BY QUADRAM

ALL ON ONE BOARD
Now you can utilize all the PC's capacity with Quadram's extremely flexible configurations. And it's totally compatible with IBM hardware, operating systems, and high level languages. It's a full-size board that can be inserted into any free system slot and it even includes a card edge guide for securely mounting the card in place.

SOFTWARE TOO!
With Quadboard you receive not only hardware but extensive software at no extra cost. Diagnostics, utilities, and Quad-RAM drive software for simulating a floppy drive in memory (a super-fast SOLID STATE DISK!) are all part of the Quadboard package.

$595
with 64K installed

PARALLEL PRINTER I/O.
A 16 pin header on Quadboard is used for inserting a short cable containing a standard DB25 connector. The connector is then mounted in the knock-out hole located in the center of the PC backplane. The parallel port can be switch disabled or addressed as Printer 1 or 2. No conflict exists with the standard parallel port on the Monochrome board. The internal cable, connector and hardware are all included.

ASYNCHRONOUS (RS232) COMMUNICATION ADAPTER.
Using the same chip as that on the IBM ASYNC board, the device is software programmable for baud rate, character, stop, and parity bits. A male DB25 connector located on the back connector is identical to that on the IBM Async Adapter. The adapter is used for connecting modems, printers (many letter quality printers require RS232), and other serial devices. Switches allow the port to be configured as COM1 or COM2 and the board fully supports IBM Communications Software.

INCREDIBLE PRICE!
Priced at $595 with 64K installed, $ with 128K, $895 with 192K and $9 with 256K.

ASK YOUR DEALER.
All products are sold through loca personal computer dealers. If you does not stock Quadram, please ask him to call us at (404) 923-6666.

QUADBOARD™

THE FIRST AND ONLY BOARD YOUR IBM PC MAY EVER NEED.

Your IBM personal computer is a very versatile piece of equipment. Perhaps more versatile than you realize. New applications and functions are being developed every day. Now with Quadboard by Quadram you can keep your options open for tomorrow's technology. Following in the tradition of Quadram Quality, four of Quadram's best selling IBM boards have been combined into one board. Your remaining slots will be left free and available to accommodate future expansion needs and uses which you may not even be able to contemplate today.

Microsoft's RAMCard™ with RAMDrive™ takes the whir, click and wait out of the IBM PC.

olid State Disk. When you add the Microsoft™ AMCard to your IBM® Personal Computer, you so add RAMDrive, which lets you use ıemory as you would normally use a isk. That gives you "disk access" ıat's typically 50X faster than isk. Without the whirring, icking and waiting of mech- ıical data access.

ast and easy. You simply esignate a portion of ıemory as "disk." RAMDrive ıkes it from there, instructing ıe program to go to RAM rather ıan disk whenever data access is eeded. The result is faster, smoother, ɔ-wait computing.

4K to 256K. You can start small, but think big. tart with 64K and add Microsoft RAMChips™ 64K blocks. Or, buy the full 256K now. Either way, ɔu get both RAM and "disk" capabilities. All in a ngle slot.

complete subsystem. The RAMCard package ɔmes complete with the memory board (64K, 128K, 192K or 256K), documentation, a diskette which adds RAMDrive and, a full one year warranty.

More tools for IBM. Microsoft wrote PC-DOS, the standard operating system for the IBM Personal Computer. And Microsoft is first in providing a full range of languages, applications programs and utilities for the IBM PC. The addition of RAMCard with RAMDrive is our way of saying that Microsoft will continue to offer more and better supported tools for the IBM PC.

See for yourself. Ask your Microsoft or IBM PC dealer for a demonstration of both main memory and disk features of the Microsoft RAMCard with RAMDrive. It's solid state memory you can also use like a disk. And it takes the whir, click and wait out of the IBM PC.

WE DROVE THE COST OF DISK DRIVES WAY DOWN

Apparat continues to expand our line of IBM PC compatible products. Buy a minimum IBM system from any dealer, then look to Apparat to complete and expand it. And save about 25% over a comparable system. You will even find that we've developed some products you can't find from any other manufacturer or distributor.

IBM compatible add-in and expansion drives.

- **Single and Double sided 40 track drives.** Both drives (Tandon or CDC available) are fully supported by PC DOS version 1.1, and you can mix or match. Drives are easily installed in minutes. Single sided (160 k) – **$225** each, Double sided (320K) – **$315** each.
- **Double sided 80 track (650K) Tandon drive.** Easily installed in minutes. Requires software patch – **$435.**
- **Expansion cabinet for 3rd an 4th drives.** Any of the IBM compatible drives above are easily mounted into the matching case. Power supply and cable included – **$275.**

With 2 dual 40's internally and 2 the expansion cabinet you have over 1.2 megabytes of storage c line and supported by an unmodified PC DOS 1.1.

Copyrighted material

SO YOU CAN DRIVE YOUR IBM PC CAPABILITIES WAY UP

More savings on these add-ons.

- **Combo Card.** Adds parallel printer, RS 232 asynchronous communications and clock calendar functions. Uses only one slot and includes RS 232 cable — **$279.**
- **Clock Calendar Card.** Features seconds, minutes, hours, day of week, date, month and year. Battery backup maintains time and date even when system is turned off. Software compatible with PC DOS — **$129.**
- **Prototype Card.** 3.5 by 8 inch wirewrap area holds over 85-14 pin dips — **$29.95.**
- **64K Byte Hardware Print Spoolers.** Internal spooler comes with parallel printer adapter. External version connects easily between computer and printer. Both buffer 32 pages of print output and are user programmable — **$399.**
- **Add-On Memory Card.** Uses 64K dynamic RAM chips, with parity. All are expandable to 256K. 64K — **$299,** 128K — **$399,** 192K — **$499,** 256K — **$599.**
- **Monitors.** High quality, reliable, 12 inch green screen. NEC, 20 MHz BW — **$195,** Amdek, 18 MHz BW and anti glare — **$180.**
- **Printers.** A variety of the newest Epson, NEC and Okidata printers available. Call for prices.
- **48K Additional Ram.** 27 chips plug easily into master PC board — **$75.**
- **RGB Color Monitors.** Includes cable and modification to include 16 colors — intensity control. NEC (resolution 690 by 230) — **$995,** Amdek (560 by 240) — **$899.**
- **Prom Blaster.** Programs most 4K to 64K bit 24 PIN EPROMS. Complete with personality modules and read/write software — **$149.**
- **Apparat Game Diskette.** Includes blackjack, othello, matches and spiralgraph — **$24.95.**

Apparat will continue to develop add-on products for your IBM PC. And Apparat warrants and services all the products we sell. Call today to order any of the products listed here or to find out more information write Apparat, Inc., 4401 So. Tamarac Parkway, Denver, CO 80237, (303) 741-1778. Dealer inquiries welcome. Add color to your business with ColorBIZ®

Introducing ColorBIZ®, the color software inventory program developed exclusively for the IBM Personal Computer®. Simple; because it works, reliable because all programs are designed with extensive error checking. Each software package includes color coded manual, program, data and backup diskettes...just in case. ColorBIZ® has been developed for businesses that expect performance and flexibility, and can be applied to satisfy even the most unique business concern. Standard features in the ColorBIZ® package include:

- User's Manual color coded to business application
- Browse feature for rapid & selective scanning
- DataBase retrieval capability
- Charts & graphs to illustrate performance
- Password security to restrict access to sensitive data
- User selectable report generation
- Single key response for improved operation
- Reorder information automatically identified
- User definable soft keys for automatic input
- Provides usage & margin analysis by month & year-to-date
- Defined reports include:
 - On Order/Order Recommendation
 - Master Parts Listing
 - Inventory Analysis
 - Physical Inventory
 - Stock Status

"WHAT IF..."

Seldom is your first solution to a problem the only one, or the one that's necessarily best.

That's why our VisiCalc® program is #1 in the business: the most widely-used business program ever for the personal computer.

It's a powerful "electronic worksheet" that takes the work out of working with numbers. Whether you are working with investments, cash flow, inventory, estimates, budgets, plans—nearly anything numerical, the VisiCalc program will help you work better, smarter, faster.

And the VisiCalc program lets you take full advantage of the IBM® Personal Computer's memory expansion capability. You can create worksheets six times larger than those possible at the 64K level. So you can solve even the biggest problems with our VisiCalc program and your IBM Personal Computer.

In just seconds, the VisiCalc program can calculate and display the answers to involved problems you could have spent hours doing by hand.

Its speed and versatility make it easy for you to explore more alternatives. You can ask "What if?"... just change any number in your problem and instantly, the VisiCalc program recalculates all the numbers and displays the new results. So you can readily analyze the impact of decisions before you make them.

Ask your retail computer store salesperson for a demonstration of the VisiCalc program for your IBM Personal Computer. Discover how easy it is to take the work out of working with numbers.

Letters To PC

Setting the Record Straight

I read with great distress "PC Dealer Network: Growing or Shrinking?" in the August *PCommuniques* and would like to set the record straight.

Your report of "rumors" that IBM will not renew its dealer contract with ComputerLand when that agreement expires in August is totally inaccurate and unfounded. I am very disappointed that a responsible magazine chose to publish this unsupported speculation.

Had *PC* staff called us or ComputerLand, they would have been informed that the rumor was unfounded. IBM is quite satisfied with the customer service and support provided by ComputerLand dealers, and IBM's agreement with ComputerLand Corp. is a continuing one that does not require renewal on an annual or any other schedule.

Your readers should have the opportunity to know that the IBM Personal Computer will continue to be sold in ComputerLand stores and they need not rely on "rumors" for information.

Philip D. Estridge
IBM
Boca Raton, Florida

We regret any misunderstanding that may have arisen from this report. In the future we will be more diligent in checking reports. —D.B.

Epson Heartache

After receiving my PC, I also purchased your *PC*. For my money, your *PC* is well worth the investment.

I want to offer a tip for novices, like myself, who are about to purchase a printer. I recently purchased an Epson MX-80 with Graftrax upon the well-meaning advice of a friend who said, "It's the same as IBM's only better." Wrong.

The number of lines per page is not the same, and when I ran my IBM sample calendar program on my new printer, it looked like gibberish. Alas, after much heartburn and many phone calls it was determined that for their own printer IBM does alter Epson's programs.

Two facts relative to IBM PC and Epson printers should be brought to the novice's attention: to incorporate friction feed on the IBM printer it must be modified through hardware; an Epson printer must be modified through software to be compatible with IBM's ASCII codes above 155 on a one-to-one basis.

Being new to computers, I would have chosen the first option had I known all Epson's/IBM's are not equal.

Eugene L. Preece
Renton, Washington

Foreshadow

I'm enjoying *PC*. I especially want to thank you for the insightful comments in "Product Reports" (*PC*, June/July, 1982) concerning *WordStar* for the IBM PC. I have been using an IBM PC for word processing with *EasyWriter*, but I am disappointed with the hardware/software combination.

Obviously no single buyer can compare all the software programs for word processing. I think your magazine could do a great service by providing in-depth comparisons.

I sincerely hope that you will have the courage to rate available programs realistically. I'm looking forward to future issues of your magazine. Keep up the good work.

Lawrence Stern
Los Angeles, California

Consumer's Lament

I purchased my PC at the end of April and have not heard a word from IBM. I have received no announcements of new products, updates about products I own, nor any information supportive to the productive use of my PC. In a business in which information is of the essence, I find this lack of communication deplorable. My information sources are *PC*, *Infoworld*, other users, rumors, gossip, and downright lies. I trust IBM does not relate to the purchasers of mainframes in the same way.

I'm sure it is new for IBM to be selling directly to consumers who are not computer professionals. But it seems that the success of the PC and similar future products will hinge on doing that well. IBM has a lot to learn.

David P. Collin
Walnut Creek, California

Swimming in Brochures

Having been set on buying the ever-popular Apple microcomputer, I am glad I finally came to my senses about the IBM PC. After swimming in brochures on microcomputers, I found your magazine to be a great source on the IBM PC. Having gone cover to cover on *PC*'s third issue, I would love to have the first two issues.

Robert Yum
Wyckoff, New Jersey

Apparently, 60,000 other readers have also come to their senses over the contents of PC because we have sold every back issue and then some. It is still possible, however, to obtain a subscription beginning with our third issue (June/July). —Ed.

PC and the Holy Grail

I subscribed to *PC* because I was interested in getting a PC. But you guys are hard to

Letters To PC

take. As my wife says, "Don't sprain your wrist patting yourself on the back." The magazine is decent enough, but this attitude of "Nya, nya, I've got the only Buck Rogers ray gun on the block" is just too much. True, the PC is new and much is unexplored, but you don't have to go on like you just discovered fire.

I have a TRS-80 Mod I, and I'll be the first to admit IBM would have to blunder pretty badly to do worse than Tandy/Radio Shack. Granted, the Mod I is mature to the point of obsolescence, but hey fellas, a machine's success and ultimate power is as much a matter of serendipity as it is good original design. For all that the engineers may have planned and schemed, bugs like the division problems of PC BASIC or the sheer overweight of the Apple III still occur.

PC comes from a good family, but it's still the new kid on the block. Your deification makes the PC sound like the Holy Grail. But perhaps you're pushing its possession rather than its use. Gotta do better, guys.

Stewart Dean
Lake Hill, New York

Old Timer, New Love

As one of the first in my area to do custom programming and software development, I consider myself an old timer with the IBM PC. I am impressed with your publication. I wish IBM had done as thorough a job as you have—the machine would be much better. It's a good machine, if only the Pascal did what they told me it would do, which is why I bought it. And if only *EasyWriter* was not so hard. But to get back to the subject at hand, I am very very glad to have a magazine to go with my IBM PC. I've learned a lot, and hope to learn more. Your programs are very good, and your articles are excellent. I hope you can continue the good work, because I am learning more about my IBM PC from you than from most other sources.

Keep up the good work. I don't really see how you can improve on a nearly perfect magazine, but keep trying.

Bill
Source: TCK496

Engineer's Appeal

In reference to A. Dean Lynn's letter "No Computerese, Please" (*PC*, June/July, 1982), please also remember that the IBM PC will appeal to engineers as well as novices. It would be a shame to let the technical content of the magazine suffer at the request of the computer neophyte.

Harold H. Fink
Arnold, Maryland

We will do our best to satisfy the needs of neophytes and techies alike. —Ed.

Second-Hand Charmer

I have been considering the options for a letter-quality printer for some time now. After much thought, I opted for a reconditioned Anderson Jacobson AJ832 daisy wheel terminal for less than $1,000.

With the assistance of technical people, I designed the necessary cable to attach to the PC's serial RS-232 port. It appears there is really no such thing as a "standard" RS-232 connection. I proceeded to reconfigure the *EasyWriter* program to print to the serial port.

Much to my amazement, I actually got something to print. However, there was a problem with carriage controls (line feeds, returns, form feeds) not being accepted properly. After repeated calls to the terminal manufacturer (A]), the PC company (IBM), and my local dealer (ComputerLand), no one was able to solve the problem.

At this point I decided to try one last call to the software company (Information Unlimited). They very quickly and courteously solved the problem by understanding that the control and escape codes necessary to drive my printer were in fact closest to those on the IBM (Epson) Printer.

Now everything works like a charm.

I am writing this letter to *PC* beca
you have severely taken the *EasyWri*
software to task. I feel they deserve cr
and my heartfelt thanks for an outstand
job in supporting their product.

Robert A. Berni
Ardsley, New Y

Puzzled Purchaser

Your magazine (*PC*, June/July, 1982) i
well done and informative, yet quite p
zling. I subscribed to it because I am in
ested in purchasing a microcomputer.
However, with the exception of the ac
pages 2 and 3, none of the ads tells m
where to buy an IBM PC nor the cost
various system configurations. Many
your readers may not be owners, but p
spective owners.

Joe
Redwood Valley, Califo

*The IBM PC can be purchased from I
ComputerLand, Sears Business Cente
and other selected distributors.—Ed.*

Communication Mystery

Your magazine is the best means I ha
encountered for IBM PC owners to k
up with the many developments in P
hardware and software. I was particul
pleased to find solutions to some com
nications problems in the June/July is
The area of communications has beer
somewhat of a mystery to me. I hope
ture issues will present articles that o
line the processes and structures invol
in communications activities.

James E. Gehrm
Sacramento, Califo

The software professional's choice.

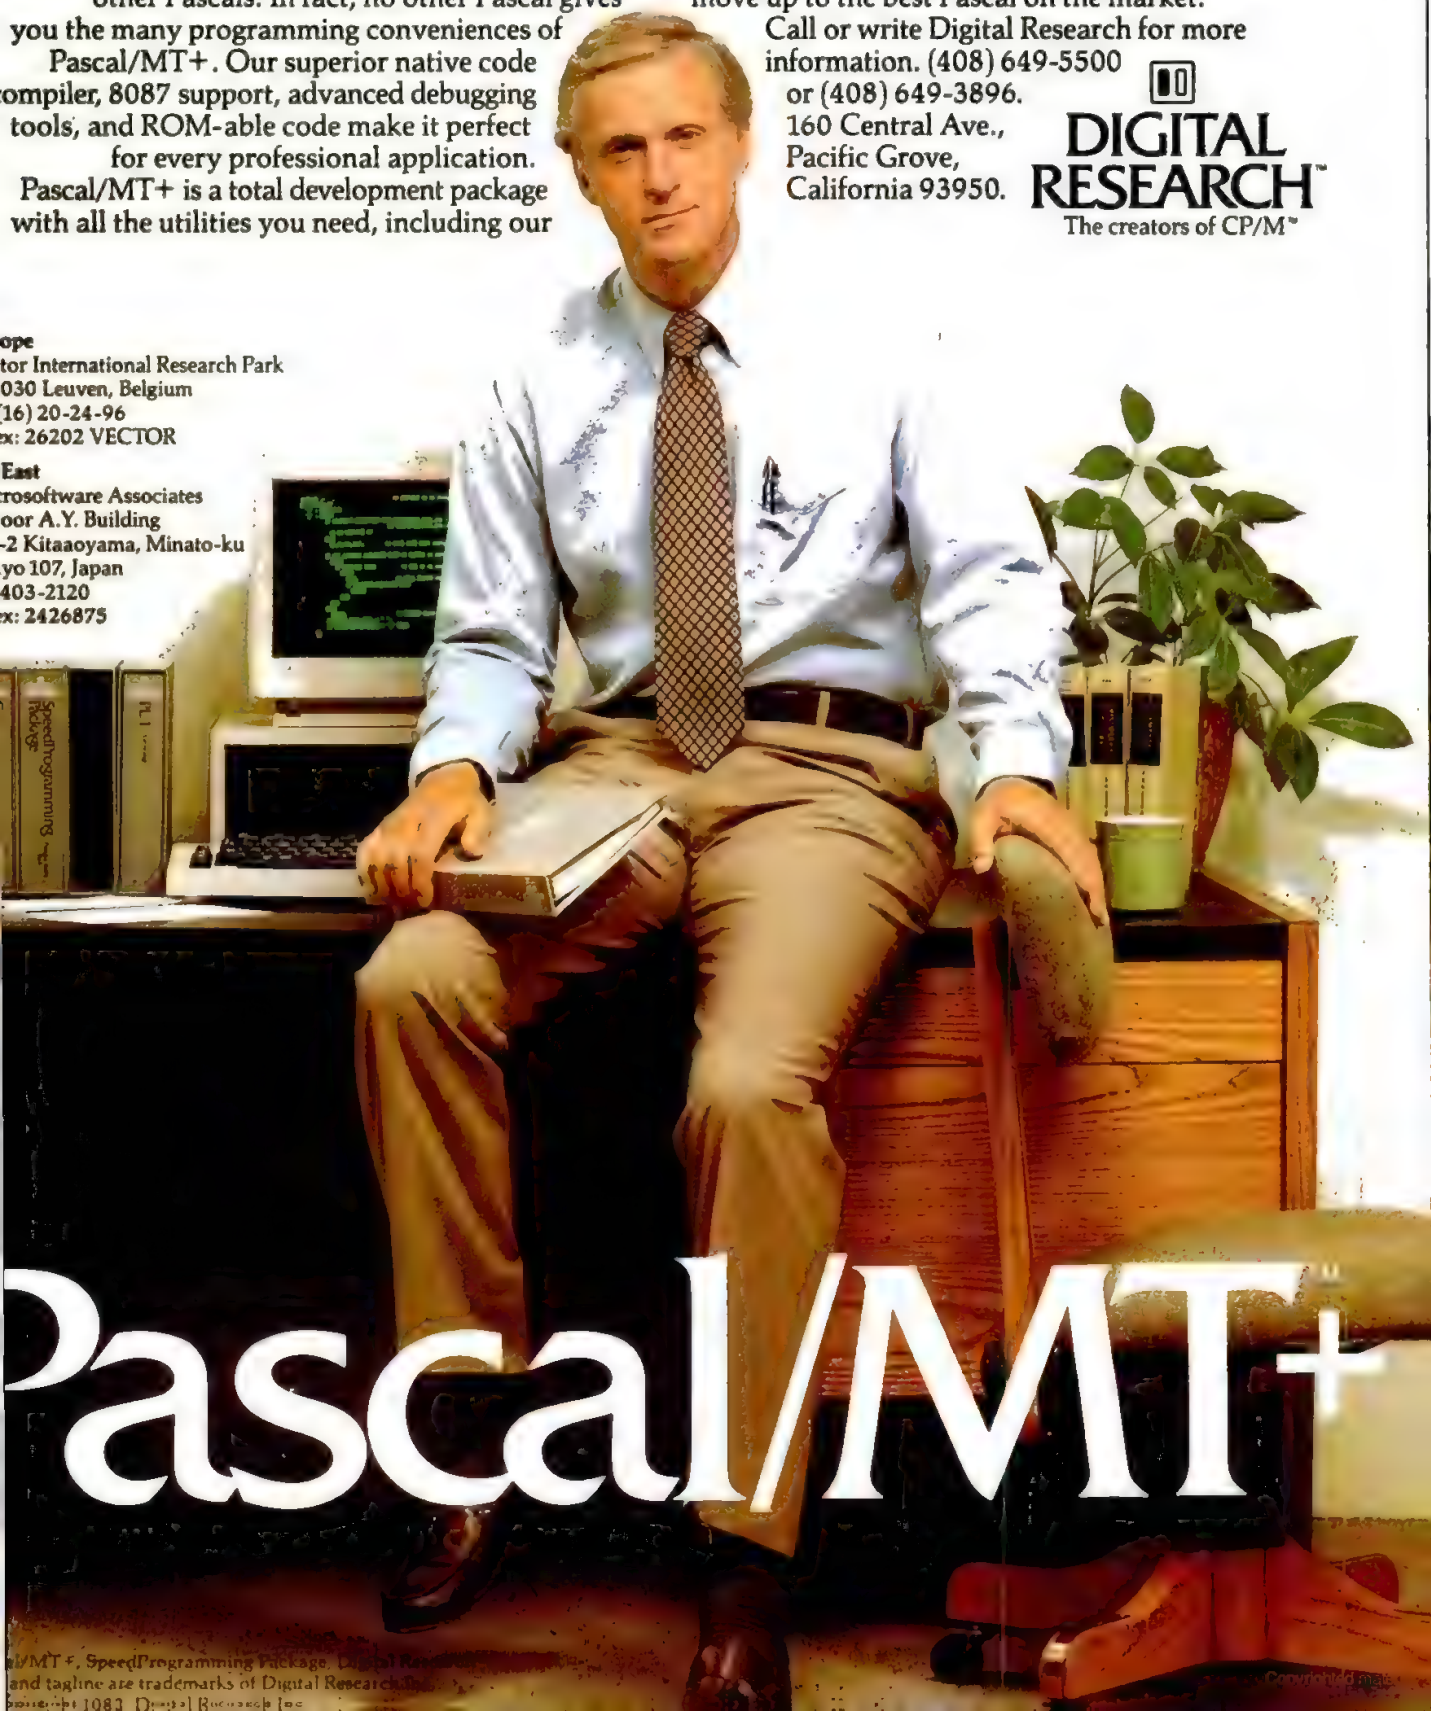

The most complete Pascal programming package is available for both 8 and 16-bit computers. Pascal/MT+ is the choice of professional software writers and hardware vendors. Pascal/MT+ is fast, versatile, and portable, plus it's easier to use than other Pascals. In fact, no other Pascal gives you the many programming conveniences of Pascal/MT+. Our superior native code compiler, 8087 support, advanced debugging tools, and ROM-able code make it perfect for every professional application. Pascal/MT+ is a total development package with all the utilities you need, including our exclusive SpeedProgramming Package.™ Pascal/MT+ is a comprehensive language package that translates directly into high-speed object code, not slow P-code. That means it's five to ten times faster than the competition's. So move up to the best Pascal on the market.

Introducing Spinnaker.
We make learning fun.

© Spinnaker Software Corp. Cambridge MA 1982

At Spinnaker Software, we make educational games that are actually fun.

Because they're fun, your children will use them. Instead of letting them collect dust in the basement.

And because your children use them, they'll be learning. And after all, isn't that what educational games are all about?

Our games are educational, because you can't kid parents.

As a parent, you're probably very concerned with how much time your kids spend playing mindless video games.

Sure, they're fun. But they don't do much more than develop reflexes and hand-eye coordination. Spinnaker games are different.

All our games have true educational value. They help develop a child's learning skills. And that's something your kids can take with them wherever they go.

Our games are fun, because you can't kid kids.

Kids like Spinnaker games for the same reasons they like roller coasters, going to the beach and ice cream sundaes.

They're fun. Lots of fun. So much fun your kids will probably forget they're learning.

Our games make the computer screen come to life. With colorful graphics, animation and sound.

And they're easy to use. In fact, a lot of our games are easy enough for kids who've never even used a computer before.

How do we make our games both educational and fun?

We're glad you asked.

Educators and game programmers write our software.

Educators, because they've been in the classroom and know how children learn. And what it takes to keep their interest.

Game programmers, because they know how to have fun with computers. These programmers give our games the high resolution graphics, animation and sound that make them so entertaining.

And right now, we're introducing four new games that can be played on the most popular computers, Apple,® Atari,® and IBM.®

First, there's FACEMAKER. It's for young computer users, kids ages 4-8. FACEMAKER helps children improve memory and concentration and provides familiarity with the computer.

Another game for young users is STORY MACHINE. This game lets children ages 5-9 write their own stories and see them acted out on the screen. STORY MACHINE helps children learn to write correctly and acquaints them with the keyboard.

Our SNOOPER TROOPS™ detective series gives your child mysteries to solve. As a Snooper Trooper, your child will have to do some daring detective work, including crawling through dark houses and talking to mysterious agents.

Designed for kids ages 10 and older, SNOOPER TROOPS helps children learn to take notes, draw maps, classify information, and develops vocabulary and reasoning skills.

All four games are available in stores today.

With Spinnaker products, you can rest easy knowing your children are spending their time wisely.

So ask your retailer about the growing line of Spinnaker games.

Because one of the smartest things parents can do is help their children learn.

SPINNAKER

We make learning fun.

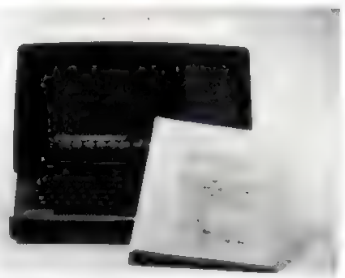

DATEBOOK II™ . . .
a computer program that makes your pencil obsolete!

Organic Software's DATEBOOK II™ designed to operate on most common microcomputers, was written for the professional office environment. It's revolutionized appointment scheduling for individuals, groups, and departments, and has made your pencil obsolete.

No longer does your secretary, receptionist or nurse need to fumble through the appointment book while your client/patient waits, and WAITS, and **WAITS.** Eliminate the lost time and frustration when you have made a prior commitment and must reschedule all those appointments.

DATEBOOK II™ will provide you with an instant display of your appointment schedule. In moments, you can search for an opening, schedule, move or cancel an appointment, or hold any appointment until it can be rescheduled. Separate schedules are available for up to 27 members of your office team. You can even schedule your appointments up to a year in advance; and, as a side benefit, you'll never forget your anniversary again.

DATEBOOK II requires 54K, CP/M and a Z80 or 8080 micro. Also available for CP/M-86, Apple Pascal and UCSD Pascal. Price is $295. Manual alone - $30.

AVID BUNNELL

When Wildly Optimistic Isn't Enough

Back in the early days of personal computing (July 1975), in my capacity as itor of *Computer Notes*, I interewed a daring young fellow, ick Heiser, who a few weeks earr had opened the world's first mputer store.

Heiser's storefront, located in a amy section of Los Angeles, was lled simply "The Computer ore." He sold the only micromputer then available, the Alr from MITS. Heiser also proded software "information" (the al thing hardly existed), and he ened his doors at night for comter hobbyist meetings.

Heiser reported that business as very brisk, that in fact it was uch better than he had ever agined. "People in this business ven't been optimistic enough," said. "I've tried to be as optistic as possible but that has rned out to be too conservative. u have to be wildly optimistic."

During the past 7 years, as I ve observed and participated in e unfolding events that shape rsonal computing, I've often ought of Heiser's pronounceent.

In the spring of 1977, for inance, when within a few days of each other, Commodore announced the PET computer, Apple announced the Apple II, and dio Shack announced the TRS-80, I remembered Heiser's rds. Overnight the hardware-hacker market created by the tair and its followers, including IMSAI and Processor Technology, was virtually wiped out and replaced by a much bigger e—the software hobbyist market.

I thought about Heiser's words again in early 1979 when *Visilc* was introduced at the West Coast Computer Faire. I knew it s going to be a hot product. Even so, I had no idea the number microcomputers would triple within the next few months, as a oing hole was blasted into the previously impenetrable smallsiness computing market.

I thought of his words again, naturally, in August 1981 when IBM announced its entry into personal computing.

When, a few weeks later, I was asked if I was interested in starting an IBM personal computing magazine, I thought of another statement I like to carry around with me. That statement, first uttered by a Russian revolutionary, was, "Seize the time, before the time seizes you."

I left my cozy editing job at McGraw-Hill and became wildly optimistic. Soon family and friends were drawn into the fray. We knew *PC* was a good idea, and we wanted to make sure we were the first IBM Personal Computer magazine published. However, as I was soon to discover, being wildly optimistic was not enough.

It was not enough when I boldly predicted that the first issue of *PC* would be 64 pages and carry 14 pages of advertising. At the time IBM had delivered only a handful of machines, so I thought it daring when I ordered 25,000 copies printed.

Being wildly optimistic was again not enough when the second issue reached 148 pages, nor was it enough when the third issue shattered the 200-page barrier. The fact that it was not enough was further evidenced when the first two issues sold out within a few days of publication. Had anyone predicted a year ago that the fifth issue of *PC* magazine would be over 400 pages, he or she would have been thought wildly optimistic or raving mad.

I TOOK THE ADVICE of Eddie Currie, who said, "Fasten your seatbelt and hang on tight."

Heiser was even more conservative than he admitted. Little did he know he was betting on a sure thing. His store grew rapidly and was soon moved to a classy shopping area of Santa Monica where it continues to prosper today (not selling Altairs, however).

I've decided to quit predicting what is going to happen. Instead of being wildly optimistic, I've decided to take the advice of friend and fellow personal computing pioneer Eddie Currie, who said, "Fasten your seatbelt and hang on tight." /PC

ZERO-BASE THINKING/JIM EDLIN

A Tale Of Two Cultures

Personal computing and Videotex: still unresolved and miles apart over the micro future.

On the morning of June 28, midtown Manhattan and Atlantic City were separated not only by the drive of about 3 hours, but by a conceptual gulf of a million miles. That day the two locales hosted the opening of two conferences, each purporting to fathom the course of your microelectronic future. The futures envisioned were polar opposites.

The Manhattan event was called the Videotex '82 International Conference. "Videotex" is a catchall word for methods of transmitting words and simple pictures from central computers to receiving devices—terminals—in homes, schools, and offices. The two main alternatives are transmitting the information via broadcast channels, in which case it tends to be pretty much a one-way business, and via physical channels such as phone wires or TV cable, which allow the exchange to have more of the character of a dialogue.

Videotex is hot stuff right now. Everybody from AT&T to CBS to your local newspaper publisher seems to have a premonition that videotex is destined to be the big medium of the future. It has acquired an electric aura of glamor, charged by visions of big, big money for the corporation or entrepreneur who first finds the key to its successful exploitation.

The Videotex universe is populated by three entities: information providers, information utilities, and users. Information providers (IPs) are people who know something you may want to find out about; examples include newspaper publishers, the weather bureau, and department stores. Information utilities (IUs) provide an electronic newsstand where IPs can put up their infowares for browsing and possible sales. If the IUs don't have communication channels of their own, they use intermediaries, such as phone companies and broadcasters, who sell access to the connecting links. Finally there are the users—the ultimate reason for the existence of all the rest.

The conceptual gulf between the videotexers and the personal computer crowd was summed up in the disdainful tone used by Jeffery Wilkins, president of the CompuServe information utility, when he addressed a conference session with the observation that, "Most information service users so far are personal computer owners." Wilkins' palpable implication was that he hoped this obnoxious state of affairs would not last long.

Videotex is wedded to the concept of the "dumb terminal," a device that lets you view images of information stored on the electronic premises of information utilities. You ask, it shows, and that's all.

Anyone making the drive down to COMDEX, the computer dealer's exposition in Atlantic City, would have found first-hand evidence that the videotex vision of Wilkins and friends is a stillborn dinosaur. One look at that hall filled with intelligent machines at affordable prices ought to have made it obvious that those proposing to traffic in dumb terminals face a career of pushing rope.

Ironically, I counted more IBM Personal Computers on the exhibit floor of the Manhattan event than I did at its counterpart to the south. So what were all those IBM PCs doing on the Videotex exhibit floor? IBM brought 'em, mostly. IBM had more floor space than any other exhibitor at Videotex '82.

IBM was showing the PC, mated w hardware and software add-ons fr Wolfdata, Inc., as a machine for inform tion providers to format their text a graphics before shipping them off to t big computers of an information utili Naturally, IBM was also showing its Series 1 computers with videotex softwa packages already marketed in Europe, the recommended equipment for an inf mation utility's central computers.

IBM's Videotex '82 exhibit was in f substantially bigger than the compan display at COMDEX, suggesting that i portant somebodies within IBM have s not digested the significance of the p sonal computer (the capital or the sma letter version). Or perhaps IBM is just p dently hedging its bets.

It's depressing that during the week COMDEX a whole other conference people, representing an enormous amo of invested money, envisioned that likely role for personal computers in ture data communications will be at sending end. And nobody there seemed grasp what must be obvious to you w already possess PCs, that the rightful a inevitable place for PCs is at the receiv end.

COMPUVIEW GIVES YOU WHAT IBM'S MSDOS & CP/M-86 DON'T

NCREASED PRODUCTIVITY

nprove your productivity with built-in horizontal crolling (254 columns) and screen line editing, hich lets you extensively edit or re-enter any ommand line on the screen. This greatly reduces he amount of re-typing due to mis-typed or repeated ommands. It's almost like having a built-in full creen editor for every program you use. And with 5% more disk capacity you will be swapping disks lot less.

VE DON'T LOCK YOU IN

ead and write IBM CP/M-86 disks, IBM MSDOS and ther CP/M double density disks. Transfer files with P/M and CP/M-86 computers via the serial port. he screen driver faithfully emulates many popular RT terminals. And of course we're software com-atible with IBM.

WINCHESTER DISK SUPPORT

pecial versions available to support the TECMAR, eVong, Corvus and others. Or have a quad density 6 tpi double sided floppy as drive B (or C and D ex-rnally) with 782K capacity.

NO SOFTWARE SHORTAGE

lost CBASIC programs run perfectly with our P/M-86 and CBASIC-86. Even most programs com-iled with CBASIC 8080 will run with CBASIC-86. nd Pascal-MT is available too.

COMPARE COMPUVIEW WITH IBM

VEDIT

CP/M CUSTOMIZABLE FULL SCREEN EDITOR

POWERFUL & PROVEN

AN INDUSTRY STANDARD FOR PROGRAM DEVELOPMENT

VEDIT is specifically designed for program development, with powerful features not found in word processors. For CBASIC, PASCAL, 'C', Asssembler and more. Yet it has easy to use word processing too. And the unique menu driven customization adapts VEDIT to your applications and preferences, including keyboard layout.

PERFORMANCE

Exceptional speed and true 'what you see is what you get' editing of files up to one disk in length. Powerful capabilities such as text Move and Copy, complete file handling on multiple drives, printing and recovery from full disk conditions (you can delete files or change disks). Unique features include an 'Undo' key and automatic indenting for use with structured programming languages such as Pascal and 'C'. Insert a specified line range of another file anywhere in the text, and change disks while editing.

MACROS

Ten buffers can hold macro commands for repeated or complex editing operations, such as automatic search/replace on many files. Macros may be edited, saved and loaded from disk. The buffers may also hold text, allowing extensive 'cut and paste', including portions from multiple files. Initialize VEDIT with an auto-startup file.

WORD PROCESSING

Includes word wrap, adjustable margins, reformating of paragraphs, word and paragraph functions, & printing with imbedded printer control characters.

Ordering: Please specify MSDOS or CP/M-86 version
Disk and 125 page manual$150
Manual only$18
VISA and MASTERCARD
Also for IBM Displaywriter and other CP/M and CP/M-86 systems.

782K FOR YOUR IBM PC

Tandon 96 tpi double sided drive gives 782K file capacity. Fits into IBM PC as drive B or connect two externally. (Requires our CP/M-86)$450
Complete external two drive expansion with 1.5 Mbyte Call

PRODUCTS, INC.

1955 Pauline Blvd., Suite 200
Ann Arbor, Michigan ● (313) 996-1299

THE LEADING EDGE IN PRINTERS!

ONE GREAT LINE. ONE GREAT WARRANTY.

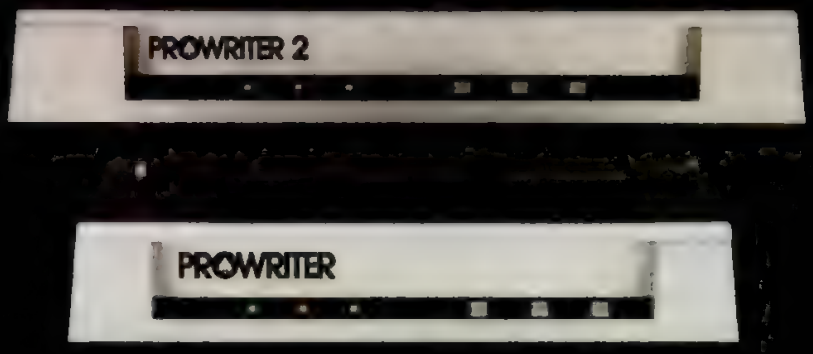

Finally, there's one full family of printers that covers every business or word processing application—all from C. Itoh, a company known for packing more product into less price; and all distributed exclusively by Leading Edge, a company known for searching out and providing that very thing. Which means that one call to one source can get you any printer, any time you need it, for any purpose. All backed by a full years' warranty from Leading Edge. (Try *that* on any other line of printers.)

THE PRO'S.

The Prowriters: business printers—and more. The "more" is a dot-matrix process with more dots. It gives you de correspondence quality copy (as opposed to business quality copy, which looks like a bad job of spray-painting)

Prowriter: 120 cps. 80 columns dot matrix compressable to 136. 10" carriage. Parallel or serial interface.

Prowriter 2: Same as Prowriter, except 15" carriage allows full 136 columns in normal print mode. Parallel or serial interface.

THE STAR.

The Starwriter F-10. In short (or more precisely, in a sleek 6" high, 30-pound unit) it gives you more of just about everything—except bulk and noise—than any other printer in its price range. It's a 40 cps letter-quali daisy-wheel with a bunch of built-in functions to simplify and speed up word processing. It plugs into almost any micro on the market, serial or parallel.

THE MASTER.

The Printmaster F-10. Does all the same good stuff as the Starwriter except, at 55 cps, the Master does it faster

Distributed Exclusively by Leading Edge Products, Inc., 225 Turnpike Street, Canton, Massachusetts 02021. Call: toll-free 1-800-343-6833; or in Massachusetts call collect (617) 828-8150. Telex 951-624.

REMEMBER:

"NEVER FORGETS."

MORE THAN JUST ANOTHER PRETTY FACE.

Says who? Says ANSI.

Specifically, subcommittee X3B8 of the American National Standards Institute (ANSI) says so. The fact is all Elephant™ floppies meet or exceed the specs required to meet or exceed all their standards.

But just who is "subcommittee X3B8" to issue such pronouncements?

They're a group of people representing a large, well-balanced cross section of disciplines—from academia, government agencies, and the computer industry. People from places like IBM, Hewlett-Packard, 3M, Lawrence Livermore Labs, The U.S. Department of Defense, Honeywell and The Association of Computer Programmers and Analysts. In short, it's a bunch of high-caliber nitpickers whose mission, it seems, in order to make better disks for consumers, is also to make life miserable for everyone in the disk-making business.

How? By gathering together periodically (often, one suspects, under the full moon) to concoct more and more rules to increase the quality of flexible disks. Their most recent rule book runs over 20 single-spaced pages—listing, and insisting upon—hundreds upon hundreds of standards a disk must meet in order to be blessed by ANSI. (And thereby be taken seriously by people who take disks seriously.)

In fact, if you'd like a copy of this formidable document, for free, just let us know and we'll send you one. Because once you know what it takes to make an Elephant for ANSI . . .

We think you'll want us to make some Elephants for you.

ELEPHANT.™ HEAVY DUTY DISKS.

For a free poster-size portrait of our powerful pachyderm, please write us.

Only the Context MBA Totally Integrates Modeling,
Word Processing, Database and Graphics in One Program.

_____ **TRUE** _____ **FALSE**

Context
Management Software
for Personal Computers

23864 Hawthorne Boulevard
Torrance, CA 90505
(213) 378-8277
Telex 181149 WEST LSA

SOURCE ID TCA 442

The Context MBA turns second generation personal computers like the IBM into powerful management tools. Information entered in any of the C-MBA's four contexts can be used in any other context. Build a model using C-MBA's sophisticated electronic spread sheet. Switch into database context by pressing three keys to quickly sort your model. When one picture is worth a thousand words (or numbers), a few keystrokes produce one of nine different graphs. Change your numbers and your graphs automatically update as well.

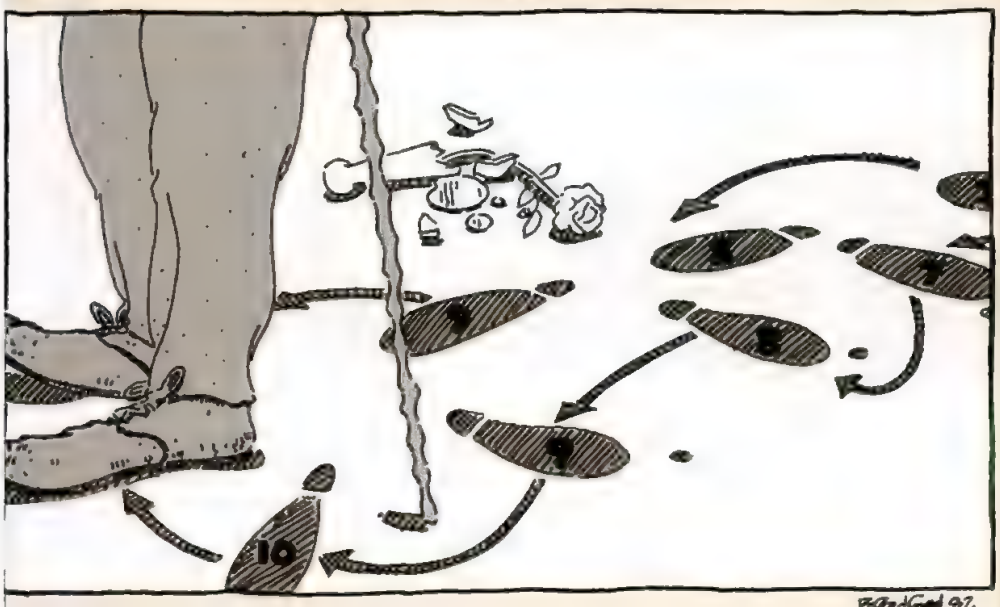

The word processing context helps you write clear, concise reports. And you can copy in entire tables of numbers from your spreadsheet in seconds.

The Context MBA is far more than four integrated programs. It is a whole new concept in management software.

Personal computers are full of promise. Context makes them deliver. ©Copyright 1982 Context Management Systems

PCommuniques

A compendium of secrets new and old: The IBM scam, keyboard errors (who's in command now?), and rumors that the 8088 will become obsolete.

Care to Dance, Anyone?

In its widely shown television commercials, IBM has revived a favorite American character and his distinctive mode of movement. Clearly the PC purveyors (including this magazine with its June/July cover) were not the first to capitalize on old Charlie's style. It seems that William A. Downs and Roy Barton worked up a catchy little song called the "Charlie Chaplin Walk" way back in 1915, creating an instant stir in fox trot circles (or fox trot squares, to be more precise). Maybe Kim Carnes should do some reviving too, and record this song as a follow-up to her hit, "Bette Davis Eyes." We might even hear it on the soundtrack of a PC commercial one of these days.

Will the Real Henry . . .

One exhibitor at NCC, Osborne Computer Corporation, showed off not only its products but also its new television commercials. The commercials draw a parallel between Adam Osborne, the company's founder, and auto pioneer Henry Ford. (Closing line: "You can have your computer in any color you want, as long as it's blue.")

Osborne thus becomes at least the second personal computer mogul to compare himself to the Model T's creator. Radio Shack's Lewis Kornfeld did so in newspaper ads a couple of years ago, and there is a nagging memory that at one time Steven Jobs of Apple Computer also measured himself publicly for ol' Henry's shoes. (Since Osborne's machine has been described as the Volkswagen of personal computers, we wonder why he didn't pick Dr. Porsche, the VW's designer, as a role model instead. Porsche, after all, went on to do some much zoomier designs.)

It's probably still too early to determine which, if any, personal computer entrepreneur ultimately will be recognized as the Micro Age's answer to Henry Ford. We are willing to wager that the role won't go to anyone for his or her role in creating the IBM PC.

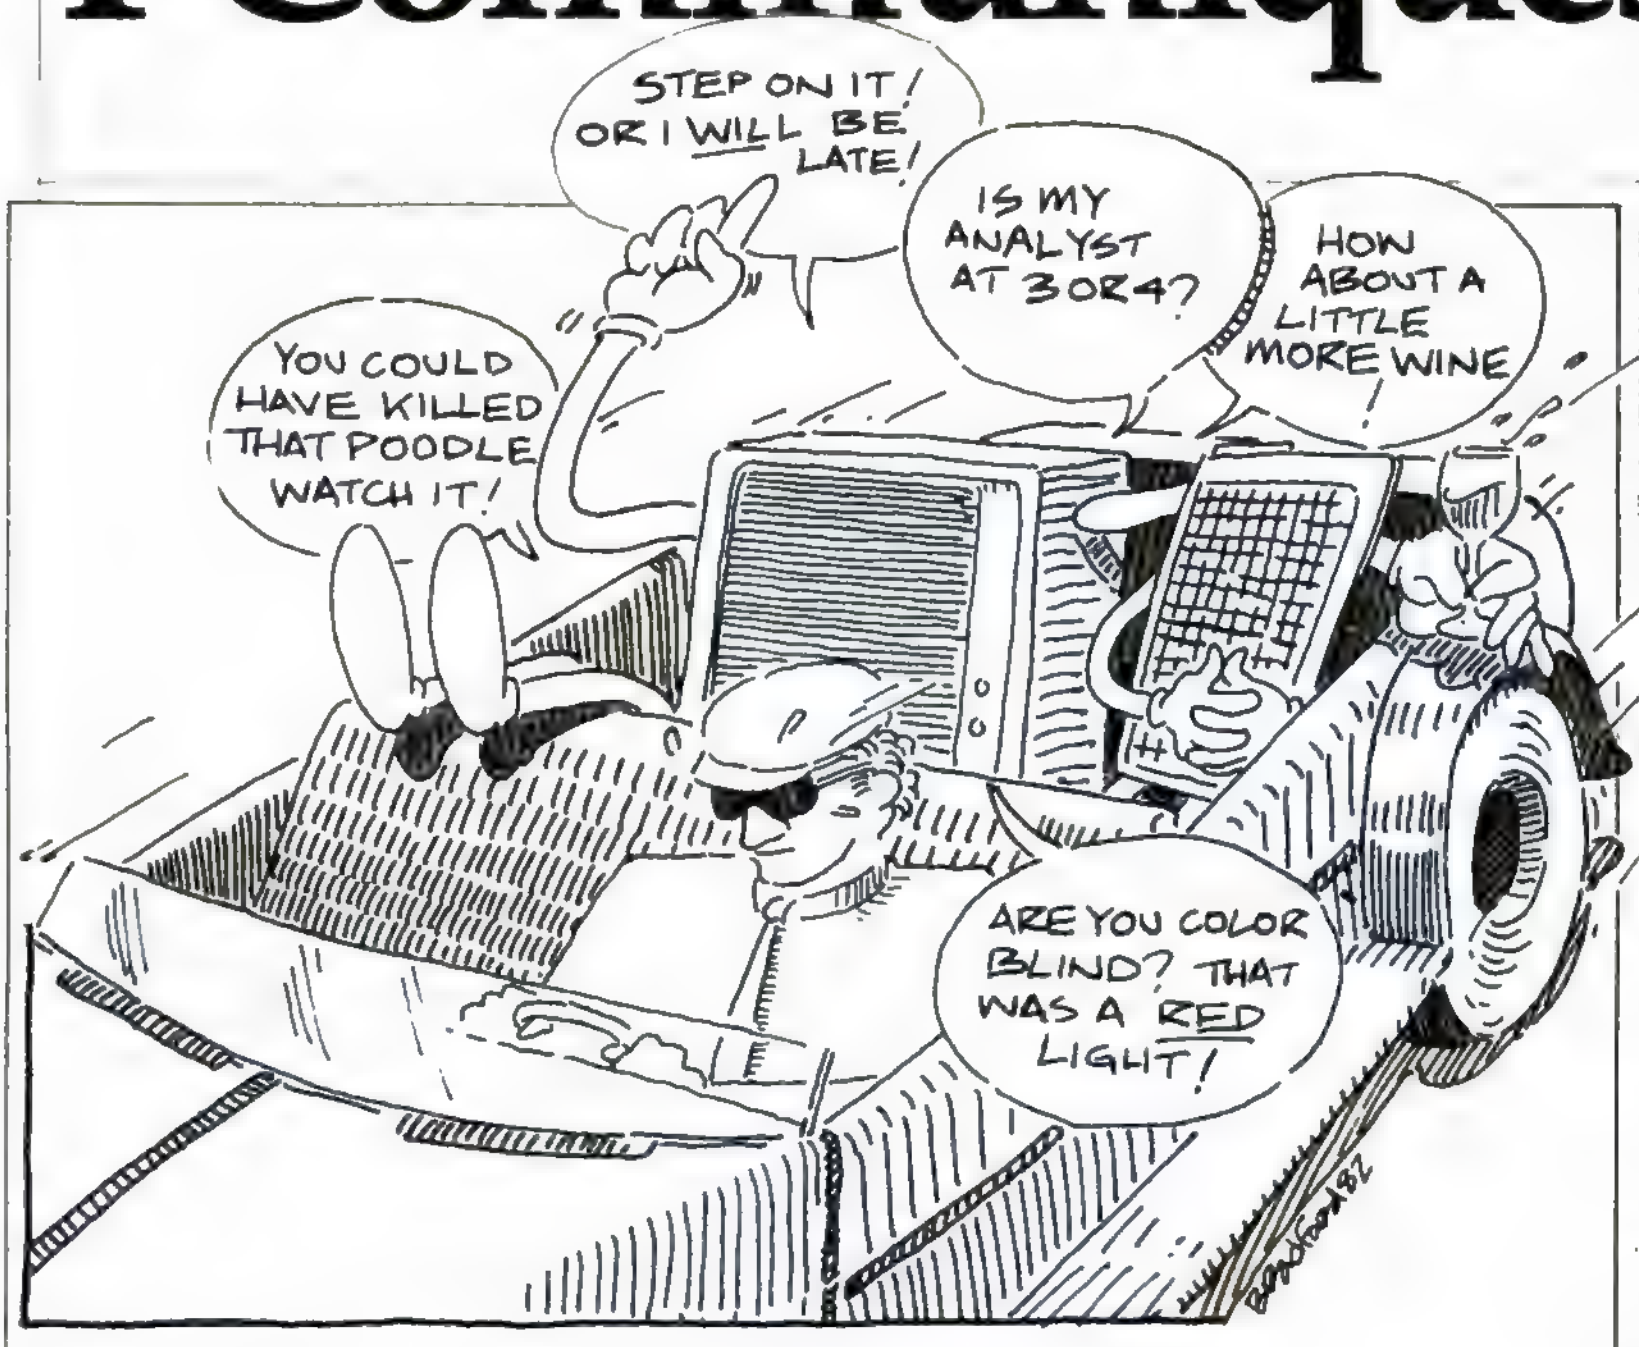

In computer lingo this process of deciding which elements in one set of things correspond to which elements in another set (e.g. that the Osborne is to computers what the VW is to cars, and that the sleek, $8,100 Grid Compass is like a Porsche) is called "mapping." The way we map personal computers over to autos, the PC is definitely an Oldsmobile.

New Profession

According to many observers, the United States is changing from an industrial economy into an "information economy." On the plane back from the NCC, a *PCommuniques* correspondent ran across a good title for the professionals who'll design the structures of that new economy. The plane was abuzz with computer talk, and our correspondent inquired of the next seat's occupant if he too were in "the business." Indeed he was. The ensuing conversation revealed that the gentleman, Tom Gilb, was in fact an author, lecturer, and consultant on computers—a 20-year veteran of the business. But none of those words appeared on the business card he produced. The card read simply, "Tom Gilb: Infotect." Gilb says he invented the term. We don't know exactly what it means, but it has an interesting ring to it.

PCommuniques

Uncommon Operating System

Ersatz Enterprises has unleashed its new operating system, which will be exclusively for the PC. This unique product, named the Spoof Operating System (SOS for short), has the sole purpose of adding clarity to the instructions and error messages that have confused and confounded micro users for years. Even though PC-DOS is better than other widely used operating systems in this regard, the Ersatz folks saw room for further improvement. Instead of responding with the lackluster "Bad command or file name" when it receives some unrecognized input, for example, SOS fights back with messages such as, "Are you serious?"

Although *PC* has not yet received the actual Spoof Operating System on disk (an Ersatz spokesperson phoned to say it had inadvertently been left out of the package shipped to us), the documentation notes that SOS divides errors into four categories: Inconsequential Errors (indicating commands that the computer will perform but doesn't appreciate), Boring Errors (those that show a lack of judgment by the operator), Grievous Errors (to let users know they've really messed up), and Apoplectic Errors (meaning that if it were human, the computer would be having a stroke). A sampling of these on-screen greetings includes "Loss of interest" (Boring Error #6); "Your typing leaves a great deal to the imagination" and "Last time our circuits were consulted we had no imagination" (Grievous Errors #3 and #4); and "It's all over now Baby Blue" (Apoplectic Error #BD).

When asked to comment on this new product, the Ersatz representative said, "Our goal is to put the fun back into computing. We believe we've created the thinking person's operating system." SOS can also be customized for special applications, and suggestions for additions to this vital new tool are welcome. An enhanced version, SOS 1.1, is in the works; it will perform certain data management tasks such as spontaneously renaming disk files, usually overnight. Ersatz also promises to publish a catalog of its products in the coming weeks, to include one we're dying to see—the Tongue-in-Cheek Speech Synthesizer.

Because Ersatz is in the process of moving its headquarters, send all queries and suggestions to *PCommuniques*.

80286 in the Wings

The stage has been set for an ultra-powerful descendant of the IBM PC. Intel, maker of the PC's 8088 processor chip, has announced a highly souped-up version in the same family, the 80286. (Intel really prefers to call it the iAPX286 but refers to it both ways.)

With a lot of clever tweaking Intel engineers have made the 80286 capable of doing five or six times as much computing as the PC's 8088 chip in the same amount of time. The 80286 can also work with a much larger complement of memory than the 8088—16 times as much, in fact (which is the same multiple by which the 8088's maximum memory exceeds that of the earlier 8088 chip). Here's the good news: Unlike the case of software for the 8080 chip, which must be reworked significantly to run on the 8088, your PC software will be just about completely compatible with the new 80286. This won't work in reverse; programs written for the 80286 may not work on the earlier chips, but programs for the 8086 and 8088 chips will work on the new one with little

> ***"Operations people wear socks with holes; programmers wear mismatched socks; systems analysts are lucky if they manage to get to work with one sock."***
>
> — Anonymous computer operations director of a major bank

or no change.

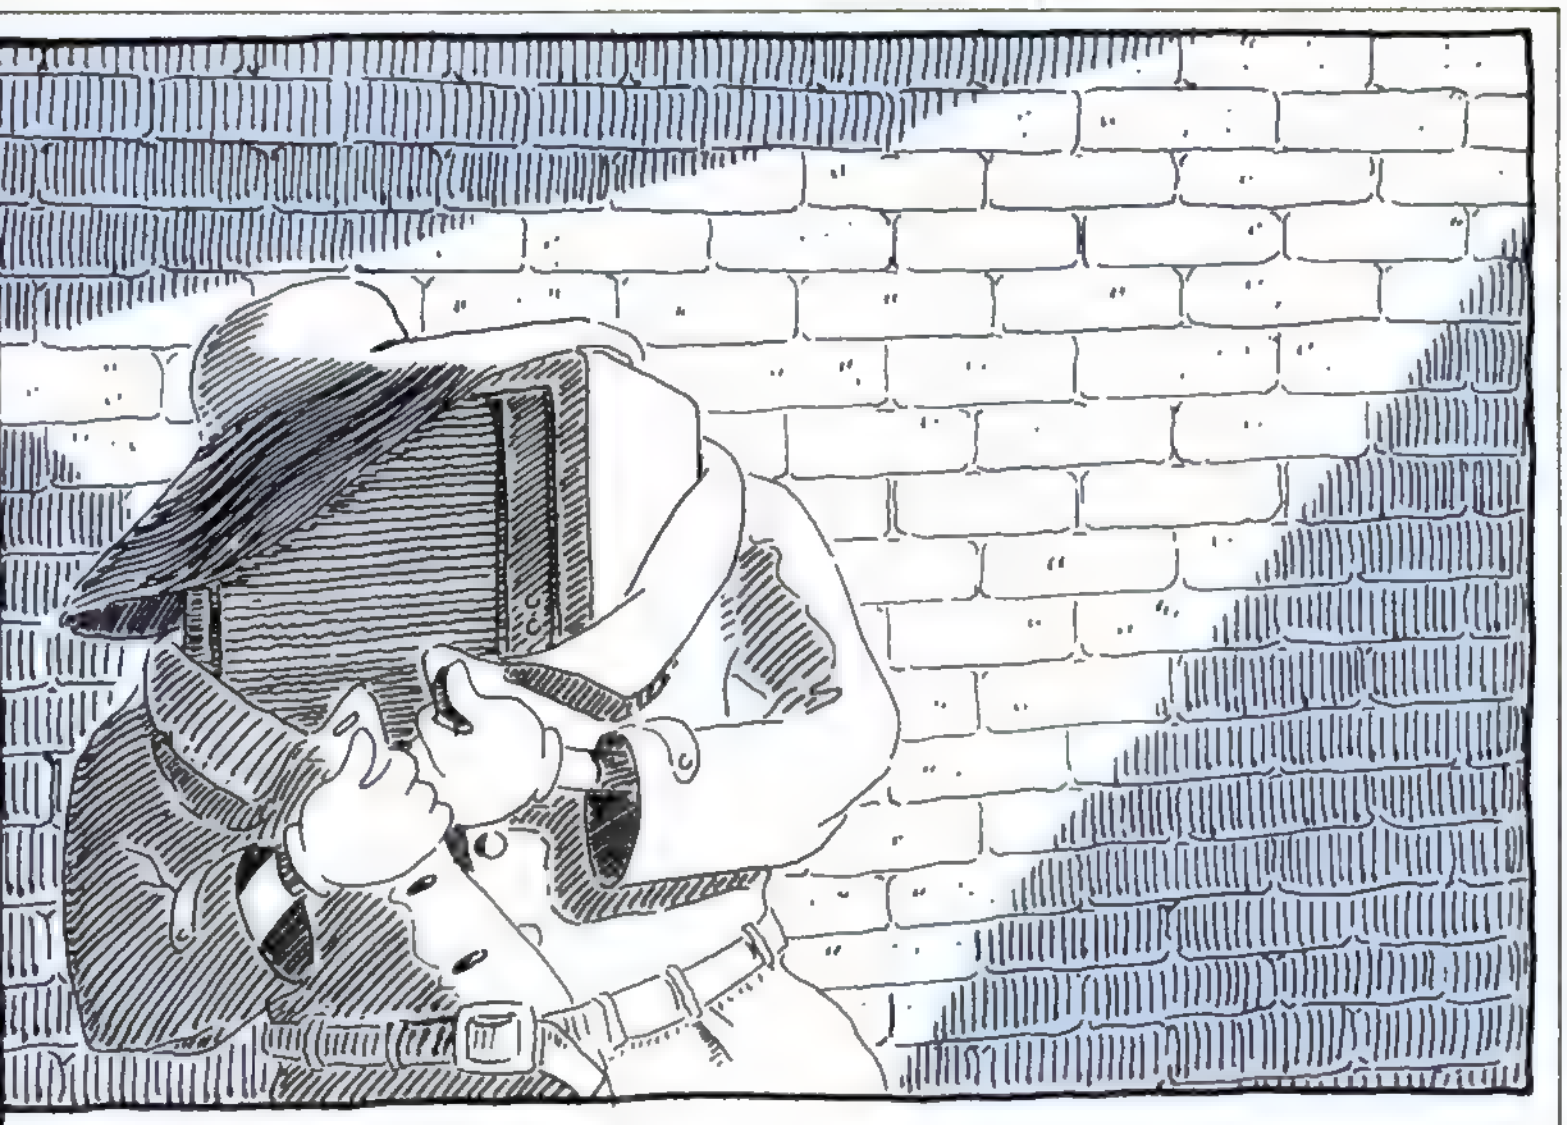

Intel says it will begin shipping samples of the 80286 to interested buyers in the fall. They'll be $237 apiece at first, if you're willing to buy them 100 at a time (or go in with 99 friends). Knowing the fast response of folks who build plug-in devices for the PC, we wouldn't be surprised to see someone advertising an 80286-based gizmo in these pages before Christmas. The Tecmar people probably have someone camped out in line already.

Disk Drive Ditties

Some fascinating speculation, rumors, and related developments have surfaced regarding disk drives for the PC. One well-placed source has told *PCommuniques* that IBM has added another supplier of disk drives to its roster. According to our reporter, Micropolis will be producing some 500,000 drives (whether single- or double-headed we haven't discerned) for factory installation in PCs.

This half-million is in addition to the half-million already on order from Tandon, the original disk drive supplier, which is producing drives at the limits of its capacity and could not promise to double its output to meet the demand for PCs. Our source also reports that IBM anticipates orders for 750,000 PCs by late 1983.

On the issue of compatibility among different brands of computers, Osborne seems to have made a wise move in designing and upgrading its disk drives to double density. In addition to increasing the storage capacity of each disk, the new Osborne drives will reportedly be totally compatible with PC disks so PC users can utilize data from Osborne disks. (The question of operating system compatibility is a bit more cloudy, but the wizard users of these two computers will undoubtedly find a solution to this problem.)

Always a Local Angle

The IBM-Hitachi-Mitsubishi stolen secrets case grabbed the national headlines for a few weeks, and some industry observers predict many more such operations will come to light. Although the Japanese computer firms concentrated their cash and circuitous contacts on the large computers in this case, the PC was included in the coverage, at least by implication. On the day the case broke, "CBS Evening News" showed workers assembling computers at an IBM production plant, and guess which computer they showed: our humble PC. (All the big stuff was too secret to photograph.) It's probably just a coincidence that Hitachi has introduced a PC-compatible machine.

PCommuniques Pays

Do you have news, gossip, or unusual computer tales for *PCommuniques*? We will pay up to $50 for each submission used. You must include your name, address, and telephone number with the item. We will preserve your anonymity if you wish. All submissions become the property of *PC* and are subject to editing. Our *User-to-User* section also publishes and pays for readers' submissions; it features tips, problem solutions, and short programs or routines. Please address submission to the appropriate department—*PCommuniques* or *User-to-User*—*PC* magazine, 1528 Irving St., San Francisco, CA 94122.

IBM PC Users

We can save you money if you give us a chance.

Plug-in to mainframe power, performance, and multi-user capability. Corvus Omninet™ — the standard in local area networks — and Winchester mass storage supply the missing elements that personal computers need to become intelligent work stations in versatile distributed-resource networks.

Corvus Omninet links up to 64 of the most popular microcomputers over distances up to 4,000 feet at speeds of 1 million bits per second. Omninet provides a total networking solution with proven Constellation software: multi-user access, security, spooling to common printers, intercommunication, and sharing up to 80 million bytes of Corvus mass storage.

Thousands of Corvus network and mass storage systems are solving problems worldwide in installations ranging from Fortune 500 companies to the smallest businesses, professional offices, and educational institutions.

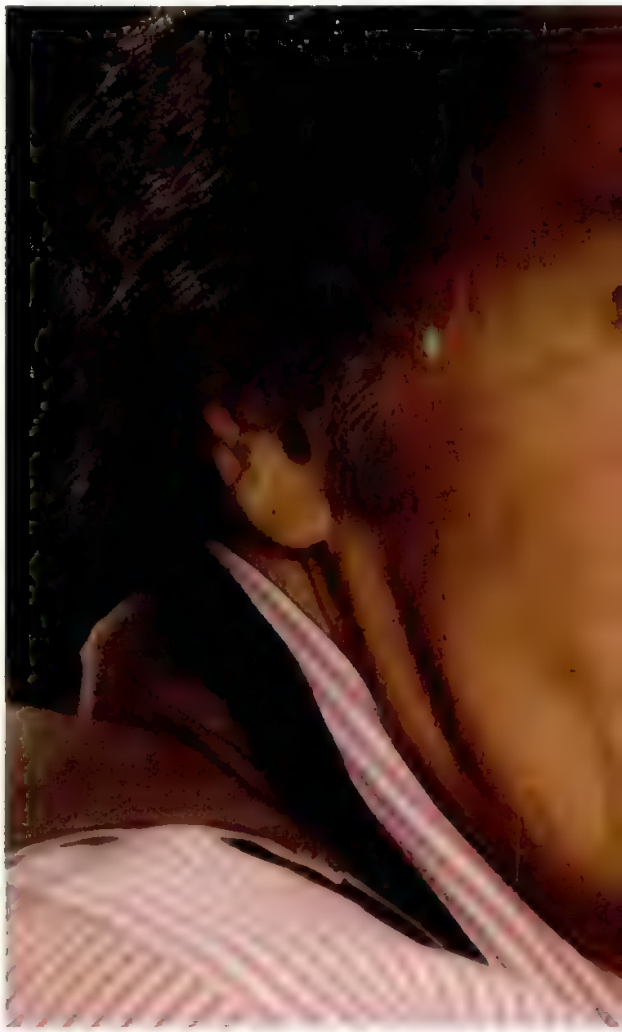

Make the Corvus connection now at your local Corvus dealer.

CORVUS SYSTEMS

THE CORVUS CONNECTION

Networks and mass storage to transform your personal computers into powerful multi-user systems.

How to ma
work like

First, neatly cut out the "370" label.

Now, when nobody's looking, nonchalantly tape it to your terminal, just under the "IBM," as if it really belonged there.

Then wait for your chance and quickly slip a dBASE II™ disk into your main drive.

That's it.

Your IBM Personal Computer is now ready to run a relational database system, the kind that IBM put on their mainframes last year.

And you're ready with more data handling power than you would have dreamed possible before dBASE II.

You'll wonder how you managed without it.

You'll find that dBASE II, because it's a relational database management system (DBMS), starts where file handling programs leave off.

dBASE II handles multiple databases and simplifies everything from accounting to department staffing to monitoring rainfall on the Upper Volta.

With a word or two, you CREATE databases, APPEND new data instantly, UPDATE, MODIFY and REPLACE fields, records and entire databases. Organize months worth of data in minutes with the built-in REPORT. Do subfield and multi-field searches, then DISPLAY some or all of the data for any condition you want to apply.

And you've just begun to tap the power of dBASE II.

Easy to look at, easy to use.

Input screens and output forms couldn't be easier—just "paint" your format on the CRT and what you see is what you'll get.

You can do automatic calculations on fields, records and databases, accurate to 10 digi

And you can use dBASE II interactively for answers right now. Or save your instructions, then repeat everything with two words: DO Manhours, DO ProjectX, DO whatever has to be done.

Use dBASE II to help make your choice:

If you've got a 96k IBM PC, send us $700 and we'll send you a copy of dBASE II to use free for 30 days.

your micro nainframe.

Instead of just poring over a manual, run and make sure that it does what you need done.

Then if you find it isn't right for you, nd it back and we'll return your money, no estions asked.

But if you do that, you'll have to remove at label. Because nothing short of a mainframe orks like dBASE II.

Call (213) 204-5570 today or drop by ur local computer store for the rest of the story.

Ashton-Tate, 9929 Jefferson Blvd., lver City, CA 90230.

TECMAR'S TRIUMPH: A Decade of Success

A candid interview with Tecmar's founder, inventor, and president, Marty Alpert, that reveals an unusual perspective on the future of personal computer hardware for home and scientific use.

Marty Alpert's initial idea was to market a single component, but after 8 years that single project has grown to become Tecmar, Inc., one of the leading manufacturers of hardware products for the IBM PC.

Alpert is founder and president of Tecmar. The company was incorporated in 1972 to manufacture the pulmonary medical equipment Alpert designed while he was in medical school. Certain components of his invention were then unavailable, so Alpert and his team began designing and manufacturing the parts themselves and eventually marketed them to the general public.

By 1981 Alpert's corporation had released 20 new products for the PC. Today that number has increased to over 30. He predicts another 20 new products will be on the market within a year.

Most surprising about the explosion of Tecmar's personal computer line is that Alpert's original goal was to manufacture only medical products and maintain a stronghold as a medical practitioner. This diversification encouraged the development of products such as PC-Talker, a speech synthesizer, and Video Van Gogh, which allows the IBM PC to input video information from a TV camera. Products for the blind and the computers implemented in electrocardiograms are other possibilities. PC Publisher and Editor-in-Chief David Bunnell interviewed Alpert at Tecmar's industry headquarters in Cleveland, Ohio.

PC: What are some of your thoughts about the impact and significance of the IBM Personal Computer?

Alpert: It is becoming the computer of the decade. In one form or another it's going to be the machine most people rely on for their computing needs. Although it's not the most powerful system around, it has all the power needed for the software developed during this decade.

PC: In what specific areas do you see the

Photograph: Jacqueline Poitier, Hand Tinting: Alica Lager

ALTHOUGH it's not the most powerful system around, it has all the power needed for the software developed during this decade.

PC moving? Is it a business computer?

Alpert: It was initially considered a business computer; clearly that's a very impressive and large market. However, one of the most surprising things is that the scientific market is also very significant—much larger than we had anticipated. And the home market has been smaller.

PC: What are some of the ways the PC is being used in the scientific-industrial market?

Alpert: The IBM PC is being used in cardiology, in fluid and aerospace research, and in process control applications for industrial environments. It's not one specific application that makes the PC significant. It's versatile enough to be used effectively in numerous applications.

PC: How would you use the PC in cardiology?

Alpert: For electrocardiograms; it's powerful enough to read them and do analysis.

PC: Would the PC be more accurate than a physician and do the job more quickly?

Alpert: Yes; the results would be more representative and repeatable.

PC: At the time of this interview your company, Tecmar, has developed an incredible number of hardware products for the IBM PC.

Alpert: Thirty-two, and we will have 52 products a year from when we announced the first [November 1981].

PC: You're introducing one product a week?

Alpert: Yes.

PC: Can you tell us about some of Tecmar's most recent products?

Alpert: We've just announced 8-inch diskette drives for the PC. We are also announcing a multiple-function card with memory, time of day with battery backup, serial and parallel I/O, as well as an encryption code designed for the banking industry. It processes the code and gives back a code. It is both the knowledge of the input and the way it's going to get processed that you have to know. It's fairly tight from that standpoint and can be used to protect software as well. Another product is a cabinet that takes the PC main unit off the desk.

PC: Does it hold both the PC unit and the Tecmar expansion cabinet?

Alpert: Yes.

PC: What is the significance of the 8-inc disk drive?

Alpert: It's important for three reasor The only industry standard for diskettes the 8-inch single-density standard, so yo will now be able to read and write ther It's an effective backup to Wincheste and is very fast. And because it stores 2 megabytes in a removable media form, substitutes as the primary storage devi on a lot of applications that previous needed the Winchester.

PC: What about future products?

Alpert: One of the more exciting produc we've begun talking about is a 68000 alte nate microprocessor board for the PC. will allow the PC to run all the 68000 so ware that's becoming available. And will give the PC a full 16 megabytes address space. You will be able to run th 8088 processor simultaneously with th 68000.

PC: What is the ultimate PC, the most s per PC you can imagine?

Alpert: For today's technology it would l 68000-based with removal media Wi chester and very high-resolution col graphics, probably based on the NEC-72 chip and even allowing multiple users.

PC: Why would someone do that with IBM when he or she could buy a 680 machine from another vendor?

Alpert: I think that even with the alterna processor board it will be cost effective buy the IBM PC, because you have all th software available for the PC and all th hardware additions that are on the PC b are not available on any other system.

PC: What are some other upcoming pro ucts?

Alpert: Voice input is another area we' very interested in and will be including later projects. It will be able to handle b tween 40 and 100 words of voice recogn tion and will be somewhat user depe dent. A training session will be involve but I think it will be very effective fro that standpoint. You will be able to u voice input for a tremendous number medical and industrial applications f on-line production.

PC: What would be some of the medic

GROWN-UP GAMEWARE™

You write it. We sell it.

At Intelligent Statements,™ we sell the kind of games you like to play on your IBM PC*.

More importantly, we sell the kind of games you like to **write** for your IBM PC. Games like **Ken Uston's Professional Blackjack**,™ advertised in this issue of PC. Games like the ones you might be developing right now.

Our game is Grown-Up Gameware.™ We publish intelligent, innovative and sophisticated games that are challenging and downright addictive. If that's your game too, you should try out for our team. Because we also play to win—with outstanding products and aggressive marketing.

There are two ways we can start a mutually profitable relationship.

First, if your gameware is in the development stage, write for our free Author's Kit. This way we can help you get your game ready for publication.

Second, if your game is past the development stage, describe it in writing or send us a disk (with your personal copyright affixed) for confidential evaluation.

We believe in rewarding creativity. On our team, you'll be a big winner.

*IBM PC is a trademark of IBM

PASCAL TOOLS

IBM PERSONAL COMPUTER

WITH SOURCE CODE

Pascal Application Development Tools is a package of Pascal tools designed for the professional user of the IBM Personal Computer. These tools are a series of routines written in IBM Pascal which provide the system developer with efficient procedures required to produce high quality, user-oriented application software.

Extended Arithmetic Procedures
- min and max functions
- exponentiation and sign functions
- pseudo random number generator

String Manipulation Routines
- string extraction and reformatting providing Basic capabilities
- general string conversion
- table translation of strings
- full date and time strings

Application Development Routines
- command line parser
- user-friendly screen handling

The total cost is only $95.00 and includes all source code, documentation which can be put in the IBM Pascal Manual, and a User Manual having comprehensive examples. Documentation and User Manual can be purchased separately for $30 00 with the cost applicable to full purchase.

IT'S NOT ONE specific application that makes the PC significant. It's versatile enough to be used effectively in numerous applications.

applications?

Alpert: Working with the blind is one such application.

PC: What about industrial applications?

Alpert: People on a production line will be able to tell the computer the status of a certain part as opposed to having to write it down or type it into a terminal.

PC: Will they be able to use it while they're using their hands for other things?

Alpert: Yes.

PC: You already have a speech synthesizer called PC-Talker. Can you tell us a little about that?

Alpert: It has two types of synthesizers on it. It has a vocabulary synthesizer, which has very good speech sound but a limited vocabulary. Initially it has only 143 words, but we left room on the board to triple that. If you can't say what you need to with the natural speech synthesizer, you can have a Votrax phonetic synthesizer, which will say anything with the basic units of sound. We also have software available that will take whatever gets typed onto the keyboard and convert it to the Votrax, so the same way you do a Control-P statement to have the printer type out anything that comes on the screen, you can use a Control-L statement to save anything that appears on the screen.

PC: What would be some of the applications for PC-Talker?

Alpert: One is a warning device for industrial applications; another is an aid to the blind. Those are the major emerging areas.

PC: What about Video Van Gogh? Can you tell us something about that?

Alpert: Yes. It does 256 x 256 pixels, horizontal and vertical. It has 256 levels of gray, which is good imaging for industrial and scientific applications for production lines. One of our video digitizers is being used in the production line for GM trucks frames to see if they have the right holes; if they do, the truck gets processed; if not it gets rejected. We've developed the visual control for the space shuttle arm. Coming up with the algorithms to determine how to move the arm around is one of our most exciting projects. And we've just gotten a second contract from NASA to do an upgraded system with the eventual goal of being able to apply it—to have it go up in the space shuttle.

PC: How did Tecmar get started?

Alpert: The company incorporated in 1977 to develop medical products. As you know I'm a physician and an engineer. We initially came up with a new idea in the pulmonary area that had to be microprocessor based. As part of the development of the medical product, we needed certain components that weren't available for microprocessors, specifically analog-to-digital and digital-to-analog converters. We developed them in a general sense, so we could use them in our medical product development and also offer them to the general market. By doing work with the 8080 microprocessor, we were in a very good position to do the products for the PC. We also developed mechanisms to create products very rapidly.

METAFILE™ transforms your PC into a higher level machine.

METAFILE™ is *the* high-level language that provides all of the software facilities a PC owner needs in one integrated architecture.

- METAFILE™ eliminates 90% of program code compared to COBOL or BASIC.
- Facilities include full word processing, text editing, animation, relational data base, electronic mail, forms directed data entry, report writing, menu handling, graphics, sound generation, spread sheet handling, interactive program testing, and all necessary utilities.
- Over 40 METAFILE™ applications are available with source code.

For more information on waking up your sleeping giant, get our detailed brochure. Better yet, order a demo version of METAFILE™ for $150. Call or write today (507) 867-4440.

INFOWORLD RAVES ABOUT PERFECT WRITER™!

Read for yourself what InfoWorld said about this incredible word processor!

"Perfect Writer would be my choice for a word processor in my home."

"Perfect Writer lives up to its name. This product appears to be a very solid piece of software. Text handling is convenient and versatile and you are given an unusually complete set of commands."

All quotes are from InfoWorld's Perfect Writer software review, by John Ford, June 14, 1982.

"'User friendly' is a trite, but true description of Perfect Writer."

"Personally, I found the full-screen text to be comfortable and in most respects superior."

"The documentation is superb..."

"I believe Perfect Writer will serve individual writers very well indeed."

"I can recommend the program as a model of clarity."

AND WE'VE GOT IT FOR JUST $249.

Perfect Writer is perfect for most CP/M computers including Apple II and III, with CP/M, and the new IBM DOS.

No wonder our phones are ringing off the hook! After InfoWorld went wild about Perfect Writer, it's become the hottest piece of software we handle.

Why? Because Perfect Writer is simply the best word processor you can buy *at any price* and 800-SOFTWARE is selling it for just $249. That's $140 off the manufacturer's suggested retail price of $389!

What's more, we are *the* Perfect Writer experts—the first dealer to stock Perfect Writer in the entire United States!

What does this mean to you? Product knowledge and support expertise you simply won't find any place else. Plus the giant inventory, fast delivery and commitment to first class service you've come to expect from 800-SOFTWARE.

But let us *prove* how good we are. Just pick up the phone and call us toll-free. We're waiting for your call.

Cross Clues™: The unique word challenge game.

It offers intellectual stimulation arcade games can't match . . . with all the excitement.

Fast-action fun isn't just for mystery or arcade games any more. *Cross Clues* is a word game that challenges more than just your reflexes. It's the new mind-challenging evolution of an old favorite, the crossword puzzle, with beat-the-clock excitement. The playing tempo is lively and challenging, but you tell the computer how fast you want to go. It signals correct answers and buzzes to tell you if your word guess is incorrect or your turn is over. You pit yourself against another player to uncover hidden words. The best combination of skill, intellect, timing and luck wins. Clues coaxed from the computer help you *and* your opponent, so suspense builds till the very end.

Cross Clues offers 50 mind-boggling puzzles that appeal to young teens through adults. Try it! You may find you've matched wits with monsters and space critters long enough.

To obtain *Cross Clues*, see your local dealer. Or send in the convenient order form below.

Available for IBM Personal Computer, 64K, disk drive, PC DOS, and Apple II, 48K disc.

PC: Which did you do first, engineering or medicine?

Alpert: I did engineering first. I got my M.S. in systems engineering and then went to medical school. We began the company while I was in medical school. I still practice, but not extensively. I'm primarily with the company.

WE'VE developed the visual control for the space shuttle arm.

PC: When you decided to go to medical school, was it your intention to develop medical products?

Alpert: Yes. I never really wanted to practice solely. Although I have a small practice now, I've had the same patients for a number of years—people I've grown close to. I have one patient who is 105 years old and another who is 99.

PC: It must be very unusual to have a medical degree and an engineering degree, although having both certainly seems very practical.

Alpert: I think it is practical. I think the practicality and the excitement of both areas is becoming more recognized, but at present the combination is still unusual.

PC: Tell us more about future medical applications for computers.

Alpert: The first application is taking care of bookkeeping and giving prescriptions. This area is very significant because 25 percent of hospital costs are for paper transfer. If a physician in a hospital wants to get a blood sample from a patient, he writes it on the chart. It gets taken off the chart by the nurse who fills out the papers. Those papers then go to the person who draws the blood and finishes filling them out. Four sets get distributed: one to the lab technicians, one to the central accounting area, one to the central distribution of paperwork, and one stays at the desk. Then the blood is transported to the lab, and a report is made. It goes to the computer room where it is retyped into the central

Introducing DataFax...the easy way to tame your Data Monster.™

If you deal with information, you're probably dealing with a Data Monster.

He's that mass of notes. Scribbled messages. Phone numbers. And all the thousand-and-one other important pieces of information you have floating around your life.

But with DataFax from Link Systems, you can keep your Data Monster under control—plus have a lot more power over your information than you ever thought possible.

Unlike most "data manager" software programs made for your **IBM PC** DataFax doesn't care what your data looks like. Or how long it is, how many items it has or what you want to do with it.

The power we've programmed into DataFax makes it as simple and natural to use as a pencil and paper. You can fill up a screen with anything you want—even information already stored on disk. Then cross-reference it as many different ways as you'd like—by a date, a species, a customer's name, whatever.

So when you need that information, DataFax will retrieve it in a way that's meaningful to you. The powerful keyword function allows you to get information out as quickly and easily as you entered it. And DataFax is the only software of its kind to let you expand from floppy to hard disks, so it will never be obsolete.

If getting so much power for so little effort seems too good to be true, send us the coupon and we'll send you all the details. Or see your **IBM PC** computer dealer and prove it to yourself—before your data situation gets any hairier.

LINK SYSTEMS™

Because whether you've gott a monster of a data problem—or just a small one—DataFax can tame it.

I want to tame my Data Monster.™

IBM is a registered trademark of IBM Corp.

Simply powerful software that links it all together

omputer, gets processed, and is then re-urned to the floor. Paper transfer costs early $100 per patient per day. The area 'm interested in is diagnostic instrumen-ation, such as our present pulmonary de-ice and the ones we are developing.

MICROPROcessors are being used to control the insulin for diabetic patients.

PC: What are some of the other ways the computer could be used as a diagnostic tool?

Alpert: In the long term, the thought process of the physician can be algorithmized for most diseases, so you can use a computer to help in the initial stages of diagnosis.

PC: What about keeping individual medical histories? For instance, if I go to a physician and he wants to know my medical history, he's not going to get a good record. I haven't been to a physician in about 5 years and that was in another city. I don't even remember his name. Could people be given some kind of memory device at an early age that the doctor and the patient could keep so that when the patient goes to another doctor the device could be updated?

Alpert: Actually, it could be just a floppy diskette. That's an interesting concept. It's not one I've considered, but it certainly is interesting. Things on a lower level are being done now, such as people with cardiac conditions carrying representative electrocardiograms. Comparing an old cardiogram to a new one is very important for determining changes.

PC: Now a question for the future. Do you think microprocessors will be implanted somewhere in the human mind, teeth, or whatever at some point in time?

Alpert: I hope not. I think only in a pathological sense—epilepsy control or controlling an arm for prosthetics. Some pioneering work is being done that is pretty far along. Microprocessors are being used to control the insulin for diabetic patients. The microprocessor device would be put on the patient's arm to give much tighter control of sugar levels. The device is presently being tested.

PC: That's amazing, but back to Tecmar. The IBM Personal Computer obviously had a big impact on Tecmar. Just how fast has it grown and what does that growth mean?

Alpert: We will probably grow at a magnitude of about ten times over last year. And we had a good year last year. We're expecting to grow four to five times that by next year.

PC: Will Tecmar go public at some point?

Alpert: That is a distinct possibility. It would make sense to continue rapid product development.

PC: You definitely intend to continue following IBM?

Alpert: Yes. Our main goal is to become the major supplier of peripherals for the IBM Personal Computer.

PC: You must have a tremendous data base about the IBM PC. Can you give us a projection on how many IBM Personal Computers will be in the field by the end of 1982?

OUR MAIN goal is to become the major supplier of peripherals for the IBM Personal Computer.

Alpert: My guess would be 250,000 to 300,000.

PC: That seems consistent with what we're hearing. What about by the end of 1983; do you have one for that?

Alpert: I think you're going to be looking at 3¼ to 3½ million.

PC: When IBM introduces a product in Europe, Japan, and England, will Tecmar follow suit?

Alpert: Absolutely, we've already begun to establish some dealers in those areas. It's a great opportunity. **/PC**

From Aspen Software

The Only Complete Document Proofreading System For CP/M®, TRS-80® and IBM-PC Word Processors

PROOFREADER™

Featuring Random House® Dictionary

- Complete Accuracy-looks up every word; does not use less accurate root word analysis, plus Random House Dictionary
- Full Interactive Correction-standard
- Instant Access to Dictionary
- Compact-Random House Dictionary supplied in sizes to fit your system (50,000 words standard)

+

GRAMMATIK™

Beyond Spelling Checking

- Detects typos, punctuation and capitalization errors, misused words and phrases
- Analyzes Writing Style
- Suggests Alternative Usages

= NO ERRORS

"The programs together (Proofreader and Grammatik) offer a dynamic tool for comprehensive editing beyond spelling corrections."
—Dona Z. Meilach in Interface Age, 5/82

"Grammatik is the perfect complement to a spelling check program."
—Dr. Alan R. Miller in Interface Age, 5/82

"If you use a word processor and a spelling checker, then you should investigate the unique capabilities of this program. Grammatik is a surprisingly fast and easy to use tool for analyzing writing style and punctuation."
—Bob Louden in InfoWorld, 12 81

"For the user who is as tight with his dollar as I, Proofreader is the program of choice."
—Stephen Kimmel in Creative Computing, 3/82

"Anyone involved with word processing in any way, whether writing manuals, letters, brochures, newscopy, reports, etc. is encouraged to get the excellent program Grammatik."
—A.A. Wicks in Computronics, 6 82

Grammatik and Proofreader are compatible with all CP/M, MS-DOS (incl IBM-PC), and TRS-80 word processors Current CP/M formats standard 8", Northstar, Omikron, Osborne, Apple Please call/or write for details of minimum system sizes and availability of additional disk and operating system formats Shipping costs included Please specify your system configuration when ordering Dealers inquiries invited

	Proofreader	Grammatik	Both

VersaText

Word Processing and Data Base in one System

Note the word System. VersaText is **MORE** than just a word processor - it is an integrated system to meet a variety of business and professional needs. Unlike some software programs that must be bought piecemeal, VersaText is **ONE** program that performs **MANY** functions. And you'll find VersaText easy to learn and easy to use. The system includes:

PCWriter - a screen editing gem

- Full cursor control
- Automatic word wrap
- Delete, insert, replace, search, and copy, done with minimal keystrokes
- On screen tutorial and helps
- Files limited only by disk space
- Uses standard DOS files

PCProcessor - a really versatile text formatter

PCBase - an easy to use data base program

- Standard data base format for names and addresses
- Define new database formats for specific needs
- Output data in custom reports or files
- Data entry, editing, deletion
- Create mailing labels
- Full mail-merge capability
- Sort or select on any field

PCGiant - creates giant letters

VersaText supports IBM, Epson, and NEC families of printers

VersaText Word Processing and Data Base System

Why look further. VersaText was written on the IBM-PC for the IBM-PC. You'll be pleased with the power of VersaText!

VersaText requires an IBM-PC with 64K BASICA and DOS.

...siness assumptions or ...e electronic spreadsheet ...for you when you use your ...ter:

SuperCalc™

The IBM Personal Computer brings new power to personal computing. Most software programs can't take advantage of that power. The SuperCalc™ program, by Sorcim, is the exception.

The reason is SuperSheet,™ which, unlike VisiCalc® and other spreadsheets, allows you to make full use of the IBM Personal Computer's expanded memory. As a result, you can make 5 year forecasts as well as detailed breakouts impossible with other programs.

Designed for business professionals who don't have a background in computer programming yet demand the most powerful electronic spreadsheet money can buy, SuperCalc™ is easy to use while answering the most complex "what if" questions.

You need change only one variable and you see instantly how that change affects your assumptions. And SuperCalc's exclusive AnswerKey™ walks you through the program by letting you stop and ask "What should I do next?"

If you own or plan to own an IBM Personal Computer, don't buy an electronic spreadsheet program without first learning about SuperCalc.™

Send me your brochure:
The Power of SuperCalc;™ which explains SuperCalc in everyday English.

MAKE ALL THOSE LONG HOURS PAY OF

Now that you've written a better program, how do you get the world to beat a path to your door?

The demand for microcomputer software is one of the greatest business opportunities of the century.

That's why you spend those long, lonely hours at your computer.

But a successful software product needs more than inspiration. It needs documentation. Testing. Advertising. And, above all, distribution.

A great author needs a great publisher.

You can't do it all yourself. That's where Max™ Software Publishing comes in.

Max packages, documents, distributes, and supports software from independent authors just like you. We know what the IBM-PC market wants so we can help tailor your product, giving it the best chance to become a "best seller."

Max is publishing programs ranging from compilers to terminal emulators to utilities to business applications to games. All professionally packaged and documented. And all targeted for commercial success.

If there's a potential best-seller in *your* program, we want to hear from you. Send a brief description of your program or idea, and enclose a stamped, self-addressed envelope so we can get back to you.

Make all those hours pay off. Take your program to the **MAX.** (And if you're an IBM-PC user just looking for a great program, write for our free software catalog. Dealer enquiries invited.)

MAX™ M
SOFTWARE PUBLISHING

MAX Software Publishing, 2334 Walsh Road, Suite D, Santa Clara, CA 95050 (408) 727-2273 A division of Willoughby Corp.

PC/FORTH

Why you should try FORTH on your IBM® Personal Computer . . .

- FORTH is interactive and conversational like BASIC
- FORTH's performance is far superior to ordinary interpreted languages, and when carefully tuned can approach the speed of equivalent assembly language programs
- FORTH's compiler includes constructs that support modular, structured programming
- FORTH is largely written in itself and is highly portable (can you imagine a BASIC interpreter written in BASIC?)
- FORTH includes a user-controlled virtual memory facility for program text and data
- FORTH permits easy user definition of new data types and control structures.

The PC/FORTH package includes the FORTH interpreter/compiler with virtual memory management, a full screen (visual) editor optomized for the PC graphic display capabilities, a true 8086 assembler with local labels, a reverse translator, debugging aids, utilities, and a 150 page manual. FORTH "screens" are stored in standard random access disk files and may coexist with other program and data files. The FORTH vocabulary has been extended to give full access to all operating system facilities including file and record management. Optional extension packages for data base management, floating point math, and advanced color graphics are also available.

Software developers: our version of the Nautilus FORTH Cross-Compiler allows you to create dedicated disk or ROM-based applications written in FORTH. "Headerless" programs may be generated which are extremely compact, efficient, and are nearly impossible to disassemble.

Current prices for PC/FORTH and extensions are given below. Shipping by UPS or first class mail within USA or Canada included. California residents add appropriate sales tax. Purchase orders accepted at our discretion. No credit card orders.

PC/FORTH (Specify CP/M-86® or PC/DOS)	$100.00
Software floating point extensions	$100.00
Intel 8087 floating point extensions	$100.00
Advanced color graphics extensions	$100.00
Data base management extensions	$200.00
Nautilus Cross Compiler (PC/FORTH also required)	$300.00

1024 x 1024 COLOR GRAPHICS

Available now - $3195

- Software selectible resolution
- 16 colors
- 80 pages text storage
- 16:1 zoom
- Pan, scroll and paging
- Light pen input
- Software selectivle characters
- 512K on board RAM
- 16K on board ROM
- TTL and RGBS output
- NEC PD 7220 GDC
- Graphics commands: line, arc, circle, rectangle, paint, DMA, graphics characters
- Character generator: 128 characters, 16 colors, cursor, blink, intensify, color background, 262,000 character storage

UPGRADABLE MONOCHROME VERSION
128K RAM, depopulated RAM locations, socketed $2

HIGH PERFORMANCE ANALOG OUTPUT OPTION
4 bit DAC gives 16 levels in each color. Meets EIA RS330 and RS
standards

ULTRA HIGH RESOLUTION MONITOR
1860 x 1400 resolution RGB, 13" screen, 40 MHZ video bandwi
35 KHZ horizontal scanning frequency $3

HIGH RESOLUTION MONITOR
960 x 720 resolution RGB, 13" screen, 24 MHZ video bandwidth
KHZ horizontal scanning frequency $1

PROFESSIONAL MULTIUSER SYSTEMS

Eight Simultaneous Users on One Database

Professional turnkey business system to reach PDP-11 performance. QUNIX multi-user/multitasking operation system. C-compiler benchmarked 400 times faster than PC DOS Basic interpreter. Basic, Fortran 77, Pascal and C compilers compatible with mainframe software. Increase number of users by plugging in additional terminals or modems:

$13,750*
EIGHT USER SYSTEM

- IBM PC system with monochrom display and keyboard
- 2 additional terminals
- 256 K memory
- 320 K diskette
- 5 megabyte internal hard disk
- 8 serial ports
- 200 cps/50cps printer
- QUNIX operating systems
- C, Basic and Fortran 77 compilers
- Screen editor
- Text formatter

$7995*
THREE USER SYSTEM

- IBM PC system with monochrome display and keyboard
- 2 additional terminals
- 128 K memory
- 2 320 K diskettes
- 3 serial ports
- 80 cps printer
- QUNIX operating system
- Screen editor
- Basic compiler

ADDITIONAL COST OPTIONS

- 6 additional terminals
- up to 1 megabyte memory
- 800 K diskette
- 20 megabyte tape drive
- 18 megabyte disk
- relational data base manager
- fianacial report writer
- integrated financial accounting package
- word processing
- specialized business packages as medical, insurance, real estate, etc
- PC DOS emulator
- 300/1200 baud auto ans/dial modem
- network interface board
- 300/600 LPM printer
- CP/M-80 software interface

Interested in the IBM Personal Computer?

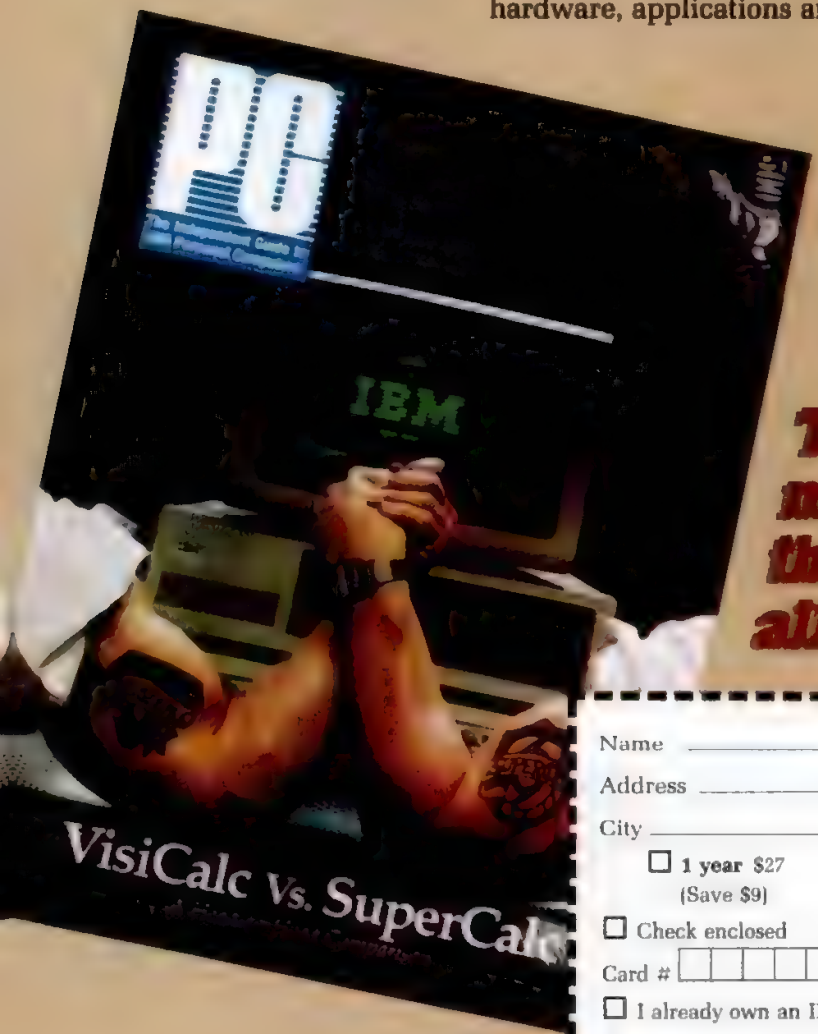

If you're interested in the IBM Personal Computer then you need PC magazine.

PC magazine is the Independent Guide to IBM Personal Computers. Each issue is packed with information for everyone interested in IBM Personal Computers.

PC magazine tells you how to put together the best IBM "PC" system and then how to get the most out of it. Each issue brings you hundreds of colorful pages of evaluations, insights, and straight talk from respected experts—professionals in computer science as well as writers, businessmen, lawyers, educators, and many others.

PC covers software, hardware, applications and most every topic of importance to the thousands of IBM Personal Computer users who read it. To ensure that we give you the information you need, PC includes a special "User-to-User" section, as well as a "PC Wish List", and news about IBM Personal Computer clubs, events and publications.

For a limited time, you can subscribe to PC at NO RISK and still receive a 25% discount off the newsstand price. Enter your subscription now. If not fully satisfied when you receive your first copy of PC, simply return your mailing label within 15 days for a full refund.

This is the magazine that tells you all about it.

TAKING THE MEASURE/LON POOLE

Under the Hood of the PC

Inside the unpretentious piece of desk-top furniture you own is a world of new information. A clear view of the fundamental components and circuitry will be an invaluable aid when repairing or adapting your system.

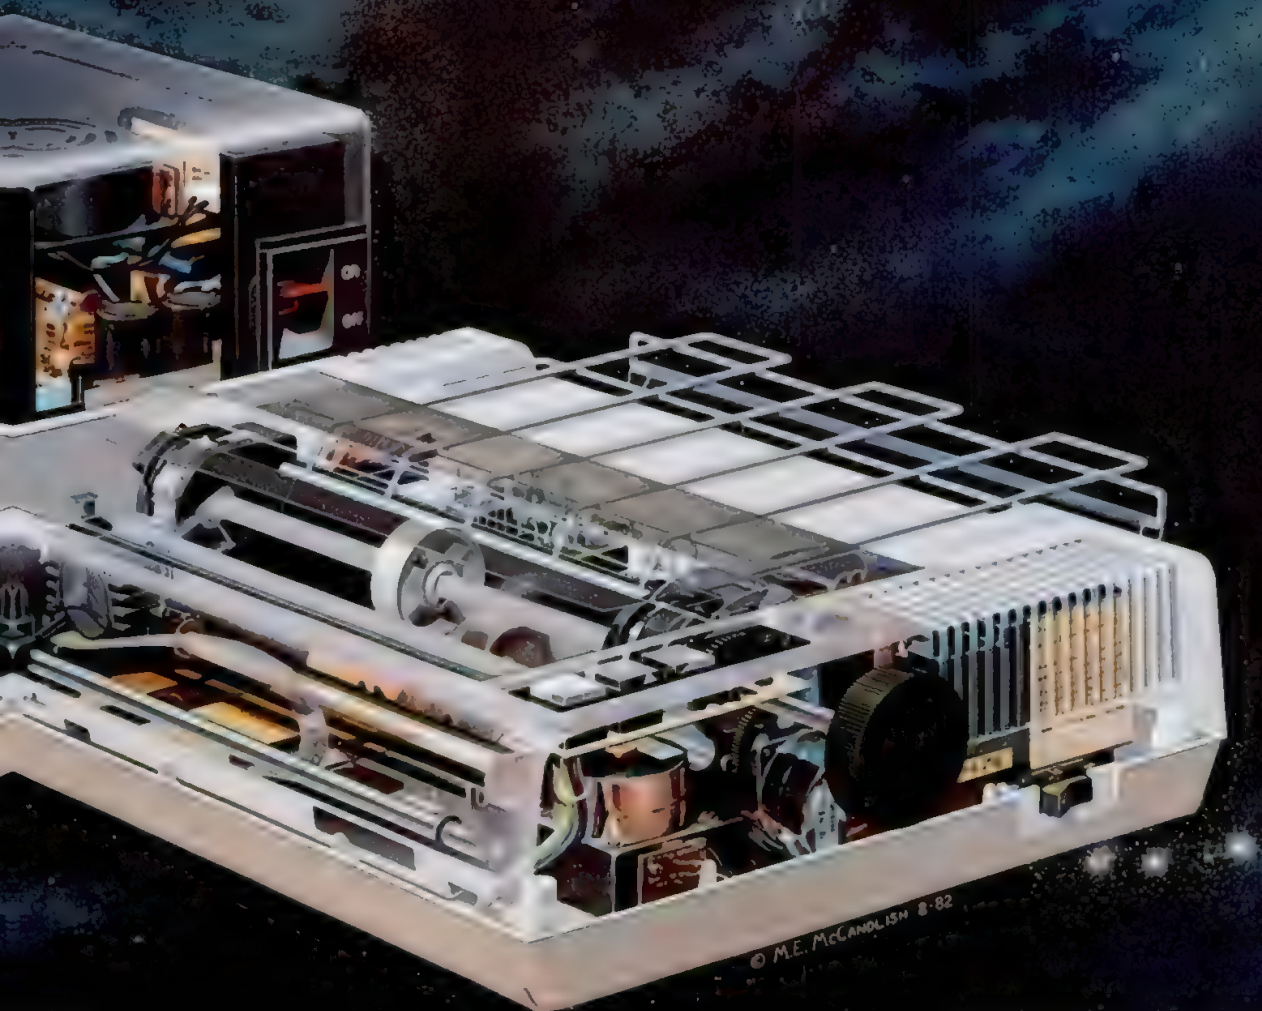

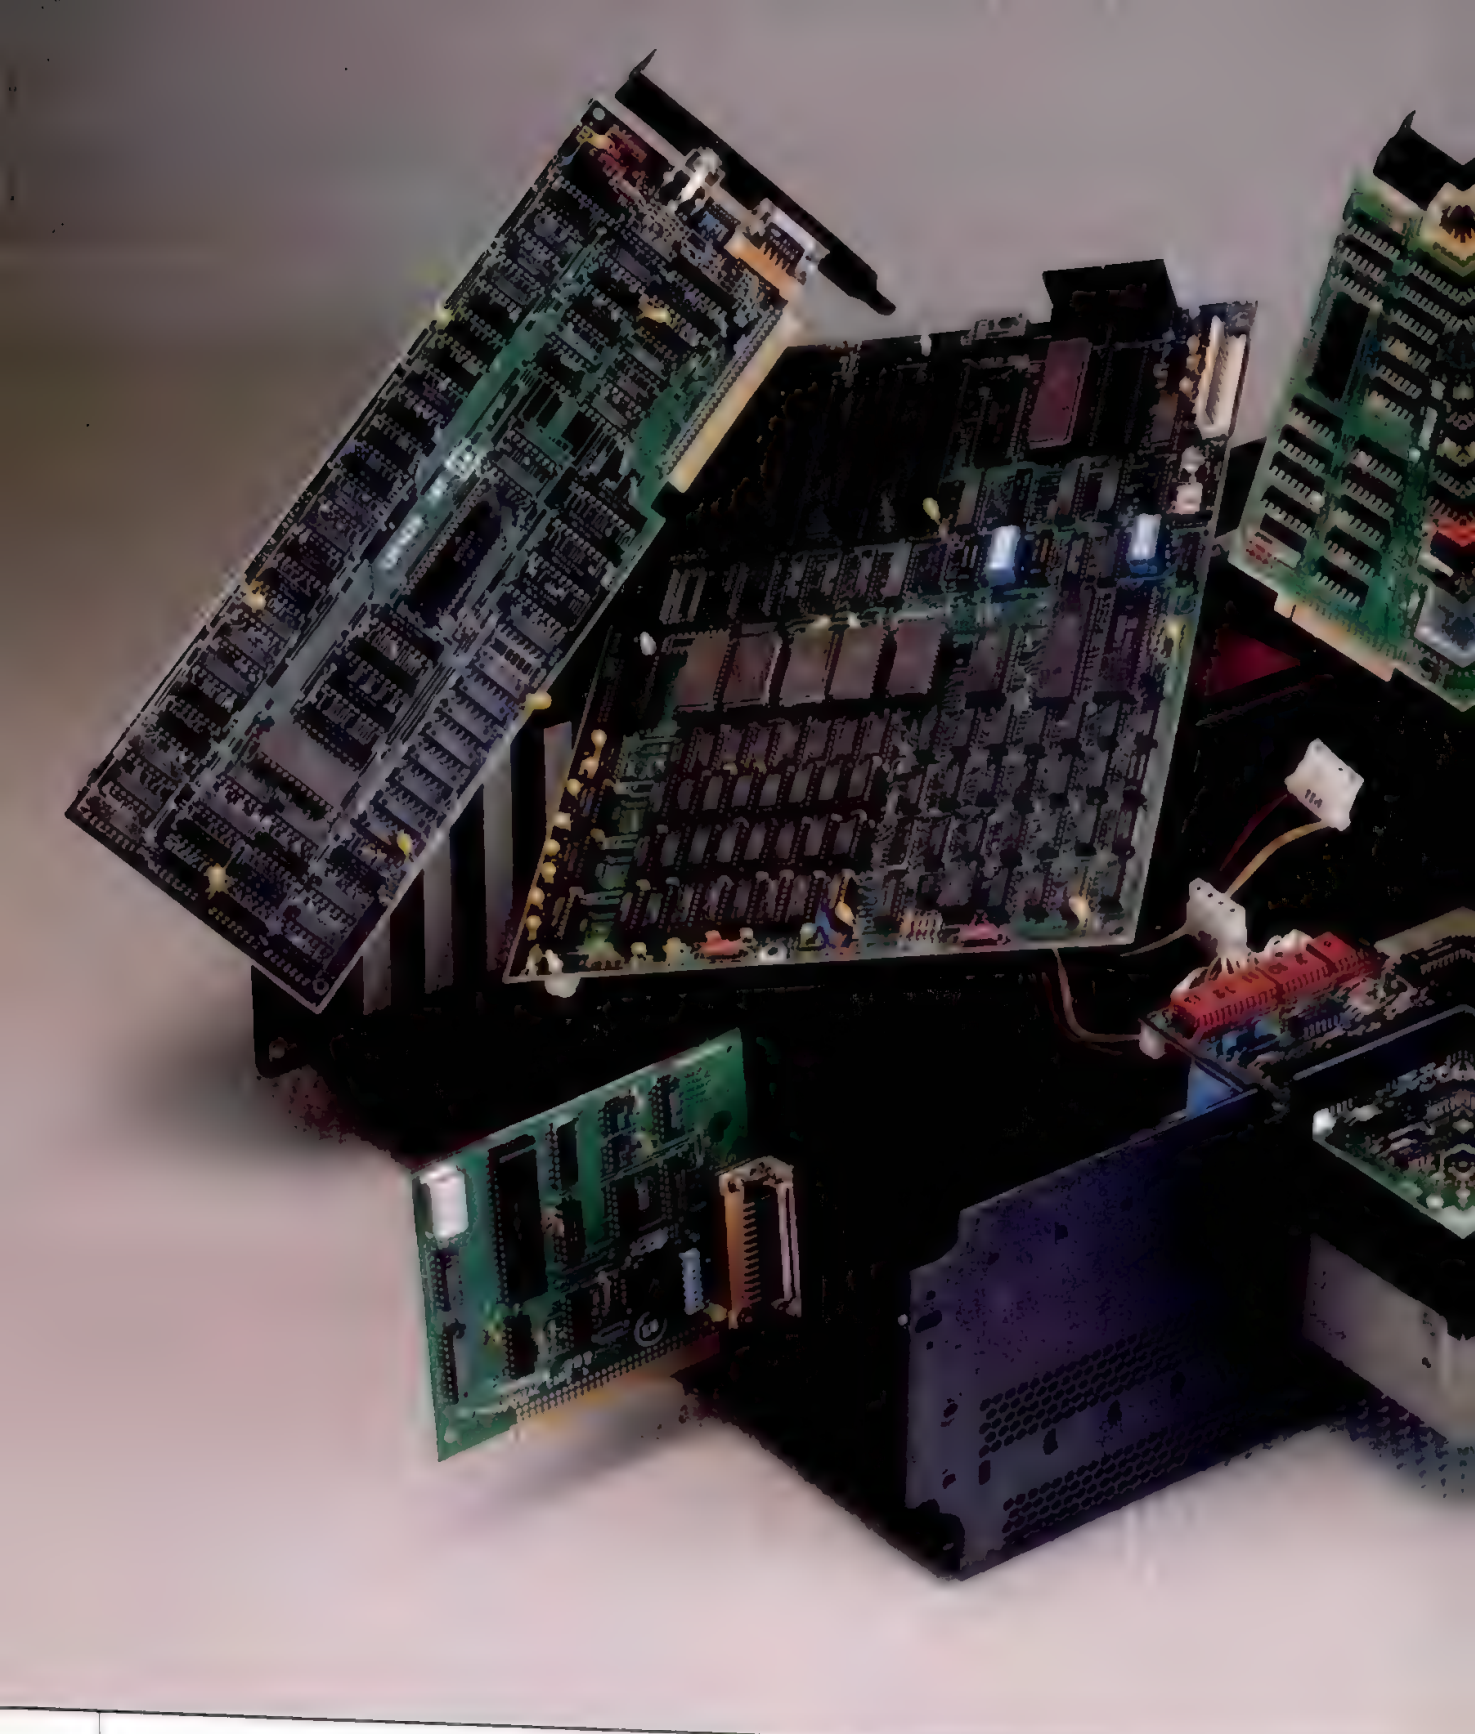

Copyrighted material

The PC is a system of many pieces, each designed to do a specific job. The keyboard receives your input, the display screen shows the results of system activity, disk drives store programs and data, and the printer furnishes permanent, portable reports. None of these, however, is as essential as the system unit, the kingpin of the PC system. It controls the flow of information between each and every component that plugs into it. The system unit can do more than shunt raw information from one device to another. It can process incoming information—extracting, combining, deleting, and calculating—to come up with entirely new information.

You would expect the system unit to be a complex device; one look inside it confirms that suspicion. You need not understand the intricacies of all the circuitry to use the PC, but you should be familiar with what is inside, even if you don't know exactly how it works. In this respect, using a PC is like operating an automobile. Under the hood of a car is an engine, a transmission, a battery, a starter, probably a radiator, possibly an air conditioner, and more. Chances are you don't know or care exactly how all those parts work, but you know they are there. A PC system unit has a

(continues)

power supply, a microprocessor, memory, probably a disk drive or two, and more. You can know what's inside without knowing how it all works.

All PC system units have a number of parts in common, and those standard parts give the PC its unique personality among computers. The system unit also accommodates a certain number of optional parts. They determine the amount of memory the PC has and whether it uses a color or monochrome monitor, disk drives, a printer, telecommunications, and so on. No one system unit will have all available options, because some are mutually exclusive. Besides that, expansion space inside the system unit is limited, and there are more options than there is room to instal them. Two PC system units that look alik on the outside may actually have quite dif ferent capabilities. Remove the cover, in ventory the internal contents, and you wi know what that PC can do now and wher there is room for future expansion.

Under the System Unit Cover

The system unit is actually more than a single component: its cabinet houses many separate pieces. Figure 1 shows the back of the system unit and the power supply. On its left are the adapter cards, which are mounted on top of the system board. Diagonally opposite the power supply is a small speaker. Two optional diskette drives are installed in this system unit, in front of the power supply. Hidden by other components are the microprocessor, memory, system configuration switches, and many incidental parts.

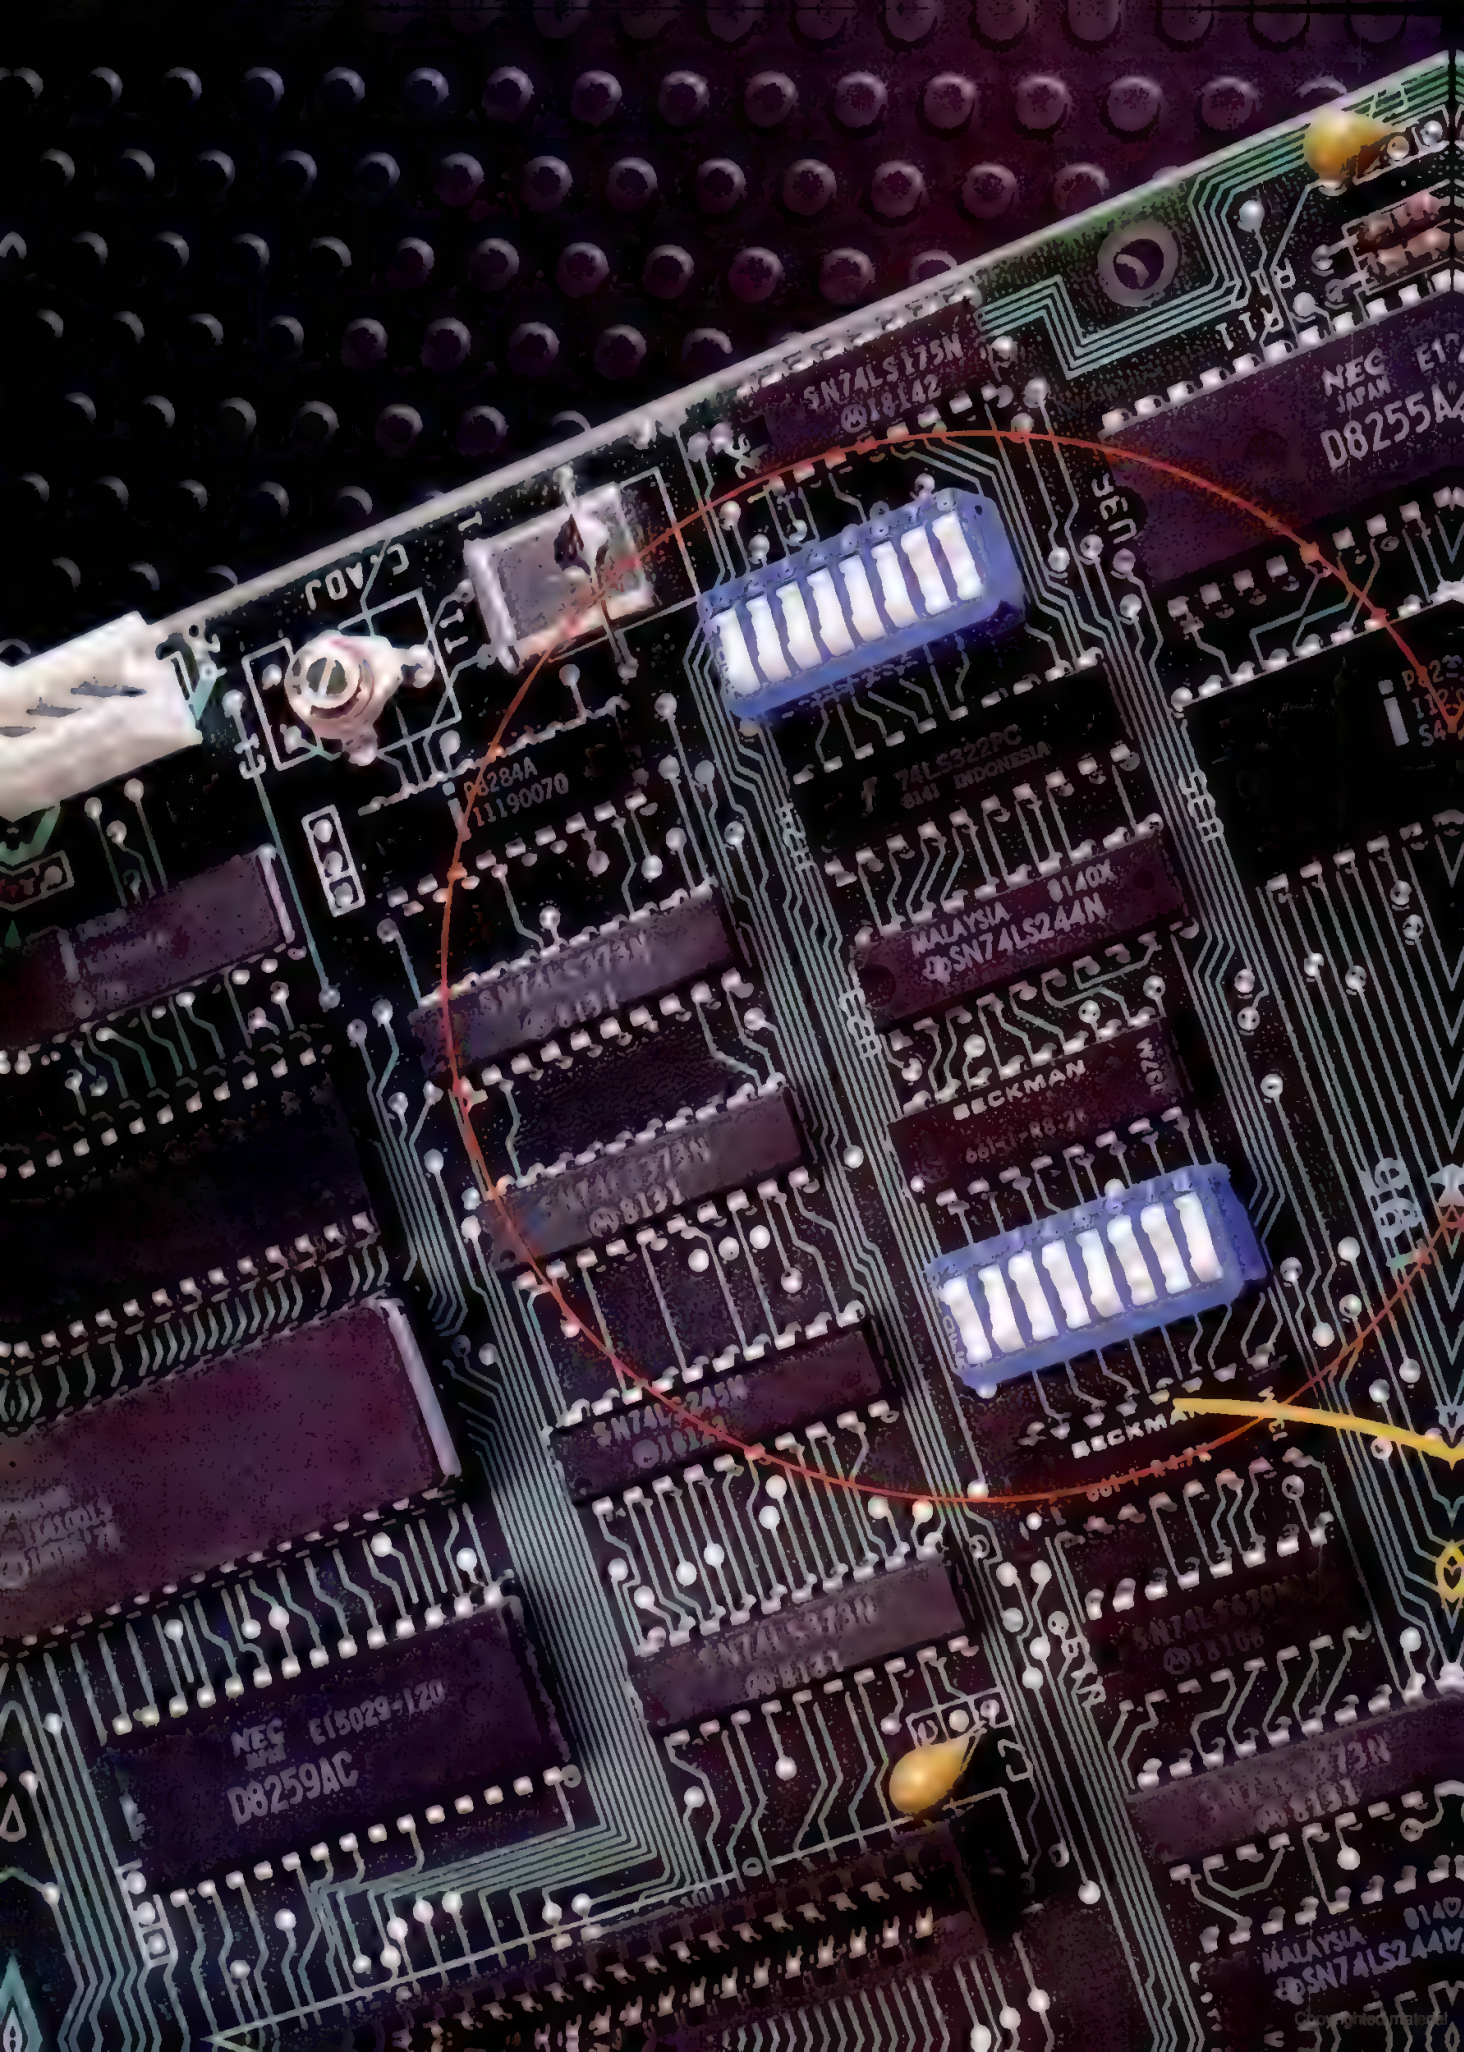

The System Unit Disassembled

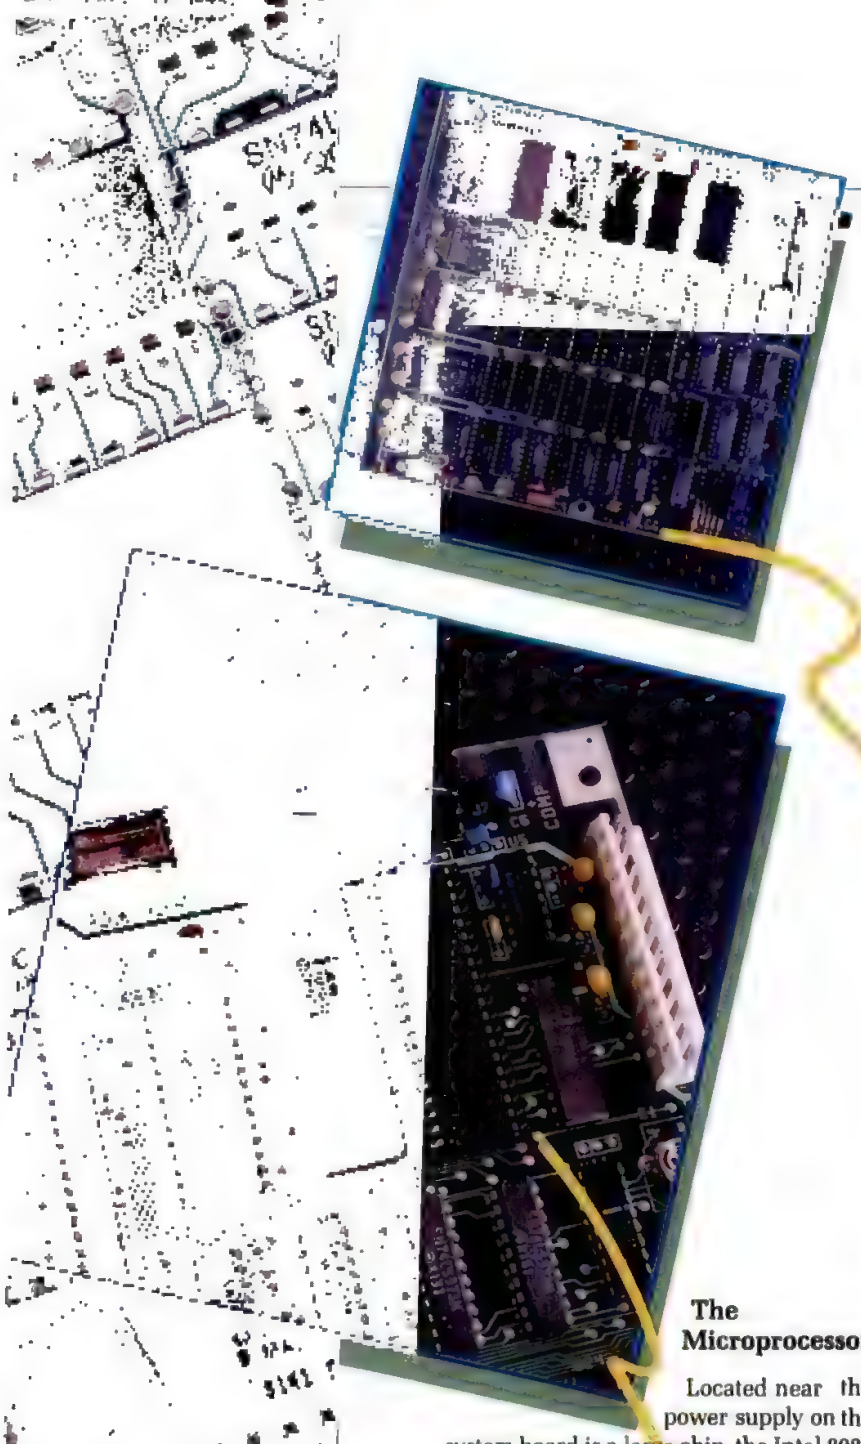

In Figure 2 the component parts of a typical system unit pose unnaturally so you can get a better look at them. The system board is the large board in the center. It contains small electronic components called integrated circuits, or chips, that control all PC activity. Surrounding the system board in Figure 2 are three of the many adapter cards that permit color graphics (top left), telecommunications (bottom left), and diskette drives (top right). The diskette drives themselves slide into a rack in the front of the system unit chassis.

The Power Supply

The main system on/off switch controls the flow of electricity into the system-unit power supply (Figure 3). The power supply in turn furnishes electricity of the correct voltages to the system unit electronic circuits, the diskette drives, and the keyboard. The power supply also contains the ventilation fan for the entire system unit, mounted on the underside of the power supply cover. Touching the components inside the power supply can result in a powerful electric shock even with the system unit unplugged.

SOME ADAPTER cards combine several functions onto one card.

The Microprocessor

Located near the power supply on the system board is a large chip, the Intel 8088 microprocessor (Figure 5). It is the main brain of the whole system unit, since it coordinates all activities and performs general arithmetic calculations for the system. The 8088 microprocessor is fast, but someday its speed may be enhanced by the presence of a co-processor in the empty socket next to it. Candidates for co-processor include the 8087 numeric data processor and the 8089 high-speed input/output processor.

The Configuration Switches

Two sets of tiny switches lie near the 8088 microprocessor, as shown in Figure 5. The settings of these switches describe the configuration of the system—how much memory and what kind of display is in use. Switch settings differ depending on the choice of options. The installation manuals included with optional equipment depict the various switch settings.

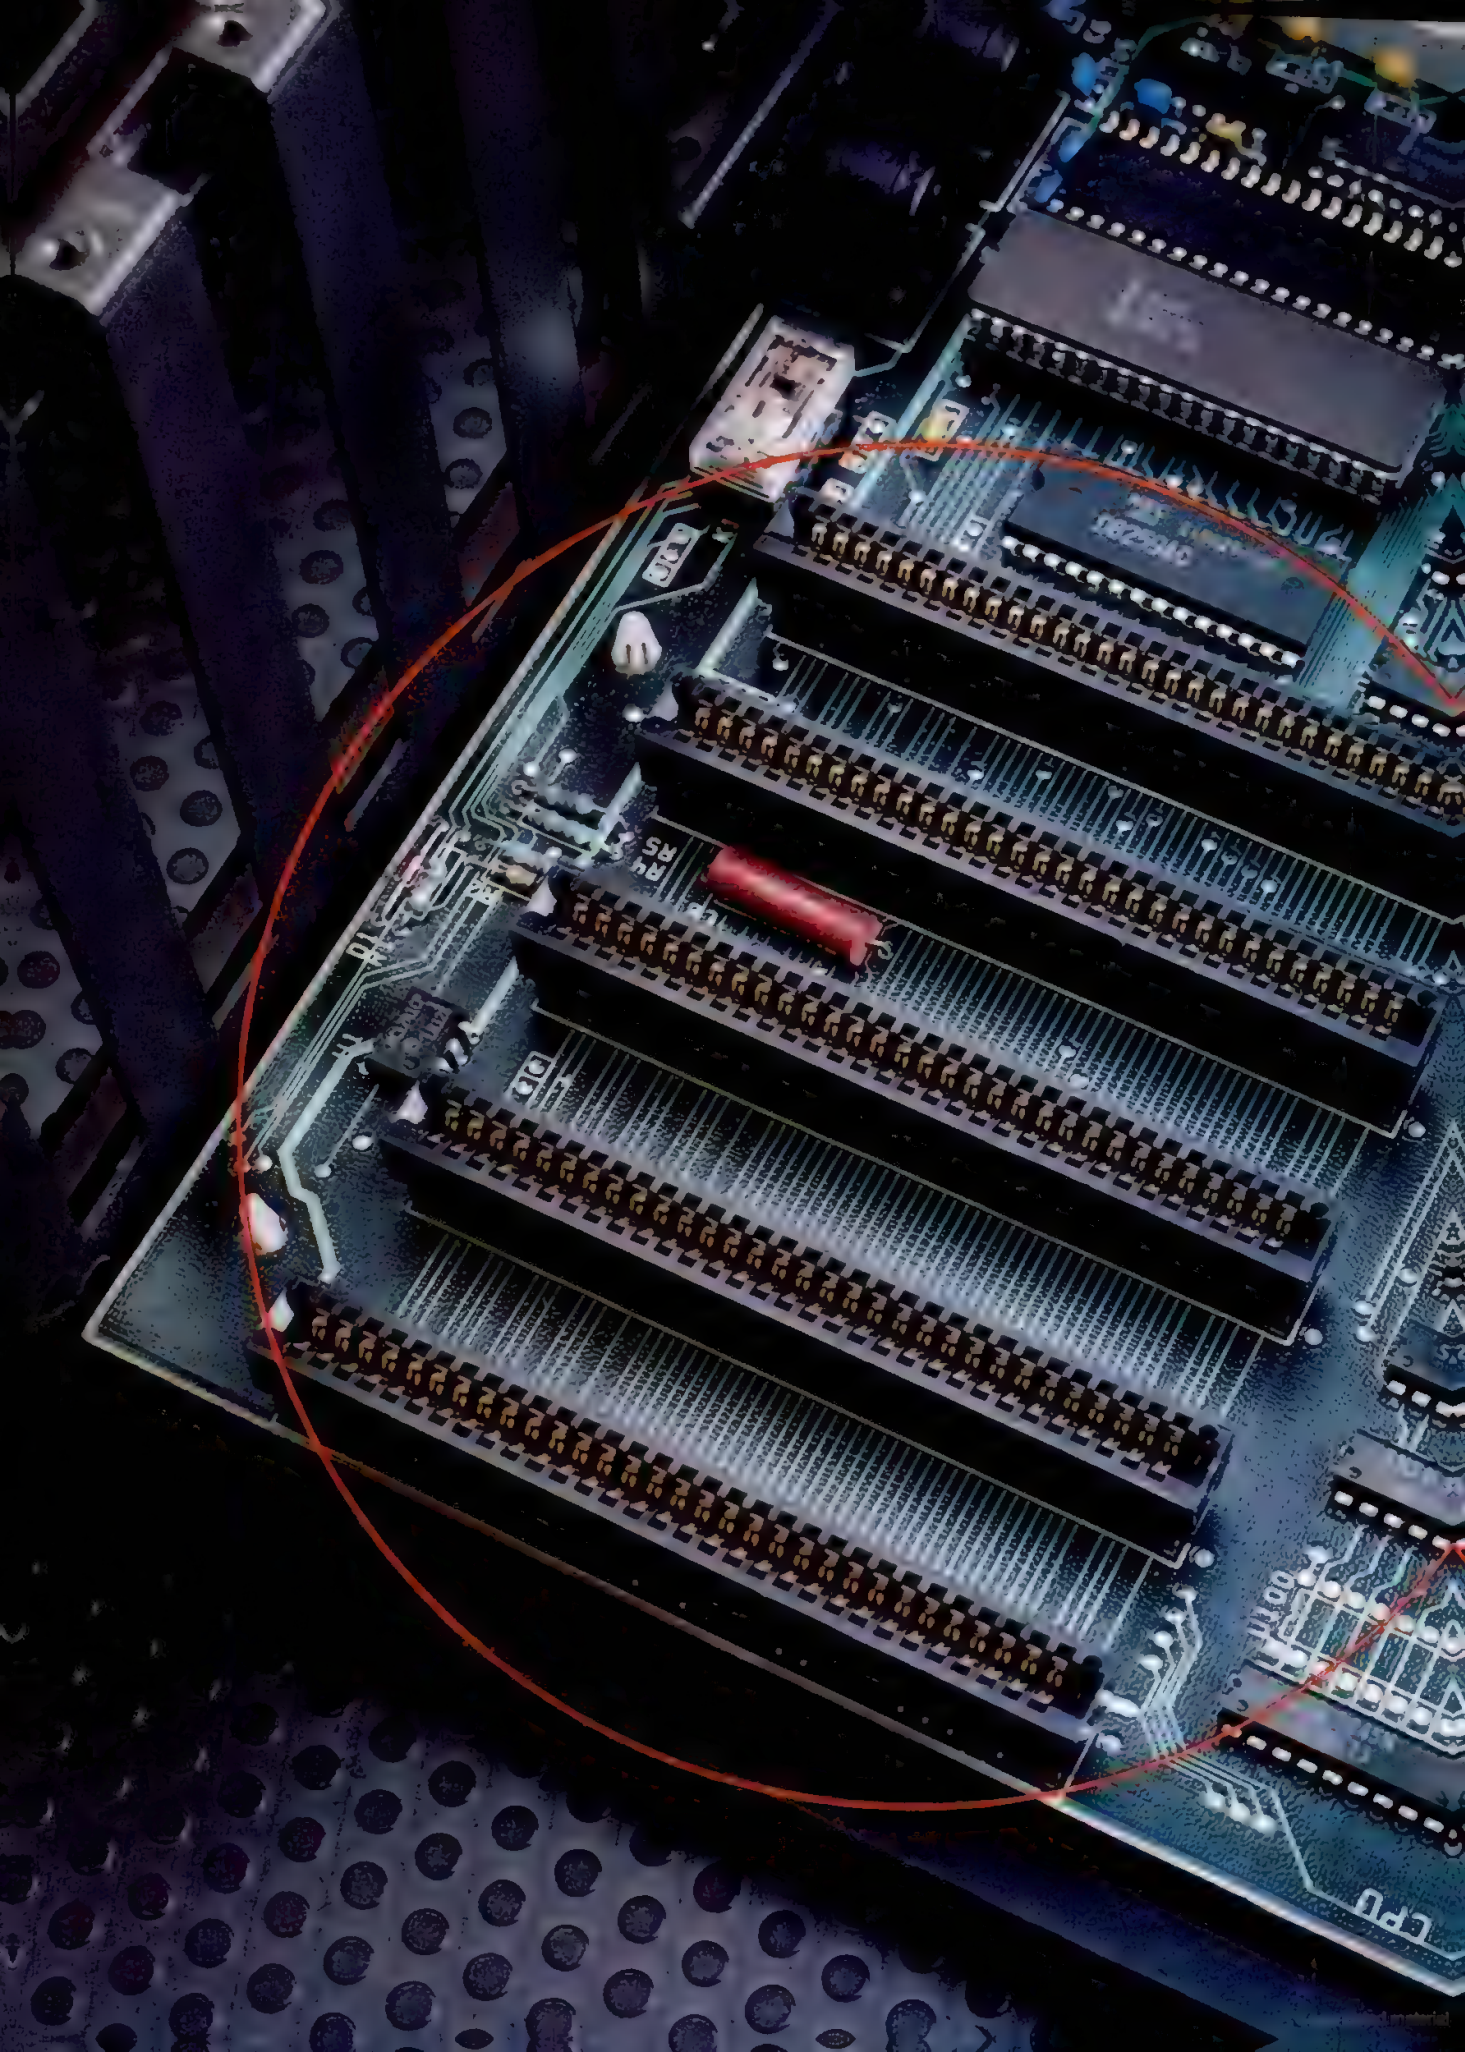

Memory

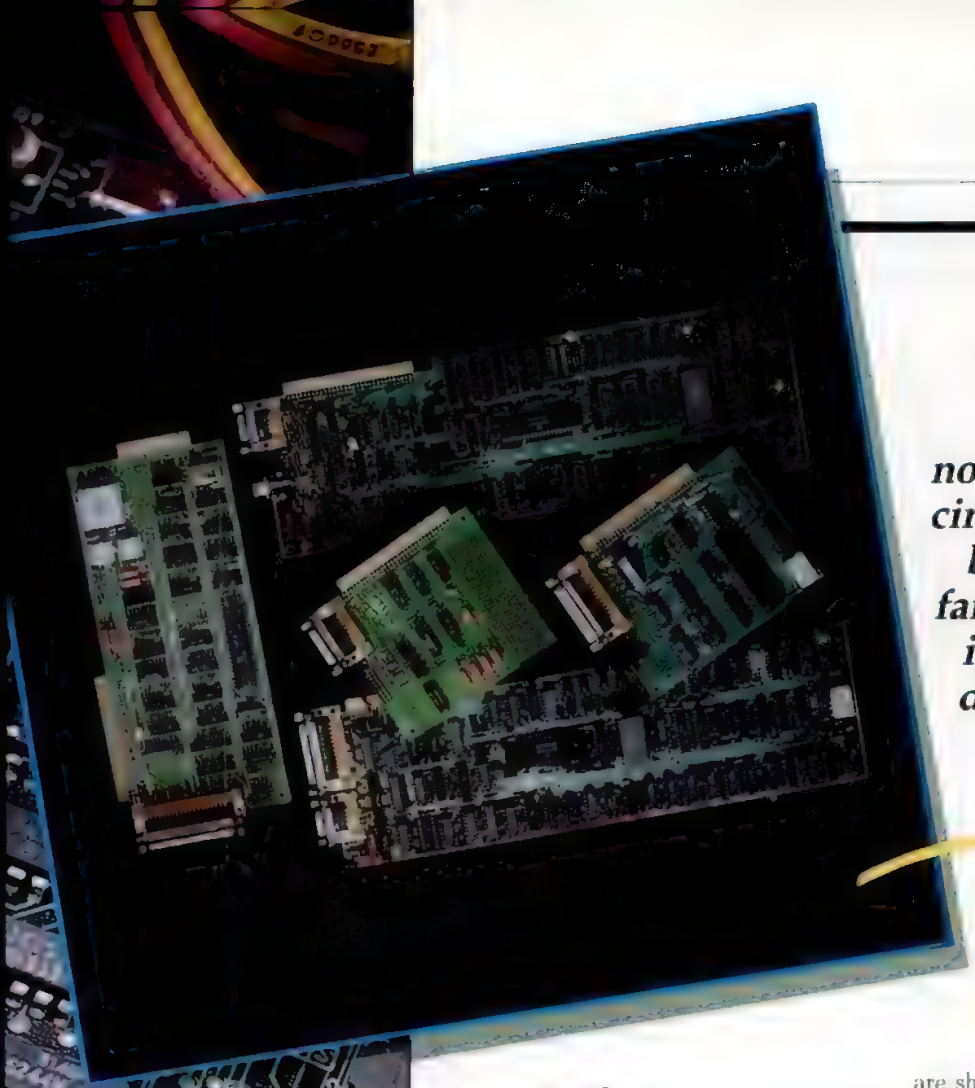

PC memory, like most computer memory, is measured in units called bytes. One byte of computer memory can store one character, so you can think of bytes as characters. But computer memory stores information other than characters, including numeric values and programs. Because of certain facts about computer circuitry architecture, memory capacity is usually a multiple of 1,024 bytes. That much memory is called 1K bytes.

Every PC has 40K unchangeable memory, called read-only memory (ROM), which has its contents indelibly set when it is made. (See Figure 6.) The contents never change, even when the power is off. Crucial information that tells the PC how to interpret BASIC language commands and how to perform other basal chores resides in ROM.

Another kind of PC memory goes by several names, including dynamic memory, read/write memory, and random access memory (RAM). Information can be stored in it and recalled from it any time the PC is on. But turn the power off and its contents vanish. Read/write memory's volatility is a function of its main asset, the changeability that allows the same memory to be used and reused for any purpose.

The PC has five 8K ROM chips, shown in the top row of Figure 6. Next to them is an empty socket that can hold another ROM chip. The nine leftmost chips in each of the bottom four rows comprise 16K of dynamic memory. The system board always has at least 16K of dynamic memory (nine chips present), and may have 32K (18 chips present), 48K (27 chips), or 64K (36 chips), as shown in Figure 6.

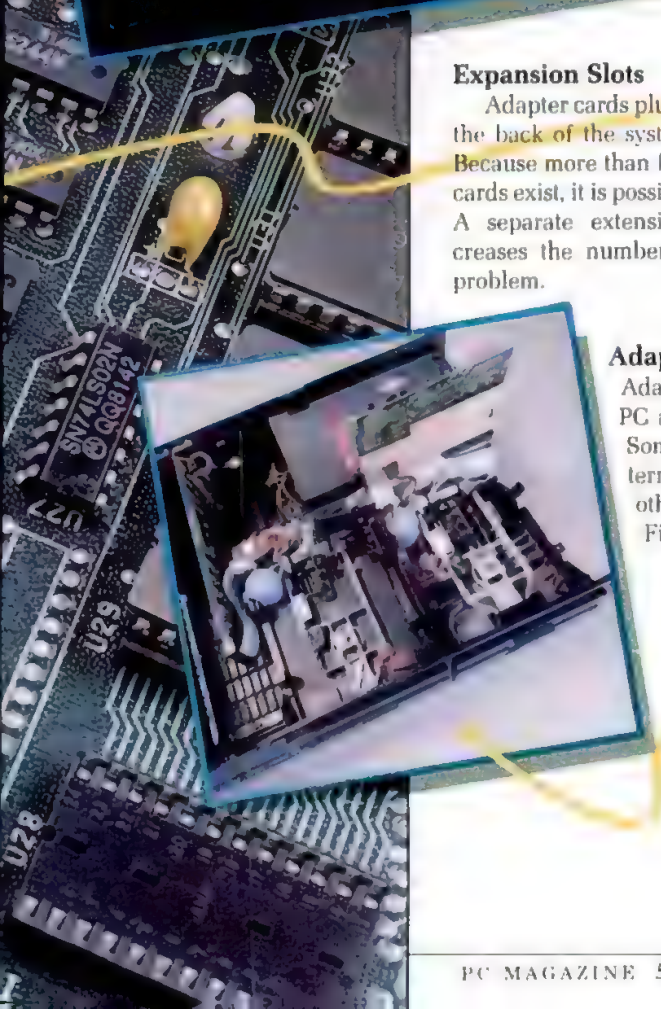

CPU

YOU NEED not understand all the circuitry to use the PC, but you should be familiar with what is inside, even if you don't know exactly how it works.

Expansion Slots

Adapter cards plug into the five slots at the back of the system board (Figure 7). Because more than five different adapter cards exist, it is possible to run out of slots. A separate extension chassis that increases the number of slots solves the problem.

Adapter Cards

Adapter cards make the PC a versatile computer. Some cards support external equipment, while others are autonomous. Five IBM adapter cards are shown in Figure 8: the monochrome display and parallel printer adapter (top), the color/graphics monitor adapter (bottom), the diskette drive adapter (right), the asynchronous communications adapter (left), and the game control adapter (center). Adapters not shown include supplemental memory; battery-powered clocks; experimental circuit testers; and controllers for disk drives, printers, and communications with other computers. Some adapter cards combine several functions onto one card, conserving slots in the system unit and making it possible to connect more optional equipment without using an extension chassis.

Diskette Drives

The diskette drive has both mechanical and electronic components. Figure 9 shows two drives with their circuit boards removed, making mechanical parts visible. The left-hand drive has a diskette fully inserted in it, while the right-hand drive has none.

Remember to replace any parts you have moved and restore the cover to its original position. If you have followed to this point, you should have no trouble repeating the checkup.

Choice A – The Book, IBM Personal Computer: An Introduction to Programming and Applications Larry Joel Goldstein and Martin Goldstein

Now for the first time, here's a book specifically designed for novices, potential buyers, and existing owners of the IBM Personal Computer. You'll enjoy its thorough yet refreshingly informal approach to BASIC programming and applications. Contains all the information you'll need to know – from turning on your PC to programming it to using it for business and personal pleasure. Available in soft and hardcover. 1982/302pp/softcover/ISBN 0-89303-111-9/Prod. No. 9429/$14.95

Choice B – The Kit, IBM Personal Computer BASIC Programming Kit

Developed by the same authors, the Kit contains the IBM Personal Computer text – plus – an accompanying diskette of applications programs with complete documentation. The diskette saves time and eliminates frustrating keyboard mistakes. Designed for easy use, the Kit allows you to use, modify, and examine application programs at your own pace. Includes 37 actual application programs from the text, such as word processing, several interactive games, and much more. 1982/Prod. No. 9645/$34.95

Now That You've Picked, Here's How to Order

Check-off your selection of the book or kit, noting your payment option, and clip the coupon. Address an envelope to the Robert J. Brady Co., Bowie, MD 20715, and mail today! For faster service, call toll-free 800-638-0220. Just have your Visa or Mastercard ready, and we'll take it from there.

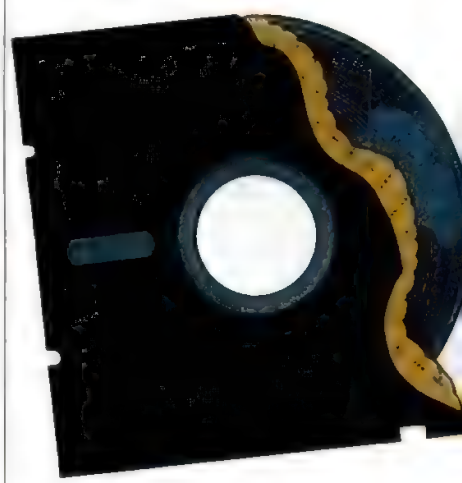

Books are available at your local bookshop. Books and Kits can be found at Computerland.

Diskettes

A memory device with recall capabilities every human brain should envy.

A diskette (Figure 10) is an auxiliary storage device, a kind of memory extension. Anything in memory can be stored on diskette and subsequently recalled for reuse. This means the PC can switch from one task to another as fast as it can recall a program from diskette. It also means program size and complexity are no longer limited by memory capacity, because a program can store unneeded information on a diskette and use the dynamic memory thus freed for other information recalled from diskette.

The entire diskette set-up consists of three parts: an adapter card that fits into one of the expansion slots inside the system unit, the diskette itself, and a machine that reads from and writes onto it—the diskette drive.

A diskette consists of a circular, flexible plastic disk coated with a magnetic film and encased in a protective, stiff plastic jacket. A nonabrasive gasket isolates the delicate magnetic coating from the plastic jacket, which in turn protects the interior parts from harsher physical indignities.

The diskette fits into a slot in the front of a diskette drive. The drive grips the flexible plastic disk through the center hole, spins it inside the jacket, and accesses the information recorded on the magnetic coating through windows cut out of the protective jacket. */PC*

How to get the most out of your IBM Personal Computer in one easy step.

Contact Lifeboat Associates We're the only software publisher you'll ever need for easy-to-use, reliable programs created for your **IBM Personal Computer.**

Our growing line of proven software for the IBM Personal Computer with DOS currently includes:

Emulator/86™, the CP/M-86™ emulator, that lets you use CP/M-86 software under DOS. This emulator allows you to fully integrate and mix programs, and to run CP/M-86 programs quicker with faster program loading than with CP/M-86 itself. All this without having to learn a new set of utilities and commands or end up with two incompatible sets of diskettes. Why spend hundreds of dollars on CP/M-86 when the CP/M-86 emulator is $75.

EM80/86™, the emulator that allows execution of CP/M®-80 programs on the IBM PC under DOS with no hardware addition or change. Programs will run from 0 to 8 times slower than on a 4MHz Z80™. Run your existing software *today* for only $200.

PMATE™, the text editor with single keystroke editing, expression evaluation, horizontal scrolling, powerful macro command definitions with conditional branching and other programming language constructs. The installation permits the customization of the keystroke definitions and so the user can set PMATE to mime a previously familiar editor. $195.

Lattice C Compiler, full implementation of 'C' with library and I/O subroutines which implement under DOS most standard I/O functions specified by Kernighan and Ritchie. UNIX™ Ver. 7 compatible; produces relocatable machine code in Intel's 8086 object module format for use with the linker supplied with DOS. $500.

ASCOM™, the asynchronous communication facility for users who need to interact with remote time sharing services or local computers to transfer data files and programs. $175.

T.I.M., the user-friendly, menu-driven Database Management System: creates files, inputs, edits, deletes data and produces a variety of reports. $495.

UT86™, system utility designed to improve user friendliness of systems using DOS. Provides neatly formatted and sorted directories, interactive copy routines, or groups of files, formatted file print-outs and more. $180.

For full information about how Lifeboat can help you get the most out of your IBM Personal Computer (and other computers using MS™-DOS), or how you can be added to our Mail List for either 8- or 16-Bit software, contact Lifeboat Associates. — The #1 resource for your IBM Personal Computer.

PLAY THE SYSTEM THA
WORLD'S WINNINGE

Ken Uston and his teams have made millions of dollars beating casinos at blackjack. He has used computer science to develop professional winning strategies that give the edge to the skilled player. With **Ken Uston's Professional Blackjack,™** you can master those strategies, and use them to challenge the tables at over 70 major casinos in Nevada and Atlantic City. Right in your own home.

PLAYS LIKE THE REAL THING

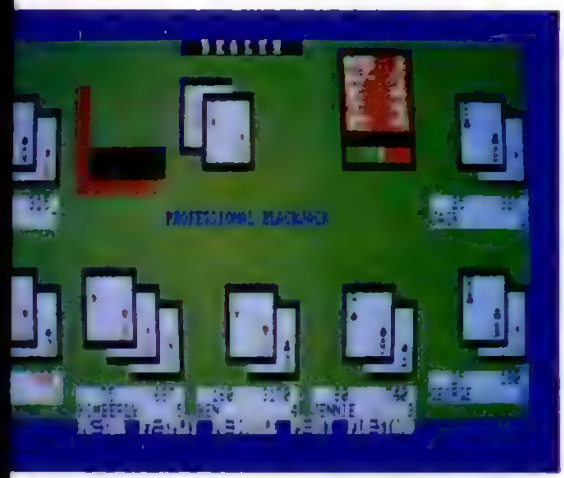

Ken Uston's Professional Blackjack is the most complete and realistic blackjack game you can buy. It accurately simulates the game rules and house variations for tables at over 70 casinos. With **Ken Uston's Professional Blackjack** you'll meet the same opportunities that you'd face at a real casino, including insurance bets, splits, doubling and more. Your range of playing options is nearly infinite, including numbers of decks, dealing speeds, numbers of players at the table, wallet sizes for each player, competing strategies and instructional prompts — both on-screen and with sound effects. Even the discard rack is proportionately scaled — which is crucial to professional level strategies.

WINS LIKE THE REAL THING

Ken Uston's Professional Blackjack is the best blackjack teaching system you can buy, developed by the game's best player. It teaches all of Ken Uston's card-counting strategies — from basic to the *Uston Advanced Point Count*. It uses menu-driven interactive practice drills — including on-screen prompts, sound effects and statistical performance evaluations — to lead you through each skill level. Even when you just play for fun, you can allow the computer to reveal accurate card counts and discard [illegible] and improves skills.

Ken Uston, familiar to millions as the blackjack expert featured on CBS "60 Minutes," is a Harvard MBA who left hi position as Senior Vice President of the Pacific Stock Exchange to pursue a career beating casinos at their own game. Ken Uston is the best selling author of *Million Dollar Blackjack, Mastering Pac-Man, Score!*, and *Ken Uston's Guide to Buying and Beating the Home Video Games*

ADE KEN USTON THE LACKJACK PLAYER.

Actual Photo of PC Version Game

Ken Uston's PROFESSIONAL BLACKJACK™

FOLLOWS THROUGH LIKE NO OTHER GAME

Ken Uston's Professional Blackjack is backed by comprehensive documentation. It provides a thorough explanation of the game, and augments the teaching system with 20 color charts that allow easy memorization of precise options for every Uston skill level and house game variation.

DON'T LOSE OUT. START WINNING NOW.

Start your way toward winning blackjack. Order **Ken Uston's Professional Blackjack** right away. Send $89.95 plus $2.00 for shipping and handling (NC residents add 4% sales tax) to:

Unique Art Poster Offer—A Cutaway View of the IBM Personal Computer!

24" x 32" poster, "Inside the IBM Personal Computer" by Mark McCandlish. Printed on quality heavyweight poster stock. Only $10 plus $2.50 for postage and handling.

Also available; Artist's signed, limited edition art posters!
500 posters signed by the artist. $25 plus $2.50 for postage and handling.

Fit Right in

Of course Percom diskette drives for the IBM Personal Computer fit right in. They fit right outside your Personal Computer, too. And they're fully compatible, providing the same full double-density storage capacity.

But just as important, Percom diskette drives also fit the same high standards set by IBM.

At Percom we've been making disk storage systems since 1977. We build quality, high-performance disk drive systems. From proven design through quality inspections that include 100% two-day operational tests. And Percom dealer support ensures competent after-sale service.

So expect more from Percom. You won't be disappointed.

Percom disk drives for the IBM Personal Computer are available in 40-track single- and dual-head models, and 80-track single-head models. Call or visit your independent IBM Personal Computer dealer — and fit right in with Percom. For the names of dealers carrying Percom products for your Personal Computer call toll-free 1-800-527-1222.

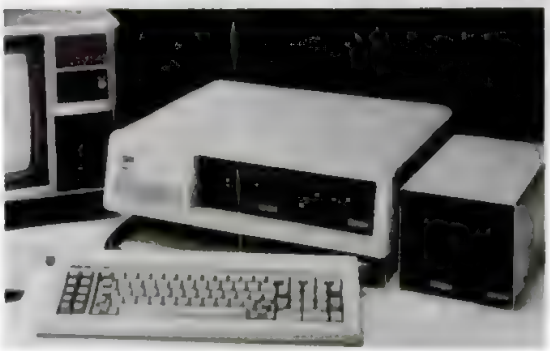

PRICES AND SPECIFICATIONS SUBJECT TO CHANGE WITHOUT NOTICE.

MAIL TODAY!

Ferox has just bridged a very large gap in the decision support market.

Ferox Microsystems presents the most comprehensive, integrated line of decision support software on the market today for America's favorite personal computers.

Micro-DSS™/Finance bridges the price/power gap.

Until now, as a financial manager, you were between a rock and a hard place. Licensing of large scale DSS software or access through time sharing can run from $50,000 to $300,000. And the small-scale electronic spreadsheet products often lack the power for serious corporate planning. The classic price/power gap.

But now there is DSS/F, developed by Ferox and acknowledged as the only computer modeling system with virtually all the power of an expensive mainframe package. While single copies are affordably priced, even more significant savings are possible with corporate purchases of multiple copies.

DSS/F is designed for use by financial decision makers. It is easy to use, can be learned quickly, and requires no knowledge of computer languages or programming skills. If you are a manager responsible for financial analysis or planning and you are not familiar with the capabilities of an advanced financial modeling system, here is a partial list of DSS/F applications:

- Hierarchical consolidations
- Marketing forecasts
- Profit planning
- Corporate modeling
- "What If?" analysis
- Strategic planning
- Budget planning
- Cash flow forecasting
- Merger/acquisition analysis
- Lease vs. buy
- Investment analysis

Ready to upgrade from VisiCalc™?

If you need increased planning capability and have already cut your teeth on the lower power systems such as VisiCalc, then you are ready for DSS/F.

Thousands of companies who take financial planning seriously have demonstrated their faith in Ferox Microsystems; among them: Citibank; Deloitte, Haskins & Sells; Ernst & Whinney; Fairchild Industries, Inc.; Marriott Corporation; Martin Marietta; Mobil; Peat, Marwick, Mitchell & Co.; Pfizer Drug Co.; Touche, Ross & Co.; and Wachovia Bank & Trust.

Just released! Ferox Modeler™ and Consultant's Edge™

Ferox announces the Ferox Modeler—an enhanced version o DSS/F for Digital's VAX computers Also, there is Consultant's Edge, offer ing the convenience of built-in menus for the normally command-driven DSS/F. Consultant's Edge lets you create personalized menus in suppor of your own models.

Two Ferox products designed to support planning while closing a common communication gap!

Ferox LogOn™ bridges the input gap.

Without help, your micro-compute cannot transfer or receive data from another computer. LogOn by Ferox is a powerful but easy-to-use communica tions software package that gives you instant access via telephone lines to information stored in other com puters—micro, mini, or mainframe— anywhere in the world. LogOn can share DSS/F models or graphics with corporate headquarters or branch

ffices, access a corporate data base nstalled on a large-scale computer, onstruct a permanent directory of requently called numbers for auto- ial, auto-answer communications, andle electronic mail, and provide ccess to commercial information tilities such as Dow Jones or The ource.

'erox GraphPower™ ridges the output gap.

Do your board meetings often be- ome bored meetings? GraphPower an help you bridge the gap between omprehension and endless columns f numbers. Vital data required for fi- ancial analysis becomes easy to com- rehend, thanks to the colorful charts, raphs and transparencies of Graph- 'ower, together with Hewlett-Packard's 470A pen plotter. GraphPower an be used as a stand-alone system or n conjunction with DSS/F. If you are a nanager who needs to communicate nformation efficiently for market nalysis, financial ratios, profitability nalysis, and budget vs. actual, you eed the simplicity and power of GraphPower.

Ferox products run on the IBM Personal Computer, Apple II and Apple III, TRS-80 Model II, and DEC Professional 300 and VAX series.

ORCHID TECHNOLOGY TRANSFORMS YOUR IBM PC INTO A POWERFUL WORKSTATION

APHICS CAPABILITY FOR THE IBM NOCHROME DISPLAY

st you can have simultaneously high resolution text and hics on the IBM monochrome screen with the ORCHID hics Interface. This single board contains 64K bytes of ory, can be used with all IBM BASIC graphic statements rovides:

- ull 720 x 350 resolution
- etter resolution than the color monitor)
- vo display pages for fast scene change
- ansparency with IBM monochrome adapter
- t mapped display

MPLETE OFFICE TOMATION NETWORK

sform your PC into a true office workstation with the com- line of networking products from ORCHID.

AL NETWORKING

ORCHID PC-netI is the first local network designed ifically for the IBM PC. It uses a standard coaxial cable to ide a high speed distributed information bus that can ex- to over 5,000 feet.

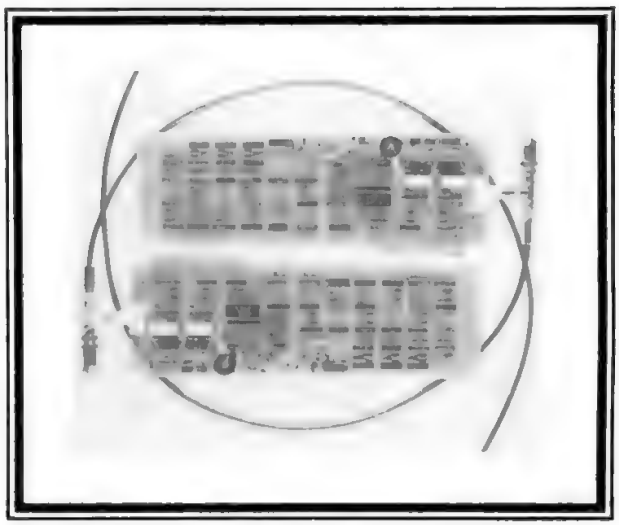

single active component of PC-netI is an inexpensive ter that takes only one slot of the IBM PC. This ter incorporates advanced CSMA/CD technology and gh-performance DMA interface. Standard PC-net soft- features include:

- Virtual disk" capability to allow multiple PC's to hare a single hard disk for increased erformance and storage.
- hared printer and print files spooling.
- ile sharing and transfer
- lectronic mail

BAL NETWORKING

Branch offices in different cities also need com- nications, so ORCHID developed the PC-netII, a long ance file-transfer system. Designed to run stand- ne, or in conjunction with PC-netI, it can use a variety ommunication media including the telephone net- k to transfer files between PC's. It offers the following tures:

- Accommodates a variety of "smart" modems and ther communication methods
- otally automatic multiple files, multiple destinations operations.
- Delayed file transmission for reduced cost.

NETWORK SOFTWARE

PC-mail enhances the operation of PC-net by coordinating file transfers with messages. PC-mail provides the full range of electronic mail features including:

- mail by name (directory service)
- ability to mail arbitrary data (object code)
- distribution list handling
- separate subject area for review by reader

Apple and Apple II are Trademarks of Apple Computer, Inc

in computer-aided graphic design.

Introducing The Space Tablet™ from Micro Control Systems. The first three-dimensional spatial digitizer compatible with Apple II™ and IBM Personal Computers.

The Space Tablet lets you interactively record x, y and z coordinates of any object – even one that doesn't really exist – then allows you to manipulate any or all of those coordinates with the push of a button. A fast, practical way to play "what if?" in any design situation.

What's more, specially written software allows you to rotate and rescale drawings instantly – or even compose one drawing from several components. All at a fraction of the price you'd expect to pay.

Applications for The Space Tablet are truly unlimited. Design. Engineering. Architecture. Science. CAD/CAM. Graph reading. And so much more. It can even be used as a two-dimensional digitizer.

Let us help you enter the third dimension in graphic design. Call or write and we'll tell you how The Space Tablet can work for you.

Micro Control Systems,
230 Hartford Turnpike, Vernon, CT 06066, (203) 872-0602.

MARKETPLACE/HAL GLATZER

It is widely believed that computers solve problems, but in reality they tend to make them worse. Accountants who cannot keep their books in order by hand will not improve their skills just because they can do thousands of calculations per second. Some businesses will fob off as computer errors ingrained shortcomings in their billing or customer service areas.

Becoming A Savvy Shopper

A microcomputer can't absolve the woes of bad business practice, but surveying the market before you buy and selecting a system to meet your needs may prevent newfound grief.

These twin misconceptions—savior and scapegoat—are responsible for more unhappy marriages between computers and people than any real obstacles to automation, and there are plenty of those, say the experts.

Most businesses will have to upgrade paperwork to electronic information handling just to stay competitive in the 1980s. Vendors are aware of that, but they also know that microcomputers can be big-ticket items in small businesses. As with most retail goods, hefty commissions are made in exchange for putting in long hours, advertising heavily, and always returning a potential customer's phone call. Vendors have a habit of insisting that their particular machine is perfect for your business. It may be perfect for your needs, but it may also happen to be the machine that carries the highest markup.

The first and most important rule for a new customer is "Know thyself." Know what your business or personal application is. What is it about your business that needs to be automated?

Perhaps that sounds like gross oversimplification, but it is a question few people really bother to ask themselves. It helps to remember Peter Drucker's immortal (and possibly apocryphal) words to the drill-bit manufacturers. Said the famous management consultant: "Your customers aren't interested in buying ¼-inch drill bits." Before the astonished directors could recover, he added: "What they want to buy is ¼-inch holes."

If you understand your own business

Look-Alikes and Co-Processors

Soon to fill the market is a new generation of personal computers with features comparable, compatible, and internally akin to the PC but without the IBM label.

Many new microcomputers have been or will be announced this year that use the same 16-bit central processing unit (CPU) chip as the PC and will run software under identical operating systems—PC-DOS and CP/M-86. It may soon be possible to buy a PC without having IBM's label on it.

But there is one difference: Many of the new computers also have an 8-bit CPU chip that will use the vast libraries of existing 8-bit programs.

When IBM announced the technical parameters of the PC, some pundits were napping. Most were impressed that IBM had entered the market, and they predicted strong PC sales on the strength of IBM's name and reputation. They were reluctant to predict popularity on technical merits alone, because the PC did not represent a great leap forward but an inclination toward future capacities.

IBM selected a 16-bit CPU chip and promoted new programs that were more or less adapted from those written for 8-bit CPUs. With a new operating system (PC-DOS) that, at least superficially, resembled CP/M, and the upgrading of CP/M to a true 16-bit capability, the PC could be enough of a 16-bit computer to handle future software.

The vast majority of microcomputer software is written for 8-bit CPUs and operating systems, and competing manufacturers took advantage of that fact in their own designs for new machines. (A PC owner can buy a plug-in printed circuit board with an 8-bit CPU on it, e.g. Baby Blue, to run 8-bit software on the PC.)

Some new micros are PC look-alikes. The Victor 9000, for example, has the same Intel 8088 CPU chip, and runs with PC-DOS and CP/M-86; it differs in having as standard equipment some items that are optional on the IBM: serial communication ports and disk drives with greater storage capacities.

Other micros, however, are being introduced with two separate CPUs—one 16-bit and one 8-bit—so a user can run many existing 8-bit programs while waiting for someone to invent or perfect the next-generation 16-bit programs. It's like having a car that runs on both gasoline and propane: You may be convinced that the cleaner propane is the fuel of the future, but it's reassuring to be able to drive up to a regular old gas station in the meantime.

One such machine is Zenith's Z-100, which was unveiled at the National Computer Conference in June. While it is unlike the PC in appearance, it is very similar internally. It uses the same operating systems, indistinguishably modified, and the same 16-bit CPU (the Intel 8088). Inside, however, there is also an 8085 chip that works much like the Z-80, which Zenith (and its subsidiary Heath, of Heathkit fame) uses in its popular Z-89, 8-bit micro.

Users can run nearly all the existing 8-bit CP/M software they would have bought for the Z-89 on the new Z-100. Almost any 16-bit software they buy new will be compatible with the 16-bit software PC users will buy. The only major difference will be that the two machines will record information on diskettes in slightly different ways, so the same disk will probably not work on both. But that will be true of practically any machines not made by the same company (it is even true among different computers made by IBM).

A new generation of first-time users and many 8-bit computer users who want to upgrade to 16-bit systems will be able to use the same machine. Does this spell trouble for the PC? Probably not. IBM, with its enormous name recognition and reach, will at least be tried and tested by prospective buyers. Victor, Zenith, and the others will have their work cut out for them convincing users that their machines are comparable in features and compatible in software.

Just as *VisiCalc* spawned a generation of calcalikes and visiclones, new computers will use PC-DOS and CP/M-86, and will compete directly against the IBM PC.

—*H.G.*

that thoroughly, it may be time to automate it. Computers come in many sizes and shapes; selecting the right one is like buying a new suit. Even if you like the material and draw status from wearing a designer's label, make sure it fits.

Buying a microcomputer may be easier than buying a larger mini or mainframe, but the principles are the same. The lower price on the micro fools some people into thinking all they have to do is walk into a retail store, try out a few machines, and take one home with them. It would be wiser to follow the advice of people who have been consultants in the minicomputer and mainframe markets, because, although those systems represent ten or 100 times the financial investment, the routine for selecting and comparing machines is in every way comparable.

THE INITIAL decision to purchase a computer really depends more on the nature of the business than on the ability to pay for it.

Know What You Want Your Computer to Do

Paul Kraabel, a computer consultant in Seattle, finds that the initial decision to purchase a computer really depends more on the nature of the business than on the ability to pay for it. According to Kraabel, "A distributor in a certain income or sales bracket may be able to afford it while a manufacturer doing the same dollar volume of sales may not." The distributor is really in the information business, keeping track of the movement of goods, while the manufacturer is typically adding value to raw materials or assembling parts. "Know what you want your computer to do, and about how much it should cost to do that before you solicit proposals from computer salesmen."

Big-computer customers have done this for years, but even for the purchase of a micro it is a good idea to draw up a request

NEW

Software Breakthrough...

NEW *QUIKPRO + PLUS* WRITES PROGRAMS FOR YOU IN MINUTES ON *YOUR* Micro

Technical Review
by Wayne Hepburn

QUIKPRO + PLUS is a new breakthrough in software for microcomputers from ICR-FutureSoft.

Until now, whenever you wanted a new separate program in BASIC (Microsoft Basic/MBasic/Basic 80/Oasis Basic), you had to spend a lot of dollars for it, or a lot of hours creating it (if you have the know-how). That's all in the past now.

Anybody who can turn on a computer can write a program, quickly, with this new *Quikpro + Plus* software which generates programs for you. *Quikpro + Plus* is the invention of Joseph Tamargo of Florida. His brilliant approach to program writing allows you to tap the real power and speed of your microcomputer, and it is about time this happened.

I interviewed him to find out more about *Quikpro + Plus* and pass this valuable information to you. He told me "The best part of this software is that it gives you a separate custom program every time you use it. The resulting program is produced, error-free, in BASIC (Microsoft Basic/MBasic/Basic 80/Oasis Basic, as appropriate to your system) for you by *Quikpro + Plus*. What's more, you can list your new program, look at it, see what makes it tick, and modify it as you wish."

You can also, customize, enhance, alter, and even copy the programs you create with *Quikpro + Plus*. This is because programs created by *Quikpro + Plus* are structured, easy to follow, and include many REMARKS statements right in the program listing. I don't know of any other software with the flexibility and ease of use I found in *Quikpro + Plus*.

HUNDREDS OF APPLICATIONS...

For Education, Business, Hobby, Home, Science, Personal, etc. a partial list includes programs like these: Financial Forecasting, Expense Planning, Data Access and Retrieval, Modeling, Record Keeping of all kinds, Statistical Data Banks, and much, much more. *Quikpro + Plus* cuts the time it takes to generate a new custom program down to a few minutes. That's true. I saw a letter from a user who created a separate program in Basic within fifteen minutes after reading the clear, simple, complete Documentation & Operating Manual for *Quikpro + Plus*. The software will generate File Handling and Data Entry Programs in a file format, drawn right on the screen by user. Programs created by *Quikpro + Plus* produce standard ASCII Data Files allowing data to be easily accessed by other programs, other micro's, and even main frames.

HOW IT WORKS...

The operation of *Quikpro + Plus* is simple and easy. On your screen you answer questions which appear in plain English. The answers generate error-free Filing & Data Entry Programs for you...instantly. This completely eliminates the tedious and time consuming development you normally go through to write a program. Since the instructions are right on the screen you don't need any programming skills to operate *Quikpro + Plus*. Quickly, you get a fully independent new program ready to run on your system. After you create the new program you can remove *Quikpro + Plus* and stick it on the shelf until the next time you create a custom program.

PRINTS REPORTS & MANUALS...

There is a full report printing capability put into your new separate program by *Quikpro + Plus*. You can even print out in formats different from the File Format you used without altering the Record Data. Or you can selectively print portions of Files or selected fields from selected Records. Just about anything you want can be reported out from the Data Base associated with the new custom program you wrote.

PERFORMS CALCULATIONS...

You can perform all manner of computations among various fields in each record. You can selectively calculate and print resulting data only, or Data Base and results, or alter Records by calculation results, and so forth. The possibilities seem unlimited. And keep in mind that the power and features I am talking about end up in the separate new custom program *Quikpro + Plus* writes for you.

This software is ready to ship immediately and you can start writing programs the day you get in. In fact, ICR-FutureSoft guarantees your satisfaction or you can return it for a full refund in ten days after delivery. How's that for confidence? Mr. Tamargo said "There isn't any risk to us...our product *works* like it's supposed to work and users are very well satisfied. We are glad to guarantee satisfaction."

You get *Quikpro + Plus* by mail or phone directly from ICR-FutureSoft. Just write them, or call their Toll-Free phones and specify your model and version requirements from the list that follows:

For CP/M with Microsoft Basic $259
(same as MBASIC/Basic 80)
APPLE • INTERTEC • NORTH STAR • OSBORNE • XEROX 820 • HEATH/ZENITH • CROMEMCO • ALTOS • RADIO SHACK TRS80 • or any system reading CP/M 8" Single or Double Density.

For MS/DOS Operating System $259
IBM/PC • WANG

For TRS/DOS Operating System
Radio Shack TRS80 Mod I, III $149
Radio Shack TRS80 Mod II, 16 $189

For ATARI Microsoft Basic $189

For OASIS Operating System $349
ALTOS • COMPUCORP • CROMEMCO • DELTA PROD • DIGITAL GROUP • DIGITAL MICROSYSTEMS • DYNABYTE • GODBOUT • IBC INDEX • INTERSYSTEMS • NORTH STAR • ONYX • SD SYSTEMS • TRS80 II • VECTOR GRAPHIC • VORIMEX

Assessing Your Priorities

Are you a status seeker or does your business really need a computer?

Roy Gillette writes a monthly column for the *Northwest Computer Society News*. He poses some tough questions for any business person who must decide whether, or how far, to automate with a computer. With some adaptation, here is his self-test. There are no "right" answers.

I see a computer in my business as a way to

- ☐ impress my customers.
- ☐ control costs or increase revenues.
- ☐ prepare for the coming "information revolution."
- ☐ do what we already do manually but do it more efficiently.

If I had a computer, I would keep it

- ☐ on display, to show it off.
- ☐ hidden as just another office tool.

When I think about computers, what worries me most is

- ☐ how I could find the time to run it.
- ☐ how I would get it fixed if it broke down.
- ☐ how I would print reports on time.
- ☐ whether it would be powerful enough and, if it were not, whether it could be upgraded without excessive cost.
- ☐ that my employees or partners would be afraid of it.

Compared with hardware costs, the software programs I will need should cost how much?

- ☐ Nothing extra.
- ☐ 10 to 25 percent.
- ☐ 50 to 75 percent.
- ☐ 100 percent plus.

When I need further programs, I will

- ☐ write them myself.
- ☐ hire a local programmer, working at his or her own pace, part-time.
- ☐ contract for the work to be done by a consultant or other software professional, full-time.
- ☐ have an employee or a partner take a course in programming.
- ☐ buy prepackaged programs by mail or at a computer store.

How committed am I to working with and learning about the computer in my business? How many hours would I be prepared to spend each week?

- ☐ Up to 4.
- ☐ 7 to 10.
- ☐ 14 to 20.
- ☐ 28 plus.
- ☐ Every night.

After taking this test, were you struck with any new thoughts about computers that had not come to you previously?

—*H.G.*

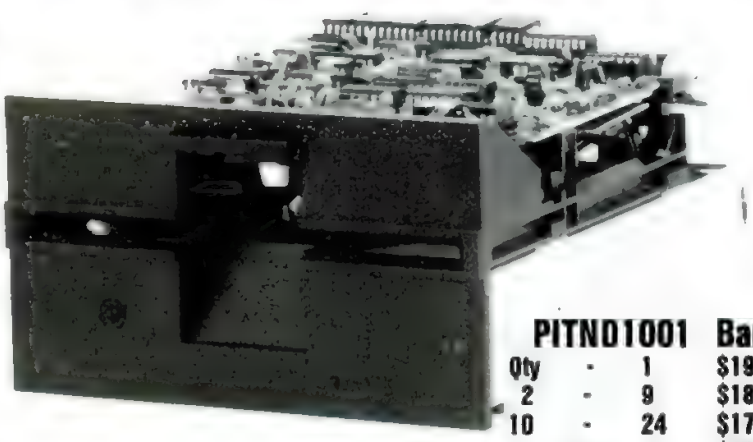

IBM PC DISK EXPANSION FOR UNDER $200.00!!

Priority One Electronics has burned Tandon's Price sheet with our special purchase of Tandon TM100-1 5¼" 40 track single sided, double density disk drives. The TM100-1 is the same drive used in IBM's Personal Computer. We purchased a large quantity of new, factory sealed drives from a large OEM who simply bought too many. This is strictly a "one-shot" deal, when these are gone there will be no more. In fact, we are selling these drives below our regular cost as a volume purchaser. At these low prices these drives will not last long. So, if you ever thought of expanding the disk capacity of your computer, now is the time.

Tandon drives are known throughout the industry for their quality and reliability. That is why major computer manufacturers such as IBM have chosen Tandon drives for inclusion in their products. to add disk storage to your PC, buy the controller and cables from IBM and then purchase the disk drive from Priority One and save hundreds of dollars!! (For more information on how easy it is to install the drives, see the first issue of **PC Magazine**, or the first issue of **Personal Computer Age**)

For those of you who want double-sided disk storage, we also have the Tandon TM100-2 double sided, double density drive. Order part number **PITNDTM1002** at **$296.00** each, 2 or more **$270.00** each. We also have a complete line of printers, deskettes, and other IBM peripherals, please call for more information.

SPECIFICATIONS:	TM100-1
TPI	48
Tracks/Diskette	40
Capacity Per Side (unformatted)Double Density	250KB
Access Time	
Track-to-Track	5 ms
Average	75 ms
Head Settle Time	15 ms
Mechanical Dimensions:	
Width: 5.75 in. Height: 3.25 in. Depth: 8.00 in.	
DC Voltage Requirements:	+12/+5
Current Requirements	900mA/ 600mA

PITND1001			Bare Drive
Qty	-	1	$195.00 ea.
2	-	9	$180.00 ea.
10	-	24	$170.00 ea.
25+			$160.00 ea.

for a proposal (RFP)—a description of exactly what you have in mind, as free of jargon as possible. If you need a spreadsheet program that accepts as many as 50 column entries and 50 row entries, make sure the RFP says, "spreadsheet minimum capacity 50x50 matrix" or words to that effect, rather than "spreadsheet for sales projections." Application is important, but it is the capacity you want to ensure.

MAKE UP a benchmark test—a real-life example of the kinds of things you will be doing.

Word Processing Needs

If you need printouts comparable to manuscripts from an electric typewriter, specify "letter quality printer with daisy wheel or comparable impact printing element." A vague expression such as "good quality printer" can be misinterpreted by salespeople. Many dot matrix printers are of good quality, but they cannot substitute for impact printers in some applications, and they cost less than half as much, so the vendor's proposed system price may be too low.

Make up a benchmark test—a real-life example of the kinds of things you will be doing—and take enough material with you to produce a realistic demonstration. Bring real data for spreadsheets and real text for word processors—what you would use if you already owned the machine. Do some real work, and you'll get to know not only the computing capabilities, but the ergonomics as well: the feel of the keyboard, the angle of the screen, the orientation of the disk drives, and the convenience of the controls.

In Kraabel's experience, "Many first-time buyers go in blind. If a man found a diamond on the sidewalk, he wouldn't go to the first pawnshop on the corner; he'd try to find out what it was worth. Those who are supposed to be smart business people often buy a computer from the first guy they see.

"Here's an example of what I mean.

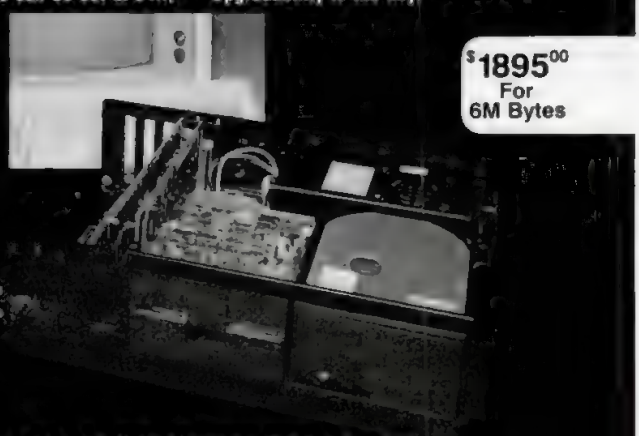

Expand Your IBM P.C.

$229.00

■ Memory Expansion Board

(PC)²'s Expansion Board offers 4 TIMES the amount of memory offered by IBM P.C. Configurations can be set at 64K, 128K, 192K and 256K Bytes. Board can be easily upgraded in 64K capacities. Upgradability is the key!

$1895.00 For 6M Bytes

■ Add-In Winchester Disk System

(PC)²'s Add-In Winchester Disk System is housed within the IBM chassis and is easy to install directly into the floppy slot, reducing desktop space. Also available in 12 and 18 M Bytes capacity.

■ Asynchronous Communications Controller

1 or 2 line capability on one card.
Totally compatible with IBM software and diagnostics.

As little as $85.00

■ DDS-1 Software

(PC)²'s software program doubles the IBM single-sided diskette capacity by using both sides. Increases capacity from 160K to 320K. Used with Tandon TM100-2 disk drive or equivalent.

PODLASERIUM is a trademark of DP's Computer Services Co

Practically every big computer company claims it's number two after IBM. You've got to ask: How? In what way? Sales? Speed of computation? Service staff? Plug-compatible peripherals? Applications software? Probably 100 companies are making computers right now, but in 10 years, 75 percent of them will be gone. They'll merge, be bought out by larger companies, or go bankrupt."

GOOD service can tip the scales in the choice between competing machines.

Hiring a Consultant

Should you hire a consultant to help assess your needs? If no one in your firm has the expertise, or if you are unwilling to take on the extra work, a professional consultant may be a good investment. According to Kraabel, "A consultant can evaluate competing claims and guard against someone in your business building an empire at your expense. At the very least, a consultant can offer a second opinion."

Kraabel suggests choosing consultants in the same way you would choose vendors. "A real expert," he says, "has four qualities: experience, common sense, references, and especially communication skills. Without communication skills the others aren't worth a damn. The best kind of consultant will be someone with expertise in your own field: a legal systems specialist if you are a lawyer; an engineering systems specialist if you're an engineer. If you don't get help from someone who understands your needs, you'll wind up buying a Ferrari when you should have bought a school bus."

Another sound business practice, although some customers are reluctant to follow it, is to delay paying the full amount for a system until you are completely satisfied it works. One writer who owned an electronic typewriter was told that the IBM PC could drive it as a printer. When he bought his PC, he withheld full payment for the system until the interface was

A communications package that's slightly easier to use than MICRO/Terminal.

But a lot less functional.

At MICROCOM we've made communicating with all kinds of computers easier and less expensive. Now, with MICRO/Terminal,™ users of Apple II,™ Apple III™ or IBM® Personal Computers can easily access any in-house or remote database. Directly, with a minimum of effort.
With MICRO/Terminal, communications set-ups and log-on routines are entered only once. From then on they can be called up automatically. A built-in editor lets you change part of a program without re-doing all of it, and you can edit off-line.
Plus you can access your company computer and more than 1,000 commercial services. The price? Under $100.
So that by comparison with other systems, anything else is like talking through a tin can.
Just ask your computer dealer for more details.

NEC's new letter-quality printer gets personal with IBM.

The Spinwriter™ 3550 lets the IBM PC get down to business.
NEC's new Spinwriter letter-quality printer is the *only* one plug-compatible with the IBM Personal Computer. So you get the business applications you've been wishing for. Letter-quality output for word and data processing. Multi-language, scientific, and technical printing. Simple forms handling. Quiet operation. And the reliability of the industry's most popular printer line.

NEC designed the new Spinwriter especially for the IBM PC. It comes complete with documentation and training materials to fit your PC user's handbook. Just plug the Spinwriter in and your PC instantly becomes more versatile and flexible.

More than 8 forms handlers and 50 print thimbles boost PC versatility.
NEC designed the Spinwriter's 8 modular forms handlers to accommodate a wide range of paper and document sizes and types. The easily mounted handlers let your computer print out the forms you need for data processing, word processing, graphics, accounting or other business applications.

The Spinwriter's 50 print thimbles can more than triple your PC's usefulness. They come in both constant pitch and proportional-spaced fonts, plus in foreign language, technical and scientific versions. They snap in and out in seconds, and let you print up to 203 columns on 16-inch paper. They each last for more than 30 million impressions.

This printer's special features make everything look better on paper.
The Spinwriter's software-invoked features include automatic proportional spacing; bidirectional, bold and shadow printing; justification; centering; underscoring; and sub/super scripting, all at speeds up to 350 words per minute.

That big extra, Spinwriter reliability.
Spinwriters have the industry's best mean-time-between-failure rating, in excess of 3,000 hours. In terms of average personal computer usage, that's more than five years.

The Spinwriter 3550 is available at **Computerland** stores, **Sears Business Systems Centers** and **IBM Product Centers** nationwide.

installed on his machine and the PC shown to print through his typewriter as was promised. When it did, he gladly gave the vendor the final check.

"People forget they have a lot more than money to spend," says Jefferson L. Brady, another consultant from Seattle, who points out that customers have what

IF YOU don't get help from someone who understands your needs, you'll wind up buying a Ferrari when you should have bought a school bus.

he calls "commodities" they can use to strike bargains with vendors.

"Ask yourself," he says, "Is my firm the first of its kind to automate in this way? If you are a leader in your field or have high standing in your community, you may be able to trade prestige for software packages or for some custom applications."

Selecting a Peripheral

The same procedures apply to selecting peripheral equipment for existing computer systems: know what you need, ask for competing bids, and get a satisfactory demonstration. Printers, disk drives, plotters, and other add-ons should match the needs of your business. You can easily overwork an inexpensive little printer, and it will break down. Disk drives almost always prove to be inadequate and are probably the most often replaced or upgraded peripheral in the industry.

Maintenance Contracts

Ask about maintenance contracts. Plan on spending approximately 10 percent of the purchase price per year (or 1 percent per month) on keeping it running. Microcomputer components are very reliable, but they are not infallible. Some vendors offer 24-hour house calls; others require you to bring the machine into the shop (service costs less that way). You may or

may not get a loaner while your computer is out of service—ask about that too. Good service can tip the scales in the choice between competing machines.

It may be subtle, but don't ignore the chemistry between you and your vendor. Even if a particular computer is perfect for your business, the personality or attitude of the salespeople may turn you off, and it is not wise to ignore that impression. If you

YOU CAN easily overwork an inexpensive little printer, and it will break down.

get a good product at a good price, you will be doing a lot of subsequent business there, so you should be comfortable visiting that shop and talking to the people who work there.

Apple complained recently that mail-order houses are taking customers away from local vendors even though service, personal attention, and training are crucial to new computer users. People who save money by buying through the mail are still going to computer stores for help. Apple has cut off mail-order suppliers (and gained some lawsuits in the process), while retailers are stressing service instead of price competitiveness. If you are already an experienced computer user, you may be able to order products through the mail and install them yourself, but don't expect help from a vendor who didn't sell you anything.

With all these factors in mind, the selection and maintenance of a computer still depends on a customer's ability to understand what the computer can and cannot do for the business. A very fast adding machine does what someone tells it to do; it does not think, and it does not make company policy.

If a business is running well, computers can help it run better by processing words or information quickly, and presenting them in helpful ways. But they cannot solve a company's problems, and they cannot replace hard work or careful, human understanding. */PC*

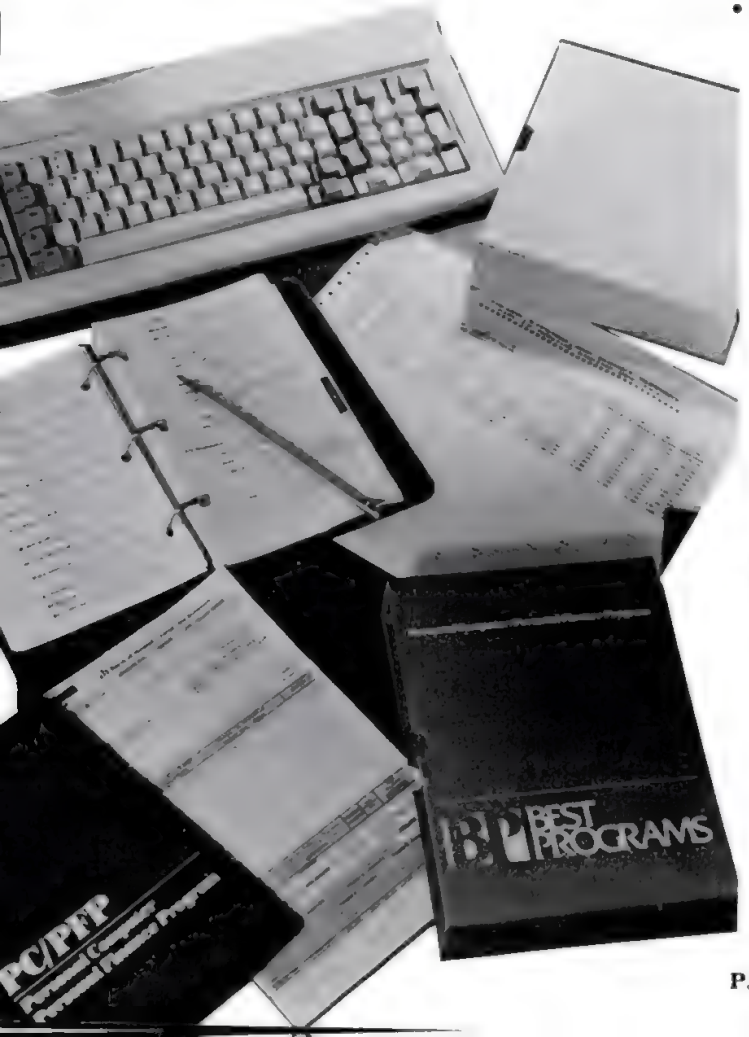

he IBM PERSONAL COMPUTER and the BEST PERSONAL FINANCE PROGRAM

est Program's Personal Computer/Personal Finance Pro-ram is a sophisticated accounting system designed for indi-dual use to specifically match the power, quality, and ver-atility of the IBM Personal Computer. The PC/PFP makes it ossible for you to know as much about your personal finan-es as well-managed companies know about theirs. Before he Personal Computer, an accounting system as sophisti-ated as the PC/PFP would not have been possible without omplicated journals, double entry bookkeeping, trial bal-nces, extensive filing, and hours of manual drudgery. Now s possible for you and your Personal Computer to keep and naintain intricate and highly useful financial information nd reports in little more time than you may now be spend-ng balancing and reconciling your checkbook and bank tatement.

With the PC/PFP your Personal Computer

Keeps detailed, accurate, and completely identified records of income, expenses, and budgets. Each item is filed into one of the 43 categories you have established to suit your needs. Once the data is in the system, the Personal Computer performs all accounting functions needed to provide a wide choice of information and reports so you can wisely manage your money.

- Makes all your financial information and records easily accessible for years.
- Provides a variety of reports of your choice on a monthly, last twelve months, year-to-date, and annual basis. Use these reports to better allocate your income and expenses. For example, you can set a precise budget based on a report of last years actual expenses and then monitor this years budget performance with monthly and year-to-date reports.
- Prints 80, 132, or 233 (with an MX-100 printer) column condensed-character spreadsheet reports to suit your configuration or needs.
- Sorts, tracts, and totals tax deductible items (nine different categories).
- Monitors your credit card payments and debt.
- Reconciles your bank statement using an on-the-screen form. You simply fill it in. PC/PFP calculates any discrepancy and tells you the amount to help you find the source.
- Maintains and balances your checkbook. You have instant checkbook access when ever you need it. Keeps a year's checkbook on a single diskette.
- Automatically rolls over financial information from year to year. Keeps many years of financial statistics on a single program diskette.
- Displays over 90 bar graphs (in color if you wish) of cash flow, budget performance, income or expense category trends, or checkbook balances. These bar graphs let you instantly visualize income, spending, and budget patterns and trends.

System Requirements. PC/PFP Requires an IBM Personal Computer with a minimum of 64K RAM, one or more diskette drives and IBM-PC DOS. For display purposes you have the option of the IBM Monochrome Display, an 80 column black and white or green monitor, or an 80 column (high resolution) color monitor. (Or use your color TV with an RF modulator to view the bar graphs in color). Reports may be printed on the IBM-PC, Epson MX-80, MX-100, or other compatible printer.

TO ORDER

The Personal Computer/Personal Finance Program is available from ComputerLand, other IBM PC dealers, or directly from Best Programs. Send your name, address, and check or money order, to the address below; or order directly by phone. The cost is $95 plus $2.00 postage and handling. Virginia residents add $3.80 sales tax. VISA and MASTERCARD cards are accepted (include number and expiration date).

Performance Breakthrough...

...the CYBERDRIVE™ for the IBM Personal Computer

13.5 or 27 million bytes of disk capacity in a single cabinet with an integrated mini-cartridge tape for secure data backup.

Setting an exciting new microcomputer standard, the CYBERDRIVE[1] combines a full package of features.

It offers new, higher performance levels, with an integrated business-oriented backup device.

As the **CYBERDRIVE** is made available for other systems, immedia transfer is assured regardless of the host hardware or Operating System.

The CYBERDRIVE slashes the seek time dramatically—e.g. the usual 5 Megabyte stepper-motor Winchester disk offers average seek time typically in the range of 100 to 200 milliseconds (incl. head settling).

With the **CYBERDRIVE,** the average seek time across more than five times as much data is only 33 milliseconds (incl. head settling).

This basic speed, coupled with disk cache buffering and a peak transfer rate of 1 million bytes per second, make the CYBERDRIVE a performance champ!

The integrated mini-cartridge tapes used for backup of data allow dumping of (for example) 10 million bytes of data in about 10 minutes... much faster than other tape or floppy disk backup techniques. Hardware read-after-write error checking is incorporated in the tape device.

...And don't fail to ask about our superb lineup of serious business software (also offered in **CYBERDRIVE** format) including:

- **RM/COBOL**[2] compiler-the micro industry standard.
- **MBSI**[3] **RM/COBOL** general business applications (derived from **MCBA**[4] minicomputer packages)... thousands in use... money back guarantee... source program license.
- **CRT!**[1] from Cybernetics (COBOL Reprogramming Tool!)- Program generator for **RM/COBOL** to ease program development and maintenance . . . an alternative to a Data Base System.
- **CBASIC2**[5] **& CBASIC86**[5] compilers... for aficionados of a useful BASIC.

The software is available on a variety of industry-standard Operating Systems including CP/M[5]-MP/M[5] (both -80 & -86), OASIS[6], PCDOS, and UNIX[7]. Inquire for specific details and prices.

FINANCE/ANDREW WILLIAMS

Getting Your Money's Worth

Feeling a tinge of guilt about the extravagant computer you purchased? Find out how owning a PC can be both a tax-deductible enterprise and a way to get a return on your investment.

A year ago you couldn't buy an IBM Personal Computer. But according to *Business Week*, IBM sold 500,000 the first year, and more than 1,000 different products—hardware, software, and firmware—are available on, with, and around the PC. This explosion in computer use is unprecedented.

It has propelled the IBM PC into becoming the microcomputer in the business world. It also means that you, as an owner or potential owner of a PC, have a powerful, easy-to-use, and economical tool with which to manage your personal finances and perform other chores around the house. You won't have to become a programming whiz to get the software you want; a good variety of software is available now, and a great deal more is in the works.

To get the most out of your PC and the investment it represents, you should learn about the ways you can use it to save time and money. You may already know, for example, that your PC can help you make better decisions when the time comes to buy a home, a car, or life insurance. The PC may even increase your wealth by helping you pick better stocks and bonds or manage your real estate holdings more effectively.

This article will outline many of the uses to which you can put your PC. I hope it will stimulate you to think of many others. In fact, the potential computer applications around your home and in your personal financial management are not limited by the [illegible]

by your needs, your free time, and your imagination.

Managing Your Budget

We all need to eat, sleep, and get to work, and we spend a substantial portion of our income providing for these needs. How we go about managing our spending can make the difference between ending the month with a night on the town or over a plate of cold beans. The key to controlling spending is planning, and a budget is the key to implementing that control.

A number of software distributors offer programs to help you budget effectively. One such program is *Personal Financial Systems* from Design Data Systems. You can also use *VisiCalc*, *SuperCalc*, or another of the electronic worksheet programs to set up a spreadsheet tailored to your specific needs.

Your budget should have categories for fixed month-to-month expenses such as rent, insurance, and automobile payments. In addition, it should contain other categories for variable expenses such as food, clothing, and entertainment. The difference each month between your expenses and your income is potentially your savings. Savings should come out of your check before any other expense or they probably won't come out at all.

To manage your budget you will need to keep close track of actual expenditures. You can set up a *VisiCalc* worksheet as a check register or buy one of the checkbook programs such as *Doughflo* from Alphanetics Software to perform that task. Keeping track of your checks will let you know how much money you have in the bank, aid in monitoring your budget, and form the basis for the records required to prepare your tax returns.

You will also want to use your computer to calculate your net worth (see "How Much Are You Really Worth?" *PC*, August 1982). You can customize a spreadsheet or acquire a specialized program such as *Financier* from Financier Inc. This program performs a net worth calculation as part of a personal financial package that includes a budget, a tax and credit card record, and a property inventory.

Your net worth will tell you where you stand financially. It is the starting point for planning for future goals, such as buying a home or retiring. You can use your computer to build a model in which you consider your savings rate, the rate of return on your investments, and the inflation rate to see where you will be financially at some point in the future.

A program like *Household Inventory* from N. F. Systems can be used to list your valuables for use in your net worth statement and as a record for insurance purposes. If this is your insurance record, be sure to keep a copy of the diskette in a safe place, away from your home. In that way you will still have a record of your possessions to make an insurance claim should your home be destroyed by fire, earthquake, or other natural disaster.

Taxes

While a PC may not be able to do anything about the inevitability of death or taxes, it can certainly take some of the sting out of preparing your tax forms. It might even lower your tax bill.

The first, and perhaps most difficult, part of preparing your taxes is keeping good records. This is one area in which your PC can really help out. You can use a data base management program such as Software Laboratories' *Mini Data Base Manager* or the larger *Database Manager* as an "electronic shoe box" in which to file your tax-deductible expenses. Be sure to use this electronic filing system in conjunction with your check register, and be sure to save the actual receipts for later reference, if necessary.

Items in a data base can be sorted by a

number of different codes. In the case of tax deductions, you will want a code for each deductible category such as medical expenses, charitable contributions, taxes, interest, and business expenses.

When it comes time to prepare your tax returns, you can utilize a specialized program such as *The Tax Manager* from Micro Lab. This program will calculate your taxes in a number of different ways—with and without itemized deductions, with and without income averaging. You can try different approaches and choose the one that minimizes your taxes. The program then prints the results in IRS format, ready to send off to Uncle Sam.

If you keep track of your tax deductions and your income regularly, you can check your tax liability at different times during the year. You will then have the information necessary to make estimated tax payments, and you will know whether some further action, such as a tax shelter, is a good idea for you. By the way, the program you buy to do your taxes is itself a tax-deductible expense.

HOW WE GO about managing our spending can make the difference between ending the month with a night on the town or over a plate of cold beans.

Investments

Most of us have a savings account and maybe an Individual Retirement Account (IRA). You may even have a portfolio of stocks and bonds or some income-earning real estate. Whatever you own, a PC will be a powerful tool when it comes to managing your investments. It simplifies record keeping for tax purposes, and it helps you make better, more well-informed decisions. And it is tax deductible for that fraction of the time you use it to manage your investments.

If you have a stock portfolio, you may

PUT YOUR IBM PC TO WORK WITH

THE DATA REPORTER

With the Data Reporter you receive an advanced user-friendly data management tool that delivers more power and flexibility than any other database system available for the IBM Personal Computer. This information management package consists of a unique combination of high speed machine language routines and BASIC programs. The modified "Program Generator" set-up program easily customizes the package to handle your data your way. Powerful search and sort routines let you manipulate your files to your requirements. The revolutionary "Soundex" search routine is included so you do not have to know the exact spelling of the data you are trying to access. Special features include fast data entry and update, calculations, data analysis, label maker, merge, data and program file back-up, reformat, global editing, and more. The report generator has many word processing features which allow you to print reports, form letters, and data in a variety of ways, with or without calculations. The Data Reporter uses single keystroke, menu driven commands with easy to follow prompting; non-programmers will have no problems using this powerful package. Sophisticated error avoidance and recovery techniques prevent undesired results. The BASIC language programs can easily be modified for those desiring special applications, while the machine language routines provide unexcelled speed. Use The Data Reporter for any of your data handling needs.

The program innovators at Synergistic Software will bring you this and other helpful, as well as entertaining, IBM PC software.

want to subscribe to the Dow Jones News/Retrieval Service or to one of the business and financial packages offered by The Source or CompuServe. Once you are connected to such an information service, you will have access to stock prices on the major exchanges (with the exchange required 15-minute delay) and to a cornucopia of news that is from 90 seconds to 90 days old. You can also receive transcripts of *Wall Street Week*, the popular public television program on investment.

To use any of these services you will need a modem and an asynchronous communications adapter in addition to communications software. You will also have to pay minute-by-minute connect charges when you are on the system. These vary with the time of day; the highest rates are charged during business hours and the lowest nights and weekends.

Every investment requires two decisions: when to buy and when to sell. Neither decision is an easy one. The old saying, "Buy low and sell high," is certainly good advice, but it is difficult to practice consistently.

Most professional decision makers utilize a great deal of information. This is true whether the basis for a decision is as straightforward as "sell if the stock falls 10 percent below its purchase price" or as complicated as Joseph Granville's "On Balance Volume System." If you understand the rule, your computer can be programmed to give you the same information as that available to the professionals.

Programs that help you perform this analysis include *Personal Investor* from PBL Corporation and the portfolio monitoring program on The Source. No one can guarantee you will be a winner in the stock market, but your PC can give you instant access to important information, and it can analyze that information with many of the same models professionals use.

If you don't own stock but would like to experience the exhilaration of picking a winner (or the terror of watching your life's savings melt out of sight), *Millionaire* from Micro-Z Applications is for you. It is a combined game and tutorial that teaches about the stock market while offering the chance of becoming a millionaire (or a pauper), at least on magnetic disk.

If you invest in real estate, you can use your PC to evaluate potential deals. Simple Soft's *Quickcalc Real Estate Investor* is one of several programs available for this purpose. Once you have obtained a piece of income-producing property, the PC can keep track of incoming rental payments as well as maintenance expenses, depreciation rates, and interest payments. Accurate record keeping will make it easier to monitor the performance of your investments and prepare the voluminous tax returns associated with owning real property.

WHILE A PC may not be able to do anything about the inevitability of death or taxes, it can take some of the sting out of preparing your tax forms.

THE Benchmark®

Household Chores

With a word processing program such as IBM's *EasyWriter* or MicroPro's *WordStar*, you can do all your writing on your computer. You can dash off a few chapters of your novel between the mailing list for the PTA and your favorite recipe. You can store the names and addresses on your Christmas card list, add a personal note to each Christmas letter, and print the whole thing, including the labels, with the push of a button.

IF YOU have already named your progeny, you can use this program to help you pick a classy name for your pet boa constrictor.

If you have a modem and a communications card, the world of electronic newspapers, vast data bases, electronic mail, shopping, and bulletin boards is open to you with a subscription to The Source or CompuServe. You can play multiperson electronic games with people across the country or exchange child-rearing ideas with someone in another state. You can even drop me a note at *PC* (70370,532 on CompuServe and ST0948 on The Source).

Finally, there is a program for you parents-to-be—*What Do We Name The Baby?* from Metamorphics, Inc. This program will be a great help to those who are so stuck in the world of computers they can't think of any name besides Hal. The program has 2,500 names in its data base, and you can get lists of prospective names according to many different criteria. If you have already named your progeny, you can use this program to help you pick a classy name for your pet boa constrictor or your kid's pet rat.

This article has surveyed some of the ways you can put your PC to work. But if you didn't find the applications you have in mind, get busy. Thousands of other users across the country are waiting for your program. */PC*

SIMPLICITY:

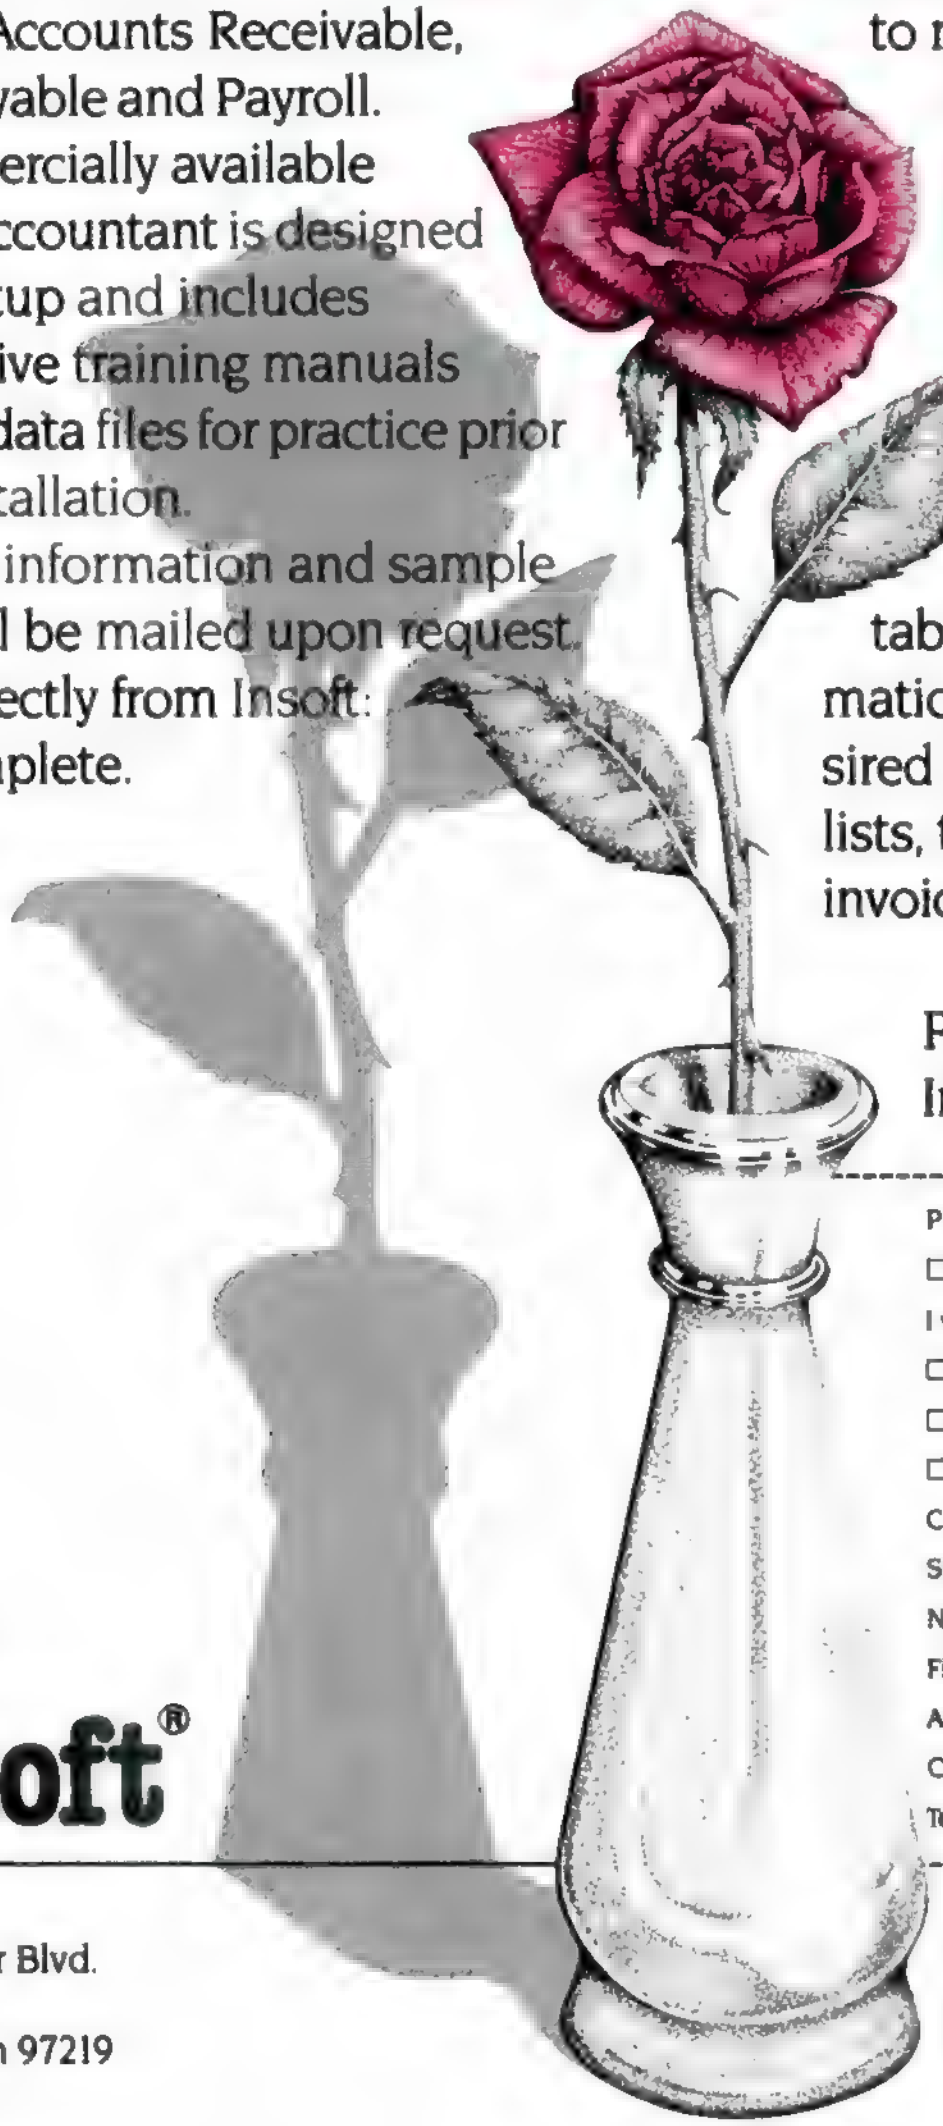

THE ULTIMATE SOFTWARE SOPHISTICATION

THE ACCOUNTANT™ is your alternative to costly and inflexible accounting systems. Organized into four packages, The Accountant is fully menu driven and includes General Ledger, Accounts Receivable, Accounts Payable and Payroll. Using commercially available forms, The Accountant is designed for easy startup and includes comprehensive training manuals and sample data files for practice prior to actual installation.

Detailed information and sample printouts will be mailed upon request. Available directly from Insoft: $365.00, complete.

DATA DESIGN™ is, quite simply, the most easy-to-use data base manager available. Fully menu driven and complete with help screens, Data Design uses the function keys to minimize learning time and operator keystrokes. Designed specifically for the Personal Computer, Data Design is as powerful as it is simple. All information is entered, viewed, changed and printed through user-created forms. Each form may have up to 40 actual and computed fields, and since each table may use as many as 26 forms, information is always ready in precisely the desired format. Data Design is ideal for mailing lists, tickler files, customer/patient records, invoicing and accounts receivable.

Available in October at your local Personal Computer dealer, or from Insoft: $225.00.

Please send me more information about:

Both packages support the IBM (Epson) printer and a variety of hard disks.

Digital Research & IBM™. Everything you need for better programming.

If you have an IBM Personal Computer or Displaywriter, you need several valuable tools to make programming faster and simpler. It all starts with CP/M-86,™ the 16-bit operating system that enables IBM's hardware to use popular application programs and superior Digital Research languages. With CP/M-86 you can use our Pascal/MT+,™ the most complete Pascal on the market; or CBASIC-86,™ the most accepted version of BASIC. We also offer PL/I-86,™ a microcomputer version of the powerful minicomputer language; plus Micro Focus CIS COBOL™ and Level II COBOL™ for most common business applications. Other special Digital Research tools include the Speed-Programming Package™ for streamlined programming, and SID-86,™ our symbolic instruction debugger that takes the work out of code debugging.

Whether you're a professional programmer writing applications for the IBM market, or the owner of a Personal Computer or Displaywriter, Digital Research has everything you need for programming. For more information call or write Digital Research. (408) 649-5500 or (408) 649-3896. 160 Central Avenue, Pacific Grove, California 93950.

$30 lets you take advanced VisiCalc® lessons from VisiCalc's creators.

Introducing SATN from Software Arts, creators of the VisiCalc program. SATN is a publication offering on-going support to all VisiCalc users.

SATN helps you discover the full power of VisiCalc, including advanced methods to help develop your own VisiCalc applications.

Each issue of SATN is filled with techniques and information to help you expand your understanding of VisiCalc functions.

Past issues include articles on mortgage calculations, playing "what if" with IRA's, internal rate of return calculations, scheduling with VisiCalc.

Bonus Subscription Offer

If you subscribe by Dec. 31, 1982, you'll receive a free issue of SATN. Just return the coupon or call our toll-free number to order.

Full Refund Policy

If you are not completely satisfied with your first issue of SATN, let us know within one month and we will refund your money.

SATN is your personal pipeline to the people at Software Arts who invented VisiCalc. Their knowledge and experience with VisiCalc will benefit you with each and every issue.

20 Megabyte Hard Disk Sub-Systems for Under $3500!

Our Systems Are Compatible with Your

- TRS-80® Model I, II, III, XVI
- Apple II®
- IBM® PC
- NEC™
- S-100™
- Altos™
- NorthStar™
- Superbrain™
- Panasonic™
- Epson™
- Heath/Zenith™
- and Others

Now Available!
Optional 10 Meg. Tape Back-up

Now you can expand the capability of your microcomputer with cost-effective mass storage from Q.C.S. Our integrated family of 6-, 12-, 20-, and 40-million-byte systems lets you operate your micro with the speed, convenience, and proven reliability of systems costing thousands of dollars more! And as your needs grow, Q.C.S mass storage can grow too. You can start with an entry-level 6-million-byte system and expand 80 million bytes ... without scrapping your existing programs or operating system.

The completely assembled and tested system includes:

- Switching power supply
- Winchester drive
- Host adapter card
- Sealed case
- Expansion (enclosure, controller, and power supply designed for future backup hardware or increased storage)
- Software
- Auto-attach CP/M
- Hard disk utilities
- Realtime clock
- Formatting program (assigns alternates for any weak sectors detected during formatting—assuring the lowest possible error rate)
- Warranty (a full one-year warranty on all parts and workmanship)

Also available:

- Attach program for TRSDOS and OASIS
- **New CP/M dynamic generator:** configured software; menu-driven for 6-, 12-, 20-, 40-, 80-megabyte drives

The following systems software can be utilized:

TRS I, III—attach software for DOS 4.0,* LDOS
TRS II, XVI—CP/M Racet for TRSDOS,* Turbo DOS, OASIS
TRS Models II and **XVI** use 6 Meg for CP/M and 6 Meg for TRSDOS.
Apple—CP/M and DOS 3.3
NEC—CP/M
S-100—CP/M
Heath/Zenith—CP/M
IBM—PC DOS, USCD, etc.

* Available at an additional cost.

Quality Computer Services

BIG BLUE SuperCharger

for Your IBM PC with Over 35% More Power and Throughput Than a Standard 4MHz Z80 System!

Here's what BIG BLUE includes:

- **Dual Access I/O**
- **Allows for Dual Processing**
- Serial port and parallel port
- Ability to run existing CP/M-80 programs
- Z80B microprocessor running at 5.5 MHz
- 64K memory
- Hard disk interface
- Calendar clock

ALL FOR ONLY $595.00

The all-on-one board all in one slot

still leaves you room for expansion.

BIG BLUE gives your IBM PC more memory capacity and expandability

Plug in BIG BLUE and get a computer-within-a-computer

BIG BLUE, an auxiliary processor PC board for your IBM Personal Computer, lets you run thousands of programs written for the CP/M operating systems.

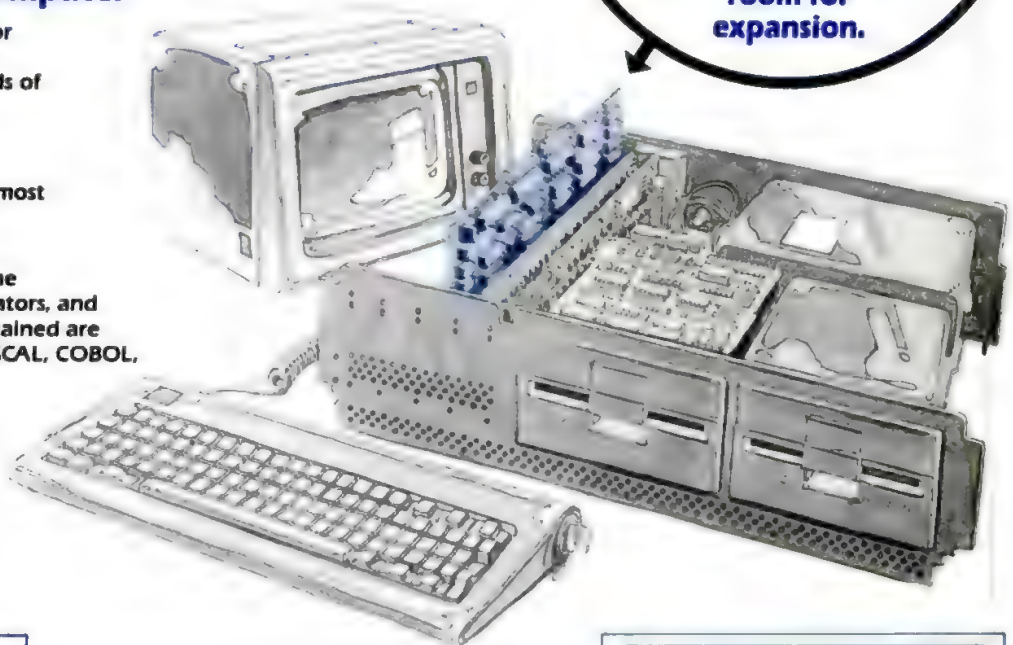

CP/M has been around since 1975, and contains some of the most sophisticated, proven programs ever written.

The immense library includes time managers, spreadsheet manipulators, and office packages. Languages contained are BASIC, ALGOL, FORTRAN, C, PASCAL, COBOL, PILOT, and many others.

Edit and format text. Check spelling and indexes. Discover the ease of word processing.

Enjoy games such as Chess, Adventure, and Star Trek.

Let your imagination run wild! Put **BIG BLUE** to the test.

AVAILABLE SOON!

DATAEASE

A TOOL FOR MODERN TIMES...

DATAEASE is a new data base system designed to be user friendly through the use of familiar terms and procedures found in an office environment, a menu-oriented design making full use of function keys and display features.

Requires no programming expertise

Sophistication via relational data structure makes data handling simple and requires no programming expertise. A flexible forms editor allows the defining of data entry forms and data retrieval by answering simple questions. In turn, the forms and text provide fast and accurate data collection and retrieval via a minimal number of keystrokes.

Advanced technology

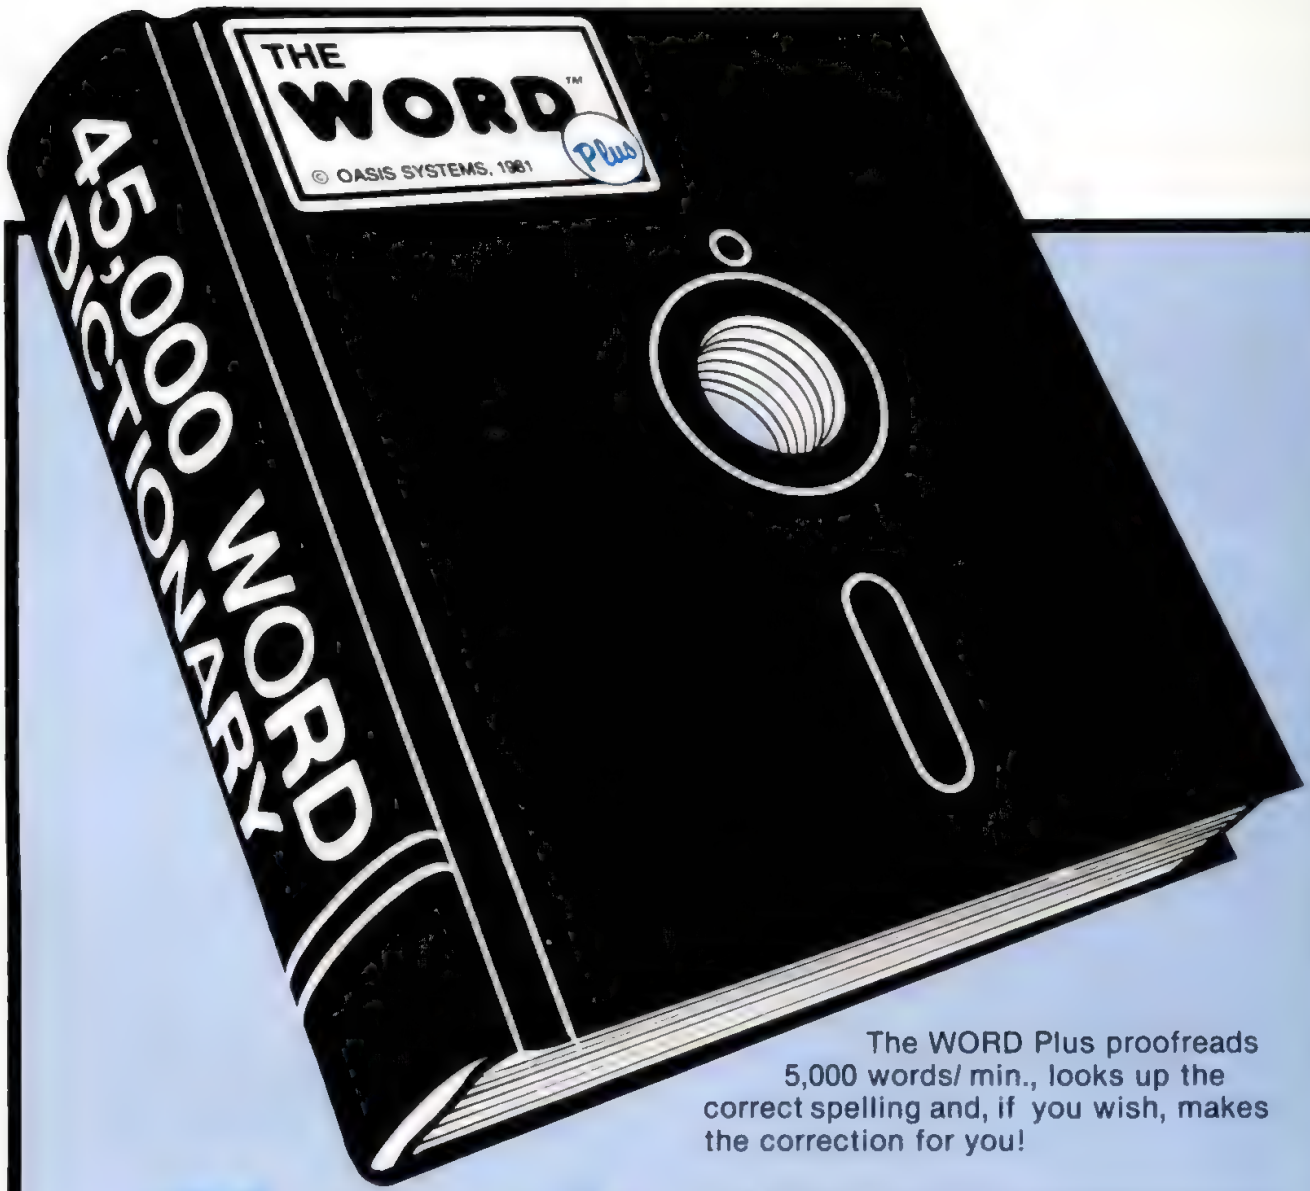

DATAEASE is programmed in 'C' for efficiency and utilizes relational data models which provide greater flexibility, usually only found in large mainframes. Designed for common business applications, DATAEASE requires 128K of memory and 600K of disk storage. It uses B-tree indices for efficient accessing along with cache memory to retain the most recently used disk sectors which reduce disk access up to fifty percent. The system provides password protection with three levels of security.

Asking questions or generating reports

A simplified, yet comprehensive English-like query language guides the user in constructing sentences by selecting from multiple choices. Selection of any arbitrary subset of data while sorting and performing arithmetic calculations and summary functions are standard features. The report editor will automatically produce report formats or provide report customization which is ideal for mailing list applications.

PC On A Budget

Generic components and careful shopping will enhance your PC options without draining your bank account. You can splurge on extra memory and a dot matrix printer, and still be a smart buyer.

Price is a major factor in the minds o many computer shoppers, especially fo the small-business or home user. As a re sult, many buyers have shunned the IBM looking instead at what they perceive to be a low-price alternative. Surprise: The PC can be a low-price alternative.

How much you pay for any compute system depends on how it is equipped and where you buy it. As far as the IBM brand name is concerned, you have a limited choice as to where to shop. It is unlikely

ou will find a significant discount unless ou buy five machines or more. But many irts of your system don't necessarily have be emblazoned with those three magic nd sometimes expensive) initials.

An IBM PC is really a collection of omponents that can be purchased all at hce from an authorized IBM dealer or in ieces from a variety of dealers. The enterpiece is the system unit, which, in its inimal configuration, comes with 16K of emory, a keyboard, the Intel 8088 central processing unit (CPU), and other necessary hardware. This minimal system is available from IBM, ComputerLand dealers, Sears Business Centers, and a select group of authorized independent dealers.

The 16K system unit with a keyboard retails at IBM Product Centers for $1,265. You will sometimes see it for a higher price but rarely for less. This initial investment represents less than a third of the typical system cost for the hardware alone. The rest of your hardware money goes to

the display, the disk drives, additional memory, a printer, and other devices.

Expandable and Flexible

One of the nicest features of the PC is the ability to equip it according to your needs and budget. It is possible to buy the 16K system and a color/graphics adapter ($300), and use a cassette recorder for data storage and a TV set as a display. This $1,565 starter system will help you learn programming, but you will be hard pressed to find software. Very few users settle for such a limited system.

You can also spend in excess of $15,000 for your PC system. Start with a 64K system with monochrome display and two 320K floppy disk drives ($3,100), upgrade it to 256K of memory (about $900), add an IBM serial port ($150), a Hayes direct connect modem (about $300), a letter quality printer ($1,000 to $5,000), and you can spend $10,000 before you buy your software. Add a 20 megabyte hard disk, and your accountant has $15,000 worth of equipment to depreciate. This is only the beginning. Scanning the pages of this magazine will tempt you with thousands of dollars worth of additional toys, tools, and software to enhance your PC and drain your bank account.

Figure 1: *Comparative Costs*

Item	IBM	Apparat
16K system	$1,265.00	$1,265.00*
Additional 48K	270.00	75.00
Disk card	220.00	220.00*
Two 320K disk drives	1,300.00	630.00
Monochrome/printer card	335.00	335.00*
Monochrome display	345.00	345.00*
80 CPS dot matrix printer	555.00	499.00
Printer cable	55.00	30.00
TOTAL	$4,345.00	$3,399.00

*Purchased from IBM Product Center, not available through Apparat.

A Typical System

A happy medium does exist. I put together a typical system that could serve the needs of many users. It has 64K of memory, two (320K) dual-sided floppy disk drives, an IBM monochrome display, and an IBM (or Epson) dot matrix printer. You could save about $400 by using single-sided drives, but for most users the extra storage capacity of the dual-sided drives is

MEET THE PROGRAMMER!

If you can't find a business software package that does everything you need, or if you want to custom design specialty programs for your business . . . MEET THE PROGRAMMER.

THE PROGRAMMER is a BASIC-language program generator which is powerful and highly-versatile, yet easy to use.

It does everything but actually create program ideas . . . those come from you. But THE PROGRAMMER can implement your ideas by writing the appropriate lines of BASIC.

You control THE PROGRAMMER by choosing various functions from a series of "menus". When you've finished a program, save it on another disk for future use, and begin creating again.

THE PROGRAMMER comes with a complete instruction book which clearly explains how to create programs for almost any application.

If you're tired of buying software that just can't do the job . . . meet THE PROGRAMMER. The solution to all of your business software problems.

THE PROGRAMMER works with the Apple II Plus® (48K Applesoft® or 64K CP/M®) and the IBM Personal Computer®. Get THE PROGRAMMER at your local software retailer, or call (800) 348-8558 to order. (Indiana residents, call (219) 879-4193). MasterCard and VISA accepted.

THE PROGRAMMER $495.

ADVANCED OPERATING SYSTEMS

well worth the cost.

At an IBM Product Center this system costs $4,345, but if you shop around, you can put together a virtually identical system for about $1,000 less. Part of the system depicted in the chart below was purchased at an IBM Product Center and the rest through Apparat, a mail-order company that advertises in *PC* and other magazines. Although I am not endorsing Apparat or any other vendor, I can say that the disk drives are identical to those sold under the IBM label (manufactured by Tandon), that the RAM chips are the generic equivalent to the RAM sold by IBM, and that the printer is the same Epson MX-80 that IBM sells under the name IBM 80 CPS Matrix Printer. Apparat's printer cable is electronically the same as IBM's though not as sturdy. Figure 1 offers some comparative costs.

I KNOW OF no way to get a monochrome display as crisp and readable as IBM's.

Shop Around

Apparat is one of many companies with products listed in this issue, and pricing is competitive. Tandon drives (identical to IBM's) are available from several other sources including Professional Data Systems, which sells the dual-sided drives (100-2) for $279 (IBM charges $650) and single-sided drives (100-1) for $208 (IBM charges $450). Maynard Electronics has a $195 disk controller that is purportedly identical to IBM's $220 unit. For $275 Arby Electronics will sell you a disk controller that also includes a parallel interface.

Memory Upgrade

Two levels of memory upgrade are available. If you buy a 16K system, you will undoubtedly want to upgrade to at least 64K. Once your system is up to 64K, you can add an additional 192K or more by plugging a memory board into one of the five expansion slots.

IBM sells a kit to upgrade from 16K to

THEY SAY IT ALL... WE DO IT ALL!

ANNOUNCING THE C86™ C COMPILER— THE COMPILER THAT SPEAKS THE LANGUAGE OF THE FUTURE!

Kernighan and Ritchie's book, *The C Programming Language*, is the key source for C. Just as fundamental is the C86™ C Compiler.

The C86™ C Compiler is especially designed for the IBM® Personal, IBM® Display Writer, CP/M-86® and MS-DOS®

For further information on the C programming language and the C86™ C Compiler, please contact:

LAS VEGAS BLACKJACK™

Be A Winner. Amaze Your Friends. Become a Pro-Class Blackjack Player. If you can beat this game, you can win at the tables. A faithful reproduction of Las Vegas "Strip" Blackjack including multi-deck play (1 to 10 decks), Splits, Double Down, and Insurance bets. Teaches card counting with any card weight and keeps a running count. The illustrated 35 page instruction manual is itself a comprehensive primer on how to play winning blackjack.

Lots of sounds and graphics for realism, including movement of cards and chips. Requires IBM* Personal Computer, 64K memory, IBM DOS, BASICA, and a green screen or color 80 column display. Order your Las Vegas Blackjack, today! Only $39.95 including postage. (CA residents add 6% tax.)

Available at COMPUTERLAND® and other fine computer retailers.

NOW, YOUR IBM P.C.™ CAN GENERA
PROGRAM CODE IN MINUTES..

Is it magic? No, not magic, but an amazing software package that generates basic code for programs use your IBM P.C.™ computer. **THE CREATOR™** by Software Technology for Computers will generate BA programs in final form in a matter of minutes. No programming knowledge necessary.

THE CREATOR™ is easy for a beginner or expert to use. Even a novice can produce professio programs. The programs you generate will be accomplished quickly, easily and error-free the first time every time. Under most conditions, the programs generated will be almost complete, leaving only a statements at most to input yourself.

THIS PROGRAM IS FOR YOU. If you have put off writing your own program because you "d understand BASIC," or "don't have the time," then **THE CREATOR™** is for you. Use **THE CREATOR™** save time in generating your own programs or as a method to merge new ideas into your existing progra

All the functions you need are contained within THE CREATOR™. It generates input and output routin file structures, sort and search routines, dollar formats, totals and more by just answering simple Engl questions. Sound amazing? Well, it certainly is!

THE CREATOR™ comes with extensive documentation and a detailed tutorial to provide you with unparalleled level of trouble-free, user-oriented performance. **THE CREATOR™** is available for only $ (U.S.). If you buy any program this year, this one is a must.

For a personal demonstration of **THE CREATOR™**, contact your local dealer. If your local dealer does carry **THE CREATOR™**, ask him to give us a call.

*Versions for other computer are under development.

64K for $270, but you can purchase your RAM chips from an electronics store or mail-order house for as little as $2 per chip (you need 27). Several companies manufacture memory chips compatible with the IBM. The RAM chips that came with my PC were marked Texas Instruments 4116. Any equivalent chips will do; just be sure they are 4116s operating at no more than 200 nanoseconds. Certain companies that advertise in *PC* sell the entire set of 27 chips needed to upgrade from 16K to 64K.

Monochrome Display

I know of no way to get a monochrome display as crisp and readable as IBM's, especially if you plan to do a lot of word processing. IBM's monochrome is a special display and requires the IBM monochrome card. Jack Strick and Associates, however, offers a 12-inch NEC green monitor and a cable for $249 ($95 less than IBM's) that plugs into IBM's monochrome card. Even without this special cable, you can plug a standard video monitor into an IBM as long as you use the PC color/graphics card. The display from this card won't be as crisp as the monochrome, but it's quite good. Black (or green) and white monitors sell for as little as $90.

IF YOU WANT to display more than 40 columns per line, a monitor is almost mandatory.

Color Display

IBM doesn't make a color display, so you're totally on your own in that department. Your cheapest option is to connect the PC to your color TV. The resolution, however, will not be as good as with a true monitor. If you want to display more than 40 columns per line, a monitor is almost mandatory. Color monitors start at about $300, but some of them are not capable of displaying the full 80 columns and 16 colors the PC can generate. Any color monitor requires the IBM color/graphics card.

Plug-In Cards

As you may have already noticed, this issue of PC covers a wide variety of plug-in cards to enhance the performance of your PC. Because of the PC's ability to address up to 1 megabyte of memory, a number of companies, including IBM, have manufactured boards with additional RAM. Memory boards can have as little as 16K or as much as 1024K of additional RAM. When the PC was first announced, IBM was charging $540 for a 64K memory board. IBM has recently lowered the price to $350, which makes its board competitive with others, but it doesn't offer multifunction memory boards.

Combining several functions on one board not only saves money, but also makes judicious use of the PC's five expansion slots. The more functions per

Introducing low cost, IBM compatible disk drives

Up to 2.6 megabytes of IBM formatted storage

Low cost internal/external drives
Plug the INTERFACE IBM compatible disk drives into your IBM cabinet or add on to your existing drive configuration. INTERFACE drives can be used externally or internally, in a variety of configurations. To give you increased storage capacity up to 2.6 megabytes.

Internal Drives
- *Single sided drive with 168K bytes IBM format $215
- *Double sided drive with 325K bytes IBM format $335
- **Quad drive with 650K bytes IBM format $450

External Drives: (Includes drive, power supply, cabinet and cable)
- *Single sided drive with 168K bytes IBM format $325 (Maximum two drives externally)
- *Double sided drive with 325K bytes IBM format $445 (Maximum two drives externally)
- **Quad drive with 650K bytes IBM format $560 (Maximum two drives externally)
- Quad software diskette $95

*Compatible with 1.1 DOS
**Requires Quad software diskette

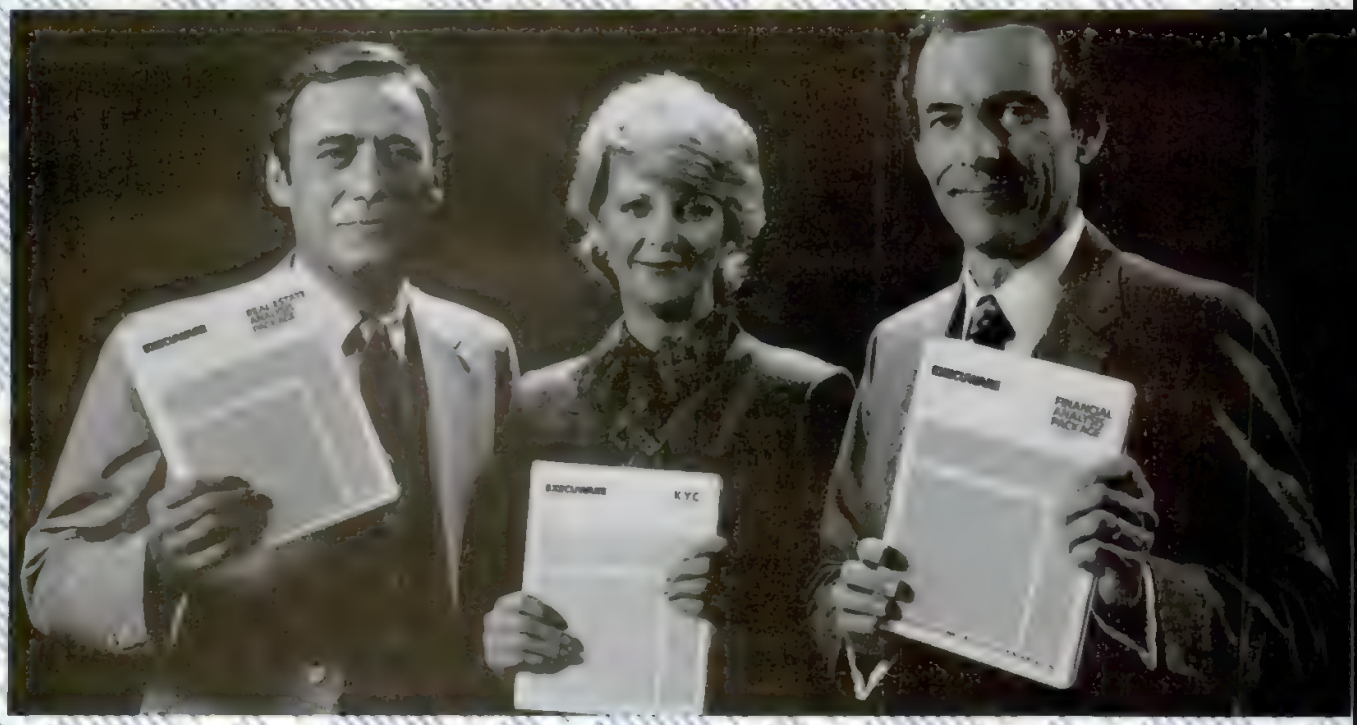

Up to four drives
You can have as many as four drives operating with your IBM personal computer. Giving you an incredible 2.6 megabytes of formatted storage.

Eight color cabinets to choose from
INTERFACE gives you a choice of color coordinated cabinets to choose from for external drives. Colors include standard off-white, an IBM-like blue, lime green, dark green, bright orange, brilliant yellow, black, and chrome.

Unconditional warranty and service
90-day unconditional warranty plus service center for out-of-warranty service. For more information about the IBM compatible disk drives, call or write today:

EXECUWARE™...THE SOFTWARE THAT MEANS BUSINESS.

Real Estate Analysis For Solid Investments.

Knowledge and insight are needed in the highly competitive real estate market. The Real Estate Analysis Package from Execuware™ gives you just that.

Store up to 15 investments, allow up to 20-year projections, utilize the Rule of 78's, ACRS Depreciation Methods and multiple and/or assumable loans.

Now investors, tax advisors and accountants can get help previously available only on mainframe or minicomputers.

Perform property income analysis. Calculate after tax results if sold or exchanged. Highlight tax sheltering effects. Simulate inflation. Know when to buy, hold or dispose. The solid solution comes from Execuware.™

Know Your Client (K.Y.C.) The Names You Need.

Don't crowd your desk or your head with names, numbers and facts. Let K.Y.C. from Execuware™ remember for you.

What company is a caller with? Can't find the name of the person you need to call at a firm? K.Y.C. gives you the information you need instantly: name, title, firm, phone number, date and subject of your last call.

K.Y.C. tells you what clients haven't been contacted in 30 days or 60 days. Reminds you of important follow-ups. Lets you make notes as you talk. No more embarrassments. True new efficiency! That's K.Y.C. from Execuware.™

Financial Analysis For Sound Decisions.

Lease or buy? What are your capital financing alternatives? Does the Economic Recovery Tax Act of 1981 change your choices? Once you had to guesstimate or use expensive mainframe or minicomputer programs. Now there's Financial Analysis Package from Execuware.™

Now it's easy to perform a long list of vital functions like loan amortization schedules, depreciation schedules, lease vs buy analysis and net present value schedules.

You can determine the internal rate of return, variable rate loan or lease schedules and much, much more. If you make financial decisions, make way for Execuware.™

card, the fewer slots you use up. AST Research offers an expandable 64K Combo+ card. Not only can it be upgraded to 256K, but it can serve as a serial port (for a modem or printer), a clock/calendar, and a parallel port (for a printer) as well. The board with 64K of memory sells à la carte for $435. Each option is $60, or you can order the board with all three options for $595. Additional memory is $145 for each 64K. Seattle Computer sells a RAM+ board with a built-in serial interface. Prices start at $475 for 64K and $150 for each additional 64K.

Assembly

Assembling your own system is easier than you might suspect. But if you're at all squeamish about mucking about in the bowels of your expensive new unit, you might be better off buying the assembled system from a dealer or seeking help from a service technician or a consultant. Check with your dealer's service department to see if they will assemble your system. You will have to pay for the service, but the bill might be less in the end. You can also look for consultants to help you assemble your system; some are listed in this issue.

Most plug-in cards slip right into a cage at the back of your system unit. Installing disk drives is a little trickier, but not difficult. Although installing RAM chips isn't difficult, you have to be careful. Be certain that the notches on the ones you install are lined up with the nine chips already soldered to the board. Try not to bend any pins. If you do bend them, you can usually straighten them out, but they may break. Any incorrectly installed chips are likely to be destroyed as soon as the power is turned on. Seek help if you're not sure what you're doing.

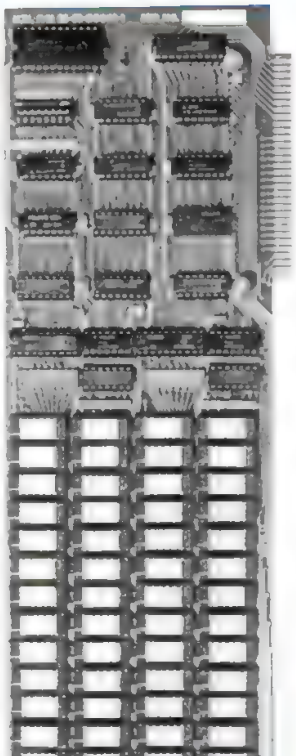

Service

What if something breaks? If you buy from a local dealer, the store will usually handle any warranty repairs or replacements if the problem occurs within the warranty period (usually 90 days). If a mail-order component breaks, you must remove the component and send it back to the mail-order house or manufacturer. You could also take your computer to a local service center, which is probably a lot easier than sending the part through the mail. They will of course charge for their work unless they can be reimbursed by the manufacturer.

IMPROVE YOUR PC'S PERFORMANCE

Install the *Versa*-RAM Memory Board!

To get the most out of your IBM PC, you need a memory board that expands to meet memory requirements as your system grows... and that means the versatile, expandable *Versa*-RAM!

- up to 512k bytes of error-checked memory on one board
- entirely assembled and tested, full year warranty
- fully socketed for future expansion
- completely compatible with all available hardware and software
- easy, five-minute installation
- fast delivery from stock

At unbeatable prices! 64k $399, 192k $619, 256k $729, 512k $1169, 64k expansion chip set $125. Other versions available. *FREE* with 192k and larger versions: *Versa*-Ware™ RAM disk and print spooler software package.

Coming soon! Memory + I/O board, expandable 64-to-256k, with two RS-232 serial ports, one parallel printer port for MX-80, etc. Will support all IBM software.

Available at ComputerLand and other IBM PC dealers. For more information or name of your nearest dealer, call us toll free 1-800-348-3377 (Indiana 219-664-5741).

Memory Technologies, Inc.
25 Main Street · Box 6, Twelve Mile, IN 46988
Toll free 1-800-348-3377 (Indiana 219-664-5741)

Before you order equipment, inquire about whether your local store or repair center will work on equipment you purchase elsewhere. I randomly called four ComputerLand dealers regarding store policy. Three said they would work on a system purchased elsewhere if their technicians were familiar with the component. One admitted his overworked service department discriminates against systems purchased elsewhere.

Research, Risks, and Time

Putting together your own system is going to involve research, risks, and time. First you have to scrounge up the various components. *PC* is the best research tool: This special issue lists more than a thousand products to enhance your PC. But are they going to be available when you need them? If you do plan to order your system in components, call the vendors before placing orders, to find out when they can ship and to coordinate the orderly arrival of your components. Some manufacturers advertise parts prior to availability for shipping.

See Your Local Dealer First

Don't overlook your local dealer as a source of bargains. Many of the components mentioned here and elsewhere in this issue can be purchased from (or ordered through) ComputerLand or other dealers. Some stores that don't carry the IBM PC do carry compatible software and hardware. You will find a great number of advantages to buying locally even if your system doesn't require servicing. If you see something you want, ask your local dealer before sending a check or calling an 800 number. Even if a local dealer's price is higher, the service and peace of mind might be worth the difference.

PUTTING together your own system is going to involve research, risks, and time.

IBM Knows What It's Doing

IBM makes a great computer and made the surprising decision to create an open system, allowing third-party hardware and software vendors the freedom to creatively enhance the IBM PC system. What IBM may lose in add-on equipment sales, it will more than recover in increased computer sales and customer goodwill.

IBM is not immune to the effects of competition. It has lowered many component prices since initially introducing its system. When this article was first drafted, the price differences between IBM and the other companies were greater than they are now, and I suspect IBM's price drop will cause others to lower prices even further. In the meantime, it's a buyer's market with plenty of options. ***/PC***

8" DISKETTE FOR IBM PC

The 8" diskette is a universal standard for saving and interchanging data and programs between computer systems. We have developed a modification to the IBM diskette controller card and over ten utility programs that enable the user to interface his IBM PC to other computer systems including all IBM models such as the 3741, S/1, S/23, S/34, S/38, Displaywriter, TRS80 Model II, DEC, NCR, Honeywell, Univac and CP/M systems. One or two sided, single (FM) or double (MFM) density recording with 128, 256, 512, or 1024 bytes/sector is supported. The utility programs can copy files between the PC and hundreds of different systems using IBM data interchange, a CP/M file directory, or by specifying the starting and ending file sector numbers. Automatic ASCII-EBCDIC conversion is provided. The system can also be used as a 1.2 Mbyte drive to backup a hard disk or as a regular DOS drive for files.

The complete system price including enclosure, drive, cable, and all utility programs is $1295. An optional 240VAC 50HZ or 115/240VAC DC version is available for an additional $70. For users that want to use their own drives, the programs and documentation are available for $695. Payment is by check or COD with delivery within 10 days. Size is 9" x 5" x 19" —weight is 25 lbs.

Verbatim Datalife™ flexible disks now come in a bold, new storage box. But more important, they now come to you with a five year warranty.*

We can give you a warranty this long because we're confident the way we make Datalife disks will make them perform better, last even longer.

All of our Datalife disks feature seven data-shielding advances for greater disk durability, longer data life. To protect your data from head-to-disk abrasion. To shield your data against loss due to environmental conditions. To insure a longer lifetime of trouble-free data recording, storage and retrieval.

Every Datalife disk is extensively tested under the most extreme conditions. Critically-certified to be 100% error-free. Assuring you an added margin of performance, no matter what the operating conditions.

And we back it up with a five year warranty. Five times longer than the industry standard. Because Verbatim is the standard of excellence.

For flexible disks you can depend on–a lot longer –call (800) 538-1793. In California, or outside the U.S. call (408) 737-7771 collect for the name of your Verbatim dealer.

If you want longer data life, keep all your data on Verbatim Datalife. Our name is the promise. Our warranty is the proof.

Verbatim.

Here's the most exciting part of Verbatim's new packaging.

5 Year Warranty

PC Product Guide

In creating the *PC* Product Guide we received more press releases than we ever expected. If you've wondered about PC software, the kinds of monitors available, or if you've tried to find PC bumper stickers, you'll want to read ahead.

We've spent the last 3 months finding out what is available in PC products. After gathering and sifting through the deluge of information, we divided the listings into five categories: Hardware; System Software; Applications Software; Educational, Personal, and Leisure Software; and Support.

The Hardware category includes products such as disk drives, monitors, and printers. System Software features operating systems, languages, and utilities. Applications Software includes programs for accounting, word processing, and data management. In Educational, Personal, and Entertainment Software we have listed games, educational programs, and software for personal and home use. Support guides the reader to accessories, publications, services, user groups, and dealers.

Each of the five sections has an introduction followed by product listings. The introduction describes features and applications for the products in that category, and, for readers new to computers, we've defined relevant terms such as system software, electronic bulletin boards, and printer buffers.

Each listing includes the product name and a description of the product based on information from the manufacturer. Following are list price and requirements, and the manufacturer's name, address, and telephone number (note that in some cases this information was unavailable).

Do you wonder whether you can purchase a letter quality printer for the PC or find a book to learn programming? Well you can. You'll find what you need in the PC Product Guide. We're impressed by both the range and quantity of products and support for the PC. We think you'll be impressed too.

PC Product Guide listings were prepared from press releases submitted by manufacturers and distributors. We were unable to test the products listed, and we regret any incorrect information or omissions.

Hardware

The Hardware section of the PC Product Guide consists of six groups of products: Boards, Storage Devices, Monitors, Printers, Modems, and Miscellaneous Hardware. Many kinds of Boards are described. (Note that the terms card, adapter, and interface are also used to refer to boards.) Memory expansion boards increase the amount of memory in your computer. Clock and calendar boards are used for applications requiring dependable time and date information. Color/graphics boards allow you to attach a monitor to your PC to display color and graphics, and input/output (I/O) boards enable you to transfer information from the PC to other devices, such as a printer or a modem. Combination boards combine features such as adding memory, a clock, or I/O facilities.

When you add a board, make sure you have an unused expansion slot inside the computer. If all the slots are filled, you can get an expansion chassis, which provides slots for additional boards. Also remember that to add a memory board, the PC must already have 64K of memory.

Storage devices are components such as floppy disk drives, Winchester hard disk drives, cartridge disk drives, and magnetic tape systems. The personal computer also comes with a cassette tape interface, a low-cost method of storage; however, many people prefer disk storage because it offers greater speed and direct access to large amounts of data.

Floppy disks are magnetic storage disks that generally come in two sizes, 5¼ inches or 8 inches in diameter. Floppy disks are inserted into disk drives that are either single- or double-sided. Single-sided drives record on one side of a disk, and double-sided drives record on both sides, giving more storage space. Many disk drives fit into the computer itself, but some are external. Cartridge disks, like floppy disks, can be inserted into the disk drive and removed, but they have more storage capacity than floppy disks. Winchester disks are permanently mounted within the disk drive. These systems also have greater speed and storage capacity than floppy disks.

Some of the hardware described in the storage group are hard disks with circuits that sense power failures and safely complete functions before shutting down. Shared hard disk systems enable several personal computers to use a single hard disk. You can buy kits and assemble the components of a hard disk drive yourself. Magnetic tape systems are available for backing up data stored on hard disks.

When choosing a storage system, consider cost, the amount of data you have to store, and how much speed you need to provide access to data. As we said earlier, cassette tape provides low-cost storage. Floppy disks provide quick, direct access to data, and hard disks enable you to store large amounts of data. Remember that when you choose a disk drive system, you will need a disk operating system, such as PC-DOS or CP/M-86, and a disk interface board, usually provided by the drive vendor or another source. If you choose a hard disk system, you will need at least one floppy disk drive.

The monitor is the part of the computer that looks like a television screen. Monitors are used to display characters and graphics. With the personal computer you have a choice of one-color (monochrome) monitors or monitors that display up to 16 colors. You can also attach a television set to your PC and use it as a monitor. A board is needed to connect a monitor to the PC. The monochrome adapter is used for the IBM monochrome monitors, and a color/graphics adapter is needed to attach a color monitor or a television set.

The products in the PC Product Guide offer a choice of one-color monitors in green, amber, or black and white. Black and white monitors are usually the least expensive, but many people find that amber and green reduce eye strain. Color monitors enable you to display up to 16 colors and color graphics for charts, graphs, and games. Some monitors display 40 columns across the screen, while others display 80 columns. A television set used as a monitor will display only 40 columns.

Before you choose a monitor, see a demonstration. Make sure the kind of graphics you need can be produced, that the characters are clear, and that the color is easy on the eyes, particularly if you use the PC for word processing.

Interchangeable Terms

THE FOLLOWING TERMS ARE USED INTERCHANGEABLY: serial interface, serial port, asynchronous communications adapter, async card, RS-232 interface, RS-232-C interface, EIA RS-232-C interface.

Also used interchangeably are parallel interface, parallel port, Centronics interface, Centronics-compatible interface, Centronics parallel interface. These terms often appear followed by "card," "board," or "adapter." Check with manufacturers and dealers before making a purchase to assure that hardware is compatible with your IBM PC.

One of the most useful computer peripherals you can buy is a printer. A printer produces reports of data, documents prepared by word processing, and program listings. Several kinds of products are described in the Printer group.

Typewriter interfaces are devices that convert an electric typewriter into a printer compatible with the personal computer. Connecting a typewriter interface to the PC is an inexpensive way to produce small amounts of letter quality printing.

Two kinds of printers are featured: dot matrix printers and letter quality printers. Dot matrix printers form each character using a pattern of small dots. Some printers have such fine resolution (the dots are so close together) that the letters appear to have been made with fully formed characters. Letter quality printers, usually daisy wheel printers, produce solid characters of suitable quality for letters and manuscripts. The advantages of letter quality printers are their interchangeable typefaces and high-quality characters. Dot matrix printers, on the other hand, provide high-speed printing and more flexible characters, such as double size, italics, and graphics.

The final group, Miscellaneous Hardware, is devoted to different kinds of computer hardware that carry out many interesting functions. One product is a speech synthesizer that produces voice sounds from text typed into the computer. Other products are game paddles and joysticks, which provide input for games and other applications. Light pens allow you to enter responses to the computer without using the keyboard. By pressing the pen to the monitor screen, you can make menu selections or draw graphics. Calendar and clock systems designed for applications that need accurate time and date records are also included. Some of these peripherals even operate burglar alarms and control sprinkler systems. Other products allow several PCs to share a single printer, plotter, or modem. And finally, battery powered backup systems keep your computer from shutting down and destroying data during power interruptions.

When choosing hardware, make sure you have compatible components so the entire system will work properly. To avoid problems check with the hardware manufacturer or computer dealer before making a purchase.

Features of the printers include sub- and superscripting, underlining and boldfacing, double wide and italic characters, choice of pitch and character style, justification and centering, line space selection, and special character sets for foreign language alphabets. The printers also have different paper handling capabilities. Some are designed for single sheets of paper, some accept roll paper, and others have tractor feed devices, which feed paper continuously through the printer during printing.

Plotters are another product described in the printer group. Plotters, some of which produce colored output, use pens to draw graphs, charts, and other drawings such as maps.

Other printer-related products are printer buffers. The printer buffer accepts high-speed data from the computer and stores the data in its own memory. Then the buffer sends the data to the printer, so editing or other tasks can take place while the printer prints.

To connect a printer to the PC, you need either a serial or parallel interface (also called an adapter or a board). The IBM and Epson dot matrix printers require a parallel interface. Serial interfaces are referred to by several other names such as RS-232 or asynchronous communications adapter. Parallel interfaces are also referred to by product names such as Centronics interfaces or Centronics parallel interfaces. There is a parallel interface on the IBM monochrome adapter, so if you have that board, you don't need to buy a separate parallel interface. Also, you need a cable designed to connect the printer to the interface. To avoid problems in connecting your printer, contact the printer manufacturer or computer dealer to make sure the PC and the printer you choose are compatible.

The next group in the Hardware section is Modems (which stands for modulator-demodulator). Modems convert audio signals into digital information that can be understood by the computer. Modems are used to communicate with other computers over telephone lines and allow you to transfer data files, use other computers and programs, or send and receive electronic mail.

Most of the modems in the *PC* Product Guide are direct connect modems, meaning they plug directly into your telephone line. Other kinds of modems are acoustic couplers, which are usually less expensive than direct connect modems. Some modems have speakers and some feature automatic telephone dialing and answering. When choosing a modem, look for the features you need, such as automatic dialing and answering, and make sure you have the proper interface board.

BUSINESS 100 PROGRAM LIST

	NAME	DESCRIPTION
1	RULE78	Interest Apportionment by Rule of the 78's
2	ANNU1	Annuity computation program
3	DATE	Time between dates
4	DAYYEAR	Day of year a particular date falls on
5	LEASEINT	Interest rate on lease
6	BREAKEVN	Breakeven analysis
7	DEPRSL	Straightline depreciation
8	DEPRSY	Sum of the digits depreciation
9	DEPRDB	Declining balance depreciation
10	DEPRDDB	Double declining balance depreciation
11	TAXDEP	Cash flow vs. depreciation tables
12	CHECK2	Prints NEBS checks along with daily register
13	CHECKBK1	Checkbook maintenance program
14	MORTGAGE/A	Mortgage amortization table
15	MULTMON	Computes time needed for money to double, triple, etc.
16	SALVAGE	Determines salvage value of an investment
17	RRVARIN	Rate of return on investment with variable inflows
18	RRCONST	Rate of return on investment with constant inflows
19	EFFECT	Effective interest rate of a loan
20	FVAL	Future value of an investment (compound interest)
21	PVAL	Present value of a future amount
22	LOANPAY	Amount of payment on a loan
23	REGWITH	Equal withdrawals from investment to leave 0 over
24	SIMPDISK	Simple discount analysis
25	DATEVAL	Equivalent & nonequivalent dated values for oblig.
26	ANNUDEF	Present value of deferred annuities
27	MARKUP	% Markup analysis for items
28	SINKFUND	Sinking fund amortization program
29	BONDVAL	Value of a bond
30	DEPLETE	Depletion analysis
31	BLACKSH	Black Scholes options analysis
32	STOCVAL1	Expected return on stock via discounts dividends
33	WARVAL	Value of a warrant
34	BONDVAL2	Value of a bond
35	EPSEST	Estimate of future earnings per share for company
36	BETAALPH	Computes alpha and beta variables for stock
37	SHARPE1	Portfolio selection model-i.e. what stocks to hold
38	OPTWRITE	Option writing computations
39	RTVAL	Value of a right
40	EXPVAL	Expected value analysis
41	BAYES	Bayesian decisions
42	VALPRINF	Value of perfect information
43	VALADINF	Value of additional information
44	UTILITY	Derives utility function
45	SIMPLEX	Linear programming solution by simplex method
46	TRANS	Transportation method for linear programming
47	EOQ	Economic order quantity inventory model
48	QUEUE1	Single server queueing (waiting line) model
49	CVP	Cost-volume-profit analysis
50	CONDPROF	Conditional profit tables
51	OPTLOSS	Opportunity loss tables
52	FQUOQ	Fixed quantity economic order quantity model
53	FQEOWSH	As above but with shortages permitted
54	FQEOQPB	As above but with quantity price breaks
55	QUEUECB	Cost-benefit waiting line analysis
56	NCFANAL	Net cash flow analysis for simple investment
57	PROFIND	Profitability index of a project
58	CAPI	Cap Asset Pr Model analysis of project
59	WACC	Weighted average cost of capital
60	COMPBAL	True rate on loan with compensating bal. required
61	DISCBAL	True rate on discounted loan
62	MERGANAL	Merger analysis computations
63	FINRAT	Financial ratios for a firm
64	NPV	Net present value of project
65	PRINDLAS	Laspeyres price index
66	PRINDPA	Paasche price index
67	SEASIND	Constructs seasonal quantity indices for company
68	TIMETR	Time series analysis linear trend
69	TIMEMOV	Time series analysis moving average trend
70	FUPRINF	Future price estimation with inflation
71	MAILPAC	Mailing list system
72	LETWRT	Letter writing system-links with MAILPAC
73	SORT3	Sorts list of names
74	LABEL1	Shipping label maker
75	LABEL2	Name label maker
76	BUSBUD	DOME business bookkeeping system
77	TIMECLCK	Computes weeks total hours from timeclock info.
78	ACCTPAY	In memory accounts payable system-storage permitted
79	INVOICE	Generate invoice on screen and print on printer
80	INVENT2	In memory inventory control system
81	TELDIR	Computerized telephone directory
82	TIMUSAN	Time use analysis
83	ASSIGN	Use of assignment algorithm for optimal job assign.
84	ACCTREC	In memory accounts receivable system-storage ok
85	TERMSPAY	Compares 3 methods of repayment of loans
86	PAYNET	Computes gross pay required for given net
87	SELLPR	Computes selling price for given after tax amount
88	ARBCOMP	Arbitrage computations
89	DEPRSF	Sinking fund depreciation
90	UPSZONE	Finds UPS zones from zip code
91	ENVELOPE	Types envelope including return address
92	AUTOEXP	Automobile expense analysis
93	INSFILE	Insurance policy file
94	PAYROLL2	In memory payroll system
95	DILANAL	Dilution analysis
96	LOANAFFD	Loan amount a borrower can afford
97	RENTPRCH	Purchase price for rental property
98	SALELEAS	Sale-leaseback analysis
99	RRCONVBD	Investor's rate of return on convertable bond
100	PORTVAL9	Stock market portfolio storage-valuation program

10 GREAT NEW PROGRAMS FROM
Single SOURCE Solution™

1. STOCKMAP™ **$49.95**
An interactive program to draw bar charts for stocks or commodities on a weekly or daily basis and to display or print a detailed graph of high/low and closing prices and volume. STOCKMAP also displays short- and long-term moving averages with user-selectable periods as well as price/earnings ratios and dividend yields. Easy to use, STOCKMAP is available for HP-85 users. A Microsoft BASIC version will be available January 1983 for IBM-PC users.

2. PORTMAP™ **$49.95**
Analyze your existing investment portfolio, whether it contains stocks, bonds, moneymarket instruments, and/or other securities. PORTMAP's summary report analyzes cost basis, number of units, and expected income by account, type of security, month of payment, and taxability (Federal, State, or non-taxable). The gain/loss report analyzes market values, gain/loss, and holding period by individual lot and type of security; margin account status is also reported. For ease at tax-time, a special report containing all required data for Schedule D is provided. Any number of portfolios may be processed, and data may be selected by portfolio or individual accounts. All data entry is interactive and user-oriented. PORTMAP is written in Microsoft BASIC and will be available in September 1982 for the IBM-PC and other computers running MS-DOS or CP/M.

3. INTERACTIVE RESUMÉ™ **$49.95**
A user friendly program for updating or tailormaking your resumé to meet the needs of particular job opportunities. Use a menu-driven set of routines related to education, volunteer and work experience, special skills, work objectives, etc. to functionally define your resumé using accepted managerial psychology principles. INTERACTIVE RESUMÉ provides special text formatting features. A detailed manual is included.

4. THE ADDRESSOR™ **$49.95**
A name and address filer system, alphabetized and adaptable to a 2" by 3" binder. It will also print address labels as well as remind you of important dates. Set to run on the IBM-PC under PC-DOS with at least one disk drive and Disk BASIC, ADDRESSOR includes a tutorial on setting up the filing system and a detailed manual.

5. PCWORD™ **$49.95**
The sophisticated Full-Screen Text Editor. PCWORD runs under PC-DOS and Disk BASIC and provides optimum use of the full IBM-PC keyboard. All the normal text editing functions are available including online "help", automatic file saving, paging up and down, etc. All function keys may be redefined for the convenience of the user. Detailed manual is provided.

6. PCSCREEN™ **$49.95**
Paint your screen any way you want and have an efficient BASIC program module written for you for inclusion in various programs. PCSCREEN runs under PC-DOS and Disk BASIC. You type on the screen just as you wish to see formats in your program, complete with input fields and protect prompts. A ready-to-run BASIC program segment is generated that can be linked to your own program. Various fields may be colored with reverse-video, high and low intensity, etc. A "help" module is included to simplify the programming tasks even further, as well as a detailed manual.

7. PCFORMS™ **$49.95**
A super text-formatting system which runs under IBM-DOS and Disk BASIC with at least 32 Kbytes of memory. Designed specifically for operating with the line printer, text may also be formatted for display on the screen. PCFORMS supports macros nested ten deep and printer specifications for overstrike, doublestrike, etc. PCFORMS accomplishes five main functions: Setting Text Characteristics, Text Formatting, Page Control, Printer Control, and Macros. When combined with PCWORD, PCFORMS provides all word processing capabilities of software selling for considerably more.

8. XREF™ **$39.95**
A complete cross-reference utility for PC-DOS Disk BASIC programs. XREF will first generate a listing of your program with formatting that aids in the program's readability, such as indentation, pagination, program name, time and date, etc. It will then print out a list of every variable, their line numbers, and finally a table of all line numbers. Since large arrays are used, XREF requires as much memory as possible.

9. PCGRAPHS™ **$49.95**
Providing full graphics capabilities. Coming Soon!

10. COMPLETE ACCOUNTING SYSTEM **$149.95**
Coming Soon!

Learning IBM® BASIC
For the Personal Computer

by David A. Lien

The IBM Guide Everyone's Been Waiting For

Learning IBM BASIC, Dr. David Lien's definitive guide for the IBM PC, is now being offered at a one-time-only 25% discount through October 31. This easy-to-follow guide will soon have you writing custom software for your PC – even if you're completely new to computers.

Learning IBM BASIC is an indispensable reference for all PC users. Dr. Lien's techniques are simple and proven effective. Learning is a relaxed, enjoyable experience as you follow his step-by-step instructions. Don't miss this opportunity to learn more about your PC – at a 25% discount.

This is a one-time offer and will not be repeated, so order now. Fill out and mail the coupon, or call our 24-hour order line at 800-854-6505; in California call 714-588-0996 (8 am – 5 pm).

30 Day Money-Back Guarantee

If you're not totally satisfied with this book for any reason, return it to CompuSoft in saleable condition within 30 days for a full refund.

Please send _____ copies of *Learning IBM BASIC* at $14.95 each, Reg. $19.95, (Calif. residents add 6%) plus $1.65 shipping and handling per book within the U.S. Foreign orders, include $2.38 surface shipping and handling per book.

Hardware

IBM Personal Computer

An easily expandable system that can be used in educational, business, professional, word processing, and entertainment applications. A minimum hardware configuration includes a high-speed, 16-bit microprocessor; 16K of user memory; an 83-key detached keyboard; a built-in speaker; color/graphics capability; diagnostics that automatically check the system components including power-on, self-test, and parity checking; and 40K of ROM, which includes a BASIC interpreter.

A starter system consisting of a keyboard and system unit that can be connected to a black and white or color TV set using an RF modulator (purchased separately). The system includes the BASIC Interpreter by Microsoft, which comes in three versions: cassette, diskette, and advanced. The cassette version is included in every system's ROM. It provides I/O instructions needed to enter and retrieve data, and supports use of the keyboard, display, light pen, and printer.

The diskette and advanced levels are optional (included with DOS). The diskette extension supports the use of diskettes, while adding date, time of day, and communications capabilities. The advanced extension enhances graphics to include features such as point, circle, and get/put display, while increasing light pen and joystick support. *(List Price: 16K system unit with keyboard $1,265; 48K system unit with keyboard, disk drive, and disk drive adapter $2,235)*

IBM Corporation
System Products Division

Boca Raton, FL 33432
(800) 447-4700, 322-4400 Illinois
447-0890 Alaska, Hawaii

BOARDS

Model U100A RAM Board

1 A board that affords 256K capacity using 64K RAM. Any 64K block is addressable at any 64K address boundary, and mapping PROM allows for full RAM space compatibility with the PC. Features also include parity error interrupt and fully buffered noise tolerant design. *(List Price: 64K with parity $398, each additional 64K with parity $90)*

Universal Micro Inc.
6302 Odana Rd.
Madison, WI 53719
(608) 274-6100

Memory Expansion Modules

2 A family of memory expansion modules in sizes from 64K to 256K designed to allow full memory utilization. Features include socketed high-speed dynamic RAMs for expansion and replacement of faulty components, single-board design for a capacity of 256K in any single PC slot, low component count for low power usage, parity checking and error reporting, switch-selectable addressing for memory positioning on any 64K boundary, ability to run IBM diagnostics, compatibility with all IBM hardware and software. *(List Price: 64K $395, 128K $620, 192K $845, 256K $1,075, 64K expansion kit $225)*

Personal Systems Technology, Inc.
22957 La Cadena
Laguna Hills, CA 92653
(714) 859-8871

Universal Wiring Boards

3 Three drilled universal wiring boards for breadboarding, prototyping, and low-volume production. Boards are form- and plug-compatible with IBM cards and can be installed in any of the five expansion slots on the PC.

Model 4613 has three-hole solder pads between power and ground buses for solder-wire interconnections. Model 4613-2 for wrapped wiring has a full ground plane, power plane, and three alternate power buses. Model 4613-1 has power and ground buses around its perimeter. All three boards hold different width and number DIPs and come with layout planning sheets, instructions, card guide, and universal I/O connection mounting bracket. *(List Price: Model 4613-1 $37, Models 4613 and 4613-2 $59 each)*

Vector Electronic Company, Inc.
12450 Gladstone Ave.
Sylmar, CA 91342
(213) 365-9661

Maxi-RAM Memory Board

4 A memory board that offers up to 512K parity-checked RAM and is completely socketed for ease of expansion and maintenance. One-year warranty. *(List Price: $1,295)*

Memory Technologies, Inc.
25 Main St., Box 6
Twelve Mile, IN 46988
(219) 664-5741

UltraRAM

5 A memory board designed to industrial standards with low-inductance decoupling capacitors and solid tantalum storage capacitors. Multilayer, ground-planed printed circuit boards with gold-plated edge connector traces, solder masks for both sides of the PCB, and face grip sockets are also provided.

On-board switches for starting address in conjunction with RAM row disable switches allow the board to be placed in any unoccupied 64K segment within the PC's address space, with no special devices, circuits, or modifications required. A parity disable switch provides a "don't care" feature if parity is not desired or required by the user. The IBM diagnostics can test the memory board (both the power-up and IBM advanced diagnostics test).

Boards are available in 64K increments from 128K through 512K with socketed memory chip array so users can add memory upgrade kits as required. Instruction/operational manual is included, sized to fit the IBM user manual. *(List Price: $1,800)*

Daystar Systems Incorporated
10511 Church Rd., Ste. A
Dallas, TX 75238-9990
(214) 341-8136

"I've been dying to **say** something and now I **can**!"

Now, thanks to TYPE-'N-TALK,™ your IBM® Personal Computer can talk.

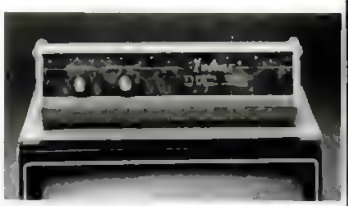

This exciting text-to-speech synthesizer gets your computer talking about any subject you choose—from data verification to educational testing and games. And, of course, enhancement of any computerized adventure series.

By adding a voice to your computer, printed matter can be eliminated from the screen. Directions, information and questions can be vocalized, leaving the screen free for other tasks. It's no longer necessary to shrink a dazzling graphic to show the accompanying text. Just let TYPE-'N-TALK™ speak it out.

And now, great new software is available.

TYPE-'N-TALK™ has unlimited vocabulary, an RS-232C interface, and is one of the easiest-to-program speech synthesizers on the market.

TYPE-'N-TALK™ is covered by a limited warranty. Write Votrax for a free copy.
500 Stephenson Highway, Troy, Michigan 48084.

BOARDS

Combo Memory Expansion Board

6 A single board that includes 192K of expansion memory and a serial interface port. The board is expandable to 256K, and additional options are a parallel printer port and a real-time clock with battery backup. *(List Price: $499, additional 64K $100, parallel port $50, real-time clock $50)*

Qubie' Distributing
1707 Stewart St.
Santa Monica, CA 90404
(800) 421-7103, (213) 870-3718

Clock/Memory

7 An additional 64K or 128K of parity checking memory plus a battery-supported clock/calendar for applications requiring dependable date/time entries on records and files. It uses a 10-year Lithiode battery. *(List Price: 64K and clock/calendar $445, 128K and clock/calendar $540, 64K memory upgrade—nine 64K ICs—$90)*

Tenley Design, Inc.
P.O. Box 39155
Washington, D.C. 20016

Memory Boards

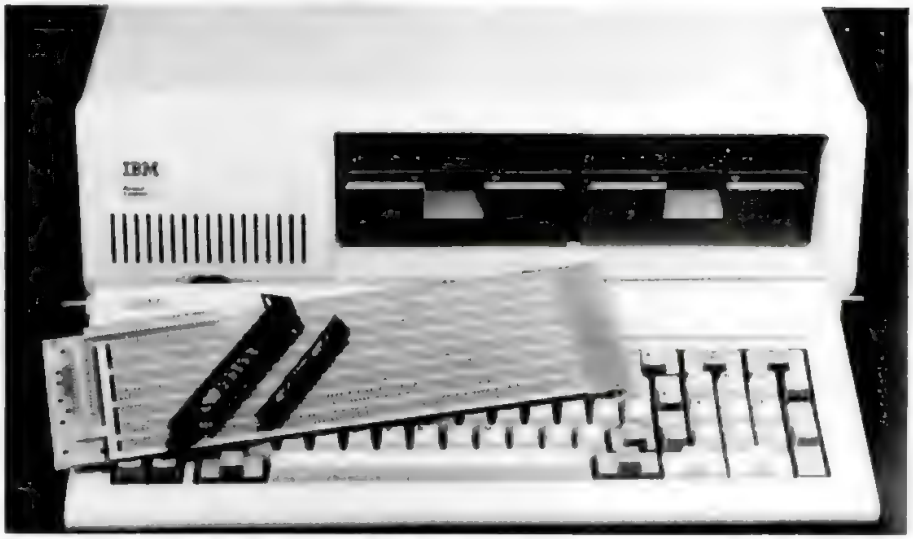

8 Four add-in memory boards with parity available for installation in any slot. PC disk drives and AC line transient protection are available at additional cost. The boards come in 64K, 128K, 192K, and 256K configurations. *(List Price: 64K $419, 128K $547, 192K $675, 256K $799, disk drives $239, AC line transient protection $29.95)*

Bitstream Inc.
P.O. Box 809
Loxahatchee, FL 33470
(305) 798-0025

Memory Boards

9 Two RAM boards of 256K and 512K. User manual and diagnostics are available from the manufacturer. Two double-density disk drives are also available in 640K and 1280K disk systems with controllers. Both disk systems consist of two drives each. *(List Price: RAM boards 256K $695, 512K $1,195; disk drives 640K $995, 1280K $1,395)*

Computer Technology Innovations
965 W. Maude Ave.
Sunnyvale, CA 94086
(408) 245-4256
TWX: 172-509 (domestic), 470-582 (international)

***Universal Wiring Boards**, Vector Electronic Company, Inc.*

Floppy Drive Controller with Parallel Port

10 A floppy disk drive controller and a parallel printer port in one board. The floppy drive section of the board is functionally identical to the IBM floppy disk drive interface and can interface up to four single- or two dual-sided floppy drives. The parallel port is functionally equivalent to IBM's parallel printer interface and can be used to interface a parallel printer, such as the Epson MX-80 to the PC. *(List Price: $269)*

Maynard Electronics
P.O. Box 3322
Longwood, FL 32750
(305) 869-8058

Floppy Drive controller with Serial Port

11 A floppy disk drive controller and a serial printer port in one board. The floppy drive controller is functionally identical to IBM's floppy disk drive interface and can interface up to four single- or dual-sided drives. The serial port is functionally equivalent to the IBM asynchronous interface. This port can be used to connect to a modem or other RS-232-type device, and runs with existing communications software. Installation is simple and well documented. The product includes a cable to interface to the internally mounted drives. *(List Price: $269)*

Maynard Electronics
P.O. Box 3322
Longwood, FL 32750
(305) 869-8058

SDI Floppy and Clock

12 A disk drive adapter with a clock, calendar, and backup battery that supports up to four drives. *(List Price: Not Available)*

Sigma Designs, Inc.
P.O. Box 3765
Santa Clara, CA 95055
(408) 496-0536

Memory Combo Cards

13 A family of memory combo cards that can be configured up to 256K. The MC series features storage capacities up to 256K, parity memory, one asynchronous communications port, and a parallel printer port. The basic board comes fully socketed and is user-upgradeable.

The Memory Combo Card includes an asynchronous parallel printer port, and wire-wrap and extender cards. The Combo+ Card includes a real-time clock. Disk++ includes a hard disk host adapter that allows the user to switch-select to either the Corvus or Tall Grass disk drives. Omni++ features a real-time clock and Omninet interface. Developed by Corvus Systems, this local area network device permits communication and information-sharing between computers. One-year warranty. *(List Price: Memory Combo Card $435–$1,155, Combo Plus $435–$1,195, Disk++ $635–$1,355, WW-070 wire wrap card and extender kit $95)*

AST Research, Inc.
2691 Richter Ave. #104
Irvine, CA 92714
(714) 540-1333

Hardware

BOARDS

MEM Memory Expansion Modules: 16, 64, 128, 192, 256

14 Memory expansion that includes 16K expansion chips to take the computer to 64K and an I/O board that can contain from 64K to 256K. The MEM16 is a kit of chips that plug into sockets on the main board inside the computer.

The boards add memory to the PC by plugging into the I/O connector slots inside the computer. They add 16K, 64K, 128K, 192K, and 256K bytes of storage respectively. Expansion kits are also available for the memory boards. *(List Price: MEM16 $25, MEM64 $295, MEM256 $555)*

Maynard Electronics
P.O. Box 3322
Longwood, FL 32750
(305) 869-8058

SDI Proto and MiniProto

15 A line of prototyping boards that includes the SDI Proto, a full-sized prototyping board with plated holes and power planes; and the SDI MiniProto, a half-size board similar to the Proto model. *(List Price: SDI MiniProto, $30; SDI Proto, $55)*

Requires: RS-232-C.

Sigma Designs, Inc.
P.O. Box 3765
Santa Clara, CA 95055
(408) 496-0536

Pack-Ram, Pack-Combo, Pack-Ram+Combo

16 Three compatible products. Pack-Ram is a memory board that comes in three configurations—64K, 128K, and 192K. It provides on-board sockets for upgrading purposes. Pack-Combo is a combination RS-232 serial port, parallel printer port, and battery backup real-time clock. It includes an on-board jumper for port address selection for both ports. Software is included for the real-time clock application. Pack-Ram+Combo is a combination of both packages and features up to 256 memory with RS-232 serial port, parallel printer port and real-time clock. One-year warranty on all items. *(List Price: Pack-Ram 64K $225, 128K $335, 192K $445; Pack-Combo with printer port $245, without printer port $175; Pack-Ram+Combo 64K $495, 128K $615, 192K $735, 256K $855)*

Imagik

17 A board that displays images with graphic overlays. Image pixels range over 64 intensity levels, which can be enhanced to 64 gray or five color graphic levels. For high-resolution still frame, it provides 483 vertical lines by 640 pixels horizontal; for animation it provides 241 lines by 320 pixels with loops up to five frames in length. Features include individually addressable pixels, simultaneous image and graphics display, user-selected loop rates, and light pen and external synchronous options. *(List Price: $2,950, with light pen $3,450)*

IDETIK Corporation
Madison, WI 53715

Boards, Hard Disk

18 A256K memory board with parity. A 1-year warranty is available from the manufacturer. A hard disk subsystem and a channel board, the 2SP with two serial ports are also available. *(List Price: 256K board $598, hard disk subsystem $1,899, 2SP $199)*

Zobek
7343 J. Ronson Rd.
San Diego, CA 92111
(714) 571-6971

Graphics Card

19 A board that replaces IBM's display and printer adapter board. It offers graphics resolution of 720 horizontal by 350 vertical with the graphics control features of IBM's color card. It includes the printer function, is compatible with DOS software, and will be available with popular graphics plotting software. *(List Price: $599)*

Hercules Computer Technology
160 Beechnut Dr.
Hercules, CA 94547
(415) 799-9354

PC/RAM Rack, PC/RAM Stack, PC/SASI RAM

20 A line of memory and combination boards in various configurations. Model PC/RAM Rack is expandable to 256K. PC/RAM Stack is a 4- by 10-inch circuit board with 512K of parity-protected memory. The PC/SASI RAM combo board includes up to 256K RAM with parity, a serial RS-232-C port, and SASI interface allowing connection to 5¼-inch hard disk drives. *(List Price: PC/RAM Rack $495–$995, 256K PC/RAM Stack $1,195, 512K $1,795, PC/SASI RAM $1,150)*

Hammond Computer Products, Inc.
3800 Crossbend Pl.
Plano, TX 75023
(214) 596-0130

RAM Expansion Board

21 A board that offers 64K to 192K bytes of addressable memory with parity, bus bar capacitors, invisible refresh, and gold connectors. *(List Price: 64K $310, 128K $420, 192K $525)*

Control Systems
2855 Anthony Ln.
Minneapolis, MN 55418
(612) 789-2421

Memory Expansion Boards

22 RAM boards that are available with 64K, 128K, 192K, or 256K. Also available is a 64K byte internal memory expansion kit to expand the PC from 16K or 48K to 64K bytes. *(List Price: DM-64 $449, DM-128 $645, DM-192 $840, DM-256 $1,035, ADM-64 $195)*

680 Almanor Ave.
Sunnyvale, CA 94086
(408) 735-0323

Spectrum Series

23 A multifunction board combining memory, serial communications, and parallel printer interface functions. The board has up to 256K of field expandable memory, two asynchronous communications lines, and a parallel printer port that interfaces to a wide variety of industry-standard printers.

All three functions reside on a single full-length card in 24 different configurations. Memory consists of socketed, high-speed dynamic RAMs and is designed for expansion. The four available configurations are 64K, 128K, 192K, and 256K. Field expansion kits are available in 64K increments.

The memory section features parity checking and error reporting, switch-selectable addressing, and compatibility with IBM hardware and software.

Spectrum offers programmable baud rates ranging from 50 to 19,200, in either single- or dual-channel configuration. The parallel printer port lets users choose from a variety of dot matrix, letter quality, and high-speed impact printers. A field expansion kit is available for the printer. *(List Price: From $435 depending on configuration)*

Requires: 64K.

3 Choose from Intelligent Printers for your IBM Personal Computer

The NEC Spinwriter is an excellent printer. But you need more— More interfacing choices, more RAM buffer, and more word processing features. So we installed a specially designed interface and renamed the printer SELLUM I. For the past 2 years it's been outselling all expectations.

Now you have 3 choices of printers based on the NEC Spinwriter Series, and the Fujitsu. All perform beautifully with the IBM Personal Computer. They're the **SELLUM SERIES PRINTERS.**

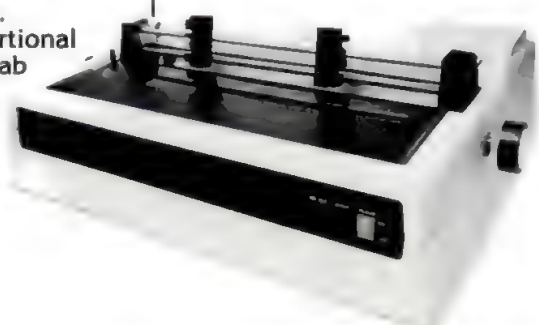

OUTSTANDING FEATURES

Select from either of these fine printers, and enjoy many bonus benefits, such as

- 16K RAM or 48K RAM option.
- 16 baud from, 50-19,200,—hardware/software selectable.
- RS-232, Centronics Parallel, IEEE ports, Current Loop.
- Switch selectable protocols: NEC 3510, Diablo 630, Qume Sprint 9.
- 24 switch selectable functions.
- Auto-bidirectional printing with optimized throughput.
- Sheetfeeder and graphics modes.
- Auto proportional spacing and tab setting.
- Upgradable to latest software.

- Complete word processing features, standard.
- Supports optional front panel.

MATCH THE RIGHT PRINTER TO YOUR NEEDS.

BOARDS

PC-MATE Device Master

24 An interface to the BSR X10 remote controller with a real-time clock and calendar that interfaces to the BSR via an ultrasound adapter. It controls up to 16 devices in the home or office on a regular schedule or as part of an energy management scheme. The real-time clock and alarm are powered by an on-board battery. With additional circuitry and programming, the board can be used to turn the computer on, perform certain functions, reschedule, and turn itself off. One-year warranty. *(List Price: $229)*

Tecmar, Inc.
23600 Mercantile Rd.
Cleveland, OH 44122
(216) 464-7410
Telex: 241735

Prototyping Card

25 A card that provides space for up to 96 integrated circuits. It is full size and has power and ground buses for mounting a DB25 or DB37 connector. *(List Price: $49)*

Automated Business Machines Incorporated
29352 Avocet Ln.
South Laguna, CA 92677
(714) 643-0439

I-QUEUE

26 A plug-in printer spooler that accepts over 4000 cps and sends the data to the printer at whatever speed it can accept it. I-QUEUE has 16K onboard memory and automatic forms control. It also provides programmable word processing functions and a clock/calendar. Two-year guarantee. *(List Price: 16K I-QUEUE with clock/calendar $495, 64K memory expansion $175, interface cable for PC printer $50)*
Requires: Printer.

Periphex, Inc.
149 Palmer Rd.
Southbury, CT 06488
(800) 221-0732, (203) 264-7937

JRAM

27 A memory board that adds 512K memory to PC's maximum 64K configuration using one expansion slot. 1024K of memory can be added by using two expansion slots. One-year warranty. *(List Price: $1,200)*

Tall Tree Systems
1036 Los Altos Ave.
Los Altos, CA 94022
(415) 941-8747

Memory Expansion Modules

28 Three memory expansion modules. Model 4192 adds 192K RAM with parity and expands main memory to 256K. Model 4256 adds 256K RAM, expanding memory to 544K, and offers switch-selectable address-space location. Model 4512 offers two serial asynchronous ports and 512K with parity. *(List Price: Model 4192 $579, Model 4256 $729, Model 4512 not available)*
Requires: 64K.

Intermedia Systems
10601 S. Saratoga-Sunnyvale Rd.
Cupertino, CA 95014
(408) 996-0900

RAM+ Card

29 A memory card that allows the PC to run PASCAL, FORTRAN, and several *VisiCalc*-type programs. Features include 36 installed memory sockets. Users can purchase additional memory, which can be plugged into the board, using 64K, 5-volt, 200-nanoseconds chips contained in the company's expansion kit. The board is expandable to 256K. Each card has RS-232 serial port supported by IBM PC software. *(List Price: Not available)*

Seattle Computer
1114 Industry Dr.
Seattle, WA 98188
(800) 426-8936, (206) 575-1830

Memory Expansion

30 Memory expansion that complements the manufacturer's Omni-Board. It provides parity-protected memory for the PC; 64K increments allow for growth to 256K. *(List Price: MEM-64K $445, MEM-128K $625, MEM-192K $805, MEM-256K $985)*

Automated Business Machines Incorporated
29352 Avocet Ln.
South Laguna, CA 92677
(714) 643-0439

Serial/Parallel Interface with PROM Space

31 Two serial ports, two parallel ports, and four PROM sockets on one board with 25 pin connectors on the rear panel and two ribbon connectors on the board. It uses LPT and COM calls. *(List Price: $300)*

Control Systems
2855 Anthony Ln.
Minneapolis, MN 55418
(612) 789-2421

DS1, DS2

32 Plug-in compatible expansion circuit boards and software packages that install the CP/M 2.2 operating system on the PC. Both contain 64K of parity RAM and a Z-80B microprocessor. Two diskettes include the CP/M operating system and utilities, and Byad's utilities. The I/O processing system is interrupt-driven, fully buffered, and uses DMA transfers to and from the Z-80 host. The DS2 contains an IBM-compatible serial port capable of driving RS-422 lines. *(List Price: DS1 $660; DS2 $760; documentation only, $40)*
Requires: 48K, one disk drive.

BYAD Inc.
5345 N. Kedzie Ave.
Chicago, IL 60625
(312) 539-4922

APSTEK AIM-256

33 An add-in memory expansion card that allows users to expand the available memory from a base-line system of 64K bytes to a total of 320K bytes with a single card. The card is available in five versions: 0K, 64K, 128K, 192K, and 256K. The 0K byte card is a fully assembled, burned-in, and tested board without RAM for users who can obtain their own RAMs.

Both the starting address boundary and the ending address boundary are DIP-switch selectable. No FPLAs or PROMs are used. Other features include precision-delay line timing, parity generation and checking, 100 percent decoupling of the entire RAM array, and no special component requirements.

A memory card diagnostic disk is available for users planning on expanding memory card capacity with their own RAMs. A bare board with bracket and schematic is also available. *(List Price: 0K byte $169, 64K $289, 128K $419, 192K $549, 256K $679, bareboard $89, memory card diagnostic disk $19)*

Apstek, Inc.
P.O. Box 5306
Richardson, TX 75080
(817) 571-7171

Maxicard

34 A memory board that adds up to 576K in increments of 64K. It may be installed in either the upper or lower segment of 1MB. The board is of four-layer design and includes on-board parity bit and switch-selectable addressing. *(List Price: 256K $1,199, 320K $1,349, 384K $1,489, 448K $1,619, 512K $1,739, 576K $1,849)*

Three Years In Development • **Now Available For Public Use**

An Invaluable Aid to:

Business...

Lenders, Appraisers
In just minutes, hours and days of tedious computations and piles of paperwork are concisely eliminated. Calculating time from 13 to 23 seconds. Professional documentation completed in less than 2 minutes!

Sales...

Agents, Counselors, Marketing-Specialists
Buyers' and sellers' questions are quickly computed, documented and ready for evaluation.

Investment...

Investors, Speculators, Sellers
It's the ultimate tool for exhaustive "what if" situations . . . helps you tailor parameters to your rate of return requirements.

Real Estate...

Individuals, Partnerships, Corporations
You're equipped with an essential decision-making assistant. It tells you if your investments are working for you, if they are stagnant and if they are losing money. It instantly computes your rates of returns per investment.

Education...

Teachers, Students
It's like a complete real estate investment course. Together with the User's Manual it is a full tutorial system, with step-by-step explanations of all Input and Output Data... professionalism at your fingertips.

THE PACKAGE INCLUDES:
Program Diskettes
Demonstration Documents
User's Manual (100 page)
Packet of Questionnaire Blanks
Only $195

WHEN YOU WANT TO GO BEYOND WORD PROCESSING & TEXT EDITING . . .
AND THEN BEYOND SPREADSHEET MODELS, TEMPLATES AND MODULES . . .
WHEN YOU WANT A SOFTWARE PACKAGE THAT IS "USER FRIENDLY",
"ERROR PROTECTED","TOTALLY MENU DRIVEN", & WITH "COMPREHENSIVE PRINTOUTS"...
THEN, GO ONE-STEP-BEYOND, WITH THE REAL ESTATE CONSULTANT,™
AND TRULY UTILIZE THE COMPUTING POWER OF YOUR IBM PC . . .*

It is said that a picture speaks a thousand words . . . we'll let the printouts, on the following page, speak for the Real Estate Consultant™

*IBM PC is a registered trademark of IBM

The REAL ESTATE CONSULTANT™

The following reproductions are actual printouts computed and generated on the IBM PC® using DOS BASIC 1.0 they do not however, represent, the full capabilities of the software package.

IBM PC is a registered trademark of International Business Machines
The Real Estate Consultant is a trademark of Consultant Systems Inc.

AVAILABLE NOW

2780/3780 Emulation with IBM Personal Computer

2780/3780 emulation is now possible with the IBM PC, AST3780 package which includes the hardware, software on diskette and documentation to enable the versatile IBM Personal Computer to emulate the 2780/3780 terminals. 327X emulation will be available.

Other products available for IBM PC: 1) ComboPlus with clock; 2) Advance Com. card – Async, Bisync, SDLC, HDLC; 3) Expansion parity memory – 64K-256K; 4) Disk++ (memory, Async & disk host adaptor; 5) Original Memory Combo; 6) Async Communication Card – (1 or 2 ports); 7) Wire Wrap Card (13.1″ X 4″); 8) Extender Card.

AST RESEARCH INC.

2691 Richter Ave., Suite 104, Irvine, California 92714 • (714) 540-1333

Hardware

BOARDS

Omni-Board

35 A memory board that features up to five functions on one board and provides the capabilities of an expansion chassis on a single board. It configures functions required and expands to maximum configuration when needed. Adapters provide for a parallel printer and up to two RS-232 asynchronous communications ports.

A game adapter option compatible with IBM software is also available and connects to two standard Apple joysticks. A clock/calendar option with rechargeable battery backup maintains the correct time and date even when the computer is off. *(List Price: Omni-Board $165; printer only, $165; printer and other configurations $265–$485)*

Automated Business Machines Incorporated
29352 Avocet Ln.
South Laguna, CA 92677
(714) 643-0439

Semidisk

36 A high-capacity memory board that operates like a 512K disk drive. Files can be written, read, and executed. Because it has no moving parts, it is faster than a floppy or hard-disk system. Data or programs from regular disks can be loaded for access. *(List Price: 512K $1,995, 1MB $2,995)*

SemiDisk System
P.O. Box GG
Beaverton, OR 97075
(503) 642-3100

CI-PCM Memory Module

37 A single board of 256K with on-board parity generator checker addressable as a contiguous block in 64K byte increments through 1MB. Other features include access time of 225 nanoseconds, cycle time of 400 nanoseconds and power requirements of +5V at 1.0A maximum. *(List Price: $575)*
Requires: One I/O expansion slot for 256K bytes.

Chrislin Industries, Inc.
31352 Via Colinas
Westlake Village, CA 91362
(213) 991-2254
TWX: 910-494-1253

Memory Expansion Module

38 A memory expansion module that comes in configurations ranging from 64K to 256K. Features include parity generation and utilization of 1MB addressing capability. One-year warranty. *(List Price: 64K $395, 128K $595, 192K $795, 256K $995)*
Requires: Not available.

PERSYST, Inc.
22957 La Cadena
Laguna Hills, CA 92653
(714) 859-8871

Versa-RAM

39 A card that expands memory from 64K up to 512K. A RAM disk and RAM spooler software package is included with the hardware, allowing emulation of a disk drive in memory and selection of up to 48K as a print buffer. A 256K board with two RS-232 serial ports and a parallel printer or I/O port is also available. Full even-parity error checking is provided. The card comes with a one-year warranty. *(List Price: $549 to $1,295)*

Memory Technologies Inc.
P.O. Box 6
Twelve Mile, IN 46988
(219) 664-5741

Controller and Memory Expansion Boards

40 A series of asynchronous communications controller boards with either one or two RS-232-C connector ports. The *MEM* memory board series ranges from 64K to 256K. *ADD-64* is a memory expansion kit that enhances memory in 64K increments. The *INTERNAL-16* expansion kit expands the PC from its basic 16K to 64K. One-year warranty. Two other boards, the COMM-1 and -2 are also available. *(List Price:* COMM-1 *$85,* COMM-2 *$115,* MEM Series *$229–$616,* ADD-64 *$129,* INTERNAL-16 *$50)*
Requires: 64K.

PC²
1250 Oakmead Pkwy.
P.O. Box 678
Sunnyvale, CA 94086
(408) 749-9313

Asynchronous Communications Controller

41 Single- and double-ported communication cards that provide loopback functions of transmit/receive signals and input/output signals. A controller adds and removes start, stop, and parity bits. A baud rate generator allows rates from 50 to 9,600 baud. The product supports a variety of character formats and provides an interrupt system for handling transmit, receive error, data set, and line status interrupts. *(List Price: DMS-1 $139, DMS-2 $199)*

Datamac Computer Systems
680 Almanor Ave.
Sunnyvale, CA 94086
(408) 735-0323

PC-MATE Stepper Motor Controller Board

42 A plug-in board that provides users with intelligent control of up to two stepper motors. The board interfaces the Cybernetic Micro-Systems CY512 Intelligent Positioning Stepper Motor Controller to the PC bus. Each motor is controlled by a CY512, allowing independent, simultaneous operation of both stepper motors. Features include external and internal TTL-compatible motor control and status lines for each motor, and two independently buffered, 8-bit TTL input and output ports for communication with other devices. One-year warranty. *(List Price: $495)*

Tecmar, Inc.
23600 Mercantile Rd.
Cleveland, OH 44122
(216) 464-7410
Telex: 241735

DS1 and DS2, *Byad, Inc.*

Hardware

BOARDS

Model 4613, 4613-2, 4623-1

43 Three drilled, universal wiring boards for designing and prototyping interface circuits, memory expansion boards, input/output adapters, or other special functions. They are fully formed, are plug-compatible with IBM cards, and can be installed in any of the five expansion slots in the PC. The boards were designed for breadboarding, prototyping, and low-volume production. Model 4613, designed for solder-wire interconnections, features three-hole solder pads interspersed between heavy power and ground buses. Model 4613-2, designed for wrapped wiring, has a full ground plane on one side, a power plane on the other, and three alternate power buses. Model 4613-1 has heavy power and ground buses around the perimeter. Each board features different DIP configurations.

Model 4613 and 4613-2 feature drilled plated-through holes spaced on 0.1-inch centers. Boards also include a 3½-inch-square area with individually padded, plated-through holes for mounting discrete components or hardware.

Each board comes with layout planning sheets, an instruction card guide, and a universal I/O connector mounting bracket. *(List Price: Models 4613 and 4613-2 $59 each, Model 4613-1 $37)*

Vector Electronic Co., Inc.
12460 Gladstone Ave.
Sylmar, CA 91342
(213) 365-9661

Megaram

44 An on-board memory expansion board from 64K to 1MB that includes a memory write protect command, program-controlled banking capability in 128K or 512K blocks, memory error detection, flexible memory boundary selection, and on-board two DOS-supported asynchronous RS-232-C ports. *(List Price: From $495)*

Microcomputer Business International
P.O. Box 16115
Irvine, CA 92713
(714) 553-0133, 727-0202

Bus Analyzer

45 A board that shows the status of the PC bus. It displays address, data, and control signals. Scope triggering capability is provided on address. *(List Price: $295 including instruction manual)*

Personal Computer Products
1400 Coleman Ave., Ste. C-18
Santa Clara, CA 95050
(408) 988-0164

DS Series

46 A series of integrated hardware and software systems that provide the PC with the CP/M 2.2 operating system for running CP/M-based software programs. It has plug-in compatible expansion circuit boards and software. The DS1 and DS2 contain 64K of parity RAM and a Z80B microprocessor. The DS Series normally appears as 64K additional RAM. When the disks are booted, the operating system becomes CP/M-2.2. The Z-80 and 8088 processors run as a distributed processing system with the Z-80 becoming the host CPU and the 8088 an intelligent I/O processor. The DS2 contains an IBM-compatible serial port with the ability to drive RS-422 lines. *(List Price: DS1 $660; DS2 with serial port $760; manual only, $40)*
Requires: 48K, one disk drive.

BYAD Inc.
5345 N. Kedzie Ave.
Chicago, IL 60625
(312) 539-4922

Baby Blue

47 An adapter board that supports the following CP/M 5¼-inch disk formats: SuperBrain (3.0 DOS or higher), NEC, Cromemco (single sided, double density), Triumph-Adler Alphatronic (Origin-O CP/M), DEC VT180 or VT18X, Heath/Zenith (48-track-per-inch format).

The board functions as an accessory printed-circuit board and software package that allows users to run programs written for CP/M under DOS. It acts as a computer within a computer and supports a keyboard, video boards, a printer, and an asynchronous communications adapter. The hardware consists of 64K dual-ported RAM with parity checking and a Z-80B microprocessor operating at 4.77 MHz (the same speed as the 8088 microprocessor). The software includes a translator and an intelligent converter that activates the Z-80B, reads files from CP/M formats, and determines executable machine-language files. *(List Price: $600 including board, software, manual; $980* WordStar *and* Mail Merge*)*
Requires: 64K, two disk drives.

Xedex Corporation
1345 Ave. of the Americas
New York, NY 10105
(914) 368-0353

Three-in-One-Board

48 A hardware and software replacement for three IBM cards: two serial cards and one game adapter card. *(List Price: $339)*

RGB Designs
175 S. San Antonio Rd. #117
Los Altos, CA 94022
(415) 941-2246

Lab Master

49 A board that provides data conversion capabilities and features a 16-channel, 12-bit analog to digital converter with a 30KHz conversion rate; a two-channel, 12-bit digital to analog converter; three 8-bit parallel ports; and five timer/counters. Options include programmable gain; 14- and 16-bit resolution; 40, 100, and 125KHz conversion rates; and expansion up to 256 channels. One-year warranty. *(List Price: $995)*

Tecmar Inc.
23600 Mercantile Rd.
Cleveland, OH 44122
(216) 464-7410
Telex: 241735

DSI-64K, -192K, -256K, -EX64K, -K64

50 Three parity cards that are compatible with PC hardware and software and can be placed in any free system slot. DIS-EX64K includes 64K RAM, upgradeable in 64K byte increments to 256K total RAM memory. DSI-K64 consists of nine 64K-bit dynamic RAM memory chips to add to the DSI-EX64K card, expanding memory by 64K bytes. *(List Price: DSI-64K $299; DSI-192K $599; DSI-256K $799; DSI-EX64K $350; DSI-K64 $175)*

DAVONG Systems, Inc.
1061 Terra Bella Ave.
Mountain View, CA 94043
(415) 965-7130

RS-232-C Asynchronous Adapter

51 Software and hardware compatible with the IBM Asynchronous Adapter, Quadram's board is available with either single or dual ports. The dual port version has two INS8250 LSIs and enables the user to operate two devices from one system expansion slot. A patch on the board is provided in the event future operating software will support additional devices. *(List Price: Serial adapter $129, dual port expansion kit $60)*

Quadram Corporation
4357 Park Dr.
Norcross, GA 30093
(404) 923-6666

Parallel Interface Adapter

52 A board containing a 25-pin, D-shell connector that allows the user to attach a parallel printer to the IBM PC. *(List Price: $105)*

Control Systems
2855 Anthony Ln.
Minneapolis, MN 55418
(612) 789-2421

PC-MATE E+EEPROM Expansion Unit

53 A unit that connects to the E+EEPROM Programmer/Reader Board to expand its capabilities. Like the main board, it can program 2716, 2732, and 2764 EPROMS and 2816 EEPROMs, but it adds an additionl 16 EPROM sockets, and the capability of programming up to 15 PROMS with the same data at the same time. The memory capacity may be extended to 192K using 2764, 96K using 2732, and 48K using 2716 or 2816. It is primarily useful as a gang programmer. One-year warranty. *(List Price: $195)*

Requires: E+EEPROM programmer/reader board.

Tecmar Inc.
23600 Mercantile Rd.
Cleveland, OH 44122
(216) 464-7410
Telex: 241735

PC-MATE Lab Tender

54 A hardware subsystem containing up to 32 channels of 8-bit analog to digital channels, 16 8-bit digital to analog channels, five 16-bit timers, and 24 digital I/O lines. It can accept 32 single-ended or 16 differential inputs at rates up to 50 KHz, and provides up to 16 analog outputs formed by 16 sample-hold amplifiers with a hold time of 30 msec at the maximum rate the computer can furnish. Two of the timers can be cascaded to provide time of day, and the digital I/O lines are programmable and available for control or monitoring purposes. One-year warranty. *(List Price: $395)*

Tecmar Inc.
23600 Mercantile Rd.
Cleveland, OH 44122
(216) 464-7410
Telex: 241735

Prototype Boards

55 A prototype board that comes in 5, 9, and 13-inches. It features plated through holes and distributed +5V and ground. Documentation is included. *(List Price: 5-inch $30, 9-inch $50, 13-inch $65)*

Personal Computer Products
1400 Coleman Ave., Ste. C-18
Santa Clara, CA 95050
(408) 988-0164

PC-netI Adapter Card

56 An adapter card capable of local area networking using CATV coaxial cable. It provides 64K address space allowing for more than 64,000 network users. Software features include virtual disk capability to allow multiple IBM PCs to share a single hard disk, shared printer and print files spooling, file sharing and transfer, and electronic mail. *(List Price: $595)*

Orchid Technology
1084 Hillview Dr.
Milpitas, CA 95035
(408) 942-8660

PC-MATE Scribe Tender

57 A parallel port and two serial ports that allow multiple I/O capability in a single expansion slot. An optional software package, *Softswitch*, is also available. Scribe Tender has two serial ports that emulate IBM serial ports, the first of which has a fixed address that coincides with the COM1 address while the second can be addressed to any I/O location. The printer port is functionally equivalent to the IBM parallel printer adapter. *Softswitch* transparently redirects system print output to a serial port. *(List Price: $195, with* Softswitch *$220)*

Tecmar Inc.
23600 Mercantile Rd.
Cleveland, OH 44122
(216) 464-7410
Telex: 241735

Error Correcting RAM

58 A memory card that corrects a single-bit error in any byte and detects a dual-bit error. It is designed for applications where memory must be nonstop. Any RAM chip in a row can be removed and the memory will continue to function perfectly at full system speed. *(List Price: $1,199)*

RGB Designs
175 S. San Antonio Rd. #117
Los Altos, CA 94022
(415) 941-2246

PC-MATE Extender Card

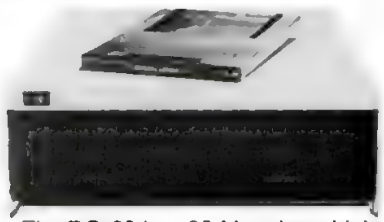

59 A fused bus extender card that brings all bus signals to a top-located bus connector 5 inches above the system unit, providing for repair and testing of boards. Features include fully interlaced grounds, a wire wrap area for special circuitry, gold contacts, and connection points for oscilloscope or logic analyzer probes. One-year warranty. *(List Price: $80)*

Tecmar Inc.
23600 Mercantile Rd.
Cleveland, OH 44122
(216) 464-7410
Telex: 241735

10 MByte Floppy

Resolves Storage Backup Dilemma

Now there is a proven, effective disk storage subsystem, the BC-20, for the IBM Personal Computer and S-100 based microcomputer systems.

The **BC-20** is a 20 Megabyte high-performance disk storage subsystem, consisting of two 10 Megabyte removable cartridges. This subsystem is a direct access storage device that uses flexible media. The media, a 10 Megabyte cartridge, is an efficient, durable poly-carbonate enclosure containing a single flexible disk, internally latched to prevent user contact. This cartridge is easy to use, and can be safely transported in its own packaging.

The BC-20 is the simple solution to your disk storage backup dilemma.

Write or call for more information.

1061 Terra Bella Ave.
Mountain View, CA 94043
(415) 965-7130

256K Memory Board

63 A 256K memory board that contains a memory address decoding scheme implemented via an on-board configuration switch, which allows each 64K segment on the board to be either disabled or based at any 64K boundary from 0 to 1 MB. This feature allows the board to be used in conjunction with the CPU board-mounted 64K memory or mixed with 64K expansion boards. It takes one expansion slot. *(List Price: $598, quantities of 100 $549 each)*

Zobex
7343 J. Ronson Rd.
San Diego, CA 92111
(714) 571-6971

Quadboard

64 A combination of four IBM PC boards: a memory expansion board, a serial RS-232-C asynchronous adapter, a time clock, and parallel interface card. The Quadboard leaves slots free for further memory expansion. The full-size board is compatible with IBM hardware and includes 256K memory expansion, clock/calendar, parallel printer I/O, and an asynchronous RS-232 communications adapter.

Memory expansion is socketed and expandable in 64K increments to 256K. Full parity generation and checking is included. A Quadboard feature allows parity to be switch-disabled to avoid system lockup upon error detection. The DIP switches allow it to be addressed starting on any 64K block, so it takes up as much address as it has memory. Memory access and cycle time meet all IBM specifications.

The board eliminates the manual entering of a date on the system bootup by providing for the clock and all software routines necessary for inserting the appropriate programs in the disks. The internal computer clock is compatible with most software routines that use clock functions. *(List Price: 64K $595, 128K $775, 192K $895, 256K $995)*

Quadram Corporation
4357 Park Dr.
Norcross, GA 30093

First we made IBM's baby grow up. Now we've made it think faster.

Only RAM+ from Seattle Computer gives your IBM-PC up to 256K of memory, the versatility of a built-in RS-232 serial port plus the speed of Flash Disk™ software.

Seattle Computer announces a major programming innovation for the IBM Personal Computer.

Our new RAM+ Flash Disk software lets you use memory like a disk. Flash Disk finds information in a flash by electronically simulating a disk drive 10 to 50 times faster than a mechanical disk. By copying your most-used programs and data to Flash Disk, you make them instantly accessible—ending those long disk access delays. Flash Disk is also ideal for temporary intermediate files.

And best of all, Flash Disk comes free with the RAM+ memory cards. Or, if you already own RAM+, Flash Disk software is available from your dealer.

As always, the beauty of RAM+ is the combination of memory and serial port on a single card. Not only does it save the $150 an IBM serial card would cost, but it also leaves an open slot for further additions—like another RAM+ card.

Available in 64K, 128K, 192K 256K, RAM+ is expandable, fast a reliable. Each card comes fully test and with a one-year guarantee. (Ex pansion kits are also available.)

Of course it's made by Seattle Computer. We're the people who w the operating system of the IBM-PC and we're still first in innovation.

How to order: New RAM+ w Flash Disk is available through you local computer store. Call us toll-fr at **1-800-426-8936** for the location your nearest RAM+ dealer.

SEATTLE COMPUTER

1114 Industry Drive Seattle Washington 98188

Hardware

BOARDS

Memory Expansion Board

69 A socketed memory board with parity checking that is user-expandable up to 192K. Standard 64K dynamic RAM chips are used on the board. Switches provide for both the selection of beginning address and memory bank select. *(List Price: 64K $395, 128K $595, 192K $795)*

Quadram Corporation
4357 Park Dr.
Norcross, GA 30093
(404) 923-6666

PC-MATE Speech Master

70 A board that provides flexible voice output capability through two methods: a ROM-based vocabulary speech synthesis chip set for high-quality speech but limited vocabulary, and a single-chip phoneme synthesizer giving less human speech but an unlimited vocabulary. An on-board audio amplifier and speaker are provided as well as an RCA phone jack. An optional software support package allows for complete text to speech translation including screen to voice and print of ASCII text directly to the Speech Master. One-year warranty. *(List Price: $395)*

Tecmar Inc.
23600 Mercantile Rd.
Cleveland, OH 44122
(216) 464-7410
Telex: 241735

Parallel Interface Card

71 A parallel interface that has a standard Centronics connector, pin-out, and timing with handshaking. Complete with an 8-foot shielded cable, IPIC operates most parallel printers including the IBM Dot Matrix Printer. *(List Price: $159)*
Requires: Printer.

Quadram Corporation
4357 Park Dr.
Norcross, GA 30093
(404) 923-6666

Time Clock

72 A clock/calendar board that eliminates the need to enter the current date at each bootup. It includes software that will poll the time clock for this information. All current software can be used to access seconds, minutes, hours, month, date, and year through normal system and BASIC commands. A Ni-Cad rechargeable battery is on the board. *(List Price: $159)*

Quadram Corporation
4357 Park Dr.
Norcross, GA 30093
(404) 923-6666

PC-MATE RAM/ROM Board

73 A means for developing programs using static RAMs and transferring them to EPROMs, eliminating the need for floppy disks in many applications. The static RAMs used on the board are byte-wide memories allowing the board to contain a mixture of RAM and preprogrammed ROMs. The board may be used with any one of three densities of chips: 2K, 4K, or 8K. The board has 16 sockets, providing a possible address range of 32K, 64K, or 128K, divided into eight equal segments, any of which may be hardware disabled, allowing holes for other devices. One-year warranty. *(List Price: $195)*

Tecmar Inc.
23600 Mercantile Rd.
Cleveland, OH 44122
(216) 464-7410
Telex: 241735

PC-MATE E+EEPROM Programmer/Reader

74 A board that enables users to program and read EPROM and EEPROM. The board has eight sockets, with a capacity of 64K bytes using 2764 PROMs. The board can be used to program one PROM at a time or to gang program multiple PROMs. It also enables data to be stored in nonvolatile memory that can be changed. No external connections are necessary and all sockets may be write-protected. Any socket may be software disabled to remove its PROM from the memory address space. Besides byte by byte write and erase, an entire EEPROM may be erased with an overwrite operation. One-year warranty. *(List Price: $395)*

Tecmar Inc.
23600 Mercantile Rd.
Cleveland, OH 44122
(216) 464-7410
Telex: 241735

Multifunction Card

75 A single multifunction card that provides 64, 128, 192, or 256K memory, a time of day clock and calendar (automatically sets system time and date), a serial port (for printer or communication port), and a parallel port for a printer. Also included is an encryption decoder that reveals a unique serial number or code. The decoder provides a machine-dependent lock that ensures single machine usage of certain software products. *(List Price: 64K $565, 128K $735, 192K $875, 256K $975)*

Tecmar Inc.
23600 Mercantile Rd.
Cleveland, OH 44122
(216) 464-7410

INCOME TAX OFFICES:
MULTIPLY YOUR OUTPUT

WITH TaxPro™

THE PROFESSIONAL INCOME TAX SYSTEM

TAXPRO DOES MORE. Five years of successful use and system improvement has pushed TAXPRO far beyond Form 1040 and its supplemental schedules. This versatile system also totals W-2s, computes FICA overpayment, calculates tax alternatives . . . even prepares client billing.

TAXPRO IS INTELLIGENT. It analyzes the client's tax picture, suggests the best route to go. Determines eligibility for special forms such as minimum/maximum tax, income averaging, to name a few.

TAXPRO IS EASY. Because it follows the tax forms line by line. Taxes are automatically figured, entered everywhere they apply. Change any entry, and all relevant data is automatically revised. Produces a printout that exactly fits 1040 and IRS-approved schedule forms.

TAXPRO IS GUARANTEED. We stand behind TAXPRO completely. Full, no-charge support through the tax season. Inexpensive, yearly system updates. Over 5 million returns prepared with no reported errors.

TAXPRO BUILDS PROFITS. The door is open to higher profits than you have ever enjoyed. Double, triple, or quadruple your output; pay for TAXPRO **and** the computer in one tax season.

If you do income tax returns, you need TAXPRO, the truly professional, computerized income tax preparation system.

Look into it today. Contract Services Associates, 706 South Euclid, Anaheim, California 92802, (714) 635-4055.

BOARDS

RAMCard, RAMChips

81 A memory board/RAMDrive system that provides disk emulation capabilities. It is available in 64K, 128K, 192K, and 256K configurations, and includes a disk enabling the computer to use either some or all of the memory as RAMDrive for disk I/O. This feature is valuable for programs that require repeated disk access. Users may expand lower memory configurations themselves by purchasing RAMChips, a 64K upgrading kit. Up to three RAMCards may be installed at one time. One-year warranty. *(List Price: RAMCard, 64K $495; 128K $695; 192K $895; 256K $1,095; RAMChips $200)*

Microsoft Corporation
10700 Northrup Way
Bellevue, WA 98004
(206) 828-8080
Telex: 328-945

MM64-1, -2, -3, -4 Memory Expansion Boards

82 Four user-expandable memory boards from 64K to 256K. All boards include parity and are supplied with a complete manual, a memory test disk, and a snap-in card guide. A package of nine 64K bit chips for additional memory expansion is provided. Five-year warranty for manufacturer-implemented boards. *(List Price: MM64-1, 64K $400; MM64-2, 128K $510; MM64-3, 192K $620; MM64-4, 256K $730; 64K-bit chips $108)*

Micro Match
10343 Commerce Ave.
Tujunga, CA 91042
(213) 353-5929

MM39-1 Extender Board

83 A board that extends any expansion bus connector up and above the PC's system unit; both sides of the extended board are accessible for testing. Boards are secured in place with supplied hardware. *(List Price: $45 including user manual)*

Micro Match
10343 Commerce Ave.
Tujunga, CA 91042
(213) 353-5929

Floppy Drive Controller

84 A controller that is functionally identical to the IBM floppy disk drive interface. It can interface up to four single- or dual-sided disk drives, two internal and two external. Installation is documented. The FDC includes a cable to interface the internally mounted drives. *(List Price: $195)*

Maynard Electronics
P.O. Box 3322
Longwood, FL 32750
(305) 869-8058

Persyst

85 A dual-channel asynchronous communications controller available in both single- and dual-channel models. The boards provide a rotating jumper plug that eases communications cabling by switching the transmit and receive signals in the connector. Programmable baud rates range from 50 to 19,200. The single-board controllers support 5-, 6-, 7-, or 8-bit characters with 1, 1½, or 2 stop bits. Odd or no parity bit generation and detection are included.

A fully prioritized interrupt system that controls the transmit, receive, error, and modem status change interrupts, while advanced diagnostic capabilities provide loopback functions for transmit/receive and input/output signals. Full duplex operation is supported, and double buffering eliminates the need for precise synchronization. The boards also feature full modem support, false start bit detection, and line break detection and generation. *(List Price: Single-channel cards $130, dual-channel modems $195)*

Personal Systems Tech., Inc.
22957 La Cadena
Laguna Hills, CA 92653
(714) 859-8871

Memory Boards

86 Two memory boards, expandable to 256K, starting at 64K and 128K respectively. A 256K RAM board with a 64K expansion kit and a dual-line asynchronous controller board are also available. All boards come with a one-year warranty. *(List Price: 64K $299, 128K $450, 256K $750, expansion kit $175, controller board $159)*

Micro Express
3857 Birch St. #109
Newport Beach, CA 92660
(714) 859-7575

PC-Mate Scribe Master

87 A communications system that includes three RS-232 serial ports operating at baud rates up to 230K as well as at conventional baud rates, and 24 TTL-compatible I/O lines. Two of the serial ports may be connected to DMA channels for high-speed (230K baud) CPU-transparent operation. Pipelined operation on two DMA channels allows maximum baud rates of 460K. Features include three high-speed asynchronous ports and independently selectable baud rates ranging from 110K to 115K. One-year warranty. *(List Price:* Scribe Master *$395, serial cable $25, parallel cable $25)*

OMNI-Board

90 A board that allows PC configuration without an expansion chassis. Features include two RS-232 asynchronous communication ports for attaching printers or plotters or for maintaining telephone hookup with other computers, a printer adapter with Centronics parallel interface, and a game adapter. OMNI-Board features up to five five adapters per board and a single expansion slot. The system includes a 24-hour clock and calendar with leap year controls and day-of-week registers. *(List Price: $485)*

Automated Business Machines, Inc.
29352 Avocet Ln.
South Laguna, CA 92677
(714) 643-0439

MM77-1 Prototyping Board

91 Up to 105 14-pin or 98 16-pin ICs can be mounted on this board. ICs on .3, .4, .6 inch or any separation up to 3 inches will fit. A mounting bracket and card guide are included. An optional 37-pin subminiature D connector can be used to give access to external signals. *(List Price: $50, 37-pin connector $18)*

Micro Match
10343 Commerce Ave.
Tujunga, CA 91042
(213) 353-5929

The Davong DSI-501 fits into the second slot of the IBM Personal Computer to provide up to 5 MB formatted (6 MB unformatted) storage for $1995. The DSI-514 provides up to 12 MB formatted (14 MB unformatted) storage for just $2695*.

$1995.* PLUG IN HARD DISK FOR THE IBM® PERSONAL COMPUTER.

One low price buys you the expanded storage, speed and reliability of a Winchester technology hard disk system. Both the DSI-501 and the DSI-514 support IBM DOS®. Full software support includes an installation program and complete diagnostics.

The DSI-ASYNC+ RAM provides 64K RAM, expandable to 256K with parity, and 2 serial I/O ports on one card. Select the option and save space as well as dollars. The price of $495* includes extensive software for flexibility.

More low-priced expansion options. Our wide selection lets you mix and match products to fit your needs and your pocketbook.

Choose the DSI-64K, DSI-192K, or the DSI-256K fixed RAM cards with parity. For powerful upgrades, select the DSI-EX64K—a 64K RAM card that easily expands to up to 256K with the addition of individual memory chips. Prices start at $299*. Also available is the DSI-ASYNC, a dual port serial I/O card priced at $199*.

Expand your IBM Personal Computer for a lot less money. Take this ad to your local computer retailer and ask for products by Davong.

BOARDS

Game Control Adapter

92 An interface device that allows the user to attach game paddles and joysticks. The joysticks and paddles themselves are not available directly from IBM but, when used with the PC, they are useful in graphics applications, video games, and for the attachment of light pens. *(List Price: $55, IBM Product Center prices)*

IBM Corporation
System Products Division
P.O. Box 1328
Boca Raton, FL 33432
(800) 447-4700, 322-4400 Illinois
447-0890 Alaska, Hawaii

IEEE-488 Interface

93 A GPIB-488 instrumentation interface that is ideal for laboratory and industrial control applications. Software drivers are available for total IEEE-488 Bus Control from BASIC. The new NEC7210 Chip provides best IEEE-488 Bus Control. A European model of the interface is also available. *(List Price: $395)*

Micro Interface, Inc.
3111 South Valley View Blvd. #1-101
Las Vegas, NV 89102
(702) 871-3263

OMNI-Board

94 A board that expands the PC by integrating five peripheral adapters on one board. It can include a parallel printer adapter, clock/calendar, RS-232 asynchronous communication adapters, and an Apple II-compatible joystick adapter. The board may be configured in the field to add any function required with the appropriate OMNI-board upgrade kit. *(List Price: $165–$485 depending on configuration)*

Automated Business Machines, Inc.
29352 Avocet Ln.
South Laguna, CA 92677
(714) 643-0439

Memory Expansion

95 Memory expansion modules that feature storage capabilities on one card from 64K to 256K in 64K byte increments. All memory chips are socketed for easy field expansion, and the cards are designed to meet IBM memory interface requirements including parity protection and high-speed dynamic RAMs to ensure that no wait states are required when accessing memory. Address decode can be user configured to select any 64K byte boundary within the 1 MB processor address range. *(List Price: 64K $279, 128K $379, 192K $479, 256K $579)*

Automated Business Machines, Inc.
29352 Avocet Ln.
South Laguna, CA 92677
(714) 643-0439

Asynchronous Communications Adapter

96 A device that enables the PC to be linked to a wide range of outside devices or networks, including other IBM computers, another PC, a large host system, or laboratory instruments. The communications option gives users access to the Dow Jones News/Retrieval Service and The Source. Other features include the ASCII character set, modem and data transfer control, complete status reporting, and even/odd/no parity generation and detection. The communications adapter supports 5-, 6-, 7-, or 8-bit characters and speeds of 50 to 9600 baud. An asynchronous communications support package is also available. *(List Price: $150, IBM Product Center prices)*

Requires: 16K, audio cassette storage device; application programs in BASIC require one disk drive, 32K.

IBM Corporation
System Products Division
P.O. Box 1328
Boca Raton, FL 33432
(800) 447-4700, 322-4400 Illinois,
447-0890 Alaska, Hawaii

Development Card

97 A full-size prototyping card with longitudinal power and ground buses. It features plated-through holes, an extra rigid support bracket, and a card edge guide. *(List Price: $49)*

Automated Business Machines, Inc.
29352 Avocet Ln.
South Laguna, CA 92677
(714) 643-0439

Memory and Prototyping Boards

98 A line of memory boards that includes Model SDI256, available from 64K to 256K; Model SDI256+ Async, a memory board with asynchronous interface (RS-232-C and current loop) available from 64K to 256K; Model SDI64, a miniature 64K nonfield expandable memory board; Model SDI576+ Async, a memory board with asynchronous interface (RS-232-C and current loop) available from 64K to 576K. One-year warranty. *(List Price: Model SDI256, from 64K to 256K, $295–$745; Model SDI256+ Async, from 64K to 256K, $445–$895; Model SDI64 $195)*

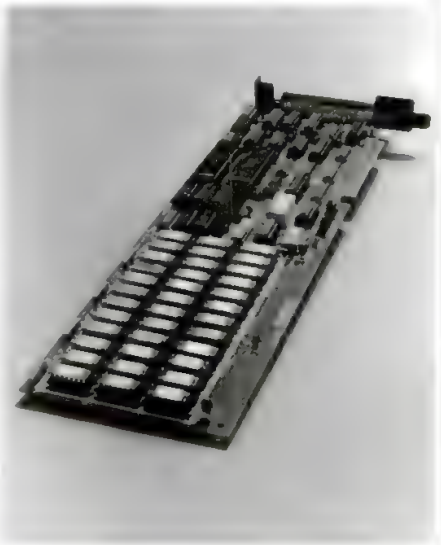

Requires: RS-232-C.

Sigma Designs, Inc.
P.O. Box 3765
Santa Clara, CA 95055
(408) 496-0536

CP/M-80 Adapter

99 An independent Z-80B auxiliary processor running at 4.77 MHz. Communication between processors is controlled by a pair of parallel I/O ports providing the PC with full control to halt, interrupt, and request the bus of the Z-80 processor. It provides on-board, parity-protected 64K byte local memory capable of doubling as a 64K memory expansion. Software is supplied for the execution of CP/M-80 programs. The Z-80 can interrupt and provide bus status to the PC, and high-speed, volume data interchange may be performed by direct memory to memory transfer to and from the Z-80. *(List Price: $545)*

Automated Business Machines, Inc.
29352 Avocet Ln.
South Laguna, CA 92677
(714) 643-0439

***Spectrum Series Board**, Personal Systems Technology, Inc.*

Xebec Hard Disk Kit

100 A hard disk kit consisting of a 5MB, 5¼-inch Winchester disk drive, single board controller, host adapter personality card, power supply, cable set, cabinet, software, and documentation. Aimed at both the home/hobbyist and system integrators, kit assembly does not require extensive assembly and technical knowledge on the part of the user. Component parts are preassembled and need only be connected. *(List Price: $1,300)*

Requires: Hard disk adapter (included).

Xebec
432 Lakeside Dr.
Sunnyvale, CA 94086
(408) 735-1340

Hardware

BOARDS

Expansion Chassis

101 An expansion chassis that provides additional memory, frees up the "printer-bound" operator, allows for access to S-100 systems, and extends disk storage capabilities.

System specifications include five-slot expansion bus, buffered address and control lines to the expansion bus, and multiple disk storage combinations such as hard disk (5 to 20MB formatted), smart hard disk controller, 96 TPI floppy disk drive (600K formatted), two 96 TPI slimline floppy disk drives (1.2MB formatted). *(List Price: $1,100)*

MICROBYTE/ASAP
1198 E. Willow St.
Signal Hill, CA 90806
(800) 421-7701, (213) 595-6431 California
Telex: (814) 656 491 (ETYB LGB)

256K Expansion Module

102 A RAM expansion module that provides 256K of additional RAM for the PC. Board specifications include parity errors reported to bus I/O check line. On-board parity generation and checking, hardware bank select/deselect, and hardware relocatable on 64K boundaries are also included. It is also available depopulated with 64K, 128K, or 192K. *(List Price: $750)*

MICROBYTE/ASAP
1198 E. Willow St.
Signal Hill, CA 90806
(800) 421-7701
(213) 595-6431 California
Telex: (814) 656 491 (ETYB LGB)

S-100 Interface Adapter

103 An interface adapter that allows the PC to communicate with S-100 memory and peripherals. Board specifications include utilization of up to 512K of S-100 memory, up to 512 I/O port addresses, special S-100 applications hardware, four hardware routed interrupts, and individual software enable/disable for each interrupt. *(List Price: Not available)*

Requires: S-100 mainframe.

MICROBYTE/ASAP
1198 E. Willow St.
Signal Hill, CA 90806
(800) 421-7701, (213) 595-6431 California
Telex: (814) 656 491 (ETYB LGB)

Memory Board

104 Four plug-in memory expansion boards that can expand the system from 64K to 256K with full IBM hardware and software compatibility. Boards occupy only one slot on the PC. Each board comes with a 2-year limited warranty. *(List Price: 64K $375, 128K $475, 196K $575, 256K $675)*

Requires: Not available.

Macrolink Inc.
1150 E. Stanford Ct.
Anaheim, CA 92805
(800) 854-3332, (714) 634-8080 California

64K EPROM Expansion Module

105 An expansion module that adds an additional 16K to 64K of EPROM on a single board. It can utilize 2716, 2732 and 2764 type ROMs and features hardware-selectable addressing. *(List Price: Not available)*

Signal Hill, CA 90806
(800) 421-7701, (213) 595-6431 California
Telex: (814) 656 491 (ETYB LGB)

FASTPAK

106 An 8087 numeric data processor that plugs into the vacant 40-pin socket on the main board. It includes instructions on how to plug it in and which switches to set. A manual, the 87/88 Guide, and one of five 8087 libraries (87BASIC, 87PASCAL, 87MACRO, 87FORTRAN, or 87COBOL) are also included. *(List Price: $375)*

MicroWare
P.O. Box 79
Kingston, MA 02364
(617) 746-7341

Color/Graphics Monitor Adapter

107 An adapter that enables the PC to provide users with a text system capable of displaying 256 different characters in any of 16 foreground and eight background colors, in 40 or 80 columns, and in upper- and lower-case. It can also display graphics in four colors on a color monitor or color television set. *(List Price: $300, IBM Product Center prices)*

Requires: Color monitor or color TV, RF modulator.

IBM Corporation
System Products Division
P.O. Box 1328
Boca Raton, FL 33432
(800) 447-4700, 322-4400 Illinois
447-0890 Alaska, Hawaii

Pack-Comm

108 A communications system that upgrades the PC to a voice and data communication terminal. It allows an average of 20 voice messages to be stored in a two-drive system; an average of 350 voice messages can be stored on a 5 MB hard disk. Features include an optional integral 300 baud modem with auto-dial and answering capability. *(List Price: $495)*

Requires: Not available.

Personal Data Systems, Inc.
1110 Wrigley Way
Milpitas, CA 95035
(408) 262-7880

Memory Expansion Kits

109 A 16K Memory Expansion Kit and 32K and 64K Memory Expansion Options (with parity) are available from IBM. *(List Price: 16K Memory Expansion Kit $90; 32K Expansion Option $325; 64K Expansion Option $350; IBM Product Center prices)*

(408) 942-8660

1st Class Mail™
It does everything but lick the stamp.

We've made a mailing list program worthy of today's remarkable microcomputers. It's called *1st Class Mail*™—but you can use it for anything you'd keep on a card file, like your car's servicing history or your address book. And it's not only the most flexible mail list/utility data base you can buy—it's also incredibly easy to use.

You create the label.

Since you're not stuck with the same old name/company/street/etc. format, you can make the label look like whatever you want. And with the new feature that lets you print right on your envelopes, you not only save time—you give your correspondence a very professional look.

Super search and sort.

1st Class Mail™ lets you search and sort in any of 12 different categories. So you can organize your mailings by zip code (up to 10 digits), alphabetical order, state, company, any way you want. Fast. And if you're using *1st Class Mail*™ for another type of data base, like a record collection, you can sort by whatever categories you choose— from String Quartets to Rhythym and Blues. It's extremely flexible.

Personalized entries.

One of the ways we've made *1st Class Mail*™ especially "user friendly" is by letting you create your own headings for each entry line. So your computer speaks *your* language.

The form letter feature.

1st Class Mail™ is compatible with many word processors, such as Screenwriter II,™ Applewriter II,™ Applewriter III,™ Pie Writer,™ and WordStar/Mailmerge.™ Just a few simple commands and you can combine your form letters with your mailing list for professionally formatted documents. All automatically.

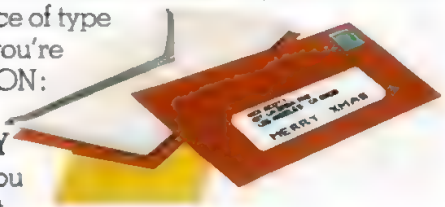

Automatic entry.

If time is money, this feature translates minutes directly into dollars. It automatically includes, or searches for, particular categories in each entry you record. Repetitive typing and sorting becomes a push-button joy.

The special message line.

Now you can put a special message anywhere on the label—in a choice of type styles. Whether you're saying ATTENTION: SALES MANAGER or MERRY CHRISTMAS! you can do it automatically. And right on the envelope.

Stop by your Continental Software dealer. Or call us today to find out all about *1st Class Mail*™ No matter what you're cataloging, from a household inventory for insurance purposes to a 25,000 person mailing list, *1st Class Mail*™ is the best program you can buy.

It's true, you still have to lick the stamp.

But we're working on it.

Available for: Apple II,™ Apple III™/III with Profile,™ IBM-PC™/IBM-PC with Tecmar™ hard disk/IBM-PC with Davong™ hard disk.

PERSONAL FINANCE MASTER

The premier personal and small business financial system. Covering all types of accounts including check registers, savings, money market, loan, credit card and other asset or liability accounts, the system has these features:

- Monthly Transaction Reports
- Budgets Income & Expense
- Reconciles to Bank Statements
- Prints Checks & Mailing Labels
- Automatic Year-End Rollover
- Prepares a Net Worth Report
- Searches for Transactions
- Handles Split Transactions
- User-Friendly Data Entry Forms
- Fast Machine Language Routines
- Extensive Error Trapping
- HI-RES Expense/Income Plots

For Apple II (48K) & IBM PC $75.00
Manual & Demo Disk only $15.00

COLOR CALENDAR

Got a busy calendar? Organize it with Color Calendar. Whether it's birthdays, appointments, business meetings or a regular office schedule, this program is the perfect way to schedule your activities. The calendar display is a beautiful **HI-RES** color graphics calendar of the selected month with each scheduled day highlighted in color. Using the daily schedule, you can review any day of the month and schedule an event or activity in any one of 20 time slots.

For Apple II (48K) $30.00

BUSINESS SOFTWARE SERIES

Both Programs $250.00

A user-friendly yet comprehensive double-entry accounting system employing screen-oriented data input forms, extensive error-trapping, data validation and special routines for high speed operation. The series includes these two modules:

GENERAL LEDGER: A complete accounting system with these features:

- Up to 500 accounts and 500 transactions per month.
- Interactive on-screen transaction journal
- Prints checks and mailing labels.
- Produces these reports:
 - Transactions Journal
 - Account Ledgers
 - Income Statement
 - Balance Sheet
 - Account Listings

For Apple II (48K) & IBM PC $150.00

ACCOUNTS RECEIVABLE

A flexible system with these features

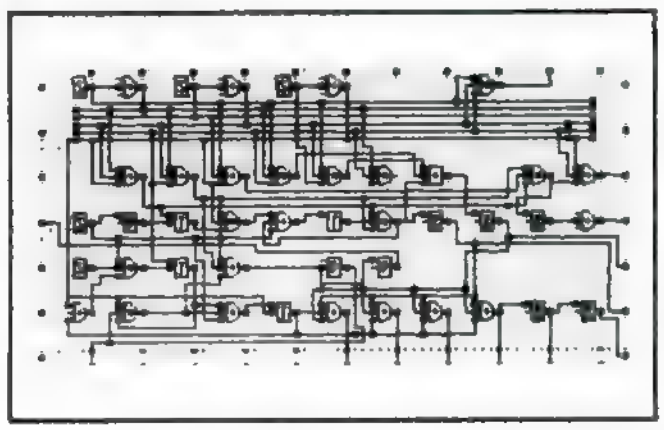

- Up to 500 accounts and up to 500 invoices per diskette.
- Prints invoices, customer statements & address labels.
- Interfaces to General Ledger.
- Interactive screen-based invoice work sheet.
- Produces these reports
 - Aged Receivables
 - Sales Analysis
 - Account Listings
 - Customer Balances

For Apple II (48K) & IBM PC (2 DRIVES) $150.00

LOGIC DESIGNER & SIMULATOR

An interactive **HI-RES** graphics program for designing and simulating digital logic systems. Drawing directly on the screen the user interconnects gates, including **NAND, NOR, INVERTER, EX-OR, T-FLOP, JK-FLOP, D-FLOP, RS-FLOP, USER-DEFINED MACRO** and **N-BIT SHIFT REGISTER** types. Network descriptions for the simulation routines are generated automatically.

The program is capable of simulating tne bit-time response of any logic network responding to user-defined source patterns. It will simulate networks of up to 1000 gates. Includes a source pattern editor, **MACRO** editor and network editor. Produces a fan-out report. Simulation output is a string of 1's & 0's representing the state of user selected gates for each bit time of the simulation.
A typical page of a logic drawing looks like this:

For Apple II (48K) & IBM PC (2 DRIVES) $250.00
MANUAL AND DEMO DISK: Instruction Manual and demo disk $30.00

MATHEMATICS SERIES

The Series Includes These 4 Programs:

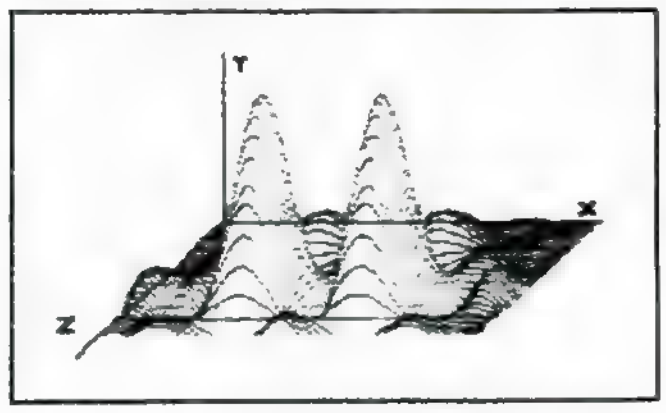

STATISTICAL ANALYSIS I: This menu driven program performs **LINEAR REGRESSION** analysis, determines the mean, standard deviation and plots the frequency distribution of user-supplied data sets.

NUMERICAL ANALYSIS: HI-RES 2-Dimensional plot of any function. Automatic scaling. At your option, the program will plot the function, plot the **INTEGRAL**, plot the **DERIVATIVE**, determine the **ROOTS, MAXIMA, MINIMA** and **INTEGRAL VALUE.**

MATRIX: A general purpose, menu driven program for determining the **INVERSE** and **DETERMINANT** of any matrix, as well as the **SOLUTION** to any set of **SIMULTANEOUS LINEAR EQUATIONS.**

3-D SURFACE PLOTTER: Explore the **ELEGANCE** and **BEAUTY** of **MATHEMATICS** by creating **HI-RES PLOTS** of 3-dimensional surfaces from any 3-variable equation. Disk save and recall routines for plots. Menu driven to vary surface parameters. Hidden line or transparent plotting.

For Apple II & IBM PC $50.00

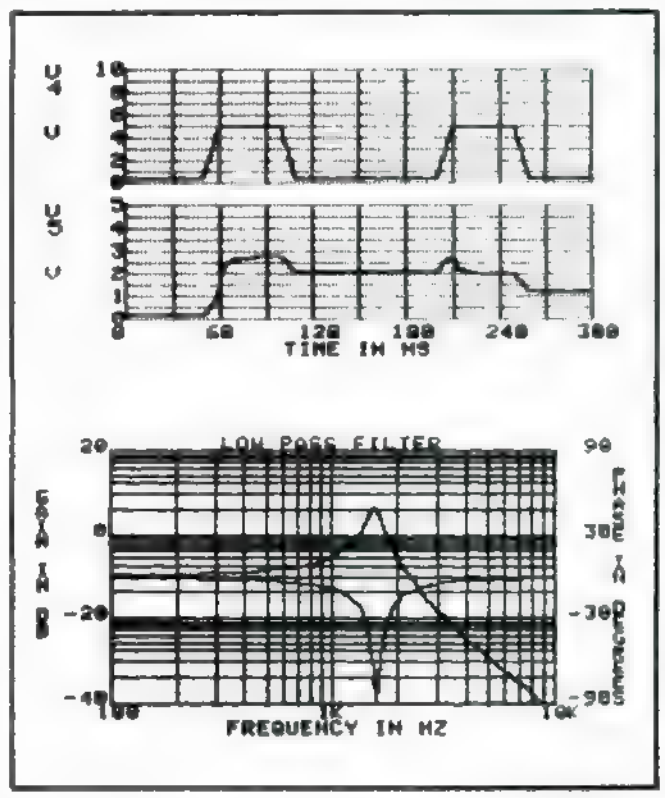

μCAP

Microcomputer Circuit Analysis Program

Tired of trial & error circuit design? Analyze and debug your designs before you build them. With **μCAP** you simply sketch your circuit diagram on the CRT screen and run an **AC, DC** or **TRANSIENT ANALYSIS.** Your circuit may consist of **RESISTORS, CAPACITORS, INDUCTORS, DIODES, BATTERIES, BIPOLAR** or **MOS TRANSISTORS, OPAMPS, TRANSFORMERS,** and **SINUSOIDAL** or **USER-DEFINED TIME DEPENDENT VOLTAGE SOURCES. μCAP** can analyze any such network containing up to 40 separate nodes. Includes a user controlled **MACRO** library for modelling complex components such as **OPAMPS** and **Transistors.**

Typical **μCAP AC** and **Transient Analysis** graphs:

For Apple II (48K) & IBM PC (2 DRIVES) $475.00
Manual & Demo Disk $30.00

ORDERING INSTRUCTIONS: All programs are supplied on disk and run on Apple II (48K) with a Single Disk Drive or IBM PC (64K) with Single Disk Drive unless otherwise noted. Detailed instructions included. Orders shipped within 5 days. Card users include card number. Add $2.00 postage and handling with each order. California residents add 6½% sales tax. Foreign orders add $5.00 postage and handling per product.

STORAGE DEVICES

CMS 1600 Add-On Disk Drive Subsystem

128 An 8-inch disk drive subsystem that provides 2.4 MB of removable storage on 8-inch floppy disks, while allowing single-density interchange. It uses two Tandon Thinline disk drives that are half the thickness of standard 8-inch disks. The subsystem fits into a 2½-inch-high cabinet on top of the PC and includes low-loss power supply, fan and fan filter, signal cable, AC power cord, and switched AC outlet for a monitor. It may be ordered with optional three-way write protect switches with three-color LEDs (red=write any disk, off=normal write protect tab, green=cannot write). A CMS 1600-IBM/C system including controller and utility software for CPM/86 and PC-DOS is also available. *(List Price: $1,750; $2,095 including controller and driver software)*

Columbia MicroSystems, Inc.
110 N. Tenth St.
Columbia, MO 65201
(314) 875-8900, 443-0255

DSI-501, DSI-514

129 DSI-501 is a 6.4MB (5.2MB-formatted), 5¼-inch disk drive. DSI-514 is a 14.3MB-unformatted (12MB-formatted) capacity 5¼-inch disk drive. Both come with 1-year extended warranties. *(List Price: DSI-501 $1,995, warranty $300; DSI-514 $2,695, warranty $350)*

DAVONG Systems, Inc.
1061 Terra Bella Ave.
Mountain View, CA 94043
(415) 965-7130

Tandon Disk Drives

130 Two models of Tandon disk drives: the TM100-1 for 160K, and the double-sided TM100-2 for 320K bytes. Installation instructions are included. DOS 1.10 supports the double-sided disk drive. *(List Price: TM100-1 $225, TM100-2 $295)*
Requires: Cable, disk drive adapter.

Micro Match
10343 Commerce Ave.
Tujunga, CA 91042
(213) 353-5929

HDIII

131 A hard disk subsystem that comes in 9.5 and 6.3MB configurations. It includes 115/230 VAC, and 50/60 Hz, and will drive up to four disks. The system also includes chassis, PR, controller, bus adapter, 5¼-inch disk drive, and software. *(List Price: 6.3MB subsystem $2,895, 9.5MB subsystem $3,395, PC adapter and HDIII driver software $249)*

STORAGE DEVICES

Disk Memory Series

132 Floppy disk systems that include a PC-compatible adapter card and support both 5¼-inch and 8-inch drives. Model CFS640C provides up to 640K internal memory. Model CFS1280C provides up to 1280K internal memory and includes the controller and two 80-track disks. The CFE640X and CFE1280X are external disk systems, each with two disk drives and a built-in power supply and cable. *(List Price: CFS640C $995, CFS1280C $1,395, CFE640X $895, CFE1280X $1,295)*

CTI, Computer Technology Innovations
1037 N. Fair Oaks Ave.
Sunnyvale, CA 94086
(408) 245-4256

Disk Attachment System

133 An 8-inch disk attachment system containing an 8-inch Qume DT 8 disk drive including an enclosure, a power supply, a cable, and utilities that run under DOS. Utility programs are provided for formatting, verifying, and copying files between the 8-inch and 5¼-inch disks.

Both single-sided, single-density IBM 3741 or DEC format and double-sided, double-density IBM S/34 or S/38 format are supported. A 64-point digital input and output attachment card for use in data acquisitions and control applications is also available. *(List Price: Drive and utility software $1,295, card only, $395)*

Requires: Disk adapter.

Flagstaff Engineering
2820 W. Darleen
Flagstaff, AZ 86001
(602) 774-3588

SFD-51, *Personal Micro Computers, Inc.*

Disk Drives, Adapter

134 A single-sided 160K disk drive, 320K double-sided disk drive, and a disk drive adapter. The 320K drive accommodates up to 327,680 characters on a 5¼-inch disk, enabling users to store and update information. The drives are supported by DOS 1.10, CP/M-86, and UCSD p-System, Version IV.0. *(List Price: 160K $450, 320K $650, disk drive adapter $220, IBM Product Center Prices)*

5MB Hard Disk

135 Installed in place of the second floppy disk drive, the 5MB capacity Winchester-technology fixed disk comes with a microprocessor-controlled interface adapter. DOS installation software is included, and the disk may be configured as one large or several variable-length volumes. Utility software provides for file backup and restoration. One-year warranty. *(List Price: $2,195)*

Automated Business Machines, Inc.
29352 Avocet Ln.
South Laguna, CA 92677
(714) 643-0439

PC-Bridge

136 A floppy disk subsystem that allows both 5- and 8-inch floppy disks to be intermixed on the PC, allowing access to programs and data available on both disks. Included are two 8-inch double-density, double-sided floppy disks (2.4MB storage), a controller, a power supply, a cable, and a cabinet. It is compatible with both PC-DOS and CP/M-86.

PC-Bridge also operates in a special streaming mode—data is streamed onto an 8-inch floppy disk in a high-density data format, providing backup to hard disk options (see hard disk subsystems by Tecmar). *(List Price: With 2.4MB hard disk storage $2,995; with 5MB hard disk $4,995; with 10MB hard disk $5,995)*

VOLKSWRITER™

a high performance word processor for a high performance machine

The wait is over. Volkswriter, designed especially for the IBM PC, allows you to concentrate on your writing instead of your word processor.

For your personal writing needs, use Volkswriter to prepare correspondence, proposals, studies, manuscripts, articles, and school work. In the office, use Volkswriter for agreements, sales letters, memoranda, reports, newsletters, price lists, schedules, and mailing lists. Volkswriter is unequaled in versatility and simplicity.

For programmers writing in BASIC, PASCAL, and other DOS languages, Volkswriter's full screen editor is unexcelled in speed and flexibility. Volkswriter is the last program editor you will ever need.

Volkswriter is easy to learn. A unique interactive tutorial shows you how to use it. With a reference card and on screen guide to commands, editing and printing functions are explained in step by step detail. For in depth documentation, there is a sturdy reference manual.

Standard equipment on the Volkswriter includes:

- Full screen editor
- Typewriter keyboard layout
- Extensive use of function keys
- On line help
- On screen tutorial
- Reset key for changing your mind
- Automatic word wrap
- Fast insertion and deletion of characters and lines
- Reformat paragraphs
- Rapid scrolling through text
- Move and copy blocks of text with 3 key strokes
- Swap lines with 2 key strokes
- Search or replace any or every occurrence of a word
- Set margin and tabs visually
- Store formats for later recall
- Automatic centering
- Left/right justification

Since Volkswriter files are in 100% standard DOS format, it can be used with VisiCalc™ print files, network transmissions, and BASIC and PASCAL text files.

Volkswriter protects you. You cannot erase data unintentionally. Problem situations are detected and explained in English.

And performance? Whether you have a 64K system with one disk drive, or a 128K system with two floppies and a hard disk, Volkswriter can and will use all your horsepower to drive as fast as you care to go.

...and the best news of all: Volkswriter is priced at $195

Tandon Disk Drive TM100-2

142 A 48 TPI, double-sided, double-density disk drive that is compatible with dual-sided drives supplied by IBM. *(List Price: $400)*
Requires: Disk adapter.

Datamac Computer Systems
680 Almanor Ave.
Sunnyvale, CA 94086
(408) 735-0323

UP-9705 Universal Mass Storage Subsystem, S1410 Controller

143 A subsystem that provides hard disk data storage in a compact system weighing 16 pounds. The 5¼-inch system provides 5MB of on-line mass storage, has an average access time of 170msec, and operates from either 115V or 230V AC power. A series of interchangeable host adapter cards allows the system to work with several different operating systems including DOS. The manufacturer supplies software compatible with the host computer.

The subsystem contains an S1410 single-board, microprocessor-based controller capable of handling two drives simultaneously, and features a standard SASI interface allowing it to operate with any standard host adapter. *(List Price: UP-9705 $2,995 including host adapter, S1410 $295)*

United Peripherals
432 Lakeside Dr.
Sunnyvale, CA 94086
(408) 730-4440
TWX: 910-339-9359

Cyberdrive

144 A hard disk that provides either 13.5 or 27MB disk capacity in a single cabinet with an integrated mini-cartridge tape for secure data backup. Average seek time is 33 milliseconds, including head settling. Integrated mini-cartridge tapes used for backup of data can allow for dumping of up to 10MB of data in approximately 10 minutes. Hardware, read-after-write error checking is incorporated in the tape device. Cyberdrive comes with all hardware and software to interface with the PC. *(List Price: 13.5MB version $5,750)*

Cybernetics, Inc.
8041 Newman Ave. #208
Huntington Beach, CA 92647
(714) 848-1922

TG-2012

145 A tape backup unit for Tallgrass 1000 series of 6 and 12MB hard disk systems that use ANSI standard DC-300XL cartridges to store up to 12.5MB of formatted data. Once begun, all operations take place with no operator intervention. Compatible software comes with the unit. *(List Price: Model TG-2012, under $1,400; 12.5MB tape cartridges, under $40 each)*

Tallgrass Technologies Corporation
9207 Cody
P.O. Box 12047
Overland Park, KS 66212
(913) 492-6002

He knows he'll save *a lot* with peripherals from PMC

MONITORS

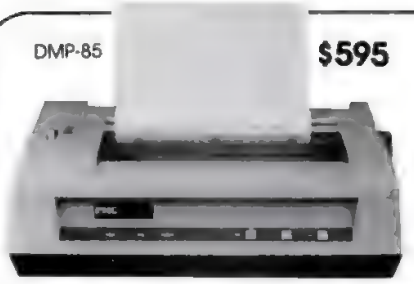

Choose either the VDM-80 that connects to the IBM color CRT interface or the VDM-80M that connects to the monochrome interface. Both are high quality green phosphor screen video monitors with 15MHz bandwidth for 80 characters per line resolution.

$159 - VDM-80
$265 - VDM-80M
plus $5 for cable

PRINTERS

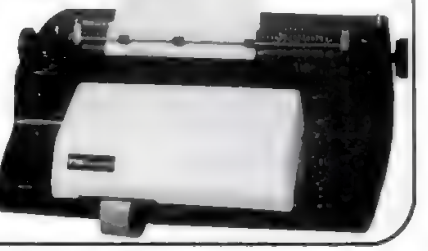

DMP-85 **$595**

Our Dot Matrix Printer, the DMP-85, is 50% faster than the IBM model and significantly lower in cost. It has both tractor and friction feed, 2 proportional fonts, 1.3K buffer and more. CABLE/ADAPTER $54.

Your IBM Selectric becomes an instant letter quality printer with our Electric Typing Fingers (ETF-80). It sits on top of the keyboard and connects to the printer port. No software or typewriter modification is required! CABLE/ADAPTER $54.

$595 ETF-80

DISK DRIVES

The 5¼ inch, single sided, software compatible drives provide 5 msec track access and perform conservatively at the recording density of the IBM operating system. Internal drives connect to IBM's cable and disk interface, while color matched external drives connect to the disk interface via the external connector.

$295 - SFD-51B Internal
$355 - SFD-51A External
plus $45 for external cable/adapter

STORAGE DEVICES

Floppy Drives

146 Single- and dual-sided drives. The drives step at 5 msec per step required for the PC, and are identical to original equipment drives. They are fully configured and tested for the PC. *(List Price: Single-sided $265, double-sided $360)*
Requires: Disk controller board.

Maynard Electronics
P.O. Box 3322
Longwood, FL 32750
(305) 869-8058

Instor/801

147 A floppy disk system that, when used with IBM's asynchronous communications adapter card, will read and write an 8-inch IBM 3741 format disk, which is then compatible with any computer that uses the IBM 3741 format. The INSTOR/801 System consists of an 8-inch flexible disk drive, a microprocessor-based controller, and a firmware package that automatically reads and writes IBM Disk I Basic Data Exchange Format. Features include direct access to data files, transference of PC disk files to standard 8-inch disks and vice versa, disk initialization, and a disk media and hardware condition monitor. *(List Price: $2,000)*
Requires: 48K, one disk drive, asynchronous communications adapter.

Instor Corporation
175 Jefferson Dr.
Menlo Park, CA 94025
(415) 326-9830
TWX: 910-373-2036

DSK50 Series Hard Disk Drives

148 A series of 5-inch hard disk drives configured in 6 and 12MB unformatted capacities. The 5-inch systems are designed to complement QuCes' existing line of 8-inch floppy and hard disks. They allow for optional installation of floppy disk, streaming tape cartridge, disk cartridge, or any other backup media or associated hardware. The systems include switching power-supply capability, a hard disk drive, and a host adapter card. They also include a formatting program, a hard disk utility, and a real-time clock. Alternate sectors are automatically assigned to any weak sector detected during formatting. One-year warranty. *(List Price: DSK50 Series, 6MB $2,895; 12MB $3,195; 24MB $4,795)*

QuCes, Inc.
178 Main St.
Metuchen, NJ 08840
(800) 631-5944, (201) 548-2135

Percom Hard Disk System

149 A 5¼-inch hard disk system in 5MB and 10MB models, featuring four-drive controller, a design that minimizes operating software overhead, optional floppy drive controller, and RS-232 serial data port. *(List Price: 5MB $2,495, 10MB $2,995)*
Requires: 64K, disk controller card.

Percom Data Company, Inc.
11220 Pagemill Rd.
Dallas, TX 75243
(214) 340-7081

Magnetic Tape Peripherals

150 A series of hardware- and software-compatible magnetic tape peripherals that allow data to be transferred between the PC and other IBM/non-IBM mainframe computers. Tape peripherals provide ANSI, ECMA, IBM, and ISO standards for media interchange.

IDT Model GPIB-1050 Tape Transport with one board-embedded formatter and a microprocessor controller provides over 40MB of data storage on a standard 10½-inch reel with 2,400 feet of ½-inch tape and can be used for any data storage application including disk backup.

Data is recorded in IBM-compatible 9-track (NRZI) 800 cip or (P.E.) 1,600 cip at 45 ips. A dual-buffer front-end operating ping-pong assures maximum data transfer rate.

A hardware code converter is also available to enable PC users to interchange data with binary, ASCII, or EBCDIC codes. The tape subsystems also feature on-board diagnostics for drives and electronics.

Model GPIB-3000, a digital mass storage subsystem on ¼-inch cartridge reads and writes ANSI, ECMA, and ISO codes using variable and intelligent file structures.

The recorder provides a means of mass storage for approximately 3.35MB of data per movable DC 300 X. cartridge. A built-in microprocessor controller supports three additional slave drives via a dual-buffer front end. Transfer rate between the PC and the GPIB-3000 is 6K bps. Either subsystem comes with a single-slot controller, cabling, documentation, and a driver provided on a 5¼-inch diskette operating from BASIC. *(List Price: $3,750–$8,500 depending on subsystem configuration)*

Hardware

STORAGE DEVICES

TG-1000 (1200, 1400, 1600) Series HardFiles, TG-2200 Streaming Tape Cartridge

160 A family of hard disk and tape backup peripherals. The TG-1000 series HardFiles comes in 6.25, 12.5, 20, and 30MB capacities. Interfacing with the PC is achieved by inserting the TG-09 card and using the supplied software disk, allowing users to select the number of directories and directory entries per HardFile. High-density backup is offered with the TG-2200 streaming tape cartridge system. Data streaming is used to copy entire surfaces of the HardFile onto individual tape tracks. Transfer to and from tape is done on a per drive basis. *(List Price: TG-1000 6.25MB HardFile $2,995, TG-1200 12.5MB HardFile $3,495, TG-1400 20MB HardFile $3,895, TG-2200 Tape Cartridge Backup System $1,395, 12.5MB Tape Cartridges $40)*

Disk Drives

161 An expanded disk storage system with double-sided drives providing up to 672K of formatted storage. The disk drives can be installed as internal drives using the IBM cabinet and power supply, or can be added as an external drive with cable, cabinet, and power supply included as part of the drive assembly.

Two models are available, and several combinations of internal and external drives can be used to meet storage requirements. The models include a single-sided drive with 168K of formatted storage and a double-sided drive with 336K. Combinations include two double-sided internal drives for 672K of formatted storage, two internal single-sided drives, two single-sided drives or one external double-sided drive, and two internal single-sided drives with an external double-sided drive. *(List Price: Internal single-sided drive $470, internal double-sided drive $570, single-sided external drive $570, double-sided external drive $670)*

now SOLOMON

Accounting Software is available for your IBM Personal Computer®

Solomon offers the most sophisticated accounting software system for microcomputers.

Easily set up, the remarkable Solomon software package operates from a single database managed by the MDBS™ database management system utilizing the industry standard operating system—CP/M.™

Solomon is faster, more powerful, more flexible, easier to install and easier to use than other systems.

The Solomon I System handles general ledger, payroll, accounts payable and receivable, invoicing, fixed assets, cash receipts and disbursements and address list maintenance.

The Solomon II System includes all these functions plus a job management package that can be used by engineers, architects, consultants, contractors and other service businesses.

Now you can have instant information for wise business decisions—with Solomon Series Software by TLB—from Computech.

Hardware requirements:
- 64K RAM
- Baby Blue™ CPU Card
- 132 Column Printer
- Hard Disk Recommended

10 reasons why you should call DataSource® for software...

1. Free Systems Analysis We have developed a variety of self-administered analysis tools to help you identify those products best suited to meet your needs.

2. Competitive Prices Our volume enables us to offer you prices which are consistently competitive. Compare for yourself, then call us toll-free 800-328-2260.

3. Express Service: 7 days per week, 24 hours per day You can place orders any day of the week at any hour of the day or night. Your order will be processed and shipped within 24 hours for all products in stock.

4. Discount Structures We offer significant discounts to any individual, organization, or user's group purchasing in quantity.

5. Key Account Program For corporations and institutions, we offer a comprehensive program: volume discounts, complete maintenance packages with an on-site option, specially staffed technical support, tailored training programs and creative financing options.

6. Unconditional Money-Back Guarantee We stand behind everything we sell. If you are not completely satisfied with your purchase, return the item within 60 days and receive a full refund.

7. Toll-Free Technical Support We service what we sell. Our customers have direct access to our technical staff on a toll-free basis. **800-328-2260.**

8. National Maintenance Network We offer a variety of maintenance agreements for both software and hardware products. Call for more information.

9. Flexible Payment Options We accept all major credit cards, checks, and money orders, as well as purchase orders from corporate accounts.

10. State-of-the-Art Software and Hardware We carry a broad range of what we believe to be the best in software plus carefully selected hardware products and accessories. Here are just some of the products we carry and recommend...

MONITORS

Micro-Verter

166 A monitor designed to interface IBM's video output with color and monochrome TV receivers. It comes with a video cable and an RF output stub coupler, and operates in the UHF band above channel 14 to avoid low-band VHF interference. Users have a choice of blank channels for operation.

A video gain adjustment control allows users to obtain optimum picture quality over a range of video levels. Video loop-thru allows users the option of operating a monitor simultaneously with a color TV receiver. It requires no direct connection to antenna terminals under normal conditions. *(List Price: $35, optional direct-connect, 12-inch antenna cable $1.50)*

Requires: Color/graphics adapter.

ATV Research

TWX: 910-874-2022

Olivetti DY 211 Daisy Wheel

181 A microprocessor-controlled bidirectional printer with optional automatic single-sheet feed. The printer features 20 cps print speed and shortest path seeking. Users have a choice of dual plastic 100-character print wheels in four pitches and 12 languages. A choice of ribbon cartridges and paper handling capabilities is also available.

Print options include normal, underscore, and bold print; horizontal tabulation; superscript; and subscript. Paper handling features include standard friction feed, optional automatic single-sheet feeder, and bidirectional tractor feed. *(List Price: Printer $1,745, sheet feeder $605)*
Requires: Parallel interface.

Basic Systems Corp.
230 W. Florence Ave.
Inglewood, CA 90301
(213) 673-4300

SP830 Daisy Wheel Printer

182 A daisy wheel printer with impact-type and bidirectional printing. Print wheels are 127- or 96-character plastic/metallic wheels. The print speed is a maximum 80 cps with an average 70 cps. Character sets are 127 characters and 96 characters. The print line is 345.4mm (13.6 inches) with 136 columns at 10 cpi or 163 columns at 12 cpi. Line spacing is 0.3mm (1/96 inch) per increment with column spacing at 0.2mm (1.120 inch) per increment. Forms-feed speed is 127mm (5 inches) per second with a carriage return speed of 400 msec for 136 columns. Tabulation is vertical and horizontal.

The printer can produce a maximum of six copies including the original, and can handle 101.6 to 406.4mm (4 to 16 inches) wide forms up to a maximum of 0.7mm (0.03 inches thick).
Requires: Hytype II (standard), Sprint 5, RS-232-C (CCITT V-24), (DC Current Loop 20 or 60mA optional).

Fujitsu Limited
2945 Oakmead Village Ct.
Santa Clara, CA 95051
(408) 727-4300

Envision Color Printer

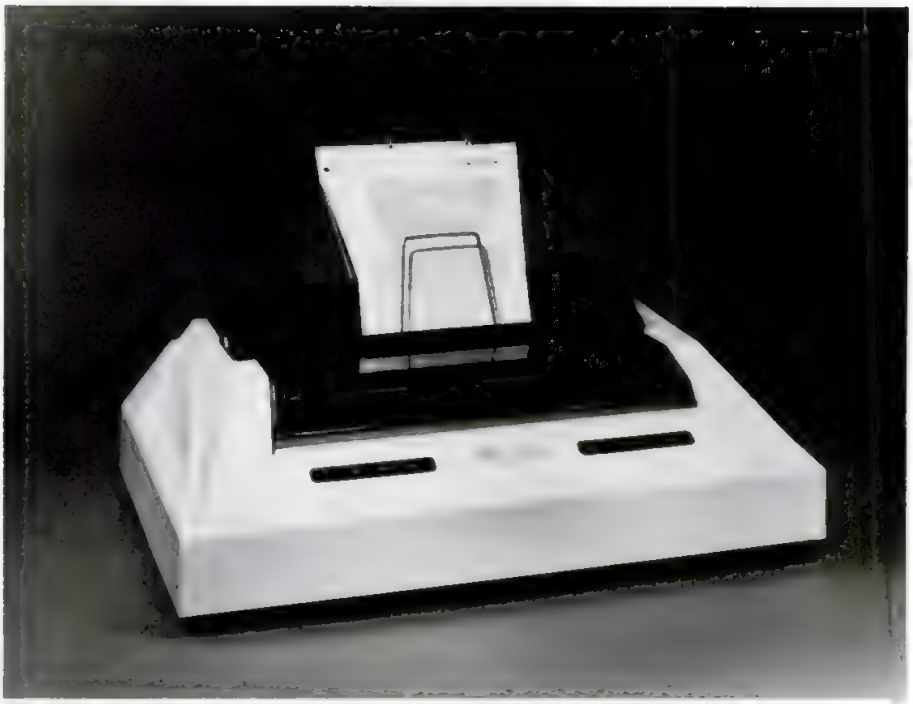

183 A color printer that offers letter quality text and high-resolution graphics. A multicartridge ribbon and carriage control system allows up to four separate ribbons to be used, permitting flexibility in selecting ribbon color or type. It includes a high-speed, 18-wire dot matrix printhead. Print speed is 100 cps. The printer switches between multiple fonts that are stored in firmware or downloaded from the host computer. All fonts support seven languages. *(List Price: $3,950)*
Requires: Standard printer parallel interface.

ENVISION Corporation
683 River Oaks Pkwy.
San Jose, CA 95134
(408) 946-9755

Microprism Dot Matrix Printer

184 A printer that combines the speed and graphics capabilities of a dot matrix printer with print quality similar to a daisy wheel. The printing technique is called MAISEY. Printer features include dot-plot graphics, serial RS-232 and Centronics-compatible parallel interface, automatic line buffering with 1,400 bytes standard, 75 cps in correspondence quality, and 110 cps in high-speed data mode. *(List Price: $799)*
Requires: Parallel or serial interface.

Integral Data Systems, Inc.
Milford, NH 03055
(800) 258-1386, (603) 673-9100
Telex: 953-032

***WP-6000**, Anadex*

Typ@Printer 221

185 An electronic typewriter that can be connected to the PC to become a letter quality printer. When connected to a modem it can become a stand-alone terminal without the aid of a computer or a separate CRT display. The typewriter features changeable daisy wheels with over 40 type styles available at extra cost. Keyboard functions can be controlled by computer with two-letter mnemonics preceded by two @ signs. Commands can be inserted into most software programs and text.

Other features include storage in non-volatile memory of up to ten most-used phrases, formats, and forms. The printer has a correctable carbon ribbon, and can print in four pitches of 10, 12, 15, and proportional spacing. It can handle paper up to 17 inches wide. Printer can also print in regular, underline, bold, bold underline and reverse type print. The printer can be utilized to access Telex and TWX networks through message conversion companies. Other options are also available. *(List Price: $2,850)*
Requires: Parallel interface. Cables provided with printer. Modem and serial interface needed to access Telex and TWX.

Rogers Products Company, Inc.
249-B East Emerson Ave.
Orange, CA 92665
(714) 974-6302

Office-Writer

186 An Adler-Royal 1010 electric typewriter that connects to an OMNI Board RS-232 or IBM asynchronous communications adapter. It features a daisy wheel print mechanism and a built-in RS-232 adapter module, and will output copy at 18 cps. *(List Price: Office-Writer $1,195, printer adapter $165)*
Requires: Serial interface.

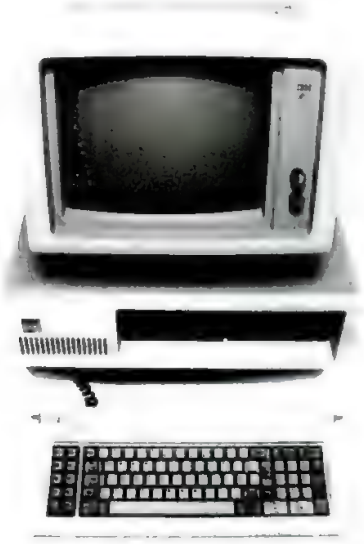

Automated Business Machines, Inc.
29352 Avocet Ln.
South Laguna, CA 92677
(714) 643-0439

PG 1000

187 A color graphic ink-jet printer that utilizes the manufacturer's drop-on-demand color ink-jet technology and provides color hard copy. A pixel-addressable, high-resolution model, the color printer comes complete with ink, paper, interface cable, and disk version RAM driver, allowing users to print anything created on the screen. *(List Price: $4,995 including cables, interface, and disk drive)*
Requires: Centronics parallel interface.

(404) 448-2675

If your IBM monitor draws a blank when you want it to draw graphics

then you need our Graphics Card.

You probably think that the IBM® Personal Computer is a fantastic machine. So do we. It looks great, has the best keyboard around, and you can order it with IBM's excellent monitor to display crisp, readable characters.

There's only one problem. You can't do graphics with IBM's monitor. So its high resolution graphics capability goes to waste.

Well, not anymore. Now there's the Hercules Graphics Card™ to let you do graphics on your IBM monitor. And it's available now so you can do pie charts, bar graphs, three dimensional plotting, schematics, fancy characters – or anything you can think of.

The Graphics Card was designed to replace IBM's display and printer adaptor board by offering the same features, including the printer function.

And, our Graphics Card delivers twice the resolution of IBM's color card in color mode for hundreds of dollars less than the cost of a color system. It's the lowest cost graphics setup available for your PC. (What's more, it uses only one slot on the IBM bus, while the color card and printer card use two.)

The Graphics Card costs only $599 and is available through participating Computer-Land® stores. Or, you can order it direct from us by calling (415) 799-9354. All our products are fully assembled and tested and come with complete documentation.

PRINTERS/PLOTTERS/TYPEWRITER INTERFACES

DS180

188 An enhanced version of the manufacturer's previous DS180. Enhancements include dot-addressable, raster-scan graphics to produce computer-generated charts, maps, and graphs at a resolution of 75 x 72 dots per inch.

A variable horizontal pitch selection allows printing at 10, 12, or 16.5 cpi plus double-wide printing at 5, 6, or 8.25 cpi. The expanded 2K FIFO print buffer handles a full CRT screen dump at up to 9600 baud without delaying the host system. A transparent mode is offered for isolating communications problems. For APL users a dual ASCII/APL character set option is available.

Other features include 180 cps print speed, bidirectional/logic seeking, expandable 1,000-character buffer, nonvolatile format retention, and 110-9600 baud communications.

The printer can run on either a parallel interface off the standard parallel card with a special cable configuration or on a parallel interface. *(List Price: $1,595)*

Requires: Not available.

Olive-80 and Olive-1

189 Olive-80 is a portable, daisy wheel printer that offers both typewriter mode and printer mode in conjunction with an Olive-1 interface. It is designed to allow for future functional enhancements. Typewriter mode supports all the features of the Olivetti Praxis 30 electronic typewriter, including 10-character correction memory. Printer mode expands to full word processing program with use of appropriate software. Olive-1 is a serial communications interface used with the Olive-80 printer that is designed for functional enhancements via upgraded CPU cards under development. It delivers text to the Olive-80's Praxis typewriter as rapidly as it can be printed and supports the standard hardware handshake mechanism, either via CTS or DTR. Two software communication protocols—ETX/ACK and XON/XOFF—can be handled. *(List Price: $749)*

Requires: Serial interface, Olive-1 interface.

The Olive Branch Association, Ltd.
1426 W. Winton Ave.
Hayward, CA 94545
(415) 887-4716

HR-1

190 A microprocessor-based printer with cassette-type daisy wheel and ribbon. The printer features three different character-per-line rates, 132 characters (1/10-inch), 158 characters (1/12-inch), and 198 characters (1/15-inch). It handles 16.5-inch paper width and has 2 inches per second paper feed speed. The carriage motion is bidirectional. *(List Price: Not available)*

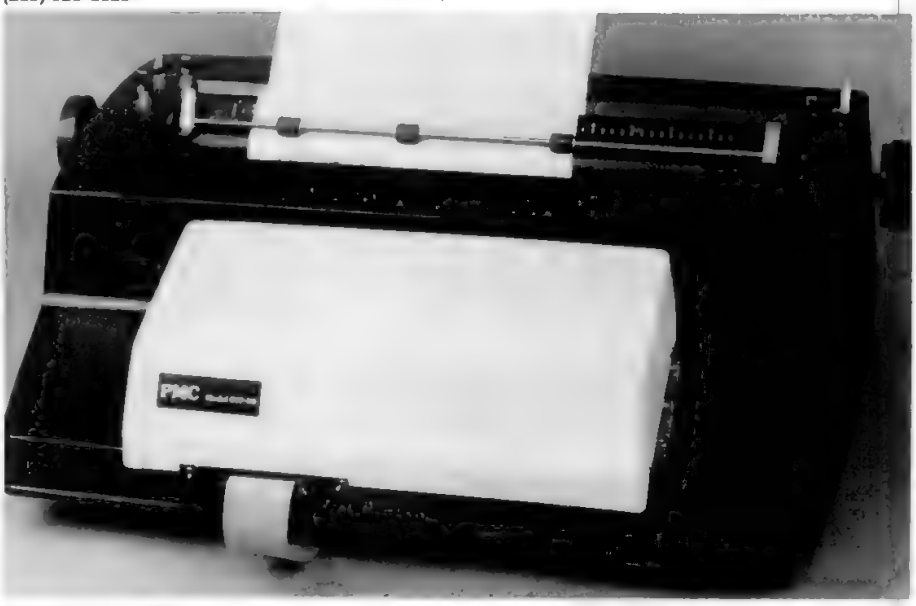

Requires: RS-232-C or Centronics parallel interface.

Brother Industries, Ltd.
c/o Kanematsu-Gosho
333 S. Hope St. #2800
Los Angeles, CA 90071
(213) 626-1123

Model 700

192 A typographic printer that prints draft copy at high speed or final versions in multiple typefaces. Mechanical parts are common with the Diablo 630 daisy wheel printer. Six different type styles or sizes can be installed in the printer, which also has plug-in slots for four additional draft/finish sets. The printer can be set by switches for common computer interfaces. *(List Price: $3,360)*

Sanders Technology
P.O. Box 1226
Nashua, NH 03061
(603) 882-1000

*Model **ETF-80**, Recortec, Inc.*

Diablo Model 630 RO Communications Terminal

191 A printer that operates at switch-selectable transmission speeds of 110, 150, 300, 600, 1200, 1800, 2000, 2400, 4800, 7200, and 9600 baud. Information is transmitted and received asynchronously over leased or dial-up telephone lines or through direct connection to the host. The interface is compatible with the Bell 103A and 212A modems or their equivalents.

Features include printer electronics, HPR05 printed circuit boards, power supply, friction platen, RS-232-C interface cable, operator control panel, and RO cover. *(List Price: Not available)*

Requires: RS-232-C interface.

IBM PC Software

SMALL BUSINESS ACCOUNTING $59.95
Based on Dome Bookkeeping Record #612, this program keeps track of income, expenditures, and payroll for a small business. Income and expenses can be entered daily, weekly, or monthly. Program computes monthly, through last month, and year-to-date summaries.

MAILING LIST..... $79.95
Maintains mailing lists of up to 1128 names per diskette. Commands allow adding, changing, finding, names, sorting by information in any field, printing labels. Supports 4-line labels of 32 characters per line. Printing on 1, 2, 3, or 4 column labels.

HOME BUDGET..... $59.95
Analyzes your income and expenses and prints monthly and year-to-date summaries showing tax deductions.

DATABASE MANAGEMENT..... $49.95
A simple and easy-to-use program. Define files of any description. Add, change, delete, find records, sort, total items, print file, and save or load on disk.

All programs written in BASIC language and ready to run on IBM PC-DOS. Complete instructions provided for modifying programs to suit your individual requirements.

Documentation to any program can be purchased separately for $15.00.

PRINTERS / PLOTTERS / TYPEWRITER INTERFACES

DMP-85 Dot Matrix Printer

194 A 9xN dot matrix printer with correspondence quality print. Standard features include rear mounted internal tractor and friction paper feed, forward and reverse line feed, print speed of 120 cps, proportional type font, 1.3K buffer, high-resolution graphic character set, and bit image graphics. Up to 136 columns per line. Pitches include 5, 6, 8.5, 10, 12, 17 cpi. *(List Price: $595)*

Requires: Parallel interface.

Personal Micro Computers, Inc.
475 Ellis St.
Mountain View, CA 94043
(415) 962-0220

ETF-80 Electric Typing Fingers Interface

195 A peripheral that turns an IBM Selectric or similar typewriter into a letter quality printer. The unit is placed on top of the typewriter keyboard and plugged into the parallel printer port. The unit supports both upper- and lowercase letters, numbers, and common symbols. Speed of the unit is switch selectable to 10 cps or 12 cps. A cable/adapter for the IBM PC is available. *(List Price: $595)*

Requires: IBM Selectric or similar typewriter, parallel interface.

Personal Micro Computers, Inc.
475 Ellis St.
Mountain View, CA 94043
(415) 962-0220

Interface for Olivetti Praxis 30

196 A microprocessor-controlled interface for the Olivetti Praxis 30 electronic typewriter for letter quality printing. Printing styles are changeable by snapping in new daisy wheels. Letter spacing is selectable with a choice of 10, 12, or 15 cpi.

Other printer features include 7-bit ASCII Centronics-compatible parallel input and underlining by carriage return without line feed or by backspace. All hardware is internal and removable by unplugging. The print speed ranges from 8 to 12 cps. A self-test program is built in. *(List Price: $795)*

Requires: Parallel interface.

B&S Computech
975 Forest Ave.
Lakewood, NJ 08701
(201) 364-3005

80 CPS Matrix Printer

197 A bidirectional printer that can print lines of up to 132 characters at up to 80 cps. Twelve character styles are available. It features a bidirectional 9x9 character matrix and weighs 12.5 pounds. *(List Price: $555, IBM Product Center prices)*

IBM Corporation
Systems Products Division
P.O. Box 1328
Boca Raton, FL 33432

447-0890 Alaska, Hawaii

***Color III Monitor**, Amdek Corporation*

Quantex Model 7030 Multi-Mode Matrix Printer

198 A printer that stores up to 40 letter quality and other resident fonts on line without requiring a change of print elements. It includes standard word processing fonts of Courier, Trend, or optional Emphasis, Cubic Italic, and Script for specialized applications. Users can also choose OCR-A, APL, and scientific fonts.

It can be utilized as a data processing printer and prints bidirectionally at either 180 or 150 cps, using character sets for USA, UK, Germany, France, Norway/Denmark, Sweden, Finland, and Spain.

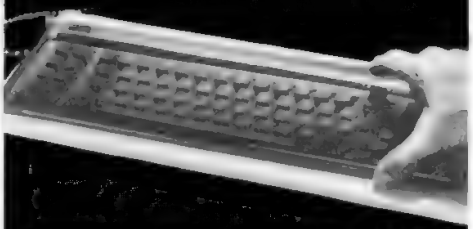

Other standard features include 4.7K buffer, bottom and front paper feed, line drawing graphics at 150 cps and 180 cps. *(List Price: $1,995)*

Requires: RS-232 or Centronics parallel interface.

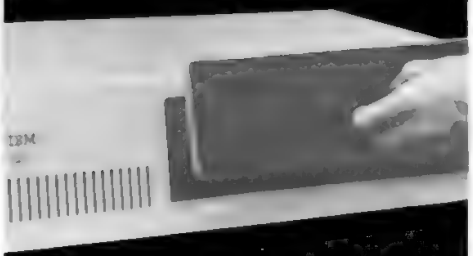

Quantex
60 Plant Ave.
Hauppauge, NY 11788
(516) 582-6060

Your IBM Personal Computer Deserves the Best.

Protect Your Investment

Keyboard Cover Model No. 1 $12.00
Protect your IBM personal computer keyboard with our dustcover made from rigid smoked bronze plastic. Its low silhouette was custom designed to fit with the IBM's contemporary design, and provides the protection your keyboard requires.

Disk Drive Cover Model No. 2 $8.00
Designed to protect the disk drive area from dirt and dust, this cover was made from black plastic that was produced to match the IBM's contemporary styling. The vinyl foam seal around its perimeter prevents harmful elements from entering the disk drive area.

Manual Rack Model No. 3 $24.00
An extruded black plastic manual rack with individual spacers to allow easy access to six manuals. This studily designed rack will be an asset to your IBM personal computer system. (Manuals not included.)

Send check or money order to:
Nat Hellman III, Inc.
5951 East Firestone Blvd., South Gate, CA 90280

Please note model no. and quantities with your order.

PRINTERS / PLOTTERS / TYPEWRITER INTERFACES

M 78-5 Trim Form

199 A dot matrix printer that has a built-in cutter that trims printed forms to specified sizes so odd-shaped items can be prepared easily. This versatile printer also produces a variety of type styles, including the special type for optical character readers, bar codes, and large lettering that can be three, five, or seven times normal character size. The TrimForm prints at speeds up to 200 cps, depending on the style and size of type reproduced. *(List Price: $4,345)*

Requires: Print controller, serial interface; may require special cable (contact dealer or manufacturer).

Mannesmann Tally
8301 S. 180th St.
Kent, WA 98031
(206) 251-5524

SpinWriter 3550

200 A letter quality, 35 cps plug-compatible printer for business applications and word and data processing. The forms handler accommodates several ranges of paper and document sizes and types. The handlers allow users to print out forms needed for data processing, word processing, graphics accounting, or other business applications. More than 50 print thimbles are available in both constant-pitch and proportional-spaced fonts, plus foreign language, technical, and scientific versions. The print thimbles allow users to print up to 203 columns on 16-inch paper. Software-invoked features include automatic proportional spacing, bidirectional bold and shadow printing, justification, and centering, underscoring, and sub/superscripting at speeds up to 350 wpm. *(List Price: $2,250)*

Requires: Centronics parallel interface.

NEC Information Systems, Inc.
5 Militia Dr.
Lexington, MA 02173
(617) 863-5720

SuperCord

201 An interface that allows an electronic typewriter to be used as a letter quality printer. Currently works with Smith-Corona Typetronic and Ultra Sonic, Brother EM-1 and EM-2, Adler 1010 and 1030, Royal 5010 and 5030, Silver Reed EX55, Hermes Toptronic, and the Facit 8000. The electronic typewriters need no modification. The printing features, quality, and speed depend on the typewriter and software used, but it generally prints at approximately 12 cps. *(List Price: $395 without typewriter)*

Requires: Parallel interface.

Cord Limited
1548 Brookhollow Dr.
Santa Ana, CA 92705
(714) 545-1643

32K Printer Buffer

202 A 32K printer buffer that provides a means for hardware spooling with the PC and is available in both serial and parallel output. *(List Price: Not available)*

MICROBYTE/ASAP
1198 E. Willow St.
Signal Hill, CA 90806
(800) 421-7701
(213) 595-6431 California
Telex: (814) 656 491 (ETYB LGB)

External Textformatting Interface

203 A microprocessor-based intelligent peripheral controller that can access all six fonts of the Centronics 737 or 739 from any word processor, providing low-cost typesetting capabilities. It features right-margin justification, multicolumn two-color printing, tabbing, and centering between user-defined margins. *(List Price: From $147, with graphics and two-color printing $157)*

Requires: Centronics 737 or 739 printer.

Microdome Corporation
45 Broadway
Denville, NJ 07834
(201) 627-8554

Model DXY Four-Color Plotter

204 An X-Y coordinate plotter that has a 10-inch by 14-inch effective plotting range, and includes four pens, pen holders, and chart hold-downs. Functions may be expanded by additional ROM. *(List Price: $949)*

Requires: Parallel interface.

Amdek Corp.
2420 E. Oakton St., Ste. E
Arlington Heights, IL 60005
(312) 364-1180
Telex: 25-4786

Olivetti Interface

205 An interface for Olivetti ET 221 and 121 typewriters. ET 221 features a two-line buffer, nonvolatile permanent memory 1K phrases, and page formats. Automatic right margin justification, paper feed, page end, and underscore are included.

ET 121 features an interchangeable daisy wheel printing element; one-line memory for automatic correction; one-line buffer; Pica, Elite, and Mikron pitches; automatic centering; decimal alignment; carrier return; right margin alignment; and paragraph indent. *(List Price: ET 121 with RS-232 interface $495, Centronics parallel interface $995; ET 221 with RS-232 interface $199, Centronics interface $1,300; installation extra)*

Requires: Not available.

Business Systems Solutions, Inc.
2579 Merced St.
San Leandro, CA 94577
(415) 351-3991

Starwriter F-10 Daisy Wheel Printer

206 A 40 cps printer featuring 1/120-inch character spacing with static print impact and 1/48-line spacing. It is an industry-standard, 96-character wheel with 40 msec line feed time, a return time of 900 msec, and features 136, 163, and variable-number printable columns.

A download option allows word processing expansion commands to provide proportional spacing and special character wheel selection. The printer is compatible with the X-ON, X-OFF, and ETX/ACK interfaces. *(List Price: $1,995)*

Requires: Parallel or RS-232-C interface.

Leading Edge Products, Inc.
225 Turnpike St.
Canton, MA 02021
(800) 343-6833, (617) 828-8150
Telex: 951-624

Model ETF-80

207 An interface for IBM Selectric or similar typewriters that provides letter quality printing. The typewriter requires no modification and no software to use the ETF-80. It prints approximately 10 cps and uses all standard typewriter characters. Automatic line feed on carriage return is switch selectable. *(List Price: $495 including PIF-40 cable)*

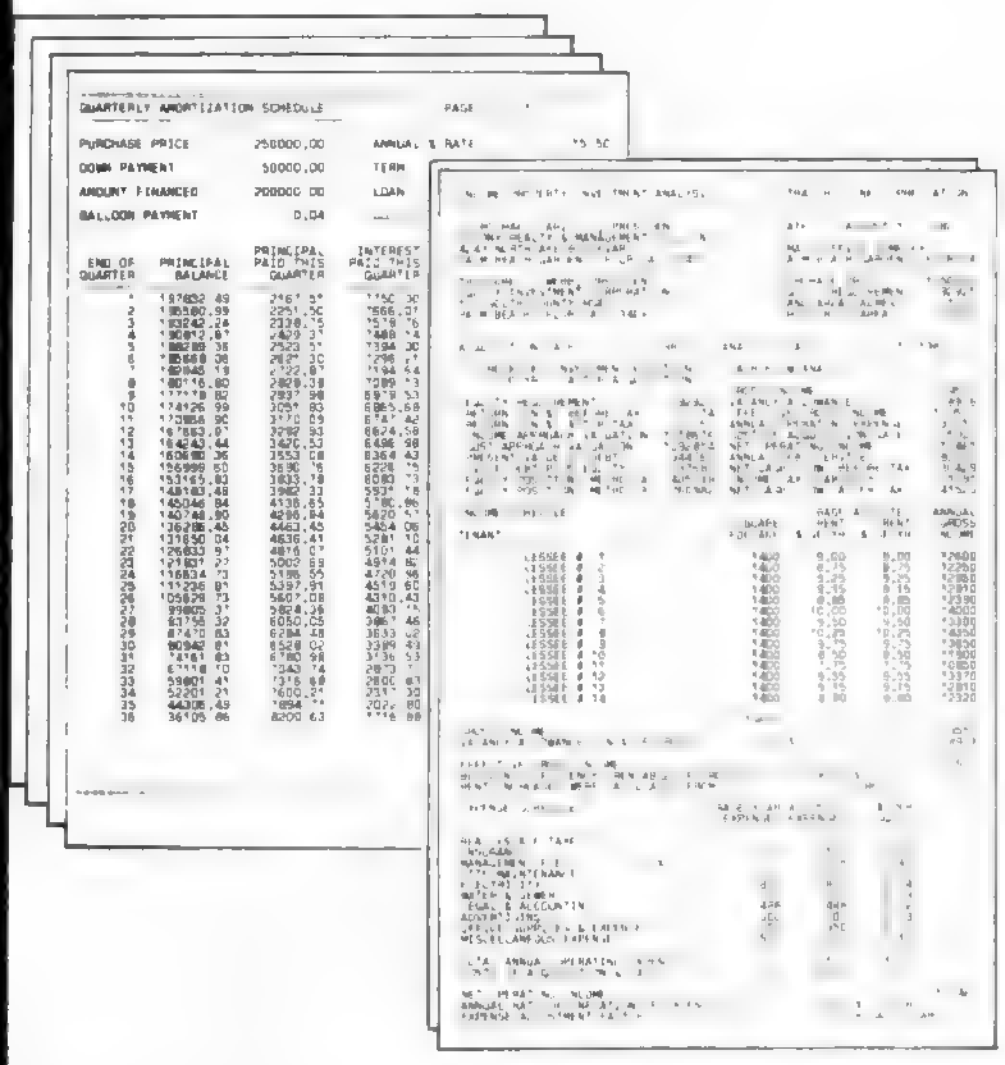

Requires: Centronics parallel interface.

Recortec, Inc.
475 Ellis St.

IBM™ Personal Computer

VisiCalc™ Real Estate Templates

This is a versatile problem solving package for business executives, developers, brokers, accountants, attorneys, and real estate analysts of all kinds. It combines the power and flexibility of VisiCalc with the simplicity of a menu driven program.

Menu selections appear on every VisiCalc screen to prompt you to load new templates on top of the template currently in memory. This simple 'overlay' technique makes use of *unpublished* VisiCalc capabilities. It results in automatic screen reformatting and presentation of new menu selections. In this way, 101 VisiCalc models interact to produce reports that make your work easier, better, more productive.

The VisiCalc Real Estate Templates are brought to you by Sofstar, the company whose only business is helping you be more productive in your business.

Sofstar ™

13935 U.S. 1, Juno Square,
Juno Beach, Florida 33408
(305) 627-5511

Sofstar . . .

We take the Work out of Working with VisiCalc.

Amortization System:

Interactive set of 29 templates solve for the unknown variable, then print multiple-page schedules. Monthly, bi-Monthly, quarterly, semi-annual, and annual payments.

Income Property Investment Analysis:

Evaluate and project performance of any income property, including office buildings, shopping centers, and rental apartments. Screen potential investments to minimize risk and maximize yield.

Internal Rate of Return:

Calculates I.R.R. of four combined cash flows. Accepts up to 40 years of data. Change any value and recalculate.

A.C.R.S. Depreciation:

Create schedules and analyze for best method. Tables are imbedded on the diskette. The user manual is an A.C.R.S. reference guide.

Comparative Depreciation:

Pre-1981 methods are displayed side-by-side. Template will automatically switch from accelerated to straight-line method in the year which will result in the maximum deduction. Calculates all partial-year prorations.

Mortgage Loan Analysis:

Track up to five loans. Calculates debt service, principal balance, interest and principal paid each year and to date, and more.

Personal Financial Statement:

Complete, four-page statement acceptable to most lending institutions. Save hours of preparation each time you need to update your statement.

Requires: IBM Personal Computer with 64K RAM, one disk drive (single or double-sided), 80 column display, printer, VisiCalc program.

$119.95 AT COMPUTERLAND: Ask for a demonstration.

PRINTERS/PLOTTERS/ TYPEWRITER INTERFACES

Centronics Model 739

208 A printer that produces correspondence for text and data processing plus graphics designed to meet the needs of small business system users. Model 739 is an addition to the line of small business computer printers. Standard features include pin-addressable graphics with 74 dots per inch horizontal resolution by 72 dots per inch vertical resolution, a monospaced print speed of 100 cps, and an acoustical top cover for improved single-sheet paper loading. It can print 7 x 8 dot matrix characters with true underline at 10 and 16.5 cpi for data processing and can generate Nx9 dot matrix proportional characters with true descenders for text editing applications. Additional features include a standard 2K buffer and a software-controlled top of form and self-test capability. *(List Price: $695)*

Requires: Centronics parallel or serial interface.

Centronics Data Computer Corp.
Hudson, NH 03051
(603) 883-0111
TWX: 710-228-6505
Telex: 94-3404

Centronics Model 122

209 A 120 cps desk-top printer designed for data processing and business processing applications. The printer provides standard industrial features such as 132 columns and pin-addressable graphics for business processing or design graphics applications. Users can select standard alphanumeric printing and pin-addressable graphics but also have a choice of 6- or 8-pin graphics.

Flexibility makes the Model 122 software compatible with the Centronics Model 739, giving users a broad base of readily available software packages to perform applications such as trend analysis, business graphics, pie charts, bar codes, and CAD/CAM draft plots. Other features include bidirectional/logic seeking printing in monospaced alphanumeric mode and unidirectional logic-seeking printing in graphics mode. *(List Price: Not available)*

Requires: RS-232 or Centronics parallel interface with 2K buffer.

Centronics Data Computer Corp.
Hudson, NH 03051
(603) 883-0111
TWX: 710-228-6505
Telex: 94-3404

Transaction Document Printer

210 A printer of forms of up to five parts that allows tear-off within 1 inch of top of form. It is suitable for invoice printing, inventory control, hotel management, wholesale/retail distribution, and any business application that needs multipart forms capability. Standard features include compressed print, 150 cps bidirectional logic-seeking printing, clean hands ribbon cassette, and variable-forms length control. *(List Price: Not available)*

Requires: Parallel interface.

WP-6000

211 A single-pass printer with multiple operational modes and speed ranges that provides letter quality, correspondence quality, draft quality, data processing, and graphics printing for the office environment. Letter quality printing of 10-pitch, 12-pitch, or proportional spacing can be produced at 150 to 180 cps for word processing. Speeds of 250 and 330 cps are obtained in a correspondence quality mode with 10- and 12-pitch, and proportional spacing. In both modes character fonts include Serifa, Helvetica, and a complete scientific set. Each of these is supported in both columnar and proportional printing, subscripts, superscripts, simultaneous underlining, as well as double-wide and italic characters. Pitch and character font changes can be produced within the same line. Other character sets can be added and user-developed character sets can be downloaded from the computer.

The printer provides left, right, and full justification and can center in both single- and double-column formats in the letter quality and correspondence quality modes. Horizontal and vertical tabs are each supported with 16 settable positions. Line spacing selection is 6, 8, 12, and 16 lines per inch.

Graphics can be printed at either of two resolutions: 72 x 72 and 144 x 144 dots per inch. Graphics generation is provided by a dot-addressable technique. A combination of the letter quality and graphics modes allows users to produce letters containing a company logo, text, and a computer-printed, "hand-written" signature through a high-resolution dot matrix printhead. The printer can emulate the Diablo 630. *(List Price: $3,250)*

Requires: Centronics parallel or RS-232 interface; Pin 36 on printer must be nullified to connect the PC.

Anadex
9825 DeSoto Ave.
Chatsworth, CA 91311

TWX: 910-494-2761

Smartbuffer

212 A printer buffer that accepts data from the computer at computer speed, stores the data in its own memory, and then spools the data to the printer or plotter at the slower printer speed. Smartbuffer is preprogrammed for office use and users can program a variety of protocols and conversions including serial to parallel. The buffer includes 16K and can be upgraded to as much as 128K. *(List Price: From $325)*

Requires: Printer.

PRINTERS/PLOTTERS/ TYPEWRITER INTERFACES

Printstation 350 Series

213 Industrial grade matrix printers designed for data processing, word processing, and business processing applications. Standard features include paper handling flexibility to accommodate cut-sheet, fanfold, and immediate tear-off demand-document forms. The printers are designed as universal machines, and they include resident character sets. For international usage, 110- or 220-volt operation is provided together with switchable serial/parallel interfaces. Additional standard features include pin-addressable graphics, 200 cps print speed, self-test/diagnostics, and bidirectional logic-seeking printing.

Based on a bus interface architecture, the Model 350 includes all standard features and can be customized by OEMs to suit user needs. Model 352 is designed for 200 cps data processing quality printing and combines all Model 350 features plus a basic communications formatter with a host of switch-selectable electronic functions.

Model 353 is a full-featured, multifunction unit with the ability to perform high-resolution printing by utilizing a multipass capability at 50 cps for word processing applications in addition to the 200 cps data processing mode. *(List Price: Model 352 $1,795, Model 353 $2,495)*

Requires: Serial or parallel interface.

Centronics Data Computer Corp.
Hudson, NH 03051
(603) 883-0111
TWX: 710-228-6505
Telex: 94-3404

Centronics Model 152

214 A 132-column desk-top printer designed for business and communications applications. It complements the 80-column Model 150. Standard features include 150 cps print speed bidirectional logic-seeking printing, adjustable tractors, clean hands ribbon cassette, and top of form compressed print that allows 132 columns to be printed in an 8-inch print line or 216 columns in a 13.2-inch print line. Additional features include a self-test, a five-part forms capability, and a visual paper-empty indicator.

A character set modification guide is available for OEMs to modify or create personalized character sets on Model 152 and Model 150. *(List Price: Not available)*

Requires: RS-232 or Centronics parallel interface.

Centronics Data Computer Corp.
Hudson, NH 03051
(603) 883-0111

iPEX ELF Interface Unit

215 An interface that allows several IBM typewriters to be used as letter quality printers. Print speed ranges from 150-192 words per minute; no modifications to the typewriter are required; installation does not alter the typewriter's appearance. Cables are available for direct connection to the parallel printer port or RS-232-C asynchronous adapter. Typewriters remain eligible for IBM warranty service. *(List Price: $495-$660 depending on model and options)*

Requires: IBM Selectric I, II, III, or IBM Electronic Typewriter Model 50, 60, or 75.

iPEX International, Inc.
5115 Douglas Fir Rd.
Calabasas, CA 91302

Color Conversion for Model 739 Graphics Printer

217 A color conversion kit for the Model 739 graphics printer that provides the ability to print in both black and red. Model 739 produces correspondence printing for text and/or data processing plus pin-addressable graphics that allow Model 739 to be used with many available graphics packages. The kit was designed for applications such as business graphics, financial and statistical analysis, sales trends, and scientific functions. It can also aid small-business system users in conducting presentations. The kit is user installable and comes with a Centronics red and black ribbon, Model 739 firmware, and a color shifter mechanism. *(List Price: $75)*

Requires: Model 739 graphics printer.

Centronics Data Computer Corp.
Hudson, NH 03051
(603) 883-0111
TWX: 710-228-6505
Telex: 94-3404

Model MP150 Printer

218 A matrix printer that forms characters bidirectionally in a logic-seeking mode to optimize system throughput. Nine ballistically driven print wires form characters with true descenders and underlining capability. Users have a choice of a full 136-character line at 10 cpi, or up to 226 columns may be printed by using 12 cpi or 17 cpi density.

The printer allows full 136-column printouts to be condensed to fit on standard 8.5-inch-wide paper. Double-wide characters can be software selected in any of the character densities to give a total of six different cpi densities. A 7x9 matrix font is used for high-speed data printing while an 11x9 serif-style matrix font is used for applications requiring correspondence printouts. A standard 96-character ASCII set with three additional strap-selectable foreign fonts is standard in each unit. Special fonts may be either down-line loaded into memory or permanently located in ROM.

A Centronics-type interface can accept parallel TTL level data at a transfer rate in excess of 1,000 cps using either a Strobe/Ack or a Strobe/Busy handshake. An optional RS-232-C serial interface can be added and will accept data at any one of seven strapable baud rates up to 9,600. The printer can also be interfaced to devices with an IEEE-to-Centronics interface adapter card. *(List Price: $1,095)*

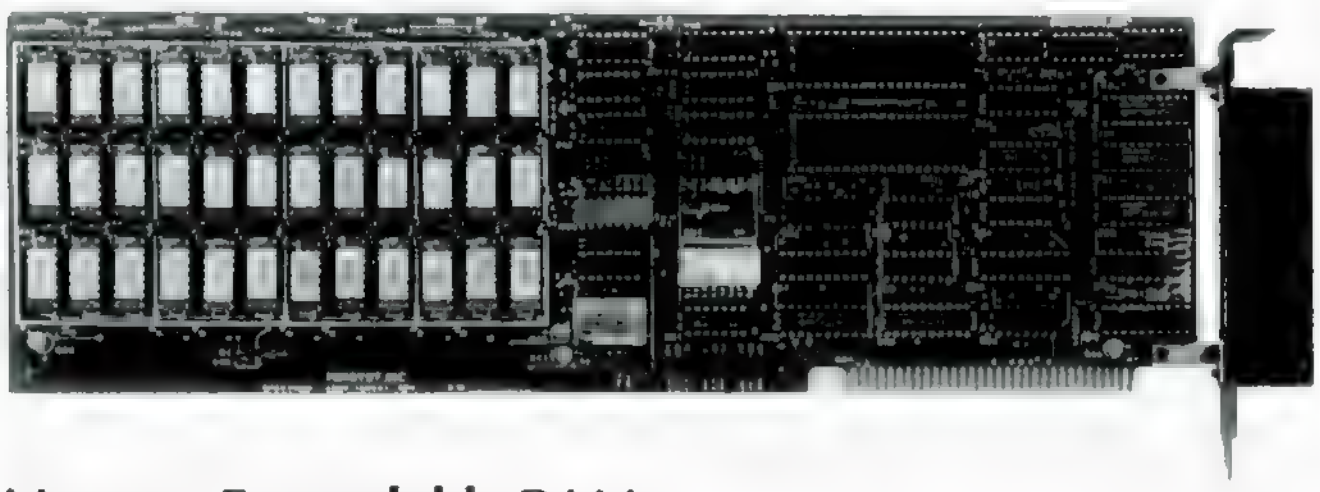

Requires: Parallel interface.

FOR THE IBM® PERSONAL COMPUTER

IBM

Memory Expandable RAM

- Expandable from 64 to 256K Bytes
- Parity generate and check
- Base address switch-selectable for any 64K boundary
- No wait states

Expandable Parallel Printer Port

- Supports Centronix, Data Products or IDS interface
- Switch selection of printer port I/O address
- Selectable Interrupt level
- Adjustable flat cable clamp (strain relief)

Two Expandable Asynchronous Communication Ports

- Single or Dual Channel, RS 232-C
- DCE/DTE selectable
- 3 wire interface support
- Full modern support
- Programmable Baud rates from 50 to 19,200
- Selectable Interrupt levels
- Programmable character length, stop bits and parity
- Single line configuration addressable as COMM 1 or COMM 2

SPECTRUM Multifunction Board

PRINTERS / PLOTTERS / TYPEWRITER INTERFACES

Parallel Print Spooler, Serial Print Spooler

219 The parallel print spooler is a printer interface card that can buffer up to 64,000 characters of printer output. It is fully software compatible and can be used anywhere an IBM parallel printer adapter can be used. No software patches are required.

The serial print spooler is similar to the parallel print spooler but is designed to work with most serial printers, buffering up to 40 minutes of output at 30 cps. It is compatible with all standard software. The board appears as a parallel interface to the PC, so no software changes are necessary. *(List Price: Parallel print spooler $349, serial print spooler $349)*

Genie Computer Corporation
18720 Oxnard St. #108
Tarzana, CA 91356
(805) 497-1262

Mediamix ETI²

220 An interface that converts any IBM electric typewriter into a printer compatible with the PC and its software. It is available in either a Centronics-type parallel model or an RS-232-C model.

The interface provides access to the typewriter's automated functions including underlining, centering, and tabbing. Users may mix features of their word processing programs, the ETI², and the IBM typewriter into a word processing system. They may access these printing effects in any program.

An optional module for the ETI² adds typesetting capability to the IBM ET 50. Users can create and print an entire newsletter using the PC, the ETI², and an IBM ET 50. *(List Price: Centronics Parallel $495, RS-232-C $595)*

Requires: IBM electric typewriter, serial or parallel interface.

MODEMS

Models 103J-L, 103J-M, 212A

221 Models 103J-L and 103J-M stand-alone modems feature full duplex, asynchronous communication rates of up to 300 baud. These are originate and answer modems, FSK modulated with an EIA RS-232-C interface. Both modems feature local analog loopback and visual indicators for status indication. An alternate voice/data option is available. Model 103J-M has an auto-answer option.

Models 103J-L and 103J-M are compatible with Bell modems 102, 112, and 212A, are FCC certified, and have direct access to the DDD network. Model 212A is compatible with the Bell modem 212A only. The 212A comes as a stand-alone or a rack-mount.

Data rates are full duplex, asynchronous, or synchronous at up to 300 or 1200 baud. All three modems come with a 1-year warranty. *(List Price: Models 103J-L, 103J-M $199 each; Model 212A stand-alone model $820; rack-mount model $725)*

Requires: Serial interface.

General DataComm Industries, Inc.
One Kennedy Ave.
Danbury, CT 06810
(203) 797-0711

UDS 103LP O/A

222 A modem that provides for 300 baud dial-up communication with customers, suppliers, or anyone else with compatible equipment. The unit will automatically switch from RS-232 to TTY interface. A front panel switch provides for conventional phone set-up. *(List Price: $195)*

Requires: Serial interface.

MODEMS

212A Data Modem

226 A microprocessor-based modem providing full duplex operation on two-wire PSTN networks with 0 to 300 baud asynchronous data or with 1200 baud asynchronous mode. It will accept 9-, 10-, and 11-bit characters including start and stop bits.

This modem is 103 or 113 series-compatible in the 0 to 300 baud mode and 212A-compatible in the 1200 baud mode. The called modem adapts to the speed of the originating station. Manual call origination is permitted by connecting the TELCO jack at the rear of the modem to the registered data jack and plugging the telephone into the TELSET jack, then manually dialing the number. Automatic answer capability is also incorporated into the units.

Front panel controls allow the user to implement tests at either of two speeds of operation, 0 to 300 or 1200 baud. A built-in abort timer disconnects the modem from the line when the absence of carrier is detected. Automatic disconnect is accomplished via a loss of carrier, a steady space signal, or by the terminal dropping Data Terminal Ready (DTR). Call disconnect can also be accomplished automatically or manually with the telephone handset or via the TALK button. The UDS 212A can operate with the UDS 801 series Automatic Calling Units. *(List Price: $695)*

Requires: Serial interface.

Universal Data Systems
5000 Bradford Dr.
Huntsville, AL 35805
(205) 837-8100
TWX: 810-726-2100

Model 1012 Modem

227 A microprocessor-based 1200/300 baud modem featuring full Bell 212A/103 compatibility and the manufacturer's patent-pending keyboard dialing. The modem is a 1200-baud version of the manufacturer's Model 1022 Intelligent Modem and the Hayes Smartmodem.

Applications include remote data stations, store-and-forward electronic mail, computer-computer file transfers, and automatic polling of unattended locations. An integral, serial autodialer allows for keyboard dialing. The built-in microprocessor provides a full complement of commands for controlling dialing, auto-answer, self-testing, and programming modem parameters.

Front panel controls have been ergonomically designed for nontechnical office personnel. The modem is fully FCC registered for direct connection. *(List Price: $995; reference manual only, $9.95)*

Requires: Serial interface.

Bizcomp
P.O. Box 7498
Menlo Park, CA 94025
(415) 966-1545

Hayes Stack Smartmodem

228 An auto-answer, auto-dial data communications system with touch-tone or pulse dialing and direct connection. The Smartmodem is program controlled by any language through ASCII character strings. A series of software commands and eight configuration switches change operating parameters. The Smartmodem operates in full or half duplex up to 300 baud.

LED indicators on the front panel provide a visual check of the modem's status, and a speaker allows users to monitor call progress. The Smartmodem also features automatic baud rate parity sense and word size detection. Two-year limited warranty. *(List Price: $279)*

Requires: Serial interface.

MARKETING & PRICING POLICY

MicroCorp markets all hardware and software from IBM and most major independent vendors, specializing in software-intensive products. **MicroCorp** provides high-level technical support, including machine communications, and provides any necessary additions and corrections to most software products at no additional cost. **MicroCorp** will match any advertised (unsupported) price for any product on a comparable basis. Here are some new products:

SPACE SAVERS
(an Electronic PC Delicatessen)

1. **SEATTLE RAM+**—more free slots. Available in 64K to 256K. Plus RS-232 Port for communications. All on one board occupying one slot. Includes Flash-Disk software to turn your Seattle board into a virtual disk. (See Below) PLUS $100 credit from **MicroCorp** for each IBM Communications board sent with order . . . $475.
2. **QUADRAM QUADBOARD**—64K to 256K Memory, Parallel Printer Interface, Communications and Real-Time quartz- accuracy clock with battery backup. Amazingly, all on the same board $595.
3. **MicroSoft RAM-DISK**—64K to 256K Memory with sophisticated virtual disk software. Works with DOS 1.1 $495.
4. Memory expansion kits for all of the above boards $150./64K

SUPER-MATH 87 with FLASH-DISK (NEW!)

1. **8087 Package**—Plug in 8087 math chip puts overdrive in your number crunching. Adds 8087 IEEE standard floating- point math to your IBM Macro Assembler (not included). Produces linkable. EXE files. Callable from Pascal, Basic, Fortran—needs IEEE to MicroSoft conversion macro (until Microsoft goes IEEE)
2. **FLASH DISK**—for those who already have the Seattle RAM+ Board . . . (or other plug-in memory boards), lets you use your 'board' as a virtual disk—Load entire disk into on-board memory for lightning-like response time. (Works best with total board memory of 192K: 160K for virtual disk memory and 96K for the system.) Incredible with MicroPro's Wordstar and other WPs. Available separately for $70.
3. **PRINT SPOOLER** helps your slow-speed printer keep up with the Super-Math; reallocation of devices, and more.

Entire Package . . $350. Flash Disk Alone . . $70.

MAG WHEELS for your WORDSTAR

1. **PATCHER PLUS**—A generalized patching program to allow correction of any PC-DOS disk file in the field (Like maybe the Wordstar word-processing program?) Ideal for programmers, EDP managers, computer stores, etc. Good for device- dependent fixes. Includes Wordstar modification notes and printer driver $100.
2. **WS-DRIVER**—Make your printer sit up and wag its power cord . . . and perform other tricks with this unique set of "fixes" tailored to your own printer. (Superscripts, subscripts, bold printing and more.) Lets your printer do everything it was designed to do. Free with purchase of WORD-STAR from MicroCorp $50.

LET YOUR PC GOSSIP

1. **COMM-PLUS**—Another improvement from MicroCorp. This complete on-disk patch kit lets you modify your IBM Async. program to support uploading and downloading, printers, auto-dial for Hayes modem and more. Includes 150 Pg. INTELLITERM tutuorial. (Full credit when you buy soon-to-be-released INTELLITERM) $25.
2. **INTELLITERM**—Just wait till you get a look at this program . . . The first truly user-friendly, full capability communications program. You'll be online in an instant—with INTELLITERM. Easy to tell who's "talking" with separately scrolling windows. Setup your own bulletin board with optional CBBS module $150.

DATAMASTER—The Premier Database Information Manager $800. Possibly the most flexible data base management system for your IBM PC. Provides true variable length records, user-defined input and report formats, reformatting of previously entered data records, and much more. (Scheduled for Winter '83). (Full trade-in credit for any data-base manager bought from MicroCorp).

CYC-48

238 A bar code scanner/decoder that plugs into the PC's RS-232 port. Passing the wand over a bar code sends the code's ASCII representation to the RS-232 port. The code is then read by an existing program as an ID number, a serial number, o a part number. The bar code itself can be generated on the PC's printer using the manufacturer's program *BAR-GEN*. Users need a dot graphics feature to use the program.

A voice output option is also available fo users to verbalize directives and responses from the computer. Words can be verbalized at any time by sending a stream of phoneme to the CYC-48. A booklet containing phoneme representations of 45 basic sounds, dipthongs and 1,400 words is included. *(List Price: CYC 48 $650; BAR-GEN $345, voice option $245)*
Requires: RS-232 port.

New Wave Systems
12123 Washington Pl.
Mar Vista, CA 90066
(213) 475-8545

***Micro Disc**, Amdek Corporation*

Match-Box

239 A programmable computer cablin system that can be used to fit various cable configurations. Two component connect almost any two pieces of hardware, with a combined length of up to 110 feet. The components are mated, and the system is programmed by moving pins into the correct sockets to meet each unit's requirements. *(Lis Price: $19–$53 depending on the number of conductors used)*

ICO-Rally Corporation
2575 E. Bayshore Rd.
Palo Alto, CA 94303
(415) 856-9900

***Automatic Feed Optical Card Reader**, Chatsworth Data Corp.*

Color/Monochrome Interface Cable Module

240 A module that connects to the color/graphics adapter and performs signal transformation to allow connection of the monochrome monitor. All features of the color/graphics adapter are supported including graphics to 640x200 pixels and multiple pages on low- and medium-resolution modes. It is IBM software compatible. *(List Price: $95)*

Automated Business Machines, Inc.
29352 Avocet Ln.
South Laguna, CA 92677
(714) 643-0439

Apple Joystick Interface

241 An interface that plugs into any standard IBM game adapter and provides connections for two Apple-compatible joysticks. *(List Price: $29)*

Requires: Game adapter.

Automated Business Machines Inc.
29352 Avocet Ln.
South Laguna, CA 92677
(714) 643-0439

PC-Apple Graphic Adapter

242 An adapter board that connects the standard IBM PC game card to a standard 16-pin socket, connecting all Apple PC game paddles and joysticks to the IBM PC. *(List Price: $19.95)*

Requires: Game adapter.

XEC Company
14222 Dallas Pkwy. #1104
Dallas, TX 75240
(214) 980-9736

Phone Chronicle

243 Peripheral and software that logs outgoing calls with date, time, length of call, and number called. Date, time, and duration of incoming calls are also logged. This assists businesses in identifying unauthorized or personal calls and assigning calls to the proper department. Up to 200 calls can be logged in memory. Connects to the telephone line and includes software. *(List Price: PC-1 $395, PC-IV expanded version $995)*

TecMa Inc.
2918 Scott Blvd.
Santa Clara, CA 95050
(408) 727-2751

Surge Protector

244 A power stabilizing unit that provides a buffer between electronic equipment and voltage spikes and power surges. It is designed for a single outlet and is well suited to the PC environment where one computer is usually plugged into an outlet at a time. It is less costly than double-outlet designs and dissipates up to 950,000W at 100 microseconds, providing fast and powerful surge protection. *(List Price: $39.95)*

ICO-RALLY Corporation
2575 E. Bayshore Rd.
Palo Alto, CA 94303
(415) 856-9900

Cassette Cables

245 A cable set that allows use of the IBM PC cassette interface. *(List Price: $25 including instruction manual)*

Personal Computer Products
1400 Coleman Ave., Ste. C-18
Santa Clara, CA 95050
(408) 988-0164

INVENTORY MANAGERS:

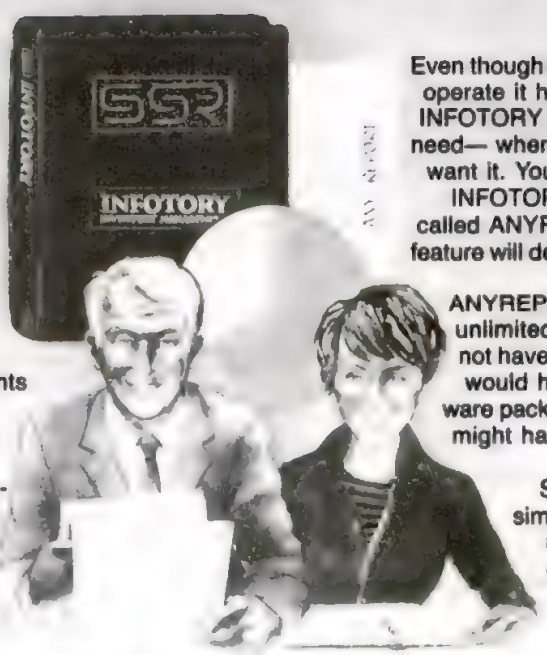

WHEN YOU BUY INFOTORY™... YOU'RE BUYING THE BEST!

SSR Corporation has been providing business solutions for all makes and sizes of computers for over twelve years. They know your needs and how to satisfy them.

They know what management wants in an inventory system...less time learning and more time producing.

Last year SSR introduced INFOTORY...the ultimate solution to inventory management problems.

With INFOTORY *anyone* in the office can learn the system—in less than four hours...because it's so easy to use.

Even though the system is easy to learn and operate it has great flexibility and power. INFOTORY promises the information you need— when you need it *and* the way you want it. You design your own report with INFOTORY'S unique reporting feature called ANYREPORT™. This easy to learn feature will deliver customized reports within minutes.

ANYREPORT's capabilities are almost unlimited. Other inventory systems do not have an ANYREPORT feature. You would have to buy an additional software package to get this extra...and you might have to take a computer course to learn how to use it.

So, for the best, most flexible, simple-to-learn inventory package available...stop in at your nearest IBM PC Dealer, or give SSR a call for more information.

SSR Corporation, 1600 Lyell Avenue, Rochester, New York Telephone 716-254-3200

Hardware

MISCELLANEOUS

Graphic Analysis

246 A hardware and software package. The hardware includes a digitizer with .001-inch resolution (sizes of 11- by 11-inch to 42- by 60-inch active area are available) digitizing stylus, power supply, communications interface cable, and operator's manual. The software supplied on disk can be used for different kinds of measurements including material usage, cost, length, distance, perimeter, area of irregular polygon, and display of X-Y coordinates to .001 inches.

The software is controlled by a 22-function block menu attached to the tablet. Eleven functions are predefined, but the remaining 11 functions can be user defined. The software was designed so users can access the digitizer input driver, measurement routines, and menu to build custom digitizing programs for special applications. The program allows users to bypass digitizer integration problems. *(List Price: With 11- by 11-inch digitizer $1,419, with 11- by 17-inch digitizer $2,606, with 20- by 20-inch translucent digitizer $3,025)*

Requires: One disk drive, (other requirements not available).

GTCO Corporation
1055 First St.
Rockville, MD 20850
(301) 279-9550
Telex: 898471

Software-Controllable Switches

247 A port expander that allows single-port units to interface with multiple peripherals or computers. Model QS11 allows a single port to communicate with one of four output devices. Model MO11 allows four computers, modems, or terminals to share a common unit, such as a printer. Model MO11 can also be used for system back-up. Input and output ports can be selected by the user via one of 128 codes. Control code and baud rate are selected via switches on the rear of this compact, lightweight unit. Extra cables or cards are not needed. Switches can be controlled by terminal, modem, or computer. *(List Price: $395)*

Requires: RS-232-C or Centronics interface.

Advanced Systems Concepts, Inc.
P.O. Box Q
Altadena, CA 91001
(213) 794-2308

TYPE-'N'-TALK Synthesizer, Votrax, Division of Federal Screw Works

Standby Power System

248 A battery that provides 200 watts of emergency electrical power at 120 volts for 20 minutes should normal power supply fail. It insures against irretrievable loss of data in memory or even irreversible damage to magnetic media should power loss occur during disk access. If the power drops below 102 volts, a sensing device immediately switches to output from an internally sealed gell electrolyte lead-acid battery, and a red warning light alerts the user to a switch. Continuous-line filter traps eliminate spikes in the current during normal usage. *(List Price: $489)*

Gould Inc.
P.O. Box 43140
St. Paul, MN 55164
(612) 452-1500

Programmable Optical Mark Reader

249 An optical mark reader that can be programmed from the host computer through a specially designed language. When power is applied, the reader defaults to either a Hollerith to binary or Hollerith to ASCII mode, depending on a switch setting, allowing the user to define the columns of the card from the host. It is available with a driver program and test scoring package. *(List Price: $1,095)*

Requires: Serial interface.

Chatsworth Data Corp.
20710 Lassen St.
Chatsworth, CA 91311
(213) 341-9200

Graphic Analysis Package

250 A package that provides the hardware and software needed to use the digitizer as an electronic planimeter for computing perimeters, lengths, distances, and areas of polygons. The user measures distances and lengths, accumulates successive measurements, subtracts lengths from the accumulator, computes the area and perimeter of an irregular polygon, applies multipliers, accumulates areas and perimeters, scales digitizer coordinates to user's scale, assigns multipliers to measurements, resets all variables, stores measurements, and prints hard-copy versions of the computations. *(List Price: $1,206)*

Requires: 64K, asynchronous adapter, monochrome adapter, (printer optional).

GTCO Corporation
1055 First St.
Rockville, MD 20850
(301) 279-9550
Telex: 898-471

Smartmodem to PC Cable

251 A cable that connects a Hayes Stack Smartmodem to the asynchronous communications interface of the PC. The cable has RS-232-C connectors at each end. *(List Price: $34.95)*

Requires: Asynchronous communications adapter.

Starware
1629 K St. NW #551
Washington, DC 20006
(202) 466-7351

Mousetrak

252 A graphic input device that replaces joysticks and game paddles, used for games, business graphics, and CAD/CAM applications. This two-dimensional hand-held tracking mechanism operates on a table or desk top. It features three switch select buttons. *(List Price: $99.95)*
Requires: Game adapter.

XEC Company
14222 Dallas Pkwy. #1104
Dallas, TX 75240
(214) 980-9736

RS-232 Analyzer

253 A plug-in adapter that shows the RS-232 signals and what's happening. It can switch signals around, greatly simplifying the hookup of RS-232 devices. *(List Price: $70 including instruction manual)*
Requires: Asynchronous communications adapter.

Personal Computer Products
1400 Coleman Ave., Ste. C-18
Santa Clara, CA 95050
(408) 988-0164

FT-156 Light Pen

254 A light pen that offers an alternative to keyboard interaction. The computer takes appropriate action when the pen is touched to the screen. In a graphics system, elements can be selected for manipulation and deletion. This device is also useful for commercial applications such as menu selection, in educational programs, and for playing computer games. Driver routines are supplied for Pascal and FORTRAN. *(List Price: $159.95, demo/games disk $139.95,)*
Requires: 16K, cassette, (48K, one disk drive recommended).

FTG Data Systems
10801 Dale, Ste. M-2
P.O. Box 615
Stanton, CA 90680
(714) 995-3900

Multiplexer, Network Interface Cards

255 Multiplexer allows up to eight computers to share a Corvus disk system. Included is the hardware, constellation software, and a network system manual. The Multiplexer network interface cards must be purchased to attach a computer to the Multiplexer, one to each computer on the network. The required software is included with the cards. *(List Price: Multiplexer $900, interface $220–$300 depending on cable length)*

Corvus Systems, Inc.
2029 O'Toole Ave.
San Jose, CA 95131
(408) 946-7700
TWX: 910-338-0226

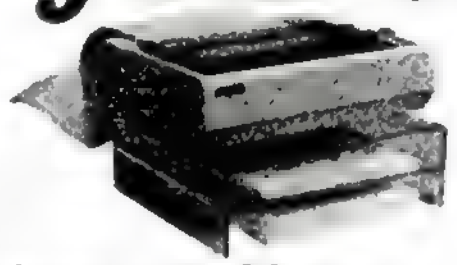

Video Extension Cable

256 A 3-meter-long combined power and D-9 video extension cable set for locating the video display remotely from the processor unit. *(List Price: $75)*

helpful products for your computer

Printer Stands

End the paper mess on your computer desk. Our printer stand allows your paper to be fed from under the printer, making room for the used paper to stack behind the print out of the way. Available with an optional removable shelf (Shown) for easy computer forms change. Available in Large size also, for MX-100 and other large printer users also. Also available with center slot for bottom feed printers. (Large only).

Regular Stand	(300010)	$29.95
Regular w/shelf	(300011)	$44.95
Large Stand	(300020)	$34.95
Large w/shelf	(300021)	$49.95
Large w/slot	(300050)	$49.95

Diskettes

Elephant Memories Systems Diskettes at a special LOW price!!!

Single Density/Single Sided/Soft Sector	500351	$22.50
Double Density/Single Sided/Soft Sector	500352	$26.50
Double Density/Double Sided/Soft Sector	500353	$32.50

Portable Disk Bulk Eraser

Clean all old data off of your diskettes before reusing them! This is a MUST for your computer room. Easy to use, non-electric, portable!!!
500102 Only ... $4.95

Ribbon Reloads for MX 70/80/100

Reload your old ribbon cartridge for much less than replacing the cartridge! Quick and easy to do, takes only about 2 minutes each to reload. Includes complete instructions. Available in Black and 4 popular colors!

Black Reload	(500000)	$3.95 ea.	(500001)	$39.95 dz.
Red Reload	(500010)	$4.95 ea.	(500011)	$49.50 dz.

Type-'N-Talk

257 A text-to-speech synthesizer with an unlimited vocabulary. Text is defined as any printable ASCII character when not preceded by an escape code or phoneme delimiter. Any received text is stored in the input buffer until spoken. Vocabulary is entered in the same way other data or programs are entered. Messages are typed as literal statements using standard English text. A 25-pin DIP connector is provided. Connector cables can be ordered separately. *(List Price: $375, cable $24.95)*

Requires: Serial interface, 75–9,600 baud.

Votrax, Division of Federal Screw Works
500 Stephenson Hwy.
Troy, MI 48084
(313) 588-2050
Telex: 810-232-4140

Discortex Graphics Tool Kit

259 A graphics package with memory board, light pen, and software that provides a 1280x800 pixel, four-color design area for graphics design and editing. Similar to a spreadsheet in concept, the large design area makes the screen a window with an area equivalent to 16 PC screens. The memory board also contains graphics subroutine ROM, space for user EPROMs, circuits for a light pen, and a light pen connector. The software offers fast vertical and horizontal scrolling in addition to the usual graphics editing and design functions. It is especially useful for animating large and complex subjects. *(List Price: $599)*

Requires: Color/graphics adapter.

DISCORTEX Corp.
87 Bethpage Rd.
Hicksville, NY 11801
(516) 935-5538

Automatic Feed Optical Card Reader

261 An automatic-feed, optical card reader that can read cards varying from 5–12 inches at a rate of up to 60 cards per minute. Each card may have as many as 128 columns. *(List Price: $1,595)*

Requires: Serial interface.

Chatsworth Data Corp.
20710 Lassen St.
Chatsworth, CA 91311
(213) 341-9200

Datasaver

262 A battery-powered AC backup unit for use during AC power interruptions or transients. It is available in 90-watt and 200-watt capacities with an automatic battery charger, a front panel indicator light, an alarm buzzer, and a remote alarm signal for system-interrupt use. It switches to backup power within 12 milliseconds. *(List Price: 90 watt $395–$415, 200 watt $695–$730)*

Cuesta Systems, Inc.
3440 Roberto Ct.
San Luis Obispo, CA 93401
(805) 541-4160

***Datasaver**, Cuesta Systems, Inc.*

Joysticks, Game Paddles

258 Joysticks and game paddles designed for the IBM PC. Suitable for games and educational use. *(List Price: Joystick $44.50, pair of paddles $42.50)*

Requires: Game adapter.

Tomcar Products
99 Lily Pond Ln.
Katonah, NY 10536
(914) 232-7405

Isolators ISO-1, -2, -3, -11, -17, Circuit Breaker, Remote Switch

260 A series of isolators that protect microcomputers from computer errors caused by powerline interference, computer system equipment interaction, spike damage caused by copier/elevator/air conditioners, and lightning damage. The isolators are geared for small offices or laboratories up to large systems used in harsh environments.

Circuit breakers and remote switches are available to work with the isolators. Users should specify CB or RS when ordering. *(List Price: Isolators $69.95-$181.95, circuit breaker $9, remote switch $16)*

Electronic Specialists, Inc.
171 South Main St., Box 389
Natick, MA 01760
(617) 655-1532

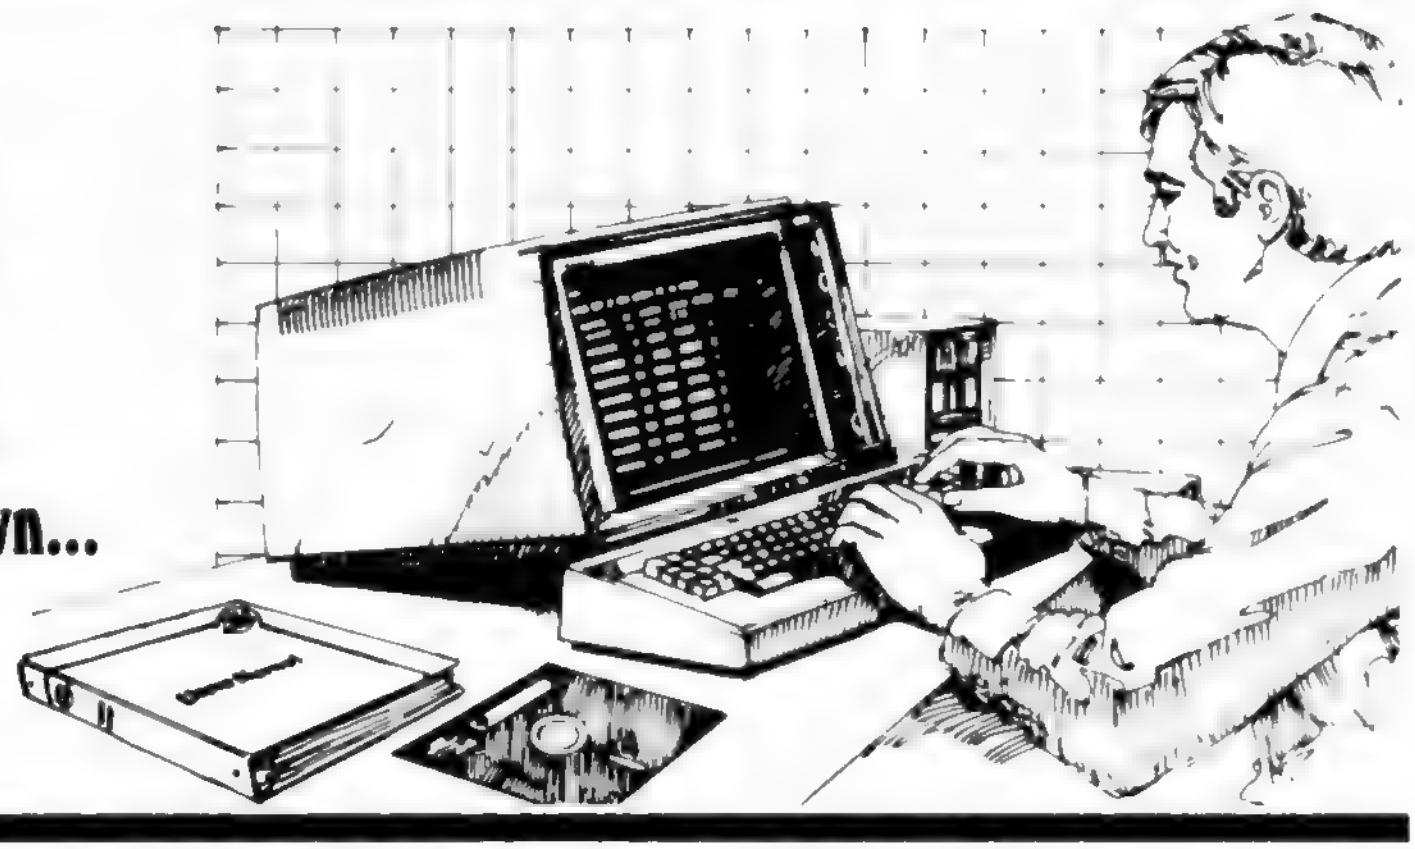

APS-5 Reserve Power Supply

263 A reserve power supply that provides backup power during power flickers, blackouts, and brownouts. When power fails, visual, audible, and electronic signals alert the user, and the APS-5 begins supplying up to 50 minutes instantaneous backup power. It automatically recharges its batteries and indicates a low battery charge. Features include an on-board transient suppression system and a steel case for improved RFI/EMI suppression. *(List Price: $395)*

Control Technology, Inc.
8200 N. Classen Blvd. #101
Oklahoma City, OK 73114
(405) 840-3163

Condor database obsoletes compilers!

Condor relational database management system makes your personal/business computer far simpler to use and much more useful to own... for less money... than other software.

Plain English, no computerese.
Condor relational database management is a complete development and operation system. It eliminates BASIC, PL/1, COBOL, FORTRAN, or other compilers in almost every case. It allows you to deal directly with your information without complex code words. In plain English, *it lets you manage your business instead of your data.*

Save 90%. Because no complex programming is needed, Condor saves *up to 90%* of the cost of program writing and testing! You also eliminate costly and time-consuming programmer "talent searches."

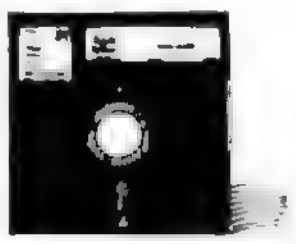

State-of-the-art relational format.
Condor makes traditional programming approaches using compilers *obsolete.* Features such as SORT, DEFINE, ENTER, POST AND REORG permit rapid database creation, access, control, monitoring and manipulation. For instance (by using the JOIN command), you can combine the information contained in two large file cabinets—such as "Purchases" and "Labor Cost"—into a single file—in one operation. To do the same task, ordinary software usually requires substantial reprogramming.

Easiest to learn and use.
Independent evaluators rate Condor *more "user-friendly" than any other personal / business computer database system.* After a brief study of the manual, you start building a database *within 15 or 20 minutes.*

In fact, *Condor has allowed many hundreds of first-time users to produce and process their own management reports.*

Only $295 for entry level.
Condor's multi-level modular design provides *full upward compatability,* up to *the most powerful software of its kind in the industry.* The entry level Condor I features database file development and management; entry, update, and posting; inquiry and report writing capabilities; and complete operations aids. And as information needs grow, you can easily upgrade to Condor III for writing highly complex reports and fast-query indexing.

Guaranteed to do more work, more easily for greater savings.
Put Condor to the test. Experience its power and versatility firsthand...how it puts you in direct touch with your data, while eliminating complex programming. You must agree that Condor saves you time, work *and* money...or return it within 30 days for a complete and prompt refund (at participating dealers only).

Questions? See Condor at your local software dealer, write to P.O. Box 8318, Ann Arbor, MI 48107, or call

(313) 769-3988.

condor

Math Master

264 A combined hardware-software product that provides the number-crunching abilities of a high-speed mathematics chip and the 8087 microprocessor. This chip fits into an empty slot on the PC's motherboard and is supplied along with a matched 8088 microprocessor that replaces the PC's current 8088 chip. Math Master also includes software that supports programs written in FORTRAN, COBOL, BASIC, and assembly language, and complete documentation and instructions for installing the new chips. *(List Price: $450)*

Sun Coast Data Sciences
680 Center St., Ste. B
Costa Mesa, CA 92627
(714) 631-9241

Asynchronous Communication Controllers

265 A line of single- and dual-line asynchronous communication controllers. Features include all standard baud rates up to 19,200 and full modem signal support on both lines. They operate with IBM's Asynchronous Communications Support Program. *(List Price: Single $150, dual $195)*

PERSYST, Inc.
22957 La Cadena
Laguna Hills, CA 92653
(714) 859-8871

MXPlus

266 A plug-in module that allows the printer to skip perforations automatically, giving users the top and bottom margins on each page. Users can manually control the print mode to select condensed, emphasized, or normal printing by using the front panel buttons. Requires no soldering for installation. *(List Price: $49.95)*
Requires: IBM or Epson printer.

Micro-Z Applications
22704 Ventura Blvd. #141
Woodland Hills, CA 91364
(800) 835-2246, (805) 583-8645

Videoslide 35

267 A color slide producer that records video images onto 35mm color film and can be used with most color raster graphics terminals. Videoslide 35 can accept video inputs in most formats including RS-170 RGB, TTL RGB, NTSC, or others (users should specify when ordering).

The system is connected to the video output or in parallel with the monitor used by the operator. Controls consist of an on-off switch, three thumb wheel switches for color balance control, and an exposure start control. Additional software is not needed for the system's operation nor is special operator training. *(List Price: $2,499)*
Requires: Color/graphics adapter.

Lang Systems, Inc.
1392 Borregas Ave.
Sunnyvale, CA 94086
(408) 734-3332

GRS 232 Series, GDn Series, GTn Series

268 A series of switches requiring 25-pin D-type connectors such as those found on the monochrome, parallel, or asynchronous communication adapter boards. Models include two- and three-way switches, dual, triple, and quad three-way switches; and a 19-inch rack model using up to ten channels (eight-module GTn series) or 16 channels (eight-module GDn series). Five-year warranty. *(List Price: GRS 232 Series two-way switch $159, three-way switch $198, dual three-way switch $369, triple three-way switch $799, quad three-way switch $899, GDn Series $149 per channel, GTn Series $169 per channel; Rack $115)*

GILTRONIX Universal Switches
970 San Antonio Rd.
Palo Alto, CA 94303
(415) 493-1300
Telex: 345-542

SooperSpooler

269 A printer interface that acts as a 16K buffer. Text or other data can be dumped into the buffer and then sent to the printer. The microcomputer itself is freed from the task of printing. Other standard features include pagination, formatting, and headers. *(List Price: $349, memory expansion $159)*
Requires: Printer.

Compulink
1840 Industrial Cir.
Longmont, CO 80501
(303) 651-2014

Software-Controllable Switches, *Advanced Systems Concepts Inc.*

Universal Video Controller

270 A stand-alone "box" that controls video disk and tape machines or other devices requiring serial or parallel communications. It runs tapes and disks separately or simultaneously and can run two videodisk players at once, allowing simultaneous video and audio input.

UVC can access any computer using an RS-232 port, and can act as an external interface with its own power supply. It houses all drivers on board in ROM chips, and comes with a Z-80 processor. The internal software is written in EPROMs and saves memory space. *(List Price: $1200)*

Requires: Serial interface, cable.

Allen Communication
3004 Arapahoe Ave.
Boulder, CO 80303
(303) 530-7300

PC-MATE Shared Device Controller (SDC)

271 A peripheral that allows two, three, or four PCs to share a single printer or a similar parallel device. Each computer's parallel port is connected to one of the four input ports on the Shared Device Controller, while the printer is connected to the output port. Any computer can gain access to the printer through the SDC by issuing a 1-byte control code. If the SDC is currently servicing another system, a negative response is provided to the new control request; if the SDC is available, a positive response is provided. One-year warranty. *(List Price: $195)*

Requires: One parallel printer output for each PC connected.

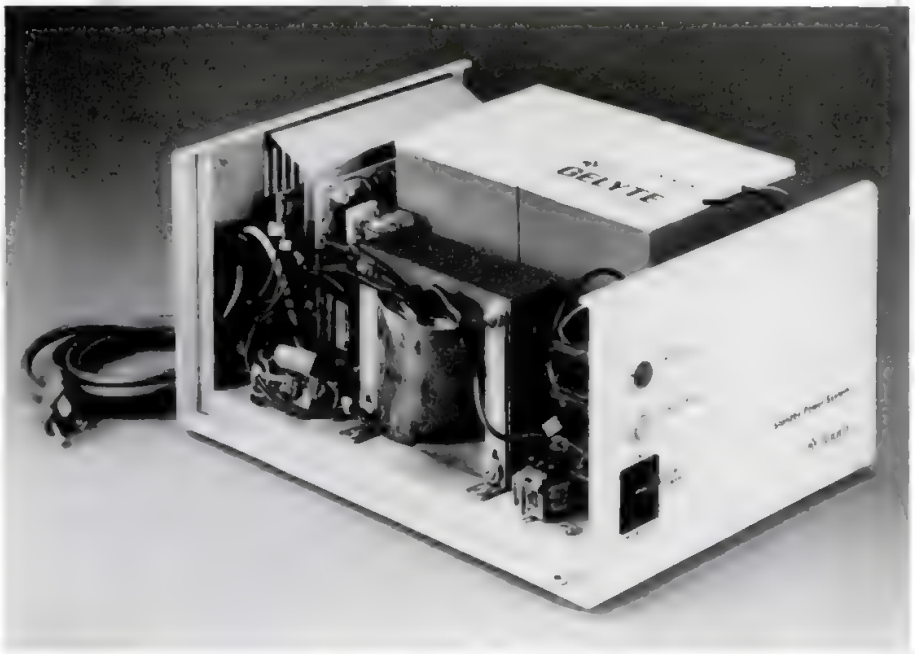

Tecmar Inc.
23600 Mercantile Rd.
Cleveland, OH 44122
(216) 464-7410
Telex: 241-735.

MicroFazer

272 A printer buffer for an IBM or Epson printer. It is controlled by a custom LSI and receives data from the computer at up to 4,000 cps. Data is transferred as rapidly as the printer can handle it. Buffering of 8K, 16K, 32K, or 64K is available. *(List Price: $159–$299)*

Requires: Epson or IBM printer.

Quadram Corporation
4357 Park Dr.
Norcross, GA 30093
(404) 923-6666

SPS0200 Standby Power System, *Gould Inc.*

Ramlock

273 A standby power controller and line voltage monitor that automatically switches to an auxiliary power supply if insufficient power is reaching equipment. Ramlok must be used in conjunction with a maintenance-free, lead/acid auto or marine battery (not supplied with this product). If the normal power supply is interrupted or voltage goes above or below acceptable limits, Ramlok automatically shifts to the standby battery for power. The contents of the computer's memory are not lost, and the backup battery can provide up to 30 minutes power to safely store all data on disk. This power supply controller can be ordered in five configurations varying from 250 to 1000 watts and 115 or 230VAC. *(List Price: $375–$865 depending on configuration)*

Requires: Maintenance-free auto or marine battery.

Ladco Development Company
P.O. Box 464
Olean, NY 14760
(716) 372-0168

Joystick

274 A joystick game accessory whose features include large buttons, trim adjustments, and molded cables. *(List Price: $64.95)*

Requires: Game adapter.

TG Products
1104 Summit Ave. #106
Plano, TX 75074
(214) 424-8568

Hayes Stack Chronograph

275 A calendar/clock system that features day, date, and time reporting through the RS-232-C interface and includes a 6-digit, vacuum fluorescent display. The Chronograph operates at 300 or 1200 baud with automatic baud rate and parity sense detect. It was designed for applications needing time-keeping such as report generation, time-sharing, electronic mail, and light, burglar alarm and sprinkler system control. Modes include 12- or 24-hour operation. The calendar mode includes semi-automatic leap year adjust. Battery backup is provided in case of power failure. Two-year limited warranty. *(List Price: $249)*

Hayes Microcomputer Products Inc.
5835 Peachtree Corners East
Norcross, GA 30091
(404) 449-8791

Light Pen

276 A plug-in light pen that detects signals from black and white or color TV monitors. The pen, set to 1 millilambert, has a visible range and infrared spectral response of 900 nanometers. Response time ranges from 0.3 microseconds at 1 millilambert (1 ft. lambert) screen brightness. The cable connector has four wires with supply, ground, pen, and switch. *(List Price: $150)*

Requires: Color graphics adapter.

Symtec
15933 West 8 Mile
Detroit, MI 48235
(313) 272-2950

Hardware

MISCELLANEOUS

TDI Joystick

277 A joystick that can be used with games or as an applications controller. It has dual firing switches mounted side by side for use in playing games. Switches can be depressed simultaneously or individually. Backlash is minimized by utilizing precision, tight tolerance parts. The self-centering standard is adjustable electronically. A 1-year workmanship warranty is included. *(List Price: $59.95)*

Requires: Game adapter.

Tech Designs, Inc.
3638 Grosvenor Dr.
Ellicott City, MD 21043
(301) 291-0818

Adam And Eve I

278 Game paddles for game and application programs. Handles can be unplugged individually for convenience. Paddles include trimmer control for adjustment to eliminate "short screen" and "wrap around" problems. Printed circuit board is utilized for reliability, while cable stress relief at the connector and in the handles protects against rough handling. *(List Price: $39.95)*

Tech Designs, Inc.
3638 Grosvenor Dr.
Ellicott City, MD 21043

ConvertaBuffer

279 A peripheral that eliminates the problem of being unable to use the keyboard's PrtSc key and BASIC's LPT and LLIST commands with a serial printer. It enables a printer equipped with a serial interface to plug directly into the PC's standard parallel printer adapter without removing the cover of the system unit. The built-in buffer of the CB-32 holds up to 800 lines or 16 minutes of printing at 35 cps, allowing users to complete other work. *(List Price: CB-8 $229, CB-16 $269, CB-32 $299)*

Requires: Parallel printer adapter.

von Leivendyke Enterprises
Silvermine Ave.
Norwalk, CT 06850
(203) 846-4973
Telex: 643103

Joysticks and Paddles

280 Products designed for plug-in compatibility with the IBM PC. The joysticks feature either selectable spring-return centering or free-floating operation. Electrical centering adjustments are on each axis. *(List Price: Joystick $69.95, paddle $49.95)*

Kraft Systems, Inc.
450 W. California Ave.
P.O. Box 1268
Vista, CA 92083
(800) 854-1923, (800) 542-6436 California
TWX: 910-322-1471

TDI Joystick, Tech Designs, Inc.

Space Graphics, Space Tablet

281 A graphics peripheral designed to perform three-dimensional data acquisition and manipulation. It allows users to take a three-dimensional model of an object and view it from any angle, rotate it, scale it, and move it along any of three coordinate axes.

It permits interactive modification of the position information using the Space Tablet. Hard copies of drawings can be produced on an Epson printer. The tablet permits direct interactive acquisition of three-dimensional position coordinates. It works on a principle of rigid arms connected by rotational joints. The ability to directly digitize X, Y, and Z coordinates permits substantial expansion of the concepts of computer-assisted design. Using this device, the user can design in three dimensions and then get two-dimensional perspective drawings. *(List Price: $595 including Space Tablet)*

Requires: 64K; Epson or IBM printer; Space Tablet: color/graphics adapter, game control adapter.

Micro Control Systems, Inc.
230 Hartford Turnpike
Vernon, CT 06066
(203) 643-4897

Joystick Modifying Kit

282 A modifying kit that includes a special connector, instructions, parts numbers, and a short demonstration program for altering a pair of Radio Shack joysticks for the PC. Modification requires a special connector and a soldering iron. *(List Price: $5)*

Requires: Game adapter.

Personal Concepts
635 Wellsbury Way
Palo Alto, CA 94306

Large Print Video Terminal, The Orator

283 A talking terminal that enables a computer to speak rather than print its output onto a terminal, providing computer accessibility to the blind and visually impaired. The terminal spells and reads words by using a speech synthesizer board. It speaks back anything sent to the terminal. The Orator is designed to be used separately or with the Large Print Video Terminal. The LPVT can be used with black and white or color monitors, or can be attached to any standard television. Users specify letter size, interline and interletter spacing, and rate of display. The LPVT produces between 4 and 8 character sizes, ranging from 3/16 inches to 3 inches high. *(List Price: Both $9,600, LPVT $7,000, The Orator $4,600)*

Requires: Serial interface.

ARTS Computer Products, Inc.

Boston, MA 02116
(617) 482-8248

Get better looking with your IBM.

Introducing the PC Pedestal™ from Curtis Manufacturing

Now you can get a real good look at your IBM Personal Computer.

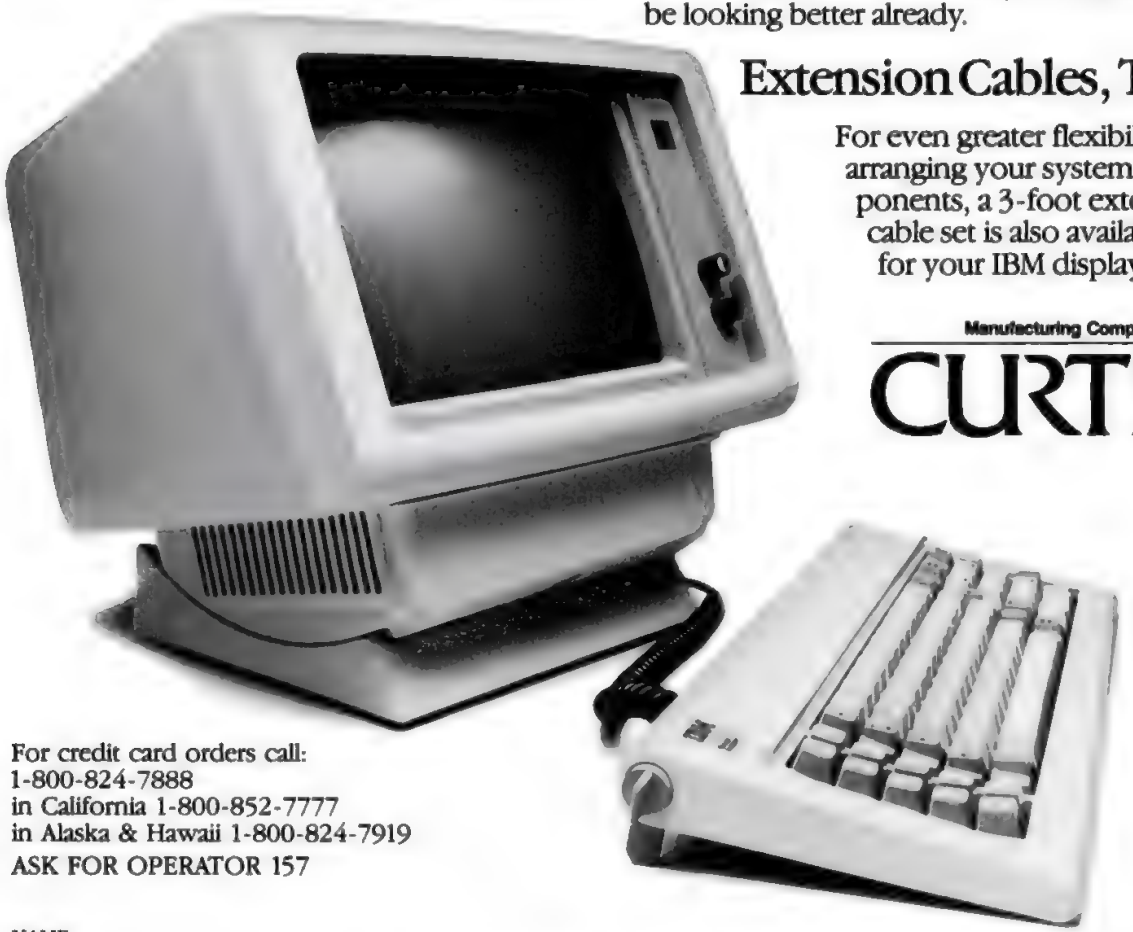

With Curtis Manufacturing's new PC Pedestal™ you can tilt or swivel the IBM display unit to suit yourself.

No more bobbing and weaving to avoid reflections. No more squinting to minimize glare.

The PC Pedestal™ virtually eliminates backache, eye strain, and fatigue. And that results in greater comfort and increased productivity all around.

Developed exclusively for the IBM Monochrome Display, the PC Pedestal™ is a perfect match in style, color and finish.

Best of all, when you see how little it costs to gain these benefits, you're going to be looking better already.

Extension Cables, Too.

For even greater flexibility in arranging your system components, a 3-foot extension cable set is also available for your IBM display unit.

Great Memories Run in Our Family

MEMORY BOARDS

256K Complete	$695
256K Expandable to 512K	$895
512K Complete	$1195

INTERNAL Disk Systems with Adapter Card (5¼" or 8" drive)

640K Disk System	$995
1280K Disk System	$1395

External Disk Systems with Power Supply and Enclosure

640K 5¼" Disk System	$895
1280K 5¼" Disk System	$1295
2400K 8" Disk System	$1695

With these versatile add-ons, you can increase your computer's memory to the highest, practical level of current technology — and do it with minimal demands on space and power.

Because only the finest-quality materials and construction go into our products, you are assured of both the lowest signal distortion and the best RFI performance.

Whatever your needs may be, you'll find that our "product-family" approach to memory design and manufacture backs you with total operating-system support — before and after sale.

Computer Technology Innovations

1037 N. Fair Oaks Ave. Sunnyvale, CA 94086 (408) 745-0180

Now even hunt-and-peck typists produce perfectly formatted letters...memos...presentations... scripts...*automatically.*

POWERTEXT® for your IBM PC: Announcing the next generation in micro-based word processing.

"A business professional wants to think about what he or she is writing. Not worry about getting the words in the right places on the printed page.

"That's why we developed a new kind of high-performance system that handles printed style automatically.

"PowerText knows exactly how you want your letters to look...your memos...reports...every kind of document you write.

"You define the formats. PowerText stores them in its style files.

"When you write, just bat out your copy on your IBM PC. Forget about printed style.

"Do all the editing you want.

"Then...just tell PowerText 'Make this a letter,' and you get a letter...'Make this a sales presentation,' and you get a sales presentation...

"It's almost like dictating to your computer. Even if you're an unskilled typist, you get a beautiful, perfectly formatted document...every time.

"And it's all very straightforward...very easy to use.

"We think PowerText is the way a word processor is supposed to work."

David P. Guest

David P. Guest, President, Beaman Porter, Inc.

All this is automatic in every kind of document you write:

* Margins
* Indents
* Spacing
* Title page
* Envelope, label
* Intelligent page breaks
* Justification
* Centering
* Variable pitch
* Pagination
* Table of contents

Plus many other high-performance features:

* Complete editing capabilities
* Form letters
* Automatic headers and footers
* Boxed copy
* Print macros
* Up to 14 columns
* Automatic footnote numbers
* Boilerplate inclusion
* Vert. and horiz. border lines
* No limit to document length
* 132-character lines
* Superscripts and subscripts
* ...and much more

25% more data per disk

PowerText accommodates 200K bytes per disk, 25% more data than the 160K bytes accommodated by standard IBM software.

System requirements

PowerText is a run-time, bootable system. It requires at least 64K of memory, two disk drives, and a printer. It supports both serial and parallel printer interfaces, extended memory, and RAM disk.

Full 5-year warranty

The system is warranted for a full 5 years. Should it ever fail to perform as specified, Beaman Porter, Inc. will fix it at no charge.

Available from selected dealers Or order directly from Beaman Porter.

VISA and MasterCard accepted. NY State residents add appropriate sales tax.

Complete software $399
Includes diskette plus excellent manual/tutorial
Manual/tutorial alone is $25

System Software

System Software programs give instructions about operations inside the computer. These programs tell the computer how to understand or use different languages, such as BASIC or COBOL. They also tell the computer how to control different parts of the hardware such as the keyboard, screen, or printer.

We've divided System Software into three groups: Operating Systems, Utilities, and Computer Languages. An operating system is a collection of programs that run the computer. These programs handle the tasks carried out on the computer. The operating system does such things as control the flow of information between memory and disk drives, organize information stored on disk, and pass information between languages and the keyboard, screen, disk drives, and printer.

When choosing an operating system, you need to consider several things. First, you want to find out whether the kind of applications software you need is available for the operating system. Next, you should make sure the operating system allows you to make use of special features of your hardware, such as graphics or color capabilities. Then, depending on the uses you intend for your computer, you may be concerned about the operating system's speed in running programs. Programmers often want fast processing, while people who use their computers mainly as word processors might not be as concerned about speed. Finally, you want to check that the operating system is easy to use. Clear screen messages and prompts, and commands that are logical and easy to remember make an operating system (or any software program for that matter) more useful. Also, look at the documentation before you choose the operating system, or see a demonstration to help you find out how easy the system is to use and how suited it is to your needs.

Utilities are system software programs that make using the computer easier for programmers and other users. Utilities carry out routine procedures such as making backup copies of programs, sorting information, or renumbering program lines. Programmers find that utilities are very useful (hence the name), because when they use utilities, they don't have to write a new program every time they need to carry out a routine task.

The utilities listed in the *PC* Product Guide can be used for some of the following activities: designing program screens, debugging programs (or removing errors), providing rapid access to data files, backing up files and programs, sorting and merging files, protecting files from unauthorized users, recovering accidentally erased files, and printing out text and graphics.

When you look for a utility, make sure it is something you will use. After using your computer for a while, you may see the need for a particular utility, such as one that helps you write programs to make use of the graphics features of your computer. Once you decide you need a particular utility, make sure you understand the program as much as possible before you buy it. Ask specific questions about the program's capabilities, get sample printouts, and see a demonstration. Find out how well the program vendor supports the program with documentation and with answers to questions both before the program is sold and afterwards.

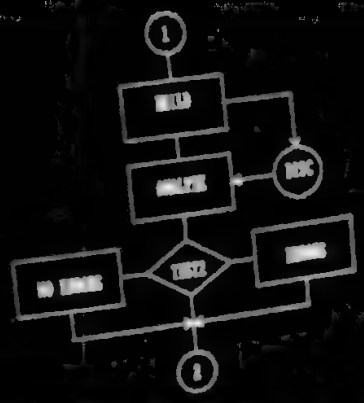

Because computers don't understand or use the English language directly, computer scientists have developed special computer languages. A computer language is a set of commands or instructions the computer can use. Some languages look similar to English (BASIC, for example), while others closely resemble the internal workings of the computer hardware. Languages are generally divided into two categories: interpreters and compilers. Interpreters are relatively easy to use, and debugging programs or removing errors with them is fairly easy. Many popular languages are compilers, such as COBOL, FORTRAN, or Pascal. Compilers convert programs (called source code) into machine instructions (called object code), which execute, or run, faster than programs run by interpreters. Several of the languages listed are compilers.

The IBM PC comes with BASIC. Many people find that BASIC is the only language they need. However, if you do a lot of programming, you might want to use another language for greater speed or to program special applications software. COBOL, for example, is often used for writing business programs, while FORTRAN is used for scientific or engineering programming.

When choosing a language, consider your familiarity with it. Getting a new language for your computer provides the perfect opportunity to learn the language, and it may even be your sole reason for choosing it. But find out about the language's debugging capabilities and how well it handles routine programming tasks.

Software Requirements

FOR ALL SOFTWARE PRODUCTS we have listed memory, operating system, language, disk drive, interface, monitor, and printer requirements where available from manufacturers. Software requires DOS and BASIC except where other operating systems or languages are listed. Check with manufacturers and dealers before making a purchase to assure that software is compatible with your IBM PC.

OPERATING SYSTEMS

UCSD p-System IV-1

284 An enhanced version of the UCSD p-system that includes hard disk support for Corvus and Tall Grass Technology, 25 percent more floppy storage, and compatibility with standard IBM disks. The system provides double-sided, double-tracking, fast-stepping floppy disk drive support; RAM disk support, which can use up to 512K RAM; adaptable system support for adding custom I/O drivers; remote terminal support; XON/XOFF flow control for serial printers; and disk write verification. Hard disk support is available. *(List Price: Not available)*

Requires: 64K, one disk drive.

Network Consulting, Inc.
A106-1093W. Broadway
Vancouver, B.C.
Canada V6H 1E2
(604)738-3500

UDI/OS

285 A universal development interface that uses Intel iRMX 86/Series III software. The UDI/OS makes the PC compatible with Intel Series III software. The operating system also provides memory management, program utilities, overlay loading, and file management identical to the iRMX 86/Series III.

All programs that execute on Series III microcomputer development systems will run on the PC without modification or linkage. The operating system is available in either IBM or Intel disk format, and includes a serial communications program for transferring files between the PC and the Intel Series III. *(List Price: $995)*

Requires: 128K, two disk drives.

RTCS/Real Time Computer Science Corp.
P.O. Box 3000-886
Camarillo, CA 93010
(805)482-0333

CP/M-86

286 An operating system that includes serial and parallel printer support, a "smart" screen driver that can emulate many CRT terminals, and 193K per single-side disk capacity. Enhanced with screen line editing, a feature usually found only on mainframe systems, it also offers built-in horizontal scrolling and page control. Compatible with a wide range of application programs, it can transfer fields to and from other computers and disk formats. A user manual includes sections for both novice and experienced users, and stresses screen line editing. *(List Price: $325)*

Requires: 64K, one disk drive.

CompuView Products, Inc.
1955 Pauline #200
Ann Arbor, MI 48103
(313)996-1299

***Mail-XI**, Micro Architect, Inc.*

PC-DOS

287 A master program that supports one or more disk drives. It allows users to interact with application programs stored on disks and use disks for information storage. The DOS disk contains Disk BASIC and Advanced BASIC, sample programs, and utilities.

Disk BASIC adds DOS file support, date, time of day, and communications capabilities to standard PC BASIC. Advanced BASIC adds advanced graphics, music, and other capabilities.

PC-DOS provides the support necessary to develop and run programs using the PC MACRO Assembler, FORTRAN Compiler, COBOL Compiler, or Pascal Compiler. Applications programs, including *VisiCalc* and the Peachtree Software Series, run under DOS. Features include a line editor to create, display, or change source (text) files; a debug utility to display, change, or trace a program in memory; a linker to combine the object output of the compilers and MACRO Assembler into relocatable modules; and the "chaining" of commands to produce a predetermined sequence of programs. *(List Price: DOS and BASIC Extension $40, IBM Product Center prices)*

Requires: 32K, one disk drive.

Oasis 16

288 An operating system that turns the IBM PC into a multiuser microcomputer. It coordinates up to three users on a standard system and up to 32 users with appropriate bus expansion. It also provides private or shared public lines, optional passwords, and privileged security access. It is compatible with Z-80 Oasis BASIC and C applications software and supports Corvus and XCOMP hard disks. Training classes are available for all levels of users. The operating system includes JCL, BASIC, C, diagnostic routines, a full-screen editor, script processor, and communications package. *(List Price: $1,495)*

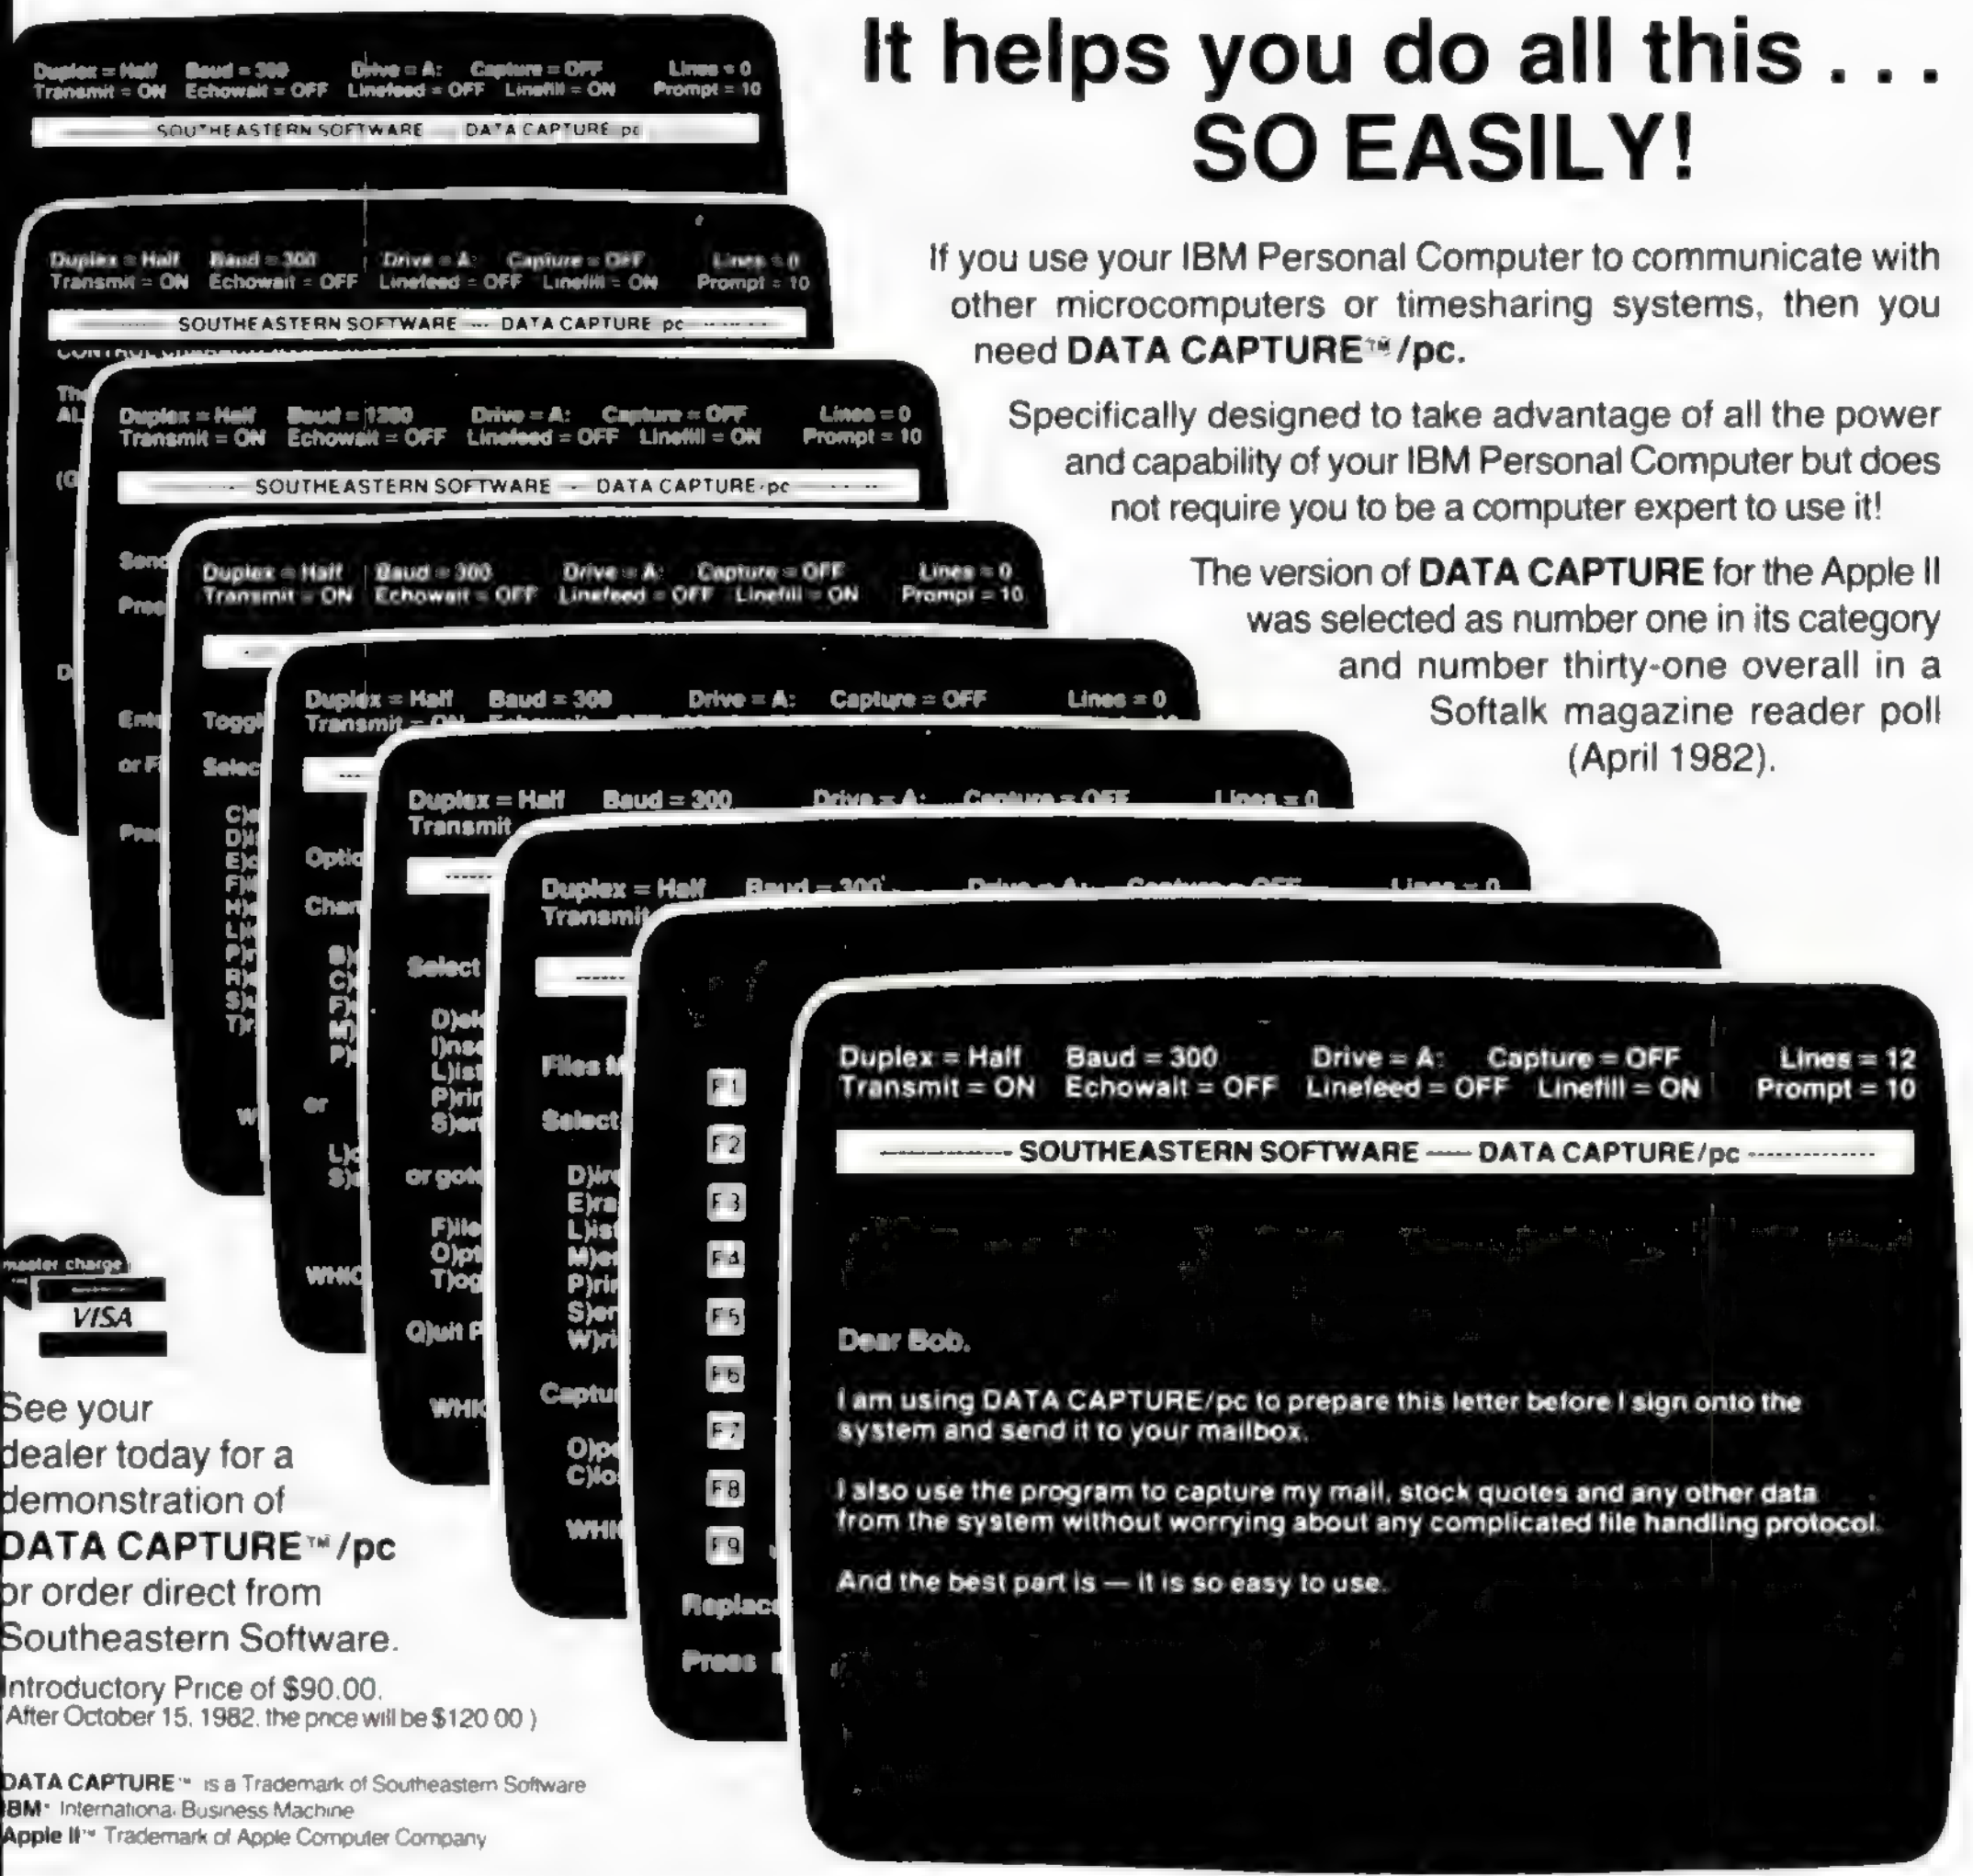

Requires: 128K, one floppy and one hard disk drive; multiusers 250K, two hard disk drives.

DATA CAPTURE™/pc

The most advanced and easiest to use telecommunications program for use with the IBM® Personal Computer.

Software designed with you in mind!

It helps you do all this . . . SO EASILY!

If you use your IBM Personal Computer to communicate with other microcomputers or timesharing systems, then you need **DATA CAPTURE™/pc.**

Specifically designed to take advantage of all the power and capability of your IBM Personal Computer but does not require you to be a computer expert to use it!

The version of **DATA CAPTURE** for the Apple II was selected as number one in its category and number thirty-one overall in a Softalk magazine reader poll (April 1982).

master charge
VISA

See your dealer today for a demonstration of **DATA CAPTURE™/pc** or order direct from Southeastern Software.

Introductory Price of $90.00.
(After October 15, 1982, the price will be $120.00.)

SYSTEMS **Software**

OPERATING SYSTEMS

QUNIX

289 A UNIX-like, second generation, multitasking, multiuser operating system. Several compilers, such as BASIC, Pascal, and FORTRAN are available, as well as a full-screen editor and text formatter. Designed to enhance the PC's ability to be upgraded to advanced information processing, communication, and networking applications, QUNIX features the ability to interface uniformly to a wide variety of system hardware extensions or peripherals. *(List Price: $150 (single user), $250 (multiuser)*
Requires: 64K, two disk drives.

Quantum Software Systems, Inc.
7219 Shea Ct.
San Jose, CA 95139
(408)629-9402

CPM-86 Operating System

290 A single-user operating system by Digital Research that manages information stored on diskettes and provides an interface between a program and the PC. CP/M-86 contains a full set of control and programming utilities. It includes programs that enable the user to create, erase, rename, and copy files. The user can also create, test, and run assembly language programs. Also supported are the IBM 80 CPS Matrix Printer, the Asynchronous Communications Adapter, Monochrome Display, and Color/Graphics Monitor Adapter, including light pen. Program development utilities include an editor, an assembler (ASM86), a debugging program (DDT86), and a program to produce command files. Existing CP/M-86 programs running on other computers must be converted to run on the PC. *(List Price: $240, IBM Product Center prices)*
Requires: One disk drive, 32K, 48K for DDT86 program, 64K for ASM86.

IBM Corporation
Systems Products Division

UCSD p-System (IBM)

291 An advanced operating system that includes either UCSD Pascal or FORTRAN-77 or both and comes with a file handler that integrates writing, assembling, compiling, editing, linking, and program execution functions. The complete UCSD p-System package includes a screen-oriented editor that runs in both programming and text-editing modes, a macro-assembler providing code that can be linked to FORTRAN or Pascal programs, and advanced turtlegraphics offering extended capabilities and graphic displays. Users have a choice between a Pascal or a FORTRAN compiler or both. A macro-assembler produces code, and a linker link-edits assembly code for either language. Other features include disk file handling capabilities, single keystroke commands, run-time support routines, block I/O service routines, and support for asynchronous processes. The UCSD p-System, with either FORTRAN-77 or UCSD Pascal, enables users to run programs already written in either language. *(List Price: UCSD p-System with Pascal $625, UCSD Pascal/FORTRAN compiler $175, UCSD p-System with FORTRAN-77 $625, IBM Product Center prices)*
Requires: 64K, two disk drives.

IBM Corporation
Systems Products Division
P.O. Box 1328
Boca Raton, FL 33432
(800)447-4700 322-4400 Illinois
(800)447-0890 Alaska, Hawaii

1-DOS Operating System

292 An enhanced version of the PC-DOS operating system. It supports the manufacturer's PMS20 and PMS 40 hard disk drives, as well as CP/M and CP/M-86.

Under 1-DOS, CP/M and CP/M-86, compatible programs can be run on the same disk drive without additional hardware. Included is a co-processor, 64K RAM, and a communications program that supports the Hayes and other RS-232 modems. Other applications software is also available. *(List Price: $350)*
Requires: One PMS 20 or PMS 40 hard disk drive, one floppy disk drive.

Professional Micro Systems
4000 MacArthur Blvd. #3000
Newport Beach, CA 92660
(714)851-8655
Telex: 182737

UTILITIES

Ultra-BASIC Translator

293 A program that allows users to write a highly structured BASIC source code. The translator will translate the source code program into BASIC. Features include labels up to 7 characters long; all BASIC commands and functions are allowed; complete defining of file structures is allowed; no FIELD, MKI, MKS, MKD, CVI, CVS, or CVD needed.

Complete source code for the translator is provided so users can add commands if desired. *(List Price: $75 including 40-page manual and 5¼-inch disk)*
Requires: 64K, one disk drive.

Basic Business Software, Inc.
P.O. Box 26311
Las Vegas, NV 89126
(702) 876-9493

TYP/PRT

294 A program that uses a printer as a typewriter, retains any display already on video, makes notes from it, or copies it on the printer automatically. It can run concurrently with another program, and users can switch from one to the other at will. A six-function calculator is included. *(List Price: $24.95)*
Requires: 64K, one disk drive, printer.

Contract Service Associates
706 S. Euclid
Anaheim, CA 92802
(714) 635-4055

Double-Precision Integer Arithmetic Package

295 A set of subroutines that can be called from IBM Pascal to provide accuracy for financial calculations and storing dates. Written in 8088 assembly language, the routines allow the conversion and representation of numbers as large as 2,147,483,647. The program gives Pascal users 32-bit accuracy instead of the 16 bits provided with the Pascal integer type, in which the largest number is 32,767. With double-precision, arithmetic amounts as high as 21,474,836.47 could be represented. Documentation on arithmetic and conversion routines is provided. *(List Price: $40)*
Requires: 48K, one disk drive.

Organizational Management Systems Inc.
7304 Kathydale Rd.
Baltimore, MD 21207
(301) 668-9011

PG FORTH

296 A screen editor, assembler, decompiler, dump, and miscellaneous utilities. *(List Price: $75)*
Requires: Not available

Worldwide Software Publishers
2555 Buena Vista Way
Berkeley, CA 92708

Floppy Disk Librarian

297 A disk library program designed to keep track of floppy disks and files. It maintains a consolidated catalog where each entry for a disk or file name includes date, size, and any added comments. It also shows what disks contain a particular file and what files are on a particular disk. The program footnotes files that do not have a backup. It provides a summary of how much free space is available on each disk. On-line help files and a user manual are available. *(List Price: $39.95)*
Requires: 64K, one disk drive, (printer optional).

Little Bit
469 Edgewood Ave.
New Haven, CT 06511
Source: TCE348

EM-80/86

298 An emulator that allows user programs written for systems using CP/M-80 to be executed on an 8086/8088 system after 8080 object files have been transferred to the target 8080/8088 system.

EM80/86 runs at operating system speed. Those programs that primarily interact with system peripherals will run at a speed equivalent to the original 8080 system. Programs that are compute bound (number crunchers) will execute significantly slower. *(List Price: Program and manual $200; program only, $190; manual only, $10)*
Requires: 16K, CP/M-86 or DOS.

Dynamic Microprocessor Associates
545 Fifth Ave.
New York, NY 10017
(212) 687-7115

Print Screen, Graphics Editor

299 *Print Screen* extends the PrtSc key to print graphic screens on printers equipped with a Graftrax chip. It handles color by printing shades of gray. The *Graphics Editor*, a subset of the CODASYL standard, is a real-time program that allows editing of two- and three-dimensional graphics images. It includes a character set definition utility. *(List Price:* Print Screen *$29.95 including disk and manual,* Graphics Editor *$129.95 including two disks and manual)*
Requires: Not available.

C&C Software
54 Sonoma Ave.
Goleta, CA 93117
(805) 685-8802

FORTRAN Scientific Subroutine

300 A series of basic FORTRAN subroutines to aid users in generating their own FORTRAN math library. The package contains a variety of subroutines to handle statistical analysis, matrix solutions, matrix manipulation, function solutions, time series analysis, frequency domain analysis, chirp-z analysis, function evaluation, and integration and differentiation.
Requires: 64K, one disk drive.

Alpha Computer Service
P.O. Box 2517
Cypress, CA 90630
(714) 894-6808

Compress

301 A file compression utility that compresses ASCII files to approximately 60 percent original size. A Huffman encoding algorithm is used to convert ASCII files to a packed binary format. Non-ASCII files such as .COM and .EXE files are compressed by about 5 percent.

A 12K byte ASCII file is compressed to 7.5K in approximately 50 seconds and restored to its original form in approximately 40 seconds. Use of a "ramdisk" program can shorten these times. The program is written in machine code and does not require an interpreter. *(List Price: $19.95)*
Requires: 48K, one disk drive.

Starside Engineering
P.O. Box 18306
Rochester, NY 14618
(716) 461-1027

Frieze

302 A program that takes a pattern on the PC graphics screen and saves it as a disk file or dumps it to an appropriate graphics printer. Written in assembly language and loaded at power-up time, the program remains in memory below the operating system until power-down, or reboot.

The program redefines the Print Screen key for graphics. If more than one screen has been stored on disk, *Frieze* expects a third keypress of a digit from 1 to 9 to indicate which screen is being handled. Error conditions are indicated by coded beep sequences from the PC speaker. It supports the Epson series with Graphtrax and the IDS series with graphics option printers. *Frieze* can run with any application program running under DOS, including BASIC and IBM Pascal.
(List Price: $55)
Requires: 48K, one disk drive, Epson or IBM printer with Graftrax or IDS printer with graphics option.

Starside Engineering
P.O. Box 18306
Rochester, NY 14618
(716) 461-1027

8087 SUPPORT for the IBM PC

Speed up your PC with these fine products:

87/88 GUIDE™

This user's guide contains all the information required to drive an 8087 from assembly language or the BASIC Interpreter. It is a valuable companion to the IBM MACRO Assembler and includes listings of 8087/8088 programs which run on the IBM PC.

$18.95

87 MACRO™

A library of assembly language MACROS which access all 8087 instructions from the IBM MACRO Assembler. Includes commented source listings of frequently called 8087 utility procedures.

$150

87 BASIC™

A library of drivers which work with the IBM BASIC Compiler and produce super fast execution modules.

$125

87 PASCAL™

A library of drivers which is called by the IBM PASCAL Compiler to produce super fast programs.

$125

FASTPAK™ + 8087

This package includes a copy of our 87/88 GUIDE™, a MicroWare-tested 8087 with installation instructions and one of the following powerful modules: 87BASIC™, 87PASCAL™, 87MACRO™ or (soon to be released) 87FORTRAN™ or 87COBOL™.

$375

IBM and IBM Personal Computer are registered trademarks of IBM Corp. 8087 is a trademark of Intel Corp. 87/88GUIDE, 87MACRO, 87BASIC, 87PASCAL, 87FORTRAN and 87COBOL are trademarks of MicroWare, Inc.

UTILITIES

DS-Disk

303 A program that provides twice the memory of a single-sided disk drive. Data is stored on the disk's unused side, increasing storage capacity from 160K to 320K per drive. Written in machine language, the program is compatible with single-sided disks for both reading and writing, and provides 324K of formatted space per disk. The program can be called from DOS, and all internal DOS and BASIC commands remain the same. *(List Price: $40)*

Requires: One disk drive, (other requirements not available).

PC²
1250 Oakmead Pkwy.
P.O. Box 678
Sunnyvale, CA 94086
(408) 749-9313

Screen-Formatter

304 A utility that merges BASIC into the user program to display full-screen input format as protected information. Data may be entered by filling in blanks. *(List Price: $35)*

Requires: 16K, one disk drive.

PC-Logic Systems
990 Washington St., Dept. 327
Dedham, MA 02026
(617) 329-7900

FABS/PC (Fast Access B-tree Structure)

305 An 8086/8088 assembly language subroutine that provides rapid access to a very large data base. The balanced multipath tree structure is key sequential, and the keys never need resequencing. Features include simultaneous opening of up to six key files, a key file independent of the data file, deleted data records that may be reclaimed by new inserts, error handling, and support for variable length keys. ASCII keys can be specified (greater than 50 bytes) or integer keys (0 to 65535) can be specified to occupy 2 bytes in the tree. *(List Price: $150 including manual with test and demonstration programs)*

Requires: 64K, two disk drives.

Computer Control Systems
298 21st Terrace S.E.
Largo, FL 33541
(813) 586-1886

Diagnostics II

306 A complete package designed to check every area of a computer, detect errors, and find the causes of most common computer malfunctions. *(List Price: $125; manual only, $15)*

Requires: 32K, two disk drives, CP/M-86 or DOS.

SuperSoft, Inc.
P.O. Box 1628
Champaign, IL 61820
(217) 359-2112, 359-2691
Telex: 270-365

DiskLook, SecMod, UnErase

307 *DiskLook* is a full-featured disk display routine that shows directory information, full-sector displays, file locations, and space utilization. *SecMod* reads and changes any disk sector in either hexadecimal or character mode. It can be used to patch or modify disks or repair damaged disks. *UnErase* recovers files lost due to erasure or damage to disk and recovers erased files even if partly overwritten. *(List Price: $20 each)*

Requires: 64K, one disk drive, 80-column monitor.

Peter Norton
1716 Main St.
Venice, CA 90291
(213) 399-3948

Electronic Disk

308 Software that permits the use of extended capacity disk drives and allows RAM to be used as an electronic disk drive. The Tandon TM100-2 double-sided drive or the Tandon TM100-4 quad drive or equivalents can be used. Installation does not require any change to the disk controller, cable, or drive itself. The program creates the equivalent of a disk drive in the user's extra RAM. *(List Price: $69.95)*

Requires: 128K, one disk drive.

Ensign Software
2312 N. Cole Rd., Ste. E
Boise, ID 83704
(208) 378-8086

Screen Dump for Epson Printer

309 A machine language program that permits hard copy and colored printouts of screen content on the Epson MX-80 or the Graftrax MX-100 printer. The program replaces the current Print Screen function and allows images to be printed upright or rotated 90 degrees. It also allows the entire PC special character set and any text and graphics in the medium- and high-resolution graphics modes to be dumped to either printer.

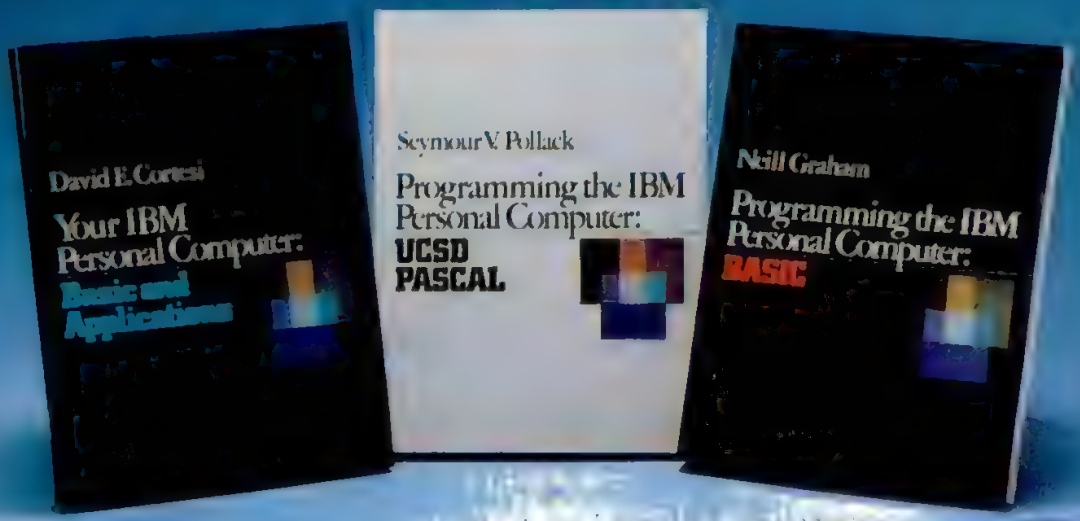

Six colors are available, including black and white and reversed black and white versions. The program does not affect normal operation of the PC. *(List Price: $49.95)*

Requires: I.D.S. Prism 80- or 132- column printer with dot and color options.

INTRODUCING . . .
A NEW USER SERIES FOR THE IBM PERSONAL COMPUTER

Designed to introduce and explain basic programming languages, machine functions and user applications from beginning through moderately advanced. Each text includes a broad range of examples, programs and exercises to encourage familiarity and creativity with the new, trend setting IBM personal computer.

) YOUR IBM PERSONAL COMPUTER: BASIC AND APPLICATIONS

David Cortesi, 304 pp., paper $16.95* ISBN-0-03-061979-3

Intended to get the first-time user over the hurdle of the initial introduction to the new machine. Provides a non-threatening, "confidence-building" introduction to the Personal Computer and to computing, basic language and software. (VisiCalc®, word processing, etc.). An ideal introductory text to be used informally, or in classroom or training situations. Focuses on central programming concepts, emphasizing IBM's version of MICROSOFT BASIC.

AVAILABLE FALL '82

(B) PROGRAMMING THE IBM PERSONAL COMPUTER: UCSD PASCAL

Seymour Pollack, 256 pp., paper $16.95*

"The Portable IBM PC Pascal!" Emphasizes the syntax of UCSD Pascal and good program design. An ideal introductory text to be used informally, or in classroom or training situations. Includes full coverage of the system and its uses, basic and advanced UCSD p-System™ functions. Easy to understand, user-oriented, reinforces working knowledge and application.

AVAILABLE FALL '82

(C) PROGRAMMING THE IBM PERSONAL COMPUTER: BASIC

Neill Graham, 256 pp., paper $16.95* ISBN—0-03-061911-4

An introduction to programming in BASIC language. Users can apply material directly to their machine, with no adaptation necessary. An ideal introductory text to be used informally, or in classroom or training situations. Covers the unique features of the IBM Personal Computer, elements of BASIC and programming, and various applications (text editor programs, program for storing and retrieving information from random files, etc.).

AVAILABLE SUMMER '82

(D) PROGRAMMING THE IBM PERSONAL COMPUTER: FORTRAN 77

Robert Rouse & Thomas Bugnitz, 304 pp., paper $16.95* ISBN-0-03-062042-2

Examples, problems and exercises drawn from the sciences and engineering teach the Fortran 77 language on the IBM personal computer. An ideal introductory text to be used informally, or in classroom or training situations Introductory and advanced topics, with special emphasis on use of IBM's unique Fortran Compiler.

Extraordinary software.

UTILITIES

Pascal Application Development Tools

310 Three integrated packages of Pascal tools designed for professional users. The programs are a series of routines written in IBM (Microsoft) Pascal, which provide system developers with the procedures required to produce user-oriented applications software written in IBM Pascal. Because source code is distributed with the package, the system also provides an introduction to some advanced features of IBM Pascal.

Intrinsics consists of many common arithmetic and logic functions, and procedures required in a development environment, are not supported by Pascal. *String Function* manipulates routines that extend the limited-string capability of Pascal. *Application Library* consists of a series of functions and procedures likely to be used within user-oriented programs. Command line parsing and screen handling procedures are provided.

Interface, implementation, object files, and source code are distributed on a standard IBM floppy disk. Reference material for the package is provided so it can be inserted into the Pascal manual. A user manual with examples and systems documentation is also provided. *(List Price: $95 including documentation and source code)*

Requires: 128K, two disk drives, IBM Pascal.

Blaise Computing Inc.
1465 17th Ave.
San Francisco, CA 94122
(415) 665-4711

Print-Graf

311 A series of programs to provide printouts of medium- or high-resolution graphics on an IBM dot matrix printer or Epson MX-80 or MX-100 printer with Epson Graftrax PROMs. The primary program, written in machine language, allows the selection of alternate printing options, and positive or negative images on paper. The series also includes a program that creates high-resolution bar charts or graphs. *(List Price: $79.50 including user manual, $149.50 with Graftrax PROMs)*

Requires: 48K, color/graphics adapter, one disk drive, IBM dot matrix printer.

Micro-Z Electronic Systems
P.O. Box 2426
Rolling Hills, CA 90274
(213) 377-1640

Screen Print

312 A machine language-based program that replaces the PC Print Screen function. It provides hard copy output of screens and produces upright, 90-degree rotated, and double-expanded upright images. Four colors are available on the medium-resolution graphics screen in four levels of black and white shading. *(List Price: $44.95)*

Requires: Epson or IBM printer with Graftrax.

M.A.P. Systems Inc.
1120 NASA Road One #444
Houston, TX 77058
(713) 333-9640

***Condon Series 20**, Condon Computer Corp.*

Quikprnt, Scrnprnt, Prntparm

313 *Quikprnt* and *Scrnprnt* are software additions to DOS. *Prntparm* modifies the parameters used in the other programs.

Quikprnt prints information that appears on the monochrome display to a printer attached to the RS-232 serial interface. The program prints neither blanks at the end of the line nor blank lines. The program is automatically added to the system resident code, and once loaded into the system it does not need reloading. *Scrnprnt* prints the entire screen, including blanks at the end of each line and blank lines.

Prntparm personalizes *Scrnprnt* and *Quikprnt* to the printer's parameters. The baud rate, number of stop and data bits, and the parity parameter may be specified for the user's system. All programs are available on a single disk. *(List Price: $39.95)*

Requires: 16K, one disk drive, asynchronous communications adapter, printer connected to serial interface.

Prosoft Inc.
16920 Oakridge Ln.
Morgan Hill, CA 95037
(408) 287-6900

Files, List, Dump, Hex, Sector, Browse

314 A group of programs supplied on disk. *Files* displays all file names from one drive on the screen at one time in three sorted columns. *List* is used with a serial printer, the Print-Screen key, and the BASIC LPRINT command. *Dump* displays contents of files on the screen in numbered data blocks in program hex and ASCII, giving relative addressable byte. *Hex* enables the user to step through a file or randomly display file contents, one sector at a time in hex and ASCII. *Sector* displays any sector on any disk, including the directory and other sectors reserved by the operating system. *Browse* allows the user to roam through files, navigating with function keys. Full screens of data are displayed. *(List Price: First program $20, each additional program $5)*

Requires: 48K, one disk drive.

The Software House
P.O. Box 112
Citrus Heights, CA 95610

ProGraph

315 A program that sends any combination of graphics and text to the printer using the PrtSc key. It converts color graphics to gray-scale or to user-defined crosshatches or textures. It allows users to PrtSc a screen to a file through either the keystroke or a procedure call for software control. The program includes a concurrent spooler for both text and graphics screens and files. *(List Price: $75)*

Requires: Epson printer with Graftrax, (other requirements not available).

ProSoft
P.O. Box 5850
Seattle, WA 98105
(206) 522-6552

Type Faces

316 A printing tool that enhances the capabilities of the dot matrix printer by adding 15 different type styles and over 100 symbols to the standard character set. Printouts can be reduced for letter quality text or copied onto acetate for overhead projector presentations. *Type Faces* comes with a text editor and is compatible with DOS files and most word processors. An instructional tape accompanies the program. *(List Price: $95)*

Requires: 64K, two disk drives, color/graphics adapter, IBM printer with Graftrax.

Alpha Software Corp.
6 New England Executive Park
Burlington, MA 01803
(617) 229-2924

UTILITIES

TimeMark, FileHide

317 *TimeMark* is a batch utility program that displays the current date in ideal format and computes and displays the elapsed running time of application programs. *FileHide* sets files to hidden, system, or normal status for hiding or erase-protecting files and revealing hidden files. *(List Price:* TimeMark *$5*, FileHide *$10)*

Requires: 64K, one disk drive, 80-column monitor.

Peter Norton
1716 Main St.
Venice, CA 90291
(213) 399-3948

PrtSc (Print Screen)

319 A program that enhances the screen print facility of the PC. The PC displays 254 different characters in text mode and a wide variety of shapes and forms in graphics mode. By using the PrtSc key, users can generate printed copies of any screen. Screen images may then be saved on disk for printing or viewing. *(List Price: $65)*

Requires: 48K; one disk drive; IBM printer with Graftrax, or Epson printer.

Radio Technology
8 N. Main St. #111
West Hartford, CT 06107
(203) 232-9974

Expansion Chassis with Winchester 5MB or 10MB Disk Drive, *Tecmar, Inc.*

Videograph 88

318 A graphics print routine that transfers high- or medium-resolution graphics images from the screen to an IBM or Epson printer. It works with any amount of memory and creates printouts of graphics displays using automatic color shading. *(List Price: $59.95)*

Requires: 48K, one disk drive, color/graphics adapter, Epson or IBM printer with Graftrax.

Windmill Software
1058 Joan Dr.
Burlington, Ontario
Canada L7T 3H2
(416) 632-6279

Jools

320 A package of 16 tools that allows manipulation and rearrangement of fixed or variable length text. Vsort and Rearrange let the user sort and rearrange fields, while Select, Find, and Replace extract, search, and replace text within a file. *(List Price: $95; manual only, $20)*

Requires: 128K, two disk drives.

Pluto Research Group
P.O. Box 50444
Palo Alto, CA 94303
(415) 323-5654

CopyPC

321 A utility that allows users to bac up many copy-protected program including *VisiCalc* and *EasyWriter*. It also allows users to recover usable data from a damaged disk. *(List Price: $34.95)*

Requires: 48K, one disk drive.

Nagy Systems
4711 Geary Blvd. #231
San Francisco, CA 94118
(415) 751-2233

ProPrint

322 An onboard print spooler that installs itself in memory and feed text to the printer as needed. Files are move from disk to memory to printer concurrently with other tasks, allowing the printer to wor without delay while performing other functions. *ProPrint* spools a queue of files o any length. The queue can be modified with text editor. *(List Price: $50)*

Requires: 64K, one disk drive, parallel printe

ProSoft
P.O. Box 5850
Seattle, WA 98105
(206) 522-6552

Pick'n'Pack

323 Two utility programs for the IBM BASIC programmer. *Pick-a-men* writes IBM BASIC code to display a menu, collect and check menu command choices, an branch to the proper line numbers that execu menu choices. Parameters for writing menu can be saved for later editing or additions. Th *Pick-a-menu*-produced code can merge wit the user's own programs to avoid repetitious menu coding.

Pack'r takes an IBM BASIC program an eliminates REMark statements, packs as man lines together as possible, produces an option REMark file that documents the program, an saves the newly packed version to disk.

Both programs are provided on one disk. Versions for both 40-column and 80-column screens are supplied. Working versions of eac program have been packed, and fully REMarked versions of each program are als provided. Access to all programs is through master menu. *(List Price: $29.95)*

Requires: 48K, one disk drive.

Joseki Computer Corporation
2604 Artesia Blvd. #5
Redondo Beach, CA 90278
(213) 374-3251

PC General Utilities

324 A utilities package written in BASIC that includes a cross-reference generator, mailing list program, label generator, and print formatter. *(List Price: $29.95)*

Requires: 64K, color/graphics adapter, (printer optional).

PCsoftware
4155 Cleveland Ave.
San Diego, CA 92103

Cross Reference

325 A program that lists a user's BASIC program and prints all the variables used in the program. Line numbers following each variable are the lines on which the variable is used. The program cross-references all line referencing statements such as GOTO, GOSUB, ON-GOTO, ON-GOSUB, IF-THEN-ELSE, and RESTORE. Users determine whether a line number is referenced by another part of the program. Listings can be sent to the screen, an IBM parallel printer, or a serial printer.
(List Price: $24.95)

Requires: 48K, one disk drive.

Ensign Software
2312 N. Cole Rd., Ste. E
Boise, ID 83704
(208) 378-8086

System Checker

326 A diagnostic program that allows users to check their entire computer system with minimal interaction. It is designed for people with no knowledge of computer hardware. Five areas of a computer system are tested under the program. *(List Price: $75; manual only, $15)*

Requires: 32K, one disk drive, CP/M-86 or DOS.

SuperSoft, Inc.
P.O. Box 1628
Champaign, IL 61820
(217) 359-2112, 359-2691
Telex: 270-365

System-Backup

327 A utility program that makes backup copies of any disk regardless of sector size and track format used. The utility recovers from sector errors when one is found and will copy with either one drive or two. *(List Price: $50)*

Requires: 32K, one disk drive.

Norell Data Systems Corporation
3400 Wilshire Blvd.
P.O. Box 70127
Los Angeles, CA 90010
(213) 257-2026

XF-Dump

328 A general-purpose disk utility that allows users to display, print, and alter the contents of any file or sector. Each record is displayed in both its character and hexadecimal representation. *(List Price: $70)*

Requires: 64K, (other requirements not available).

Distributed Software Systems, Inc.
P.O. Box 1301
Northbrook, IL 60062
(312) 634-1511

Lazycoder Screen

329 A program that provides interactive screen design capability. The screen is created by positioning the cursor and using 25 additional design features. The program is written in commented BASIC. *(List Price: $90)*

Requires: 64K, one disk drive.

Nelson Data Resources, Inc.
900 S. 74th Plaza #118
Omaha, NB 68114
(402) 397-3030

MM64SW-1 Memory Test Program

330 A disk-based program that exercises any memory in the expansion chassis. Error logging is included. Diagnostics and a manual assist in isolating memory problems to the chip level. *(List Price: $19.95)*

Requires: 96K, (other requirements not available).

Micro Match
10343 Commerce Ave.
Tujunga, CA 90142
(213) 353-5929

MXREF

331 A cross-reference program designed to work on programs written in Microsoft BASIC. This tool aids in the debugging, modification, conversion, and documentation phases of software development. Program variables, functions, key words, strings, constants, and line numbers referenced are listed in alphabetical ascending order. The listings produced aid programmers in identifying all references to particular line numbers or variables. Up to 1,000 variable names can be referenced. *(List Price: $96 including manual and disk; manual only, $15)*

Requires: 64K, one disk drive.

Computer Toolbox, Inc.
1325 E. Main St.
Waterbury, CT 06705
(203) 754-4197

ScreenPro

332 A BASIC programming language subroutine that enables users to develop professional screen-oriented dialogues. Over 20 options allow comprehensive screen prompting. All PC cursor control keys are handled, plus custom coding of the ten function keys. *(List Price: $32)*

Requires: 48K, one disk drive.

New Venture Systems
P.O. Box 2141
Chesapeake, VA 23320
(804) 482-1889

MacroP

333 A general-purpose macroprocessor that allows users to extend their document formatter or language processor. *MacroP* can convert assemblers into macroassemblers, add long variable names, perform compile-time expression evaluations, and add conditional nested inclusion of text files. The package comes with files of macros for BASIC, Pascal, and PL/I programmers, and Textwriter document formatters. *(List Price: $135; manual only, $20)*

Requires: 56K, one disk drive.

Pluto Research Group
P.O. Box 50444
Palo Alto, CA 94303
(415) 323-5654

Automatic Screen Design Aid

334 A menu-driven automatic screen design aid that allows users to lay out a screen on a CRT with any attribute. It generates BASIC code. *(List Price: $99)*

Requires: 48K, one disk drive.

Softmark Inc.
446 Colonial Ave.
Layton, UT 84041
(801) 546-2000

Pack and Crypt

335 A two-program package that saves disk space and provides security for sensitive data. *Pack* uses Huffman coding to compress files and saves 25 to 50 percent on text and program source. *Crypt* takes a user-provided password to protect files against unauthorized readers. The program is written in C language. *(List Price: $49.95)*

Requires: 64K, one disk drive.

Norell Data Systems Corporation
3400 Wilshire Blvd.
P.O. Box 70127
Los Angeles, CA 90010
(213) 257-2026

Is this your first time ?

Do it right with Comtuter !

- *Easy to use*
- *Learn by doing*
- *Set your own pace*

Comtuter uses plain language to teach you the Whats, Whens, Whys and Hows of DOS. Put our conversational diskette in your IBM Personal Computer and avoid the confusing number of details and options in manuals. Computer training specialists designed COMTUTER to help first time users understand and use DOS quickly.*

only $69.95 *California residents add $2.40*

Minimum System ~ 64 KB, 1 disk drive, 80 character display, DOS

Special Bonus

FREE DOS REFERENCE CARD
FREE FUNCTION KEY LABELS
FREE GUIDE TO IBM* MANUALS

Comprehensive Software Support

New catalog for IBM personal computer users...

FEATURING HELP WITH YOUR MOST IMPORTANT BUSINESS DECISIONS... MONEY DECISIONS

- Where will your money work the hardest? Analyze investment opportunities with sophisticated tools... from net present value to a fast calculation of the true current value of a T-Bill.
- What is the optimal order quantity? How does the new ACRS depreciation method save you money? Money Decisions helps you develop fast answers to these tough management problems.
- Money Decisions helps you print neatly formatted reports...showing all of your assumptions and answers. Ideal for presentations.

HOW WOULD YOU ANSWER THIS QUESTION?

"What will the value of a $50,000 investment be in 5 years if an additional $25,000 is invested in year #2, and $10,000 is withdrawn each year for years #3, 4, and 5? The annual interest rate is 17%."

To answer that question you'd probably have to reach for a calculator, pencil, a set of tables, and maybe an old finance textbook. Until now!

Introducing **Money Decisions,** an easy-to-use program that calculates fast answers to 34 of the most commonly asked financial problems.

Money Decisions is ideal for accounting, real estate decisions, financial planning, estate planning, banking, annuity development, and more!

For more information about Money Decisions and other products for your IBM Personal Computer, **SEND FOR YOUR FREE CATALOG TODAY!"**

Money Decisions is a Trademark of Eagle Software Publishing, Inc
The IBM Personal Computer is a trademark of International Business Machines

MONEY DECISIONS IS THIS EASY TO USE...

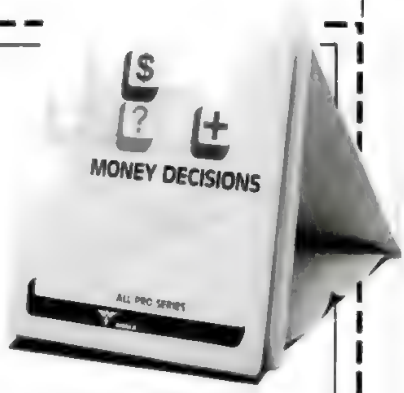

Entering information into the program is as easy as "filling in the blanks". The system prompts you at each step. Above, it asks for the regular monthly payment on a loan.

The middle screen above demonstrates a loan routine once you've entered your data. There is never any reason to worry if you've keyed information incorrectly. The program asks, "any corrections?"...and the last screen demonstrates your answer.

VISIBLE COMPUTER SUPPLY CORP.

Systems Software

UTILITIES

PFAS

336 A portable ISAM with a set of routines written in Pascal, permitting programmers to access data/records by a primary key and any number of secondary keys. The program supports the standard I/O functions of an ISAM, including initializing indexes, reading and updating records randomly by primary or secondary keys, reading records sequentially or reverse sequentially by key, and adding or deleting records by key.

The program also supports variable length records, reading records by partial key, recovery of space when records are deleted, and getting the key from the index. The indexed file implemented by *PFAS* is a B-tree, which ensures retrieval, insertion, and deletion of records without file reorganization. *(List Price: $200)*

Requires: Two disk drives, UCSD p-System or DOS, (other requirements not available).

Gryphon Systems
P.O. Box 755
Cardiff by the Sea, CA 92007
(714) 436-1455
Telex: 499-0529

COBOL Programming Tools

337 Three visual programming tools for programmers working with COBOL. *Animator* displays the source code on the screen with the cursor moving from statement to statement as the execution proceeds. This allows the user to follow the logic of a program, and it eases the task of debugging.

Slideshow allows the user to create visual aids, such as menus, text slides, and still or moving graphics slides. These visual aids can be linked to an applications program, and batch-oriented applications can be made interactive.

Forms-2 automatically generates the source code required for screen handling. As the user "paints" the screen, the program generates standard record description statements that can be copied in an application program. *(List Price:* Animator *$425,* Slideshow *and* Forms-2 *$200 each)*

Requires: 64K, two disk drives, CP/M-86, CIS COBOL.

Micro Focus
1601 Civic Center Dr.
Santa Clara, CA 95050
(408) 496-0176

PhosForm

338 A software utility that consists of a screen editor and a set of screen input routines. The screen editor is used to custom design forms to fit individual needs. While users design the form, they can change form headings and move and reorder information. In designing the form the programmer sees what the user of the program will see on the terminal. The screen editor also prints out a copy of the finished form. *(List Price: $95)*

Requires: 16K, two disk drives.

Gryphon Systems
P.O. Box 755
Cardiff by the Sea, CA 92007
(714) 436-1455
Telex: 499-0529

The Man — Machine Interface ...

... The All-Important Connection

ALS

Whether you are developing programs or writing books, you need productivity. IBM* knows that, that's why they developed SPF for their big mainframes. And now, ALS* offers the same power for your micro computer.

ADVANCED PRODUCTIVITY SYSTEM

- A Full-Screen Editor Similar To SPF
- Dual Screen Support
- A Separate Browse Subsystem
- Integrated Utilities
- Tag-Driven Text Processor
- Menu-Driven, General Purpose Dialog Manager

For information, call or write to:

ARRIX LOGIC SYSTEMS INC
P.O. Box 142

ALS is a Trade Mark of Arrix Logic Systems, Inc.

ProEdit

339 A full-screen editor with horizontal and vertical scrolling that can edit any ASCII file. Editing functions can be executed with one or two keystrokes. *(List Price: $50)*

Requires: 48K, one disk drive.

ProActive Systems Corporation
505 Channing Ave.
Palo Alto, CA 94301
(415) 326-2722

FPRINT

340 A BASIC program that prints DOS text files formatted as separate page output. It documents program source files created with BASIC or EDLIN editors, or any other DOS ASCII files. *(List Price: $5.95)*

Requires: 48K, parallel printer, (other requirements not available).

Mouseworks Computing
151 Gemini Ave.
Lompoc, CA 93436

Perfect Companion Conversation Control

341 A utility that handles the interaction between the user, keyboard, and screen. It acts as an intelligent interface, passing input and output from the screen and keyboard back and forth to the application program. Screen control, keyboard control, field control, and command control are provided, and all DOS languages are supported. *(List Price: $220)*

Requires: 32K, two disk drives.

Software Innovations, Inc.
5505 Blair Oaks, Box 74815
Lewisville, TX 75056
(214) 370-8601

BASIC Program Cross-Referencer

342 A program development and documentation tool that locates users' variable names by line number, sorts them alphabetically, and prints them following the program listing. *(List Price: $30)*

Requires: 128K, one disk drive, printer.

A. Eric Eastman
620 W. 1950 North
West Bountiful, UT 84087
(801) 292-0664

Double-Density Disk Writer

343 A program that doubles disk capacity by storing data on the unused side. Language programs convert standard DOS disk to double-sided format and allow the user to tailor DOS for any drive set-up. *(List Price: $40)*

Requires: Tandon TM 100-2 disk drives, (other requirements not available).

Datamac Computer Systems
680 Almanor Ave.
Sunnyvale, CA 94086
(408) 735-0323

ProSort

344 A utility that sorts up to eight files using specified parameters and merges them into a single output file using a polyphase binary tree insertion sort. The program is written in Pascal. *(List Price: $75)*

Requires: 48K, one disk drive.

ProActive Systems Corporation
505 Channing Ave.
Palo Alto, CA 94301
(415) 326-2722

Interested in the IBM Personal Computer?

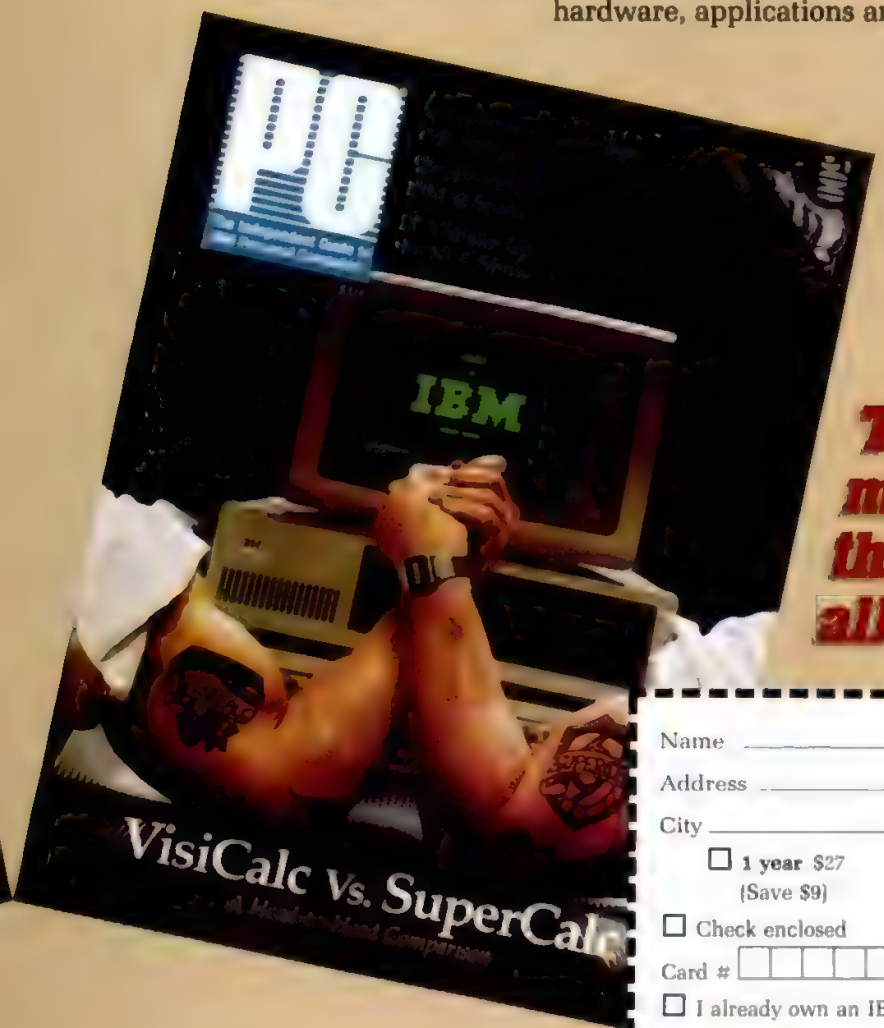

If you're interested in the IBM Personal Computer then you need PC magazine.

PC magazine is the Independent Guide to IBM Personal Computers. Each issue is packed with information for everyone interested in IBM Personal Computers.

PC magazine tells you how to put together the best IBM "PC" system and then how to get the most out of it. Each issue brings you hundreds of colorful pages of evaluations, insights, and straight talk from respected experts—professionals in computer science as well as writers, businessmen, lawyers, educators, and many others.

PC covers software, hardware, applications and most every topic of importance to the thousands of IBM Personal Computer users who read it. To ensure that we give you the information you need, PC includes a special "User-to-User" section, as well as a "PC Wish List", and news about IBM Personal Computer clubs, events and publications.

For a limited time, you can subscribe to PC at NO RISK and still receive a 25% discount off the newsstand price. Enter your subscription now. If not fully satisfied when you receive your first copy of PC, simply return your mailing label within 15 days for a full refund.

This is the magazine that tells you all about it.

EVERY NINE MINUTES SOMEONE JOINS AMERICAN SOFTWARE CLUB

HERE ARE 10 REASONS WHY:

1. PRICE: ASC promises that members' prices are the lowest available. If, within 30 days of your purchase you find a lower, nationally advertised price, we will gladly credit your account with the difference.

2. NO MINIMUM: As a Club member you are never obligated to buy anything you don't want, unlike other software clubs which sometimes require as many as three purchases every six months.

3. FAST SHIPMENT: The products we offer in our catalog are kept in stock, so orders are usually shipped within 24 hours. We also offer air shipment for those members who want it.

4. PRODUCT DESCRIPTIONS: ASC's bimonthly Compendium contains extensive product descriptions on every offering so that both novice and expert alike know what they are buying and can be sure that it's right for them and their computers.

5. WIDE SELECTION: ASC carries hundreds of programs as well as hardware and supplies for APPLE, ATARI, CP/M, IBM PC, and TRS-80 computers. Program categories include Business, Education, Entertainment and Languages/Utilities.

6. PRODUCT EVALUATION: Each product sold by ASC must first pass rigorous evaluation before it is included among the Club's offerings. Products must demonstrate both their claimed capabilities and represent sound purchases prior to their inclusion.

7. PRODUCT SUPPORT: We believe it is as important to support products as it is to sell them, so we stand behind every product we sell, and only offer merchandise from manufacturers who are committed to living up to their warranties.

8. EASE OF ORDERING: An order form and envelope is provided with every catalog, and to make ordering even more convenient, the Club also provides a toll free number for 24 hour, 7-days-a-week service.

9. CONSUMER SERVICES: The Club provides at member request, information and suggestions as to product suitability and compatibility, and when necessary can call on the assistance of additional outside sources.

10. SPECIAL OFFERS: Club members will from time to time receive special exclusive offerings that greatly enhance the value of membership.

PRINTS LIKE A DAISY...COSTS LIKE A MATRIX.

Integral Data Systems introduces the only low-cost dot matrix printer on the market that features Maisey™ printing. Maisey printing is a technique that allows you to produce correspondence-quality text approaching that of more expensive daisy-wheel printers, but at much faster speeds.

How fast? With Microprism Printer's™ dual speed capability, you can output at 75cps in correspondence-quality and 110cps in high-speed data mode. And it also features sharp, high-density graphics in an 84 x 84 dpi format.

You'll get cleaner, crisper output than you ever thought possible in a single pass.

Other standard features of the Microprism include proportional spacing, text justification and, of course, software compatibility with our more expensive Prism Printer™ line.

The Microprism Printer is the perfect system mate that can handle all of your printing requirements... it's the best of both worlds. So if you've been waiting for the price of daisy-wheel printers to come down, or the quality of dot matrix to go up, now is the time to check out the exciting new Microprism Printer from Integral Data Systems.

Stop in at your local dealer today and ask for a demonstration. If you need the name of the dealer nearest you, call us toll-free at (800)258-1386. Or write Integral Data Systems, Milford, NH 03055.

MICROPRISM™

Integral Data Systems, Inc.

Microprism Printer, Prism Printer and Maisey are registered trademarks of Integral Data Systems, Milford, NH.

UTILITIES

ProLog

345 A program that has up to 512 file directories per disk. It includes file-protect, read-only, privacy, long names, and subdirectory comands. Other features include definable directory fields, automatic backup of important files, and the ability to manage simultaneous requests for file access. Directories can extend over several devices, many directories can be entered on one device, and files can appear in multiple directories. Interactive full-screen directory reports include multiple sorts, in-time windows, on-file names, extensions, and user-defined date and time fields. *(List Price: $75)*
Requires: One disk drive, (other requirements not available).

ProSoft
P.O. Box 5850
Seattle, WA 98105
(206) 522-6552

Disk Magic

346 An interactive disk-patcher utility that lets users make system patches and repair damaged data. It combines two-dimensional screen interaction and allows full-screen display of disk records by absolute sector number. Data can be displayed in hex or ASCII. The program is written in assembly language. *(List Price: $49.95)*
Requires: 64K, one disk drive, printer.

Norell Data Systems Corp.
3400 Wilshire Blvd.
P.O. Box 70127
Los Angeles, CA 90010
(213) 257-2026

Screen Machine

347 A series of external routines enabling users of Pascal, FORTRAN, COBOL, and assembly languages to perform high-speed screen manipulations. Cursor positioning, scrolling, erasing, and text handling are all facilitated.

It emulates a 160-column by 25-line display. A 40- or 80-column physical screen can be "slid" left and right over the virtual screen (160x25). Users can define up to nine subscreens, termed blocks. Text may be manipulated in each of these subscreens independently. The program can also function with a color card adapter in 80-column mode. *(List Price: $49.95)*
Requires: 64K with assembly and COBOL, 128K with Pascal and FORTRAN; one disk drive.

Omric Corporation
1268 Main St. #207
Newington, CT 06111
(203) 666-4240

ISAM-BASIC

348 A set of subroutines in an application program that controls random data files. The program utilizes the routines by issuing GOSUB statements with control variables previously set to indicate the appropriate action. The subroutines are recorded on disk in ASCII format so the user can merge them with any number of application programs.

Combined, the subroutines make up an access method for disk files. The access method has several characteristics that simplify the programming effort required to utilize random disk files effectively. *ISAM* is implemented in BASIC, and source code is available for BASIC. *(List Price: BASIC $90, machine language $140)*
Requires: 64K, one disk drive.

Johnson Associates Software
P.O. Box 3069
Redding, CA 96049
(916) 221-0740

PascalSET

349 Three tools—*PTrace*, *PMacro*, and *PAdapt*—for writing, debugging, and maintaining production-quality Pascal programs. *PTrace* provides users with a report containing information about the behavior of a Pascal program as it runs. The report automatically traces the progress of a program through all its routines and shows current values of input and output parameters and global variables used by each procedure.

Tracing may be selective and triggered by program events. A summary activity count showing the number of uses of each routine is also provided.

PMacro provides a macro definition capability for abbreviation and standardization of complex programming sequences. It also provides several mechanisms for maintaining and controlling variations of a program within a single copy of the source.

PAdapt accepts a variety of Ada-style extensions to the Pascal language and translates these into standard Pascal. The "exception handling" extension is an approach to handling special conditions such as erroneous program inputs. All extensions are translated into standard Pascal. Products are available under license agreements. *(List Price: Not available)*
Requires: PTrace requires a run-time package provided by the manufacturer, (other requirements not available).

First Systems Corporation
865 Manhattan Beach Blvd.
Manhattan Beach, CA 90266
(213) 546-5581

Screengen IV

350 Creates a BASIC program to recreate any user-keyed screen design. Function keys can be set to any displayable character: Normal, intensified, blinking, underline, and reverse image can be turned on or off anywhere on the screen. Insert and delete keys are supported. *(List Price: $60)*
Requires: 48K, one disk drive.

Fogle Computing Corporation
P.O. Box 5166
Spartanburg, SC 29304
(803) 574-4950

PC/Format

351 Software that allows creation of screen formats. It includes user-callable subroutines that control all screen and keyboard I/O. Supported by FORTRAN, Pascal, and BASIC. *(List Price: $99)*
Requires: 64K, one disk drive.

Micro Express
3857 Birch St. #109
Newport Beach, CA 92660
(714) 859-7575

UT-86

352 Four utility programs that provide functions or features not available with existing 8086 utilities. *Copyfile* creates copies of existing files on the same or a different disk, optionally changing the file names. *Copyfile* can display each file name copied and optionally prompt operators before the file is copied.

D provides a sorted full or partial directory of files on disk, indicating file size in K-bytes. It gives a summary of space usage on the disk selected and includes hidden or system files.

Patch is an extensive file examination/modification utility program, a command-oriented program with a complete on-line Help facility. Records can be fetched, modified in hexadecimal or ASCII, or filled with fixed values. It is configurable for operation on various terminals through another command. Files can be opened, closed, typed, renamed, erased, or searched for specific strings.

Print is a general purpose file print utility. It can print multiple files using many user-specified options. Page height, usable lines/page left margin width, tab expansion width, parity strip, and page headings. Printouts may include line numbers, and the user may request print prompt before each file is printed. *(List Price: Program and manual $180; program only, $160; manual only, $20)*
Requires: One disk drive, (other requirements not available).

Dynamic Microprocessor Associates
545 Fifth Ave.
New York, NY 10017
(212) 687-7115

UTILITIES

Helpware

353 An interactive, integrated user interface for DOS that provides file creation, display, editing, copying, and printing, and is based on an updated display listing files stored on on-line disks. *(List Price: $195)*

Requires: 64K, one disk drive.

SoftWorkers of Texas
12606 Greenville Ave. #100
Dallas, TX 75243
(214) 690-0595

OMS Utilities Package

354 A utilities package that provides the PC user with control utilities. The package switches system operations from monochrome to color monitor and vice versa, opens communication channels, speeds up floppy disk access time, works with *VisiCalc*, and sets tabs on Epson and NEC printers. Full source and executable codes are provided with the program package. *(List Price: $25)*

Requires: 64K, one disk drive.

Organizational Management System, Inc.
7304 Kathydale Rd.
Baltimore, MD 21207
(301) 668-9011

PC256 Printer Expansion Program

355 An assembly language program that allows the entire IBM character set (255 characters) to be printed on the Epson MX-80, MX-100, or IBM printer with Graftrax-80 option. Every character displayed by the IBM monochrome monitor can be printed. It operates with BASIC, Pascal, and assembly language, as well as the screen print function. The program allows the user to redefine any screen character. *(List Price: $25)*

Requires: 64K, one disk drive, Epson or IBM printer.

Crest Enterprises
909 N. San Antonio Rd.
Los Altos, CA 94022
(415) 948-4948

Hotline

356 A self-prompting, intelligent terminal program that enables users to transfer files between the PC and another computer. *(List Price: $40)*

Requires: 64K, one disk drive, asynchronous communications adapter, modem.

Gottfried Associates
129 Old Suffolk Dr.
Monroeville, PA 15146
(412) 373-0425

PC-Mate Speed Disk

357 A program that simulates a floppy disk using Tecmar's PC-Mate dynamic RAM. The result of the simulation is a logical disk device compatible with normal system operations that provides speed increases between 5 and 50 times that of the IBM minifloppies, depending on the type of operation performed. This option is available with PC-Mate Dynamic RAM option only. *(List Price: $95)*

Requires: 192K, one disk drive.

Tecmar Inc.
23600 Mercantile Rd.
Cleveland, OH 44122
(216) 464-7410
Telex: 241735

TRS-80 to IBM File Transfer Program

358 A package that allows the transfer of files from the Radio Shack system to the IBM PC. Communication programs for both systems are included. Also included is an adapter that allows the two systems to connect, and a test communication file that verifies correct connection and proper transmission. File concatenation is provided as well as the ability to send files of any length. Supported baud rates are 110, 150, 300, 600, 1200, 2400, 4800, and 9600. *(List Price: $40)*

Requires: RS-232 adapter and one disk drive on TRS-80, asynchronous adapter and one disk drive on IBM.

Personal Computer Products
1400 Coleman Ave., Ste. C-18
Santa Clara, CA 95050
(408) 988-0164

ProKey

359 A keyboard enhancer that resembles BASIC's soft keys. Each key is set to type any character sequence automatically. Sequences longer than one line can be used and sequences can be changed at any time without leaving the active task. The program can be bulk loaded with user-defined strings. It can also be used by software authors to program vector interrupts to entry points in Pascal (and other) programs for possible keystrokes. It allows Pascal, FORTRAN, COBOL, and BASIC programs to call for advanced keyboard I/O, operating system service, and interrupts. *(List Price: ProKey $39.95, OEM package including MASM symbolics $100)*

Requires: 48K, one disk drive.

ProSoft
P.O. Box 5850
Seattle, WA 98105
(206) 522-6552

AST-3780

360 An emulation package that includes the AST CC-232 Advanced Communication Card (a synchronous communication card). It allows the PC to emulate the 2780/3780 terminal by transferring files with IBM mainframe computers using bisynchronous protocol. *(List Price: $945 including AST CC-232 Advanced Communication Card; card only, $295)*

Requires: 48K, one disk drive.

AST Research, Inc.
2691 Richter Ave. #104
Irvine, CA 92714
(714) 540-1333

LoadCalc

361 A system that converts virtually any text file into a *VisiCalc* (DIF) file for use with *VisiCalc*, *VisiTrend/Plot*, and other VisiSeries systems. It converts files from mainframes, time-sharing systems, other personal computers, and data from software packages that do not produce DIF files but save data on disks as text files. Fractions are converted to decimals during interchange. It allows selective conversion by row and column, so only desired data is obtained. Each field is analyzed and saved as either a label or a value in a DIF file. *(List Price: $95)*

Requires: 64K, one disk drive.

Cypher
121 Second St.
San Francisco, CA 94105
(415) 974-5297

OMS Pascal Screen Unit

362 A set of procedures that can be called from any Pascal program. The procedures can control the cursor, write messages in any video mode, clear the screen, draw boxes, and get single characters from the keyboard including special characters and function keys.

Three sets of routines are provided on disk. They support the IBM monochrome monitor or equivalent on an RGB color monitor or a standard color television or equivalent. Full documentation is included featuring explanation of routines, using the SCRN unit, and linking the programs. *(List Price: $45)*

Requires: 48K, one disk drive.

Organizational Management Systems Inc.
7304 Kathydale Rd.
Baltimore, MD 21207
(301) 668-9011

RamSpooler

363 A RAM-based printer spooler that buffers data to be sent to the printer. It leaves the PC free to perform other tasks while the data is transmitted at high speed to the printer. It sets up a true foreground/background environment. *(List Price: $95)*

Requires: 64K, one disk drive, PC-Mate Dynamic RAM option.

Tecmar Inc.
23600 Mercantile Rd.
Cleveland, OH 44122
(216) 464-7410
Telex: 241735

Speech Master Software Support Package

364 A software support package that offers a complete text to speech ability with inflections. Printer type output can direct the speech, providing the text to be spoken. A special code also provides a screen to voice function, making the screen correspond to the *SpeechMaster* output. *(List Price: $95)*

Requires: 64K, one disk drive.

Tecmar Inc.
23600 Mercantile Rd.
Cleveland, OH 44122
(216) 464-7410
Telex: 241735

CodeSmith-86

365 A programming aid that provides full-screen debugging capability with built-in screen editing features. It allows definition of precise conditions that will halt the execution of programs being tested, and displays memory locations during program execution. It performs full-screen disassembly listings from memory contents that may be single-stepped through, and allows setting of hundreds of breakpoints with one function key, as well as supporting a split-screen mode in which the source program can be displayed, scrolled through, and edited while debugging is in progress. Simplified assembly language instructions are patches to disassembled code on display. *(List Price: $145 including manual)*

Requires: 96K, one disk drive.

Visual Age
642 N. Larchmont Blvd.
Los Angeles, CA 90004
(213) 464-8141

Chartdif, Plotdif

366 Two utility programs designed for users of electronic spreadsheets. The utilities interpret data files in Data Interchange Format (DIF) and create graphic charts of the data. Because DIF data is flexible enough to record and retrieve, the programs employ the same flexibility in creating graphs. The *Chartdif* program was designed to sense the type of display activated and produce a two-dimensional bar chart. *Plotdif* creates three-dimensional spreadsheets.

Both programs are sold together on a single-sided, 5¼-inch floppy disk. Programs include documentation, a menu-driven demonstration, and sample data files. *(List Price: $75)*

Requires: 48K, one disk drive, color/graphics adapter, *VisiCalc*.

The Consultant
414 Can-Dota
Mt. Prospect, IL 60056
(312) 259-7224

Autosort/86M

367 A program that functions as a high-speed assembly language sort/merge/select module, called as a subroutine from IBM BASIC. Sort parameters can be specified during run-time, and the program permits records of 5,000 bytes. The program sorts/selects on string, integer, and single- or double-precision fields. It sorts on ten keys, independently, ascending, or descending, and deletes/retains records, comparing up to four independent select keys. The program includes prompted disk change capability for work and output files and can be incorporated into existing programs. *(List Price: $150)*

Requires: 64K, two disk drives.

Computer Control Systems, Inc.
298 21st Terrace S.E.
Largo, FL 33541
(813) 586-1886

Cross Reference (N.F. Systems)

368 An indexing program that cross-references BASIC programs and gives a list of subroutines, variables, constants, and functions. It is useful for BASIC programmers. *(List Price: $34.95)*

Requires: 64K, one disk drive, (printer optional).

N.F. Systems, Ltd.
P.O. Box 76363
Atlanta, GA 30358
(404) 252-3302
Source: TCK071

Sort Subroutine

369 A sort subroutine callable from a BASIC program that sorts records in ascending or descending order. *(List Price: $24.95)*

Requires: 64K, one or two disk drives.

N.F. Systems, Ltd.
P.O. Box 76363
Atlanta, GA 30358
(404) 252-3302
Source: TCK071

Serial Printer Program

370 An easy-to-use program that allows the IBM PC to send files to a serial printer. It supports line widths, basic formatting, paging, and form handling. Included is a manual and a translation table for customization. Supported baud rates are 75, 110, 150, 300, 600, 1200, 1800, 2400, 4800, and 9600. *(List Price: $40)*

Requires: 64K, one disk drive, asynchronous communications adapter.

Personal Computer Products
1400 Colemen Ave., Ste. C-18
Santa Clara, CA 95050
(408) 988-0164

IBM BASIC Utilities

371 A software package that provides subroutines for IBM BASIC programs. An Input routine edits input, character by character, to make sure it is the correct type, and then formats and displays the entry, or displays an error message. Matrix routines handle matrix input, inverse, and multiplications. Also provided are a file search subroutine, a subroutine to draw boxes and lines on the screen, and a miniature full-screen text editor. A utility can cross-reference all variables and line numbers in a BASIC program, reserved words, and branching. *(List Price: $75, including an 80-page user manual)*

Requires: 64K, one disk drive.

Basic Business Software, Inc.
P.O. Box 26311
Las Vegas, NV 89126
(702) 876-9493

Repair

372 A utility that enables the user to repair floppy disks. The program can copy a file on a floppy disk by track or by sector; set files to hidden, system, or normal status; show hidden or erased files; and add or change a directory. An all-purpose program that is independent of IBM DOS, it runs with double-density, and single- or double-sided disk drives. *(List Price: $59.95)*

Requires: 48K, one disk drive, (printer optional).

Squire, Buresh Associates, Inc.
4 E. Central St. #2029
Worcester, MA 01613
(617) 832-6430

UTILITIES

8087 High-Speed Math Package

373 A disk-based software package containing all the programs required to use the Intel 8087. The programs are written in assembly language, and source code is included. The 8087 programs are written in two forms: One set is Macro files and the other set is callable routines. *(List Price: $95 including documentation)*
Requires: 64K, one disk drive.

Micro Match
10343 Commerce Ave.
Tujunga, CA 91042
(213) 353-5929

Screen-Master

374 Software that defines defaults and generates screen input format. The maximum key length is 30 characters, and special handling routines are available for each field using GOSUB commands. Features include table searching and handling, date checking, and general title formatting. *(List Price: $100)*
Requires: 48K, one disk drive.

Software Masters
6704 Hoover Rd.
Indianapolis, IN 46260
(317) 259-7892

Emulator/86

375 An emulator that allows users to run CP/M-86 software under DOS. Purchasers can use a DOS editor to write a program, compile it under a CP/M-86 compiler, and execute the finished application under DOS. Programs that run under Emulator/86 benefit from such DOS features as large file size, dated directory displays, and relatively fast file access. DOS peripherals are installed and DOS commands are available. It includes a utility program that transfers programs and data files from a CP/M-86 disk to a standard DOS disk. *(List Price: $75)*
Requires: 48K, two disk drives.

Lifeboat Associates
1651 Third Ave.
New York, NY 10028
(212) 860-0300
TWX: 710-581-2524
Telex: 640-693

COBOL Animator

376 A program animator that displays source code listings on the screen and moves the cursor from statement to statement during execution. It provides an alternative to the COBOL program development facilities found on a mainframe. Users can create a programmer work station for developing and maintaining COBOL programs on their PC. It can be used with the manufacturer's Level II COBOL. *(List Price: Animator for Level II $800, animator for CIS COBOL $425)*
Requires: 64K, two disk drives, CP/M-86.

Micro Focus, Inc.
1601 Civic Center Dr.
Santa Clara, CA 95050
(408) 496-0176
Telex: 278-704

PCScreen

377 A set of programs designed to simplify and improve the user's programming by converting a format the user types onto the screen into a ready-to-run BASIC program segment. The segment may be linked to another program and to a screen control subroutine. The segment sets up screens and handles input formatting. Fields may be "colored" with reverse video and variations in intensity. Nine field format types may be specified, such as phone number, numeric, and yes/no. An accompanying Help module further simplifies programming. *(List Price: $39.95)*
Requires: Not available.

Single SOURCE Solution
P.O. Box 578
Concord, CA 94522
(415) 680-0202

GSS-Plot

378 An applications development tool that enables programmers to add graphics into their programs. It prepares high-quality line graphs, bar charts, scatter charts, pie charts, and other graph-type displays. *(List Price: $500)*
Requires: 64K, one disk drive, color/graphics adapter, CP/M-86.

Digital Research
P.O. Box 579
Pacific Grove, CA 93950

PCM/1

379 A general-purpose macro generator with uses ranging from program development to the automatic compilation of certain kinds of documents. *(List Price: $200; manual only, $20)*
Requires: 64K, one disk drive.

Automated Office Systems
602 Lookout Dr. #213
Richardson, TX 75080
(214) 669-9966

PC-UTIL

380 A software device that enhances directory and copy utilities. The directory is enhanced by user-selectable sorter sequences and formats, and the copy utility can append files during the copy procedure. *(List Price: $95)*
Requires: 64K, one disk drive.

Tecmar Inc.
23600 Mercantile Rd.
Cleveland, OH 44122
(216) 464-7410
Telex: 241735

PC BASIC (Microsoft) Programmer Utilities

381 A utilities package that includes capability for password protection, packing data, program formatting and listing, variable dump, reference list, defined matrices and user functions, and error handling. *(List Price: $200)*
Requires: 64K, two disk drives.

Enhanced Technology Associates
3929 Lynn Ave. South
Minneapolis, MN 55416
(612) 929-7889

Speedup-Plus

382 A program that provides a disk image in memory and eliminates forced reading and rereading of often-used portions of the disk. Users can specify how much available memory is to be used for imaging the disk. The program is compatible with DOS, BASICA, BASIC, FORTRAN, both Pascal systems, and FORTH. It is also compatible with *VisiCalc*, *WordStar*, and Peachtree software. Hard disk drive support is also available. *(List Price: $199.95)*
Requires: 64K, one disk drive, (printer recommended).

International Computers
13048 Olive Blvd.
Creve Coeur, MO 63441
(314) 878-8838

Diskette Catalog

383 A disk management program that keeps track of an unlimited number of disks, whether for IBM or another microcomputer. It enables the user to locate a file or to print a directory of diskettes. *(List Price: $29.95)*
Requires: 64K, one disk drive, (printer optional).

N.F. Systems, Ltd.
P.O. Box 76363
Atlanta, GA 30358
(404) 252-3302
Source: TCK071

TeleSoft PSE

384 A programming support environment that features the *TeleSoft-Ada* compiler, development tools, and utilities. Ada is a programming language for large-scale, real-time, and process control systems. The Department of Defense developed Ada as a standardized language interchangeable between processors and systems, thereby encouraging component-oriented software design and maintenance. A p-code interpreter allows implementation of the TeleSoft PSE on the IBM PC. Fully self-contained, the PSE requires no other software or operating system for execution. Many utilities are currently available. Prices include one software update; additional updates may be purchased. *(List Price: $2,975)*

Requires: 256K (320K recommended), one floppy disk drive, one TG-1000 or TG-1200 5¼-inch hard disk drive.

TeleSoft
10639 Roselle St.
San Diego, CA 92121
(714) 457-2700

Memory Diagnostics

385 A program that tests the entire 1MB of memory space. Full diagnostics are included to determine exactly which memory devices are not performing properly. All test data may be printed or logged on the disk. *(List Price: $25 including documentation)*

Requires: 48K, one disk drive.

Micro Match
10343 Commerce Ave.
Tujunga, CA 91042
(213) 353-5929

Stop-List

386 A system enhancement utility program that provides single-key operation of the Pause/Resume function, a slow-motion display option, and automatic operation upon system startup. It is compatible with DOS software. *(List Price: $24.95 including manual)*

Requires: 32K, one disk drive.

Wilcro Systems
P.O. Box 11208
Dallas, TX 75223
(214) 321-7049

Forms-2

387 A visual programming tool designed to speed the creation of programs involving interactive screen handling. The programmer can "paint" a form on the screen, as it is to appear to the user at run-time, and Forms-2 generates COBOL source code to handle the screen. It can also generate COBOL programs for data entry/inquiry and for application prototyping. *(List Price: $200)*

Requires: 64K, one disk drive, Level II COBOL or CIS COBOL, CP/M-86.

Micro Focus Inc.
1601 Civic Center Dr.
Santa Clara, CA 95050
(408) 496-0176

P-FIX

388 Allows all printer functions to be redirected to the serial port and circumvents the time out of the RAM software when printing on a slower printer. PRN, Ctrl-PrtSc, and PrtSc keys behave as if the regular printer were connected to the system. It is designed for users with a color/graphics adapter and a communications board. *(List Price: $29.50)*

Requires: One disk drive, asynchronous communications adapter, color/graphics adapter.

RGB Designs
175 S. San Antonio Rd. #117
Los Altos, CA 94022
(415) 941-2246

Key-Note

389 A string processor that becomes part of DOS. Users can specify strings of up to 256 characters or control functions with a single keystroke. Strings may be saved in MACRO disk files. *(List Price: $49)*

Requires: 16K, one disk drive.

RGB Designs
175 S. San Antonio Rd. #117
Los Altos, CA 94022
(415) 941-2246

UNBASIC

390 A BASIC preprocessor to allow the user to program in a more powerful extended BASIC. Included are new features such as CASE...CEND, LIB, and WHILE...WEND. UNBASIC translates the program into standard BASIC. *(List Price: $75)*

Requires: 64K, one disk drive, (printer optional).

MicroCorp.
913 Walnut St., P.O. Box Q
Philadelphia, PA 19107
(215) 627-7997
Source: TCMO33
CompuServe: 70335,1027

File Compare

391 A file comparison utility that displays the differences between two files. The program can be used for any type of file and supports various comparison parameters including display format such as character, character and hex, and start and end records. The output can either be viewed on the monitor or printed. *(List Price: $34.95)*

Requires: Not available.

N.F. Systems
P.O. Box 76363
Atlanta, GA 30358
(404) 252-3300

OMS Utilities Package

392 A package of control utilities including switching system operations from monochrome to color monitor and vice versa, opening communication channels, speeding up floppy disk access time, and setting tabs on Epson and NEC printers. It is compatible with *VisiCalc*. Source and executable codes are provided. *(List Price: $25)*

Requires: Not available.

Organizational Management Systems, Inc.
7304 Kathydale Rd.
Baltimore, MD 21207
(301) 668-9011

SerPrinSoft

393 Utility software that allows the user to utilize the full potential of a printer. It integrates serial printer support into DOS and allows the user to specify serial port number, handshaking protocol, baud rate, parity, stop bits, or word length. *(List Price: $79.95)*

Requires: 64K, one disk drive, communications adapter, serial printer.

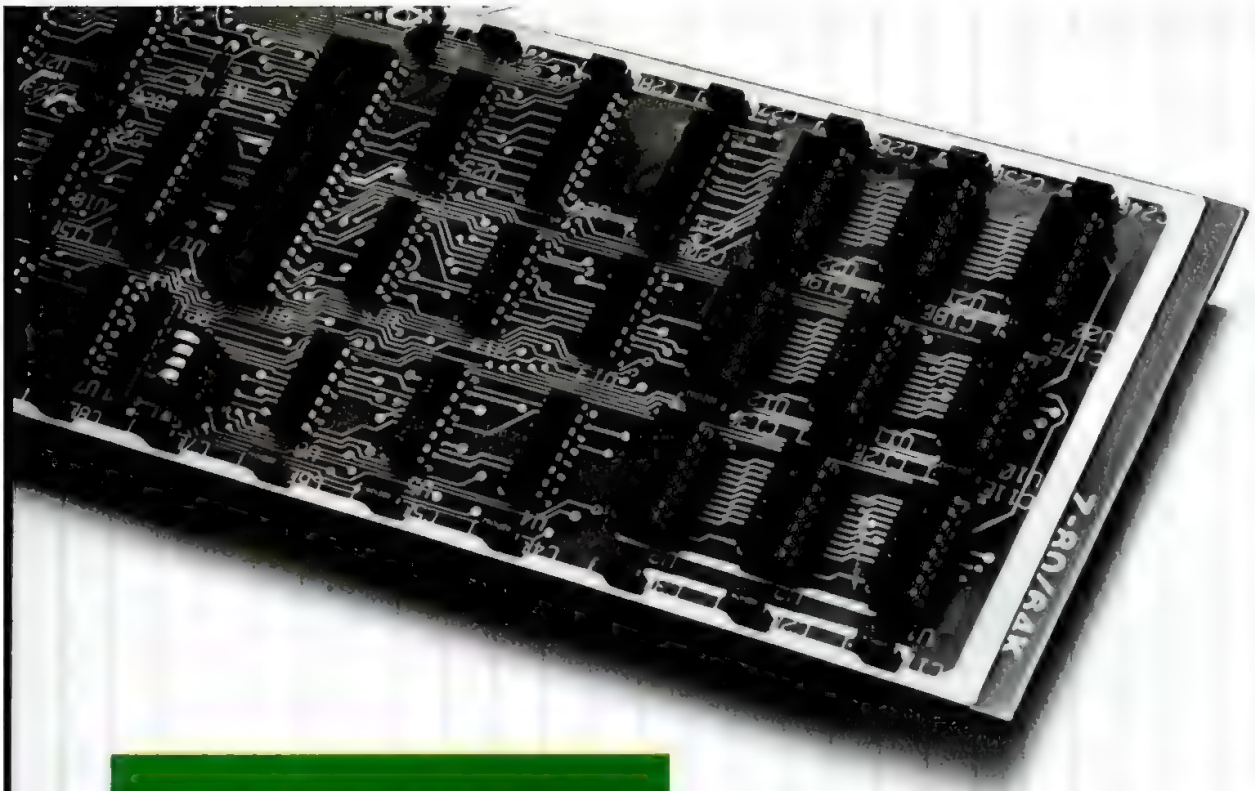

International Computers
13048 Olive Blvd.
St. Louis, MO 63141
(314) 878-8838

Standard Input Subroutine

394 A programmer's tool that may be used in any program to control the screen positioning and operator input. The parameters pass to the routine and check for valid length and type of data. *(List Price: $85)*

Requires: Not available.

TRUE CP/M® FOR YOUR IBM®
INTRODUCING BYAD DS1

More programs and faster access available now!
Today with the BYAD DS1 plug-in expansion circuit board, you can increase the speed and productivity of your IBM-PC.

More programs
The BYAD DS1 allows you to transform your system into a CP/M computer giving access to the largest existing software library (CP/M version 2.2). Data base Management, word processing, business programs, and literally thousands of CP/M programs can be used.

Faster
The DS1 board contains 64K bytes of parity RAM and a Z80B microprocessor. The Dual Systems, Z80 and IBM 8088, achieve improved performance CP/M with up to 30 times faster access through interrupt driven full I/O buffering. DS1 uses the 8088 as an intelligent concurrent I/O processor which performs keyboard type-ahead buffering, printer buffering, disk track and directory buffering.

Easy Operation
No learning curve or new commands when using DS1. Utility programs are provided for reading various 5¼" diskettes directly, moving files, and to link your IBM with a serial port to any existing CP/M system. An expanded version, BYAD DS2, contains a built-in serial port and includes all features of DS1.

Cost Competitive
Both BYAD DS1 and DS2 operate with a minimum 48K single drive system. The DS1 costs only $660 and the DS2 with serial port, $760. A comprehensive operating manual is available at $40 and the cost will be applied to the purchase of either a DS1 or DS2.

Send check, money order or call 312 539-4922 and give your VISA or Master Card number for quick delivery.

BYAD Inc.

UTILITIES

Keynote Keyboard Enhancer

395 A keyboard enhancer that allows the user to specify repetitively typed phrases or control functions with a single keystroke. The strings may contain any legal ASCII characters, making it possible to redefine many of the PC's keys. It includes a quarterly software newsletter with program enhancements and updates. *(List Price: $49.95)*
Requires: 48K, one disk drive.

Gerard Cerchio System Consultants
1110 Whirlow Pl.
San Jose, CA 95131
(408) 923-0911

DISKFIX/PC

396 A utility that helps recover accidentally erased files, reorganizes the disk by putting each file in contiguous sectors, displays free space remaining, and allows the display and patching of any disk sector or copy sector within a disk or to another disk. The system is menu-driven and comes with documentation. Disk sectors may be referenced by absolute sector numbers or by file name and sector number within a file. Sector displays are in both hex and ASCII, and patches may be entered in both. It is capable of handling both double- and single-sided disk drives. *(List Price: $49)*
Requires: 48K, one disk drive.

Unicorn Systems Company
3807 Wilshire Blvd.
Los Angeles, CA 90010

Easyscreen/PC

397 A full-page video display handler and program generator that allows multiple screens in each program and provides instant response. Screens are designed on line using cursor control keys. A full line drawing set is available for advanced screen design. Compiled screens can be integrated into programs.

A program generator can be used even by novice programmers to create BASIC programs with a data base keyed access method and add, delete, update, and inquiry capabilities. Screen images are disk-based files with each screen requiring about 2K of memory. *(List Price: Screen and program generator $169.95, screen generator only, $99.95)*
Requires: 32K, one disk drive.

PRODATA, Inc.
663 S. Capital Blvd.
Boise, ID 83702
(208) 342-6878

Access-Master

398 A disk accessor that may be used within any BASIC program to sequentially process random access files in any key-specified order. Using SKRAM techniques, access files with keys up to 30 bytes long may be accessed in five different ways. Records may be randomly retrieved by number. The program interfaces with *ScreenMaster*, a format generator by the same manufacturer. *(List Price: $100)*
Requires: 48K, one disk drive.

Software Masters
6704 Hoover Rd.
Indianapolis, IN 46260
(317) 259-7892

V-Utility

399 A software package consisting of four *VisiCalc* utility programs on one disk. *V-Print* is a flexible printing utility that allows the user to select which columns to print and whether to print sheet equations. *V-Stat* collects data and calculates numerical distribution, correlation coefficient, regression analysis, Chi-squared test, and T test. *V-Plot* inputs data from a *VisiCalc* column and plots either one or two columns on a regular line printer (graphics are not required). *V-Overlay* provides overlays to load onto the *VisiCalc* sheet including moving averages, exponential smoothing equations, time-series trend analyses, and date columns. *(List Price: $99.95)*
Requires: 48K, one disk drive, *VisiCalc*.

Yucaipa Software
12343 12th St.
Yucaipa, CA 92399
(714) 797-6331

Comorg

400 A program that quickly and efficiently organizes and presents menus with no need to modify the source code of menu program when adding or deleting programs. It offers one main menu and up to 14 sub-menus, with 15 options per menu. *(List Price: $90)*
Requires: 64K, one disk drive.

Comsen Inc.
20-A Erford Rd.
Lemoyne, PA 17043
(717) 737-2049

Master Sort

401 A machine language sort/merge utility that has up to 12 sort/merge keys, dynamic memory allocation, and a key index technique. *(List Price: $100 Canadian)*
Requires: 64K, one disk drive.

Micro Masters Software Ltd.
P.O. Box 513
Edmonton, Alberta
Canada T5J 2K1
(403) 922-3088

Tools 1

402 A utility package that includes an expanded directory with system information. Other features include displaying and editing disks by tracks and sectors, retrieving and displaying differences between files, and retrieving key words (or strings) in selected files. *(List Price: $49.95)*
Requires: Not available.

Sysco Software
4739 Mt. Longs
San Diego, CA 92117
(714) 287-1405

Comsort

403 A program that will sort any data files used on the PC and has unlimited key size. It can save or sort specifications for future use and can be used as a subroutine in existing programs. An entire record or respective record numbers can be sorted. *(List Price: $80)*
Requires: 64K, one disk drive.

Comsen Inc.
20-A Erford Rd.
Lemoyne, PA 17043
(717) 737-2049

BASIC Enhancements

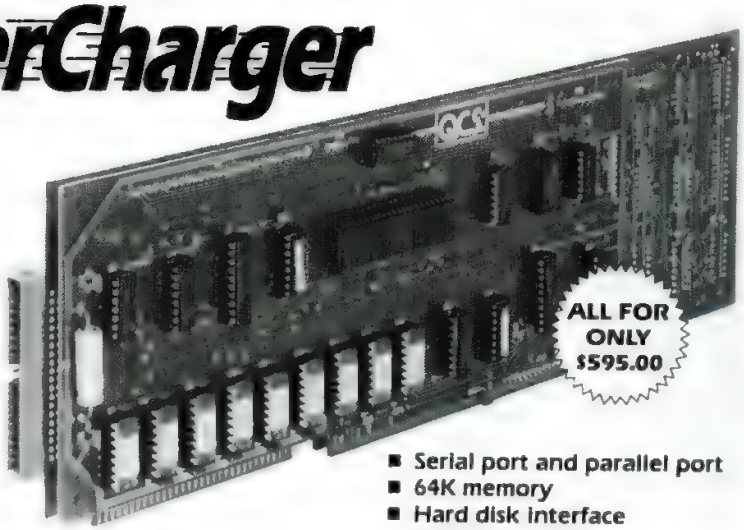

404 A BASIC language enhancer that allows (GOTO X), (GOSUB X), (RESTORE X) in normal BASIC and more handy utilities. *(List Price: $35)*
Requires: 48K, one disk drive.

Software Masters
6704 Hoover Rd.
Indianapolis, IN 46260
(317) 253-8088

Computer Advantages for Your IBM PC

Save on Quality Computer Products by Q.C.S

BIG BLUE SuperCharger

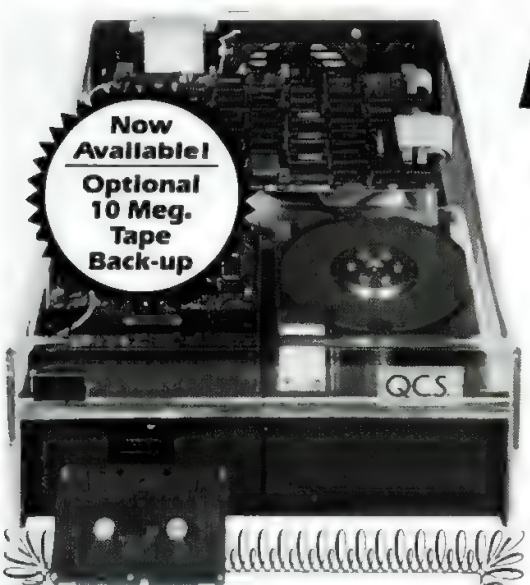

Increases the power, memory capacity and expandability of your IBM PC

All-on-one board, all-in-one slot, BIG BLUE features:

- Dual Access I/O
- Allows for Dual Processing
- 35% more power and throughput than a standard 4MHz Z80 system
- Z80B microprocessor running at 5.5 MHz
- Ability to run thousands of existing CP/M-80 programs
- Serial port and parallel port
- 64K memory
- Hard disk interface
- Calendar clock

... and still leaves room for expansion!

No Risk Hard Disk

Expands the capability of your IBM PC with cost-effective mass storage

The completely assembled and tested system includes:

- Switching power supply
- Winchester drive
- Host adapter card
- Sealed case
- Expansion (enclosure, controller, and power supply designed for future backup hardware or added storage)
- Software
- Auto-attach CP/M
- Hard disk utilities
- Real time clock
- Formatting program (assigns alternates for any weak sectors detected during formatting, assuring the lowest possible error rate)
- Warranty (a full one-year warranty on all parts and workmanship)

Also available:

- New CP/M dynamic generator: configured software; menu-driven for 6-, 12-, 20-, 40-, 80-megabyte drives

The following IBM software can be utilized:

- PC DOS, USCD, CP/M 86 (available soon), UNIX

We think the Q.C.S Hard Disk System is so reliable we'll offer you a 10-day money-back guarantee if it doesn't work.* If it is a hardware failure, the manufacturer guarantees another subsystem to your location within 48 to 72 hours, depending on the area of the country.

* We are not responsible for software problems.

20 Megabytes ~~$3,500~~ Call us!

AVAILABLE SOON! UNIVERSAL DISK CONTROLLER

For 5¼" and 8" FLOPPY DISKS

- Single Density/Double Density
- Single Side/Double Side

FrameUp

406 A utility that incorporates development methods. The methods allow programmers to begin implementation without studying the details of the operating system, file management, screen formatting, and error recovery. Features include a standardized I/O area to which the programmer can deliver or gather input data. Preprogrammed routines supplied with the program can be merged into any program. The routines reduce testing and repetitive design/implementation of standard functions that appear in more than one program module. Standardized printer output to one format or a selected group of preestablished formats is also included. Operation of the application is standardized due to limited use of function keys. Each application and subsection has the same user instructions regardless of application. *(List Price: From $175)*

Requires: 64K, one disk drive.

CTAG, Ltd.
38 Garden Road
Wellesley Hills, MA 02181
(617) 235-8830

Utility Package

407 A disk-based package containing programs to control the hardware in the IBM PC. Included in this package are three keyboard handlers, two monochrome display handlers, two printer handlers (one with spooling), a tone generator for the speaker, a DMA controller, a timer controller, and an interrupt controller. All programs are written in assembly language. Source code is provided. *(List Price: $95)*

Requires: 64K, one disk drive.

Micro Match
10343 Commerce Ave.
Tujunga, CA 91042
(213) 353-5929

XREF

408 A program that creates a cross-reference to other BASIC programs. It generates a legibly formatted listing of the program, with indentation used to show the program's structure clearly. It paginates the listing and can print the program name and date/time on each page for later reference. Then it prints a list of every variable in the program and the line numbers in which each variable occurred. Finally, it prints a table of all line numbers, showing each line in which line numbers were used in a direct transfer, and each line in which line numbers were used in a subroutine call. *(List Price: $39.95)*

Requires: Not available.

Single SOURCE Solution
P.O. Box 578
Concord, CA 94522
(415) 680-0202

Jools/86

409 A package of software tools that is specially adapted for CP/M-86. Included in the package of 16 modules is *VSort* for high-speed internal/external sorting on fixed or variable-length fields, *Select* for line extraction from a file based on field values, *Find* and *Replace* for searching for and replacing text within files, and *Rearrang* for reordering fields to user-specified formats. The package maintains mailing lists and bibliographic data bases, generates permuted texts, and monitors file changes. *(List Price: $95 including manual)*

Requires: 128K, CP/M-86, one disk drive.

Pluto Research
P.O. Box 50444
Palo Alto, CA 94303
(415) 323-5654

Cross-Reference (Microsystems)

410 A cross-reference listing of all variables and GOTO and GOSUB elements in a BASIC program, sorted in alphabetical and line-number reference order. *(List Price: $34)*

Requires: 64K, two disk drives, DOS or CP/M-86.

Microsystems
7201 87th Ave. SE
Mercer Island, WA 98040
(206) 232-1513

String Sort

411 A machine language sort routine to use with BASIC programs. It sorts any string array into ascending alphabetical order. *(List Price: $24.95)*

Requires: 48K, one disk drive.

Ensign Software
2312 N. Cole Rd., Ste. E
Boise, ID 83704
(208) 378-8086

BASIC Utilities

412 A set of utility programs for BASIC programmers, including subroutines for formatted input, matrix input and arithmetic, line drawing, and file searching. The package also contains a program for cross-referencing and similar aids. *(List Price: $75)*

Requires: Not available.

Basic Business Software, Inc.
P.O. Box 26311
Las Vegas, NV 89126
(702) 876-9493

LANGUAGES

PC/FORTH

413 An interactive, extensive language for graphics, data acquisition, and process control applications. Portable FORTH code provides a programming environment with interpreter, compiler, editor, assembler, and utilities all co-resident. The complete package includes an interpreter/compiler with virtual memory management, a custom full-screen editor, an 8088 assembler, utilities, demonstration programs, and a 150-page user manual. Optional extension packages for floating point math, advanced color graphics, data base management, and target compilation are also available. *(List Price: $100, extension packages $100 each, data base management $200, target compiler $300)*

Requires: 64K, one disk drive.

Laboratory Microsystems
4147 Beethoven St.
Los Angeles, CA 90066
(213) 306-7412

BASIC Compiler

414 A superset of standard BASIC that accepts the most popular syntax and many extensions to the language. Such extensions are Chain, Line Input, Peek, Call, On Error, and Poke.

Long variable names are allowed and line numbers are not required. The program also supports the complete range of built-in string and numeric functions including CHR$, STR$, EXP, LOG, TAB, LEFT$, and ATN. It supports 13-digit precision BCD. *(List Price: $300; manual only, $25)*

Requires: 48K, one disk drive, CP/M-86 or DOS.

SuperSoft, Inc.
P.O. Box 1628
Champaign, IL 61820
(217) 359-2112, 359-2691
Telex: 270-365

LANGUAGES

PCFORTH

415 A fig-FORTH version of FORTH that is available with printer functions and additional words such as Dump. PCFORTH applications are transportable, and FORTH modules can be accessed from the keyboard or tested without writing drivers and tracers. FORTH interfaces with machine language. Words can be defined in either high-level FORTH or machine language. *(List Price: $89.95)*

Requires: 16K, one disk drive.

Armadillo Int'l Software
P.O. Box 7661
Austin, TX 78712
(512) 459-7325

C86 C Compiler

416 A program that provides for full implementation of the C programming language, available for CP/M-86 or DOS. The distribution disk contains the compiler, an extensive library in source and object formats, and a linking loader. *(List Price: CP/M-86 and DOS versions $400; disk and documentation $250; documentation only, $25)*

Requires: 96K, two disk drives.

Computer Innovations, Inc.
75 Pine St.
Lincroft, NJ 07738
(201) 530-0995

MMSFORTH V2.1

417 A structured, modular language and operating system including an interpreter and compiler, an 8088 Assembler, 79-Standard FORTH, and an extensible instruction set. Applications are available, as well as support from a newsletter and user groups. *(List Price: $249.95)*

Requires: 32K, one disk drive, 80-column monitor.

Miller Microcomputer Services
61 Lake Shore Rd.
Natick, MA 01760
(617) 653-6136

Thread

418 A highly structured interpretive language that uses syntax based on C language and a "stacking" area for stored values. It performs interpreting, compiling, and editing functions by executing coded words, defining new words, entering them into an expandable dictionary, and modifying words being defined. *(List Price: $249; manual only, $75)*

Requires: 128K, one disk drive, 80-column monitor.

DWB and Associates
P.O. Box 4609
Portland, OR 97208
(503) 249-0412

LISP/86 Language Processor

419 An artificial intelligence language based on the Interlisp dialect, which offers over 75 built-in functions including trace, file I/O, and string operations. Written in C language, the program comes with a simple editor, file librarian, and formatted expression print routine. Also included are two artificial intelligence demonstration programs: a guessing game that learns as it plays and a version of the *Eliza* psychiatrist program. *(List Price: $49.95)*

Requires: 64K, one disk drive, printer.

Norell Data Systems Corporation
3400 Wilshire Blvd.
P.O. Box 70127
Los Angeles, CA 90010
(213) 257-2026

Lattice C Compiler

420 Full implementation of C language with library and I/O subroutines that implement most standard I/O functions as specified by Kernighan and Ritchie under DOS. It is compatible with the UNIX version 7 C compiler and produces relocatable machine code in Intel's 8086 object module format for use with the linker supplied with DOS. *(List Price: $500)*

Requires: 48K, two disk drives.

Lifeboat Associates
1651 Third Ave.
New York, NY 10028
(212) 860-0300
TWX: 710-581-2524
Telex: 640693

Level II COBOL

421 A mainframe-compatible COBOL compiler that allows ANSI '74 applications programs written for mainframes to run on the PC with minimal conversion. It can be used with a PC instead of a mainframe to provide COBOL program development facilities. It can also be used with the manufacturer's COBOL Animator to create a programmer work station out of the PC to develop and maintain COBOL programs. *(List Price: Level II COBOL $1,600, Animator $800, with CIS COBOL $425)*

Requires: 64K, two disk drives, CP/M-86.

Micro Focus, Inc.
1601 Civic Center Dr.
Santa Clara, CA 95050
(408)496-0176
Telex: 278-704

C Compiler

422 A package that contains the UNIX version 7 compatible C compiler in assembly source form or executable object; "clib--," the run-time support library in assembly source form; "stdio.h"; and the Standard I/O Library in C source form. An interface for DOS is available. The compiler is also designed to operate as a native compiler or as a cross compiler. *(List Price: Without floating point $200, with floating point $350, source code $2,500)*

Requires: 64K, one disk drive.

Telecon Systems
90 E. Gish Rd. #25
San Jose, CA 95112
(408)275-1659

TeleSoft-Ada

423 A structured, high-level language that supports many constructs of Pascal. This version is a partial implementation of standard Ada with no extensions, but it can be used for effective systems programming. It features a syntax checker.

TeleSoft
10639 Roselle St.
San Diego, CA 92121
(714)457-2700

BASIC Compiler

424 Microsoft's BASIC Compiler that enables users to write and test programs with the BASIC interpreter and then compile them into machine-level code. This can significantly increase execution speed. Once distributed, compiled programs cannot be listed or modified, which helps safeguard their design. *(List Price: $300, IBM Product Center prices)*

Requires: 64K, one disk drive.

IBM Corporation
Systems Products Division
P.O. Box 1328
Boca Raton, FL 33432
(800)447-4700, 322-4400 Illinois,
447-0890 Alaska, Hawaii

FORTRAN/RATFOR

425 A complete FORTRAN compiler. RATFOR compiles into FORTRAN, allowing the user to write structured code while retaining the benefits of FORTRAN. SSS FORTRAN makes full FORTRAN IV available to microcomputers. *(List Price: FORTRAN $275; RATFOR $100; manual only, $25)*

Requires: 32K, one disk drive, CP/M-86 or DOS.

SuperSoft, Inc.
P.O. Box 1628
Champaign, IL 61820
(217) 359-2112, 359-2691
Telex: 270-365

MatchMaker 8600

426 An interpreter that allows databus programs to run in a single-user environment. It effectively opens up a catalog of field-tested datapoint applications programs to the PC user. It acts as an interpreter, translating databus instructions into pseudo-code, an intermediate conversion step that is then translated for each operation. *MatchMaker* comes with a 30-day returnable guarantee. Restrictions of sale include single-user purchase for internal use only. *(List Price: $6,000)*

Requires: 96K, one disk drive.

CARE Computer Systems
P.O. Box 1408
Bellevue, WA 98008
(206)451-8272

NCAPT Software System

427 A sophisticated language for numerical control programming previously linked to large-computer use. It includes point, line, circle, tabulated cylinder, vector and matrix definitions, conditional branching, and looping logic and cutter compensation. *(List Price: $5,500; manual only, $85)*

Requires: 64K, 1MB hard disk drive, Baby Blue, CPU board.

FTG Data Systems
10801 Dale St., Ste. M-2
P.O. Box 615
Stanton, CA 90680
(714)995-3900

C Compiler

428 A compiler for C language systems and applications programming. It features the PL/M compatibility mode, which allows the code generated by the C compiler to be used directly with PL/M and Pascal programs. *(List Price: $195)*

Requires: 96K, two disk drives.

c-systems
221 N. Berkeley Ave.
Fullerton, CA 92631
(714)879-1123

PC/FORTH

429 A program development system that includes an interpreter/compiler with virtual memory management, a custom screen editor, a line editor, an assembler, a compiler, and many utilities. Floating point math extensions, cross compilers, and other options are also available. *(List Price: Not available)*

Requires: 48K, one disk drive.

Laboratory Microsystems
4147 Beethoven St.
Los Angeles, CA 90066
(213)306-7412

Pascal Compiler

430 A language compiler by Microsoft that provides a system development environment for the creation and execution of Pascal programs. It allows separate compilation of program elements for maximum system performance and supports several features for advanced programming work. *(List Price: $300, IBM Product Center prices)*

Requires: 128K, two disk drives.

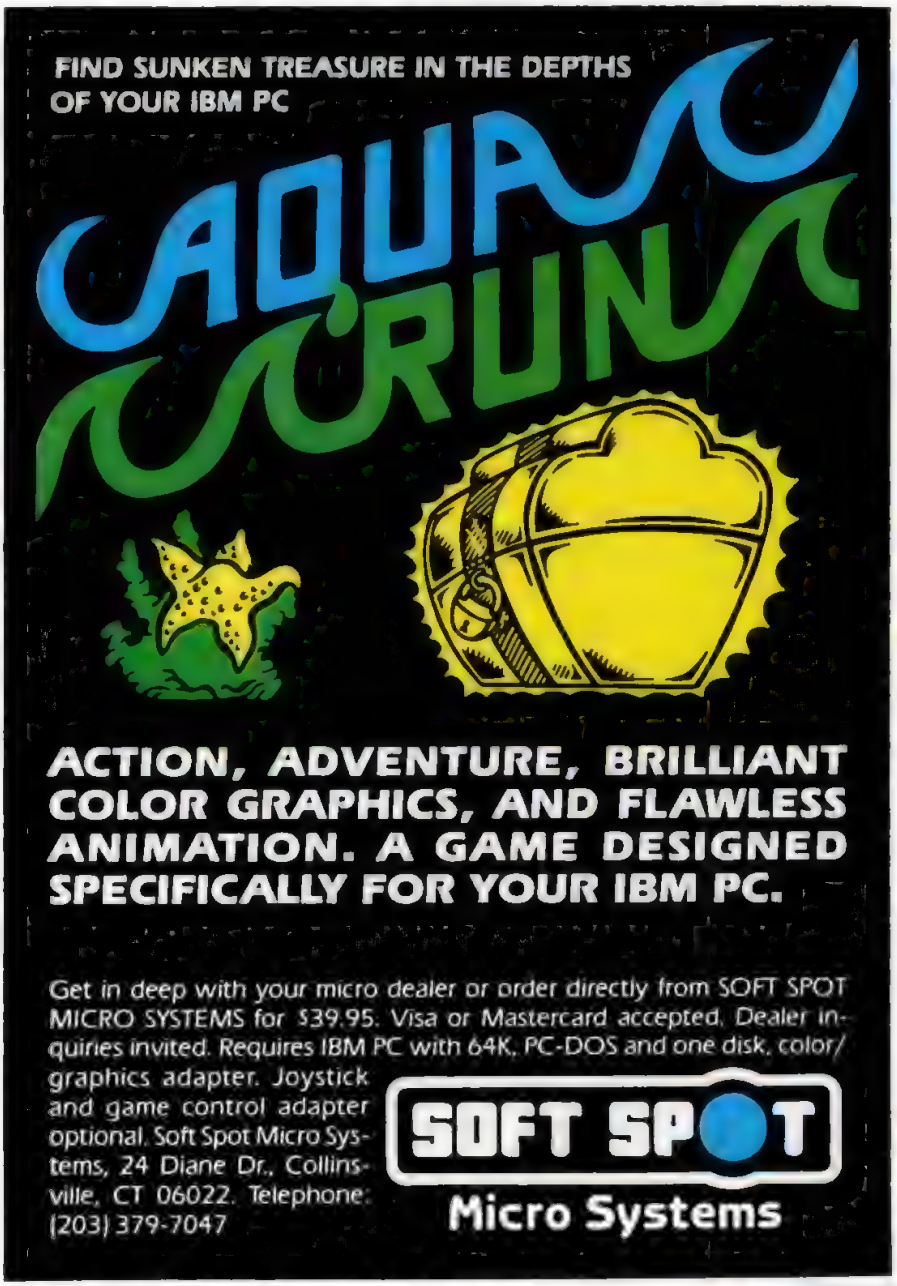

IBM Corporation
Systems Products Division
P.O. Box 1328
Boca Raton, FL 33432
(800)447-4700, 322-4400 Illinois,
447-0890 Alaska, Hawaii

UCSD FORTRAN-77 Compiler

431 A FORTRAN-77 Compiler for the UCSD p-System that develops programs in ANSI-77 FORTRAN. FORTRAN-77 is a popular language for scientific and engineering applications. Users can develop programs in both UCSD Pascal and UCSD Fortran. *(List Price: $175, IBM Product Center prices)*

Requires: 64K, two disk drives.

IBM Corporation
Systems Products Division
P.O. Box 1328
Boca Raton, FL 33432
(800)447-4700, 322-4400 Illinois
447-0890 Alaska, Hawaii

LANGUAGES

FORTH Computer Assisted Instruction Course

432 A FORTH language and editor package that includes an instruction course. FORTH is one of the more powerful languages, and it is memory efficient, machine transportable, and cuts down on program development time. *(List Price: $59.95)*

Requires: 64K, one disk drive.

International Computers
13048 Olive Blvd.
St. Louis, MO 63141
(314) 878-8838

UCSD Pascal

433 The UCSD p-System Pascal compiler by SofTech Microsystems allows users to develop Pascal or assembly language programs, as well as extensions for system development and commercial applications programming. Because the UCSD p-System is modular, users can add the FORTRAN-77 or BASIC compiler, allowing modules written in one language to be used in programs written in another. The modular system also allows the use of separately compiled Pascal modules that already exist in program libraries. *(List Price: $175)*

Requires: 64K, two disk drives, UCSD p-System.

IBM Corporation
Systems Products Division
P.O. Box 1328
Boca Raton, FL 33432
(800) 447-4700, 322-4400 Illinois,
447-0890 Alaska, Hawaii

COBOL Compiler

434 A compiler by Microsoft that allows users to develop programs in COBOL, a language designed specifically for business applications. IBM COBOL is a version of the ANSI x3.23 1974 level standard, with extensions that support color and screen formatting. Other capabilities include Call and Chain to other programs, the ability to combine object modules with those from the PC's Macro Assembler, and segmentation. *(List Price: $700, IBM Product Center prices)*

Requires: Two disk drives, 80-column monitor, 64K for compiling (COBOL programs may be executed on a smaller system).

IBM Corporation
Systems Products Division
P.O. Box 1328
Boca Raton, FL 33432
(800)447-4700, 322-4400 Illinois,
447-0890 Alaska, Hawaii

C/86 Compiler Version 2.0

435 A compiler that generates assembly language code and supports most features found in C language. Written in C and assembly language, the program includes full C structures, pointers and arrays, storage classes, and initialization. The product compiles all C arithmetic and logical operators, and all control statements. The source for sample utility programs and standard C library is included. C/86 compiles in one pass and generates 8086 assembly language code for the PC Macro Assembler. *(List Price: $79.95)*

Requires: 64K, two disk drives, printer.

Norell Data Systems Corporation
3400 Wilshire Blvd.
P.O. Box 70127
Los Angeles, CA 90010
(213) 257-2026

Ultra-BASIC Translator

436 A translator of high-level structured BASIC language into IBM Disk BASIC. Features include the ability to use any IBM-DOS command or statement, alphanumeric labels up to 70 characters long, string handling, and random-file data structures. Users do not need FIELD, LSET, MKI, or CVI. A structured block code for program maintenance and use is also included. *(List Price: $75 including manual and source code)*

Requires: 64K, one disk drive.

Basic Business Software, Inc.
P.O. Box 26311
Las Vegas, NV 89126
(702) 876-9493

APC BASIC

437 A BASIC language for the IBM PC designed to improve execution speed, debugging facilities, memory utilization, and program development time. It includes expanded string functions to support business data processing, and accurate arithmetic to 8, 10, 12, or 14 digits. Features include trace/conditional trace, global edit, multiple buffer files, cross-reference program, dynamic code merging, bit functions, multiline user functions, dynamic array dimensioning, and assembly language interface. *(List Price: $400 including manual)*

Requires: 32K, one disk drive, Z-80 card.

American Planning Corporation
4600 Duke St., #423
Alexandria, VA 22304
(703) 751-2574

87BASIC

438 A floating point library that allows programs compiled by the IBM PC BASIC compiler to drive the optional Intel 8087 numeric data processor. It supports single- and double-precision numbers, and incorporates all the floating point features of the 8087. *(List Price: $125)*

Requires: 128K, one disk drive, IBM PC BASIC compiler, 8087 coprocessor.

MicroWare
P.O. Box 79
Kingston, MA 02364
(617) 746-7341

Janus

439 A subset compiler that includes many features of ADA adapted for the microcomputer. *Janus* produces machine code for PC-DOS and includes features such as separate compilation, user-defined types, and arbitrary precision-fixed and floating-point numbers.

Janus features modular programming (the computer rather than the programmer remembers which modules are being used) and re-entrant initialized variables. The system can check all references against external definitions, minimizing human error. The package includes double-density 5¼-inch disks, compiler object code, assembler and disassembler, linker, screen editor, and several example programs. *(List Price: $400; manual only, $25)*

Requires: 96K, two disk drives.

R.R. Software
P.O. Box 1512
Madison, WI 53701
(608) 244-6436

IBM FORTRAN Compiler

440 A language compiler that enables users to write programs in FORTRAN-77, a scientific and engineering language. Object files can be linked with files from PC Macro Assembler programs. The compiler permits accessing of both formatted and unformatted sequential and direct files. It contains an augmented OPEN statement that takes additional parameters not included in the subset. *(List Price: $350, IBM Product Center prices)*

Requires: 128K, two disk drives.

IBM Corporation
Systems Products Division
P.O. Box 1328
Boca Raton, FL 33432
(800)447-4700, 322-4400 Illinois,
447-0890 Alaska, Hawaii

Waterloo Micro Language Interpreters

441 A software package including interactive interpreters for various languages, and an editor for preparation of program source and data files. Five programming language dialects known as Waterloo microAPL, microBASIC, microCOBOL, microFORTRAN, and microPascal have been designed specifically for educational use in the teaching of computer programming. The *Waterloo microEditor* is a line-oriented text editor with searching and substitution commands including global change. It is necessary to have the Waterloo Serial Adapter Board to run the software. *(List Price: Serial Adapter board $225; five language processors $795, APL $325, others $225 each)*
Requires: 192K, one disk drive, Waterloo serial adapter.

Watsoft Products Inc.
158 University Ave. W.
Waterloo, Ontario
Canada N2L 3E9
(519) 886-3700

87Pascal

442 A library of floating point routines that drive the optional 8087 numeric data processor to speed up and increase the accuracy of all IBM Pascal programs. *(List Price: $125)*
Requires: 128K, one disk drive, IBM Pascal Compiler, 8087 coprocessor.

MicroWare
P.O. Box 79
Kingston, MA 02364
(617) 746-7341

87Macro

443 A library of assembly language macro programs that can be run with the IBM Macro Assembler. The library includes pseudocodemacros for assembling the complete 8087 instruction set that features weakly typed mnemonics. A group of utility macros is also included for carrying out common floating point tasks such as: converting between numeric formats and types, evaluating trigonometric functions from the TAN function, encoding and decoding real numbers, trapping errors and comparing 8087 operands. *(List Price: $150)*
Requires: 96K, one disk drive, 8087 coprocessor.

MicroWare
P.O. Box 79
Kingston, MA 02364
(617) 746-7341

Macro Assembler

444 An assembler by Microsoft that enables users to develop and produce programs that may run several times faster than equivalent high-level language routines. Assembler-produced programs can be called from other BASIC programs, as well as other high-level languages such as Pascal, COBOL, or FORTRAN. *(List Price: $100, IBM Product Center prices)*
Requires: 96K, one disk drive, (64K if subset assembler, which does not support macros, is used).

IBM Corporation
Systems Products Division
P.O. Box 1328
Boca Raton, FL 33432
(800) 447-4700, 322-4400 Illinois
447-0890 Alaska, Hawaii

C Compiler

445 A two-pass compiler. The first pass produces an intermediate code (U-code for universal code). Pass two contains both the translator and the optimizer. The optimizer typically results in 40 percent code reduction. *(List Price: $250; manual only, $15)*
Requires: 48K, one disk drive, CP/M-86 or DOS.

SuperSoft, Inc.
P.O. Box 1628
Champaign, IL 61820
(217) 359-2112, 359-2691
Telex: 270-365

C88 system

446 A compiler for C language, a linkage editor, and an extensive library of functions. The compiler accepts a large subset of the C programming language. The compiler supports the following features: int, char, arrays, and pointers; all C statements including for, do, while, and switch; and all C operators (except assignment operators) such as ++, --, and ?:. External linkage of separately compiled functions, C preprocessor statements such as #define, #include, and #if.

An L88 linkage editor allows modules and functions to be linked together either by direct conversational interaction with the user or via linking instructions contained in a command file. The linker produces a map of all symbols to aid in debugging.

Library functions include shell sort; sequential disk I/O package, random disk I/O package, and screen and cursor I/O package; keyboard handling routines; string manipulation routines; memory and I/O device access routines; and operating system interface routines. *(List Price: $250 including documentation)*
Requires: 64K, two disk drives.

Intellect Associates Inc.
P.O. Box 365
Holbrook, NY 11741
(516) 472-4449

WS-Driver

447 Software containing set of "fixes" tailored to any printer, including subscripts, superscripts, and bold printing. *(List Price: $50)*
Requires: 64K, one disk drive, printer.

MicroCorp.
913 Walnut St., P.O. Box Q
Philadelphia, PA 19107
(215) 627-7997
Source: TCMO33
CompuServe: 70335,1027

Comm-Plus

448 An on-disk patch kit that modifies an IBM asynchronous program to support uploading and downloading, printers, auto-dial for Hayes Smartmodem, and more. It includes a 150-page Intelliterm tutorial. *(List Price: $25)*
Requires: 64K, one disk drive, asynchronous communications adapter, (printer optional).

MicroCorp.
913 Walnut St., P.O. Box Q
Philadelphia, PA 19107
(215) 627-7997
Source: TCMO33
CompuServe: 70335,1027

R/BASIC

449 An expanded version of BASIC that uses the 8087 numeric co-processor to manipulate data, extract portions of variables, and concatenate them with others. Additional statements allow users to manipulate data stored in a relational data base.

Optional hardware can be utilized: additional RAM to 256K, additional floppy or hard disk storage, a monochrome or graphics monitor or adapter, and an asynchronous communications adapter. *(List Price: $500 for a transferable license to use the program on a single machine)*
Requires: 128K, one disk drive, 8087 numeric co-processor.

Cosmos, Inc.
10626 148th Ave. SE
Renton, WA 98056
(206) 226-9362

Patcher-Plus

450 A generalized patching program to allow correction of any PC-DOS disk file in the field. It is especially intended for programmers, EDP managers, and computer stores, and is useful for device-dependent fixes. *(List Price: $100)*
Requires: 64K, one disk drive, (printer optional).

MicroCorp.
913 Walnut St., P.O. Box Q
Philadelphia, PA 19107
(215) 627-7997

TRY SOMETHING GREAT.

We serve the ultimate.

We can turn your friendly little personal computer into a giant. We can take it to its outer limits with our new "RIO" Ultimate Multi-Function card, and all for just $599 (64K) to $999 (256K).

Its 64K-256K RAM is user expandable, parity checked, and totally IBM compatible. It has an RS-232 Serial Port, a Parallel Printer/SASI Disk Controller Port, and a Game Paddle Port that works with both Apple and IBM Joysticks.

Do you already have enough RAM? Try our STB-I/O card with two RS-232 Serial Ports, one Parallel Printer/SASI Port, and one Game Paddle Port for $279. Or do you only need memory? Our affordable RAM card that's user expandable from 64K ($399) to 192K ($669) may be just what you're looking for. Standard accessory cables are available for almost any application.

All of our cards are totally IBM hardware and software compatible and offer a one-year warranty.

It's all in the cards. You can have a lot of computer for a little money with products from STB. We have the experience and technology to help you get the most out of your computer.

Simply The Best.

SAUCER/PAINTER/PALETTE
From Micro-G — $29.95

SAUCER
YOU AGAINST AN INVADER

A color graphics program where you defend the world against an alien invasion. Bombs and missiles move across the screen in real time. Requires DOS and color card.

PAINTER I
CREATE, EDIT, AND SAVE MULTI-COLORED IMAGES IN 320 BY 200 MODE

This program allows you to draw and display objects in 12 colors in 320 by 200 mode instead of the normal 4 colors. You can save images to disk and load into basic arrays. Requires DOS and color card. (Joy-stick optional).

PAINTER II
SAME AS I EXCEPT B&W IN 640 BY 200 MODE.

PALETTE
SHOWS THE "SECRET" WAY OF DISPLAYING 12 COLORS IN 320 BY 200 MODE

This program is used as a super color chart and demonstrates how you can get 12 distinct colors in 320 by 200 mode. (512 color selections are available).

ALL FOUR PROGRAMS FOR ONLY $29.95
Incl. disk & manual, add $2 for shipping, VISA/MasterCard

C COMPILER

For the IBM Personal Computer. The package includes the compiler, with complete installation and operating instructions, and the C source for many standard library functions.

The C compiler is UNIX® ver. 7 compatible. Cross compilers are available for the PDP-11, 6809, and 8080. Full C or C without float is available to meet individual needs.
(UNIX) is a trade mark of Bell Labs.)

C	$200.00
C w/float	$350.00
Cross C	$500.00

PRO FOOTBALL FANS!
INTRODUCING
THE GOLD EDITION
THE MOST SOPHISTICATED SYSTEM EVER DESIGNED FOR THE PREDICTION OF PRO FOOTBALL POINTSPREADS

TRS-80 I & III
APPLE

After four years of research, development, and testing, **SDL** is proud to present **"The Gold Edition"** — A system that predicts pro football pointspreads with a degree of accuracy that has never been obtainable until now. From weeks 6-16 during the 1980 and '81 seasons **The Gold Edition** has been a proven **winner in all categories** over the Las Vegas line:

SEASON	FAVORITES		UPSETS		TOTAL		TOTAL GAMES
	HOME	AWAY	HOME	AWAY	HOME	AWAY	
1981 SEASON:	57%	80%	63%	70%	59%	71%	154
1980 SEASON:	53%	67%	70%	66%	61%	66%	154
TWO YEAR AVG:	**55%**	**73%**	**66%**	**68%**	**60%**	**68%**	**308**

THE GOLD EDITION ALSO FEATURES....

- Completely Menu Driven Screens
- Easy to Use Commands
- Accesses One or Two Disk Drives
- Requires Only 10-15 Minutes to Update
- Includes Two Seasons of Data
- Can be Used Year After Year
- Predicts Real or Hypothetical Games
- Predicts Accurate Pointspreads
- Predicts Accurate Over/Under Scores
- Can Generate 20-35 Pages of Analysis Weekly
- Hardcopy Reports Include...
 - Full Season Schedule
 - Team Performance Detail Analysis
 - Team Performance Summary Analysis
 - YTD Divisional Standings
 - Computer Prediction Analysis
 - Pointspread Differential Graphing
 - Over/Under Differential Graphing

The Gold Edition provides the highest quality of information necessary to beat the Las Vegas Line — Prove it to yourself — **Order Now**
Retail price includes **The Gold Edition** System Diskette, Data Diskette with two years of data, and over 50 pages of comprehensive documentation with padded leather binding **$199.50**

Applications Software

Applications software is software designed for business, scientific, and engineering uses of computers. This kind of software gives the computer instructions to carry out specific tasks such as writing payroll checks or plotting business graphs or charts.

Applications Software is the largest of the three software categories. The section has ten subcategories: General Business, Financial, Accounting and Inventory, Job and Industry Specific, Spreadsheets, Data Management, Word Processing and Text Editing, Mailing Lists, Communications and Graphics.

Most of the applications programs are designed for businesses; however, many of the programs concerned with loans, check and credit card management, or stocks and investments are also suitable for personal use.

When you select applications software, make sure it operates correctly with your hardware. Before you choose a program, check the memory, storage (such as the number of disk drives), monitor (color or monochrome), printer, and other requirements to make sure they match your PC. Try to see a demonstration and read about the software to make sure it does the work you need to do at the moment and the work you expect to do later on. Make sure, for example, that an accounting package processes as many records and transactions as your business requires, and that a payroll program handles the number of employees you have now as well as the number you expect to have in a few years. Find out if the program keeps records for the time periods you need, such as monthly, quarterly, or yearly. Also check that the program prints out the information that you need to keep on paper (or hard copy), and see how much you can customize the report columns, headings, or subtotals.

Finally, you may want to find out if the applications programs you select are compatible with other programs. For example, you may want word processing software that works with a mailing list or data management program.

The first group in the Applications Software section is General Business. These software packages are designed for tasks such as business analysis, scientific research, record keeping, and scheduling.

Some of the specific applications of the general business programs are statistics and time and cost analysis. The programs also carry out project management by keeping track of project activity, reporting on personnel workloads, and monitoring deadlines. They keep records of appointments and meetings and monitor telephone use. They also keep records of business expenses and time spent with clients, and print out invoices.

The second applications software group is Financial programs. These programs assist financial planning by analyzing cash flow, budget alternatives, and income tax strategies. They enable you to study loans, compute interest and balances, and monitor loan and lease schedules. They also analyze and report on investment portfolios, calculate investment values, and link the PC to electronic news services for financial reports and quotations on bonds and stock options.

The next group under Applications Software is Accounting and Inventory Software. These programs cover general ledger, accounts payable and receivable, payroll, and inventory. Some of the programs integrate all accounting functions, while others are stand-alone programs covering only one function, such as payroll or inventory.

The accounting programs allow you to carry out tasks such as data entry, bookkeeping, posting to general ledger, and conducting audit trails. Many of the programs include report writing features for customer statements, aging reports, and reports on cash flow. The payroll systems enable you to enter information about employees, pay rates, deductions, taxes, and vacations and sick leave. The programs also enable you to print out checks, W-2 forms, and summary reports. The inventory programs allow you to keep records of stock ordered, received, and sold, and to print out invoices.

Job and Industry Specific Software is the fourth group in Applications Software. These programs enable you to carry out many of the same functions as the general business, financial, and accounting software, except that they have been specially designed for people in particular occupations and industries. For example, billing, inventory, and accounting programs are listed, but they are customized for people in professions such as law or medicine, or in industries such as lumber or petroleum.

The software in this group covers applications such as computer-aided design for architects and civil engineers, freight billing for the trucking industry, and meter billing for oil and gas distributors. Also included are programs for medical and insurance records, and financial analysis and property evaluation for realtors, investors, and home buyers.

Spreadsheets, the next group under Applications Software, are programs that enable you to enter data into the columns and rows of a worksheet displayed on the PC screen. The programs calculate numerical data and then recalculate it when you need to make changes, such as increasing or decreasing budgets or sales projections.

You can use spreadsheets for applications such as calculating depreciation, analyzing loans and investments, computing taxes, and making business forecasts. Some of the programs also enable you to customize spreadsheets by adding screens and menus designed for real estate developers, brokers, accountants, and other professionals.

The sixth group in the Applications Software section is Data Management. Data management programs are used to enter, process, and report on data. You usually enter data through the PC keyboard, although you can do it with digitizers, light pens, or wands that read bar codes (see the Miscellaneous Hardware group of the Hardware section for descriptions of these devices). Once data is entered, you can carry out several different kinds of operations. You can sort the names of customers or names of cities or states into alphabetical order. You can also search the data to find particular records, update or delete the records, or add new ones. In addition, many data management programs enable you to do calculations of numerical data. Finally, depending on the program you choose, you can display a report of data on the screen or print out a report with a printer.

The next group, Word Processing and Text Editing Software, consists of programs designed to process text in the form of letters, reports, long documents, or computer programs. One of the major advantages of these programs is that they allow you to correct errors and make changes in your text before you print anything on paper.

The programs in this group enable you to carry out tasks such as inserting and deleting lines, and copying, moving, and deleting blocks of text such as paragraphs or other sections of a document. Other features include paragraph indentation, automatic page numbering, page headers and footers, and search and replace functions. Some of the programs prepare tables of contents and indexes for documents, and allow you to edit one document on the screen while printing out another. Spelling checkers work with word processors to find misspelled words and then offer the chance to make corrections.

Programs in the mailing list group are useful for addressing large quantities of mail. These programs enable you to create and maintain mailing lists and print them on address labels or on letters and envelopes.

Many mailing list programs include a method of sorting lists numerically by zip code or alphabetically by name of person, city, or state. Some of the programs also enable you to create and print out telephone directories.

The next group of Applications Software is Communications Software, which enables two computers to be linked by cable or telephone lines. (When you connect your computer to another by telephone, you have to use a piece of hardware called a modem. Modems are discussed in the Hardware section.)

The communications programs enable the PC to function as a terminal connected to a large computer so you can have access to large data bases. You can also send and receive text, programs, and data files. Some of the programs even automatically dial the telephone connection number and then answer when someone else calls to link up with the computer.

The last group in the Applications Software section is Graphics Software. "Graphics" refers to pictures or drawings that are created on your PC. Some graphics can be printed out on dot matrix printers, but others require special output hardware called plotters, which use pens, some of which may be colored, to draw the graphics on paper.

Every IBM PC has some graphics capabilities. The monochrome monitor is useful for bar and line graphs. The color monitor, however, has more flexible graphics capability. It has high-resolution graphics that allow you to create circles and pie graphs and to simulate two- or three-dimensional graphics. Many graphics can show motion, and some business programs allow you to create charts and graphs that change automatically to reflect changes in data.

Software Requirements

FOR ALL SOFTWARE PRODUCTS we have listed memory, operating system, language, disk drive, interface, monitor, and printer requirements where available from manufacturers. Software requires DOS and BASIC except where other operating systems or languages are listed. Check with manufacturers and dealers before making a purchase to assure that software is compatible with your IBM PC.

GENERAL BUSINESS

The 25th Hour, 25:01—Time Scheduler/Organizer

451 A program that automatically tracks recurring events such as staff meetings, daily activities, and birthdays. The program allows users to schedule business and personal appointments and monitor deadlines. Features include optional activity reminders, verification of possible time conflicts, and warning flags for weekend dates. It will scan future dates for free time blocks. Recurring events may be initialized for specific years. The program accommodates individual schedules and can handle up to 600 entries per disk drive. It is menu-driven and uses single function keys. *(List Price: $99)*
Requires: 64K, one disk drive, 80-column monitor, printer.

Softrend Inc.
P.O. Box 1462
Charlottesville, VA 22902
(804) 293-5344

Phone Chronicle

452 A program that logs outgoing calls and is intended for small-business users who need to monitor internal telephone use for billing or cost-control. The program sorts, organizes, and presents calls in a report format including telephone number, date, time and length of call, and 3-digit individual employee/account code. *Phone Chronicle* consists of a single board, telephone plug, cable, disk, and manual. The unit has a 100-call on-board memory and uses an external AC adapter to supply power when the computer is not in use. *(List Price: $395)*
Requires: 48K, one disk drive, (printer recommended).

Sycon
2918 Scott Blvd.
Santa Clara, CA 95050
(408) 727-2751

MicroGANTT

453 A project-planning system designed for users who perform time-and-cost analyses. The programs use the Critical Path Method technique to determine task dependencies and project completion dates. When an aspect of a project is modified, the plan is immediately redisplayed to reflect the new schedule. *(List Price: $395 with documentation; manual only, $25)*
Requires: 64K, two disk drives.

Westico
25 Van Zant St.
Norwalk, CT 06855
(203) 853-6880

Time and Expenses Billing System (TEBS)

454 A system designed for individual consultants or business people who charge for services on an hourly basis. *TEBS* keeps records of time billing and expenses by a client, allows additions to billing records at any time, and calculates daily billable time.

The package also allows premium or minimum time changes for individual clients, produces a time and activity sheet to back up all billings, produces billing and expense invoices, and allows editing to any time or expense. With an external printer *TEBS* can produce billing invoices ready to be presented to a client. The program comes on a single-sided (160K) disk. *(List Price: $49.95)*
Requires: 64K, one disk drive.

Joseki Computer Corporation
2604 Artesia Blvd. #5
Redondo Beach, CA 90278
(213) 374-3251

Metamarket Systems

455 A complete marketing package for business users who need to seek new business prospects or track inventory versus demand. A variety of built-in functions manipulate the data base to provide different printout potentials. The data base can be composed of up to five family members or employees and up to 99 status or prospect codes per client. *Metamarket* includes an Emergency Exit function, allowing users to stop the program from being processed and return to the main menu. It comes with a user guide and a subscription to the *Meta-Market* newsletter. *(List Price: $545; manual only, $25)*
Requires: 64K, two disk drives, 80-column monitor, printer.

Metamorphics, Inc.
154 Montgomery Ave.
Bala Cynwyd, PA 19004
(215) 668-9000

Time Accountant

456 A menu-driven program that maintains lists of activity codes and descriptions grouped by client or project. It aids in preparing summary reports of time distribution from edited input. The program is modular and is written in BASIC. It is suitable for consulting firms, architects, CPAs, engineers, and service businesses. *(List Price: $195 including 1 year's upgrades and telephone support; user guide only, $25)*
Requires: 64K, two disk drives, printer.

Software Quality Associates
P.O. Box 50083
Palo Alto, CA 94303
(415) 324-8088, 321-4208

Project Management Tool

457 Business software designed for nontechnical managers, program leaders, and other individuals who need planning and project tracking support. Users enter projects as a series of things to do, give an estimated time for each step to be completed, and the name of the responsible person.

Once the entire project is described, the system uses its Critical Path Method (CPM) to calculate the total time the project should take and which tasks are most critical. The package will also report on individual workloads for those involved in the project. Networking or node numbering is unnecessary. Project items can be edited or deleted, or new tasks added to the project. The program is supplied on a single-sided (160K) disk. *(List Price: $99.95)*
Requires: 64K, 80-column monitor, one disk drive.

Joseki Computer Corporation
2604 Artesia Blvd. #5
Redondo Beach, CA 90278
(213) 374-3251

Personal Secretary

458 A system that keeps track of appointments, billings, and other information using a word-processor-like format. It allows flexibility in the entry of time information, either numerically or by selection from a calendar. The system permits key-word searching for information between dates, and automatic accumulation of job-related invoice data. *(List Price: $55)*
Requires: 64K, one disk drive.

Computer Aided Design
764 24th Ave.
San Francisco, CA 94121
(415) 387-0263

Analysis

459 A decision support tool that handles information for planning, evaluation, and reporting. It performs time series analysis and statistical questionnaire analysis. Possible applications include marketing analysis, sales analysis, and cross-tabulation. Sales managers can compare sales teams and measure the impact of changing a commission plan.

Law firms, negotiators, consultants, and lobbyists can measure the impact of budget cutbacks, policy changes, or union demands on an entire group or segments.

The program talks to *Micro-DSS/Finance*, a financial modeling package from the manufacturer. *(List Price: $495)*
Requires: 128K, two disk drives.

Addison-Wesley Publishing Company
Reading, MA 01867
(617) 944-3700

Pairstat

460 A statistics program for paired data statistics and multiple data-set plotting. Included is a data editor that uses screen editor functions, a plotting routine, and a polynomial regression routine up to the 20th order. *(List Price: $150)*

Requires: 48K, one disk drive, printer.

Davell Custom Software
P.O. Box 4162
Cleveland, TN 37311
(615) 336-3055

HSD Stats

461 A menu-driven statistics package that accepts eight samples of 250 points each. The package offers descriptive statistics, ten data transformations, a frequency distribution and bar graph, percentile ranks and points, one or two variable chi-square, a correlation matrix for up to seven variables, and three t-tests. *(List Price: $99.95)*

Requires: 48K, one disk drive, printer.

Human Systems Dynamics
9249 Reseda Blvd. #107
Northridge, CA 91324
(213) 993-8536

Context MBA

462 A business system that provides electronic spreadsheet, graphics, data base, word processing, and telecommunications functions in one integrated program. *(List Price: $695)*

Requires: 256K, two disk drives, color/graphics adapter.

Context Management Systems
23864 Hawthorne Blvd. #101
Torrance, CA 90505
(213) 378-8277

Agenda

463 A calendar system that keeps track of appointments, planned time, and "reminder" memos. An alarm sounds when a scheduled event time arrives. Any activity can be entered as a monthly or annual occurrence. Items can be posted with two expense codes (which can be expanded or redefined) and amounts. It is written in BASIC, uses random access files, and can handle up to 3,000 records. *(List Price: $65; manual only, $15)*

Requires: 64K, one disk drive, (printer recommended).

TCI Software
6107 W. Mill Rd.
Flourtown, PA 19031
(215) 836-1406

HSD Regress

464 A menu-driven multiple-regression package that accepts up to 25 variables of 300 data points each. Output includes correlation matrix, predicted and residual scores, matrix inverse, semipartial correlations, coefficient weights, and p-values. *(List Price: $99.95)*

Requires: 48K, one disk drive, printer.

Human Systems Dynamics
9249 Reseda Blvd. #107
Northridge, CA 91324
(213) 993-8536

HSD Anova

465 An analysis of variance program suitable for scientific research and business analysis. It analyzes balanced designs from one to eight independent variables and handles designs composed of between-subjects and/or within-subjects factors. *(List Price: $74.95)*

Requires: 48K, one disk drive, (printer optional).

Human Systems Dynamics
9249 Reseda Blvd. #107
Northridge, CA 91324
(213) 993-8536

Metafile

466 A program that uses an English-like command language and contains integration of functions and applications. Facilities include text editing, data base management, electronic mail, forms entry, report writing, menu handling, spreadsheets, and interactive program testing.

Virtual memory, B-tree indexing, data arithmetic, variable length fields, and auto data type conversion are also used. Over 40 applications are available with source code. A demonstration version is available. *(List Price: $1,995 including Baby Blue card)*

Requires: 64K, one disk drive (hard disk also supported).

SENSOR-based Systems
Olmsted Federal Building
Chatfield, MN 55923
(507) 867-4440

Decision Making Matrix

467 A matrix that allows users to input all options involved in making decisions and to rate the characteristics of each option before making a final choice. The program allows "what-if" types of situations so the user can see the effect of making a change in the rating factor of one of the variables. *(List Price: $45; manual only, $10)*

Requires: 48K, one disk drive, (printer optional).

Metamorphics, Inc.
154 Montgomery Ave.
Bala Cynwyd, PA 19004
(215) 668-9000

MicroGANTT™
You control your project.

MicroGANTT is a sophisticated project planning system which uses Critical Path Method (CPM) techniques and PERT to determine task dependencies and project completion dates. The user creates tasks, assigns costs and defines task dependencies. The interactive system immediately redisplays the project plan as data is entered. Projects are displayed as Gantt charts, labor time summaries and financial summaries.

MicroGANTT features: ■ Time scale of days, weeks, months, quarters or years can be varied at any time to present more or less detail. ■ Accommodates unlimited number of tasks in a project plan. ■ Detailed sub-projects can be included as tasks in a project model. ■ Assumptions are easily modified to make "What if?" analyses. ■ Single key-stroke commands page through tasks and calendar of events on display screen. ■ Single key-strokes switch the display from Gantt chart to labor time summary to financial summary. ■ Partial allocation of manpower to tasks. ■ Partial completion of prerequisite tasks. ■ All charts, reports and plans can be printed.

Available for **IBM Personal Computer** and CP/M compatible computers. Software and manual $395. Manual alone $25.

GENERAL BUSINESS

Business Planner

468 A structured planning system that focuses on problems unique to new or expanding businesses. Designed to develop viable business plans, the program groups labor, equipment, and other costs into income-related projects. Projects are combined into models that generate graphics projections and estimated financial statements. By exploring alternate models, critical timing and resource allocation decisions can be evaluated. *(List Price: $295)*

Requires: 128K, two disk drives, printer.

Duosoft Corporation
P.O. Box 1827
Champaign, IL 61820
(217) 356-3111, 356-7542

Professional Time and Billing, Executive Package

469 Two business software packages. *Professional Time and Billing* is a time-allocating program designed for offices that bill clients at an hourly rate. *Executive Package* consists of over 40 forecasting and planning programs for office use. *(List Price: Not available)*

Requires: *Executive Package* 64K, one disk drive; *Professional Time and Billing* not available.

Alpha Software Corp.
3 New England Executive Park #400
Burlington, MA 01803
(617) 229-2924

Survtab Survey Analysis Software

470 A program for entering, editing, and analyzing data from survey questionnaires. It provides capability for frequency tabulations, cross-tabulations, and "Banner" tables, for up to 80 variables. File size is limited by disk capacity only. *(List Price: $180)*

Requires: 64K, one disk drive.

Statistical Computing Consultants
9025 Andromeda Dr.
Burke, VA 22015
(202) 872-4433

Multiple Regression

471 A file-oriented, multiple regression utility program with source code. It outputs correlation matrix, regression coefficients, and R^2, with variables and cases limited only by memory and disk capacity. *(List Price: $30)*

Requires: 64K, one disk drive.

Statistical Computing Consultants
9025 Andromeda Dr.
Burke, VA 22015
(202) 872-4433

Taskmaster

472 A program that keeps track of tasks by starting and completion dates, department, person, project, and subproject, as well as man-hours and percentage completion. It produces reports and Gantt charts on the screen or on a printer. *(List Price: $89.95)*

Requires: 64K, one disk drive.

Quala
1014 Griswold Ave.
San Fernando, CA 91340
(213) 365-9526

Datebook II

473 Schedules appointments or office space for up to 27 different professionals, from lawyers to doctors. *(List Price: $295)*

Requires: 128K, two disk drives, CP/M-86.

Software Digital Marketing
2670 Cherry Ln.
Walnut Creek, CA 94596
(415) 938-2880
Telex: 17-1852

The Organizer

474 An integrated hardware/software package consisting of a single, copyable floppy disk and a clock board. The program provides a range of functions including an editor, a filing system with rolling indexes, an alarm clock, a programmable calculator, and an appointment calendar. It handles many tasks usually assigned to an operating system, such as maintenance of directories, formatting of media, communication with I/O and mass storage devices, and error detection and recovery. The clock board provided with the system maintains the date and time of day. Over 100 alarms can be set to sound tones or display notes at scheduled times. Appointment schedules can also be printed. The manual has both tutorial and reference sections. Keystroke by keystroke instructions are available for inexperienced users while additional examples suggest system capabilities for experienced users. A telephone dialer option is also available. Each system purchase includes a 1-year subscription to *New Tools*, a user newsletter featuring applications of *The Organizer*. *(List Price: $250 including clock board, telephone dialer $75)*

Requires: 64K, two disk drives.

GENERAL BUSINESS

Product Filing System

475 A program for business users who make volume purchases from suppliers and must keep track of product names, suppliers, prices, and other information associated with each product. It comes with *Product Datafile* disk containing hardware and software product listings, reference materials, and accessories. Quarterly updates are available upon request. *(List Price: $75)*

Requires: 64K, one disk drive, 80-column monitor.

Microbase Software, Inc.
P.O. Box 40353
Indianapolis, IN 46240
(317) 877-4304

Time Manager

476 A program by Microsoft that enables users to organize and plan activities more effectively while maintaining accurate and complete records for future reference. *Time Manager* can be used as a daily organizer; a personal calendar; an expense, time, and activity file; a to do list; or a tracking system. By recording events as they happen, the user can later retrieve a summary of those events as well as organize and update data. *(List Price: $100, IBM Product Center prices)*

Requires: 64K, one disk drive (printer and second disk drive recommended).

IBM Corporation
Systems Products Division
P.O. Box 1328
Boca Raton, FL 33432
(800) 447-4700, 322-4400 Illinois
447-0890 Alaska, Hawaii

Statistical Analysis Package

477 A software package that contains 24 statistical programs for regressions, distributions, hypothesis testing, and probability. It may read in data from a user-generated data file, or from a file created by the package's own data file editor. The package generates up to 24 separate reports, and may analyze up to 1,000 data points in a single run. *(List Price: $75 including a 130-page user manual)*

Requires: 64K, one disk drive.

Basic Business Software, Inc.
P.O. Box 26311
Las Vegas, NV 89126
(702) 876-9493

Statpak

478 A statistics library that gives the PC user capabilities similar to those on a time-share statistics library; it is especially useful for professional forecasting and modeling. The program includes data file utilities, mathematical utilities, and computational programs for data analysis. A standard ASCII text file format allows *Statpak* to interface directly with other system software. *(List Price: $495)*

Requires: 64K, one disk drive.

Northwest Analytical, Inc.
1532 S.W. Morrison St.
Portland, OR 97205
(503) 224-7727

C-MBA

479 A program that integrates spreadsheet, graphics, word processing, data base, and communications. Developed specifically for managers with little or no computer experience, it aids in reviewing, analyzing, and creating reports.

Users can tie into a company's computer, a financial information service, an electronic mail network, or other computer systems. The program saves information and lets users retrieve, examine, edit, or print it with a few keystrokes. Users can create business models with the spreadsheet as well as compose, edit, and print reports, letters, and business graphs. Data from the spreadsheets can be incorporated into text. *(List Price: $695)*

Requires: 256K, two disk drives, color/graphics adapter.

Context Management Systems
23864 Hawthorne Blvd.
Torrance, CA 90505
(213) 378-8277
Telex: 181149

Statistics 5.1

480 Twenty-four different statistical programs including permutations and combinations, basic statistics, moments, skewness and Kurtosis, Weibull Distribution, and Logarithmic Normal Distribution. Each program prints calculated statistical calculations onto the screen as well as a one-page report of those calculations.

Data may be entered through the keyboard or through a data file. Data files may be created by a user-generated program or the data file editor program included with the package. All programs are menu-driven and written in BASIC. *(List Price: $75 including disk, source code, and user manual)*

Requires: 64K, one disk drive.

Basic Business Software, Inc.
P.O. Box 26311
Las Vegas, NV 89126
(702) 876-9493

Property Management, Inventory Tracking

481 A property management system fo real estate and an inventory tracking system for small businesses. *(List Price: Not available)*

Requires: Not available.

Worldwide Software Products
2555 Buena Vista Way
Berkeley, CA 92708

Datebook II

482 An on-line appointment book designed for physicians, dentists, lawyers, and other professionals. A menu-styl display allows appointments to be schedule cancelled, modified, moved, or held for rescheduling. Users can search for openings b time of day, day of the week, or day of the yea and display appointments for any person, schedule conferences, or print out the day's appointments. *(List Price: $295)*

Requires: 128K, one disk drive, UCSD Pasca or CP/M-86, 80-column monitor, home and clear functions, (printer optional).

Software Digital Marketing

modifies

GENERAL BUSINESS

MatheMagic

484 A number processing system that allows users to handle a number of mathematical applications. *MatheMagic* is programmable in commonly understood mathematical terms. The program is designed for business, engineering, science, classroom, and home applications.

Features include a menu-driven format, on-line help for every command, a hardware/software configuration segment to allow full use of system peripherals. *(List Price: $89.95)*
Requires: 64K, one disk drive, 80-column monitor.

International Software Marketing, Ltd.
120 E. Washington St. #421
University Bldg.
Syracuse, NY 13202
(315) 474-3400

Key-Pad

485 An RPN, four-register, four-function calculator brought up on the upper left quadrant of the screen. *(List Price: $24.95)*

RGB Designs
175 S. San Antonio Rd. #117
Los Altos, CA 94022
(415) 941-2246

PBM-II

486 A project management system program that includes R&D construction, business planning, 1,000 events on critical path, bar charts, and other reports. *(List Price: $1,195)*
Requires: 64K, one hard disk drive.

AHA, Inc.
P.O. Box 2003
Santa Cruz, CA 95063
(408) 475-7247

Fiscal

487 A personal and/or business system designed for maximum versatility. For the individual, it keeps track of checking accounts, savings accounts, credit card expenses, loan balances, and budget, and summarizes figures for taxes at year-end. It periodically prints summaries to monitor budget. For businesses, it keeps track of checking, travel expenses, loans, equipment depreciation, and general ledger. *(List Price: $174.95)*
Requires: 64K, one disk drive, 80-column monitor.

Control Technology, Inc.
8200 N. Classen Blvd. #101
Oklahoma City, OK 73114
(405) 840-3163

FINANCIAL

The 25th Hour: 25:03—Fixed Asset Manager

488 A program that maintains management information about fixed assets. Each entry is automatically indexed by classification, location, and asset number. It retains description data, asset and serial numbers, and cost and current value information. Features include built-in and user-customized depreciation methods, unlimited classification and location listings, screen prompting, and menu-driven function selection. *(List Price: $119)*
Requires: 64K, one disk drive, 80-column monitor, printer.

SOFTREND inc.
P.O. Box 1462
Charlottesville, VA 22902
(804) 293-5344

Investment Tax Analyst

489 A financial program that estimates federal income taxes before and after investments are made. The user may determine any tax implications up to six years. The models calculate regular, minimum, and alternate minimum taxes; investment tax credits and limitations; investment interest limitations; and other factors. Standard *VisiCalc* models are used. *(List Price: $125)*
Requires: 64K, one disk drive, *VisiCalc*.

Advanced Investment Strategies, Inc.
1007 Massachusetts Ave. N.E.
Washington, DC 20002
Source: TCN 024

Tax Decisions

490 A program that analyzes complex individual income tax strategies and alternatives. Up to five strategies can be analyzed concurrently, and routine calculations are done instantly. *(List Price: $299)*
Requires: 64K, one disk drive, (printer optional).

Eagle Software Publishing, Inc.
110 W. Lancaster Ave.
Wayne, PA 19087
(215) 964-8660

Optimizer

491 A financial planning program that allows users to make quantitative decisions and solve business problems by optimizing an objective subject to some number of constraints. *(List Price: $200; manual only, $15)*
Requires: 48K, one disk drive, CP/M-86 or DOS.

SuperSoft, Inc.
P.O. Box 1628
Champaign, IL 61820
(217) 359-2112, 359-2691
Telex: 270-365

Loancomp

492 Software that computes interest and principal balance for monthly annual, and loan total periods. It computes payments required to amortize a loan, and makes true annual percentage rate computations. It has a separate section that analyzes ordinary annuities with monthly, quarterly, semiannual, and annual payments. *Looncomp* prints out summarizing statements or the user's choice of three types of amortization schedules. *(List Price: $97.95)*
Requires: 64K, one disk drive, printer.

Contract Services Associates
706 S. Euclid
Anaheim, CA 92802
(714) 635-4055

Taxplan

493 A program that computes tax liability for 1981–1985 as well as income averaging and minimum/maximum taxes for any and all years. It changes figures in 30 seconds and prints statements. *(List Price: $249.95)*
Requires: 64K, two disk drives, printer.

Contract Services Associates
706 S. Euclid
Anaheim, CA 92802
(714) 635-4055

The Personal Investor

494 A group of financial programs that includes portfolio manager, electronic news terminal, and a quotation screen. The portfolio manager reports on and analyzes stock purchases, dividends, commissions, and sales transactions. The news terminal can access a variety of major publications; financial reports; and quotations on stocks, options, and bonds. The quotation screen collects stock price and volume quotes from the Dow Jones data base. *(List Price: $145)*
Requires: 128K, one disk drive, (modem, printer optional).

PBL Corporation
P.O. Box 559
Wayzata, MN 55391
(612) 473-3769
Source: TCT-327

Perfect Companion Financial Planner System

495 An automated system for handling client information and producing financial and investment-related reports. It allows for searches and updating, and provides a word processor interface. *(List Price: $995)*
Requires: 128K, two disk drives.

Software Innovations, Inc.
5505 Blair Oaks, Box 74815
Lewisville, TX 75056
(214) 370-8601

Money Decisions

496 Software that adds 34 business and financial aids to a desk-top computer. It has three broad categories: business management, investment, and loans, as well as tutorial and help features that guide operation. The documentation uses color, charts, and illustrations. *(List Price: $199 including diskette and instructions)*
Requires: 64K, one disk drive, (printer optional).

Eagle Software Publishing, Inc.
110 W. Lancaster Ave.
Wayne, PA 19087
(215) 964-8660

Stockchart-II

497 Menu-driven stock analysis and charting with Granville's "On-Balance-Volume" analysis for identifying volume breakout and volume field trend. A price trend analysis is also provided for identifying price breakout.

The program calculates 50 days and 200 days moving averages. It can generate various types of stock charts used by investors. It also includes daily, high, low, and close price chart, volume bar graph, OBV graph, and moving average graph.

A split mode is provided for readjusting stored prices when a stock split occurs. The program uses a screen entry format for manual data entry. A telecommunications capability is provided for retrieving stock prices and volume electronically from CompuServe and the Dow Jones News retrieval system.

Each disk will store up to 265 daily prices and volume for 20 stocks. The data file uses first-in/first-out file structure ensuring the most recent; 265 daily stock prices and volume for each stock maintained. *(List Price: $350)*
Requires: 64K, two disk drives, asynchronous communications adapter, printer.

Micro-Investment Software
9621 Bowie Way
Stockton, CA 95209
(209) 952-8833

Financial Analysis Package

498 Financial analysis software designed to provide executives with a tool for making financial decisions, such as whether to lease or buy, and for analyzing capital budgeting alternatives, loan and lease payment schedules, and the effect of the Economic Recovery Tax Act of 1981 on determining depreciation schedules. *(List Price: $274.95)*
Requires: 64K, one disk drive, printer.

COMMUNICATIONS SOFTWARE $30

DATA COMMUNICATIONS THAT EVERYONE CAN AFFORD!

INTERNATIONAL SOFTWARE ALLIANCE HAS AN ULTERIOR MOTIVE IN PROVIDING DATA COMMUNICATIONS SOFTWARE TO END USERS FOR $30. **E-LYNC** AT $30 WILL ALLOW YOU TO CONVERT YOUR CP/M PROGRAMS TO IBM PC DOS. WE SINCERELY BELIEVE THAT YOU'LL REMEMBER US WHEN YOU'RE READY TO MARKET YOUR SOFTWARE.

E-LYNC is a powerful data communications program that can be used to transfer data or program files between computers or to connect to time-sharing systems. **E-LYNC** allows you to transfer any and all types of files from a CP/M system to your IBM PC DOS. **E-LYNC** will support baud rates up to 9600 on a cable hook up.

[LYNC] MODE: Can transfer data or program files between your IBM PC and either another IBM PC or a CP/M system running **E-LYNC** or **LYNC.** When transferring files **E-LYNC** uses field proven error detection and re-try protocol, sure to get your files across noisy phone lines or temporary disconnections. While in **LYNC** mode, both computer operators are in an immediate message mode and may type messages back and forth.

[TERM]INAL MODE: Terminal mode will allow you to connect your computer with time-sharing systems such as Source, Micronet, or CompuServe.

LICENSING: **E-LYNC** is licensed on a per user basis. If you intend to use **E-LYNC** to communicate with another person, they must also purchase **E-LYNC. E-LYNC** for the IMB PC is written in 8088 Assembly Language. If you intend to communicate with a CP/M system you will also need the CP/M version of **E-LYNC.** ISA has both versions of **E-LYNC** available.

TERMS: Money Order, Check, C.O.D., MC or VISA. First Class Postage included. UPS Blue add $2. C.O.D. add $3. California Res. add 6%. Overseas add $5.

DISK FORMATS: 8" Standard, 5" Vector Graphic, IBM PC DOS, TRS 80 Mod 2 w/CP/M, North Star, Cromenco, Superbrain 3.0 DOS or later.

PHONE ORDER DESK: (805) 966-3077
10am to 2pm PST Monday-Friday.

FINANCIAL

PLAN80

499 A program that provides financial modeling capability for planning and analysis, such as profit planning, market simulation, cost center budgeting, and energy accounting. *(List Price: $495)*
Requires: 128K, one disk drive, CP/M-86 or DOS, (printer optional).

Business Planning Systems, Inc.
2 N. State St.
Dover, DE 19901
(302) 674-5500

Market Illustrator

500 A program that plots, smooths, and displays ratios and differences for the nontechnical investor. Program features include a split screen for comparing data with program-generated indicators. Also included is a weekly historical data base made up of over 130 statistics compiled from *Barron's*. The program includes menu-driven operations and graphics. *(List Price: $195)*
Requires: 64K, one disk drive, color/graphics adapter.

N-Squared Computing
P.O. Box 264
Silverton, OR 97381
(503) 873-5906

Stock Analyzer

501 A program that provides analysis of individual stocks through high-low-close-volume displays with linear or semilog autoscaling, price-volume indicators, relative strengths, momentums, smoothing, averaging, and point and figure charting. It includes menu-driven operations and graphics. *(List Price: $295)*
Requires: 64K, one disk drive, color/graphics adapter.

N-Squared Computing
P.O. Box 264
Silverton, OR 97381
(503) 873-5906

Doughflo

502 A multipurpose financial planning and cash flow analysis system consisting of several menu-driven programs that interact to produce reports and summaries on tax preparation, budget planning, and income analysis. *(List Price: $79.95)*
Requires: 64K, one disk drive.

Alphanetics
P.O. Box 597
Forestville, CA 95436
(707) 887-7237

Desktop/PLAN

503 A program that uses a series of menus to guide the user through a financial modeling session. The user creates a model, beginning with row and column titles, inputting initial values, and deciding on row and column formulas for later calculation. The computed-values file can be printed out with headers, footers, pagination, and other formatting aids. The program includes a high-resolution graphing feature. The Desktop/PLAN is part of VisiSeries, a set of integrated programs by VisiCorp. *(List Price: $300)*
Requires: 64K, one disk drive, color/graphics adapter.

VisiCorp
2895 Zanker Rd.
San Jose, CA 95134
(408) 946-9000

Business Pac I

504 An assortment of general home and business programs designed to solve a variety of problems from interest computations to figuring stock options. *(List Price: $39.95)*
Requires: 64K, one disk drive.

Alphanetics
P.O. Box 597
Forestville, CA 95436
(707) 887-7237

Market Analyzer

505 Software that provides the technical analyst with the capability of creating and comparing complex indicators. Keystroke functions include exponential smoothing, arithmetic averaging, ratios, sums, differences, transforms, detrends, and time-lag analyses. It generates trading index and advance-decline line indicators. The program incorporates menu-driven operations and graphics. *(List Price: $295)*
Requires: 64K, one disk drive, color/graphics adapter.

N-Squared Computing
P.O. Box 264
Silverton, OR 97381
(503) 873-5906

Micro-DSS/Finance

506 A comprehensive menu-driven financial modeling package that features "what-if" calculations, 32,000-cell built-in financial functions, command files, editor, color/graphics capabilities, and report generation. Date files can be plotted with optional *GraphPower*. A related program, *Consultant's Edge*, creates customized menus for the *Micro-DSS/Finance* package. *(List Price: $1,500)*
Requires: 128K, two disk drives.

Ferox Microsystems
1701 N. Ft. Myer Dr.
Arlington, VA 22209
(703) 841-0800

Compu-Loan

507 An amortization system that analyzes regular or irregular loans while considering tax consequences of borrowing. It aids in financial decision-making and is fully documented. *(List Price: $50)*
Requires: 32K, one disk drive, (printer optional).

Benchmark Creations
P.O. Box 31861
Raleigh, NC 27622

The Financier

508 A financial record-keeping system designed for people with no computer or accounting background. The program uses data base sorting and indexing techniques for storing information and producing reports on bank account activities, budgets, investments, taxes, personal property, and insurance. The program includes automatic input-error checks and updates on relevant financial summaries. *(List Price: $180)*
Requires: 64K, two disk drives, 80-column monitor.

Financier, Inc.
11 Flanders Rd.
Westboro, MA 01581
(617) 366-0950

Plus

509 Accounting packages available for general ledger, accounts payable, accounts receivable, fixed assets, payroll, and *Easytrak*, an all-purpose tracking system. All programs are menu-driven and come with manuals that include screen explanations, installation guides, glossaries, and an accounting theory refresher. Support features include a toll-free hot-line newsletter, and updated technical bulletins. *(List Price: $350 each, Easytrak $125)*
Requires: 48K, two double-sided disk drives.

Plus Computer Technology, Inc.
6900 N. Austin Ave.
Chicago, IL 60648
(312) 647-0988

High Yield

510 A system that manages mutual and money market funds. It enables users to review portfolio, and it stores transaction data, including mutual funds, IRA, and Keough plans. *(List Price: $75)*
Requires: 64K, two disk drives.

Hourglass Systems
P.O. Box 312
Glen Ellyn, IL 60137
(312) 690-1855

Invest

511 A portfolio management and reporting system specifically designed for bonds, certificates, or other securities. It can be used for home investments. Various menus allow users to enter purchases, repurchases, interest collection, and sales. Each portfolio can contain up to 600 securities. Daily accrual and compounding are possible. Detail transaction history is kept for historical tracking and analysis. *(List Price: $70; documentation only, $10)*

Requires: 64K, two disk drives.

Miracle Computing
313 Clayton Ct.
Lawrence, KS 66044
(913) 843-5863

The 25th Hour: 25:04—Financial Calculator/Analyzer

512 A program that calculates present and future values of investments, loans, and annuities. It performs bond calculations, prorates amounts over dated periods, and handles simple interest problems. Its features include displaying and printing amortization schedules, performing optional balloon calculations, and "what-if" data manipulation on any calculation. Designed for nontechnical users, the system includes screen prompting and menu-driven function selection. *(List Price: $89)*

Requires: 64K, one disk drive, printer, 80-column monitor.

SOFTREND inc.
P.O. Box 1462
Charlottesville, VA 22902
(804) 293-5344

Budget/Tax Deductions Record

513 A record keeping program to keep track of budgets and tax-deductible expenditures. Deductions can be listed and categorized. *(List Price: $39.95)*

Requires: 64K, one disk drive.

International Computers
13048 Olive Blvd.
St. Louis, MO 63141
(314) 878-8838

Market Time

514 A system that analyzes the stock market and plots moving averages on monitor or printer. It includes an expandable data base of NYSE items. Users can personalize statistics. *(List Price: $75)*

Requires: 64K, two disk drives.

Hourglass Systems
P.O. Box 312
Glen Ellyn, IL 60137
(312) 690-1855

Stock Options Trading

515 A financial program that analyzes put and call options, profit potential of spread and hedge strategies, and covered or uncovered writing. It also identifies undervalued options. *(List Price: $49)*

Requires: 48K, one disk drive.

Finsoft
16-06 Quail Ridge Dr.
Plainsboro, NJ 08536

Practical Business, Common Financial/Statistical, Personal/Home

516 Three software packages. *Practical Business Programs* calculates business and cost projections and includes project planning capabilities. *Common Financial/Statistical/Decision Making/Projections and Forecasting Programs* is a statistical and forecasting package, and *Personal/Home Programs* features interest and forecasting capabilities coupled with investments and bonds costs calculations. *(List Price:* Practical Business Programs *$70,* Common Financial/Statistical Programs *$75,* Personal/Home Programs *$50)*

Requires: Not available.

Easy Data
812 E. Cliff
Euless, TX 76039
(817) 283-1915

Dow Jones Toolkit

517 A stocks monitoring program that automatically interrogates the Dow Jones data base for price news and historical data. The data is arranged into *VisiCalc* readable form. A tutorial section explains how to do some calculations, compute the value of a portfolio, and use the "what if" capability of *VisiCalc*. *(List Price: $150; manual only, $25)*

Requires: 64K, one disk drive, *VisiCalc*.

Automated Office Systems
602 Lookout Dr. #213
Richardson, TX 75080
(214) 669-9966

Municipal Finance

518 A series of seven programs that perform the analysis necessary to structure municipal bond issues. They are designed for investment bankers and financial advisors who prefer on-site microcomputer analysis to off-site time-sharing with large computers. *(List Price: $10,000)*

Requires: 128K, two disk drives, serial interface, printer.

B.A. Nicholson & Company
271 Madison Ave. #1007
New York, NY 10016
(212) 889-7535

Micro-Tax

519 An income-tax preparation package designed to meet the needs of, and based on the design specifications of, registered agents, certified public accountants, and tax attorneys. The package offers three levels: individual, professional, and partnership/corporate. Annual updates are available. *(List Price: Individual $195, professional and partnership/corp $1,000 each)*

Requires: 64K, two disk drives, printer.

Microcomputer Taxsystems, Inc.

Loan Amortization

520 A finance program that allows users to enter three of four variables needed to compute loan amortization and solve the fourth variable. The four variables are amount of loan, length of loan, interest rate, and monthly payment. The program permits any number of periods in a year and provides on a period-by-period basis the payment, interest, principal reduction, and total principal remaining.

The program computes the total payments made and the cost of the loan. This output can be directed to the screen or a printer. The program can be used with the manufacturer's other financial software programs. *(List Price: $100)*

Requires: 64K, one disk drive, (printer optional).

Design Data Systems Corporation
5270 N. Park Place N.E.
Cedar Rapids, IA 52402
(319) 373-1571

Stockplot

521 A program that provides storage of high, low, and close stock market quotations or commodity quotations and printing of a bar chart. The price axis is scaled and dates are printed on the time axis. A moving average is calculated and plotted simultaneously with the bar chart to yield buy and sell signals. An option provides point and figure chart plotting of the same data, and the point reversal parameter can be chosen arbitrarily. Several years of data can be stored on one disk. *(List Price: $99)*

Requires: 64K, two disk drives, printer.

Cook Compusystems
309 Lincolnshire
Irving, TX 75061
(214) 253-6979

ACCOUNTING AND INVENTORY

The Software Fitness Program

522 A package of seven comprehensive, interactive financial management programs. *Accounts Payable* allows users to measure the impact of their company's cost distribution and cash flow requirements. *Accounts Receivable* produces invoices and statements as well as detailed aging reports. *General Ledger* summarizes accounting data to show users their money flow.

The *Inventory System* aids users in controlling their purchasing and sales decisions with access to current balances and comprehensive valuation statistics. *Sales Order Processing* moves orders automatically from entry through packing, verification, and invoicing. It offers users a complete range of order processing including returned goods and back orders. *Payroll* helps users meet government reporting requirements in paying hourly and salaried employees. It processes checks and allows labor expense distribution and reporting by department, job, and phase. *Job Cost* automatically records costs and revenues as users process other accounting data. *(List Price: Not available)*

Requires: 64K, one disk drive, business BASIC interpreter, DOS or CP/M-86.

Open Systems, Inc.
430 Oak Grove #409
Minneapolis, MN 55403
(612) 870-3515
TWX: 910-576-1743

ProCalc

523 *ProCalc* is a financial planning and report generating program that allows up to 50,000 entries in a model. Using multiple windows and files, *ProCalc* can directly access over 100,000 entries. Text entries are not limited to column width. The system allows access to more than one model simultaneously, and up to six screen "splits" may be displayed on the screen at one time. Features include business function calculations such as present and future values, amortization payments, and depreciation. The program interfaces with SPI's *LogiQuest*, *Asset*, and *Word Processing* packages. Included in the system are a text editor, file manager, and disk formatting utility.

The system comes in two versions: with the UCSDp-System or a turnkey version that comes without it. *(List Price: $350; manual only, $35)*

Requires: 64K, one disk drive.

Software Products International
10343 Roselle St. #A
San Diego, CA 92121
(714) 450-1526

Inventory Control

524 A program by Peachtree Software that is designed to help a small business improve merchandise control and reduce inventory investment, thereby improving customer service. Records contain vendor and cost data, three pricing levels for sales, reorder levels, and year-to-date and period-to-date sales amounts and quantities. The program may be customized to suit a company's needs. *(List Price: $595, IBM Product Center prices)*

Requires: 64K, two disk drives, 80-column monitor, printer.

IBM Corporation
Systems Products Division
P.O. Box 1328
Boca Raton, FL 33432
(800) 447-4700, 322-4400 Illinois
447-0890 Alaska, Hawaii

General Ledger

525 Software that allows up to 99 departmental income and expense statements. The user has a 4-, 5-, or 6-digit account number and he or she provides the account description. The program can handle a maximum of 200 customers and 1,400 transactions, and interfaces with the manufacturer's other applications programs. *(List Price: $485)*

Requires: 64K, two disk drives, 80-column monitor, 132-column printer.

Computer Systems Design, Inc.
P.O. Box 735
Yakima, WA 98907
(509) 575-0320

Asset

526 An integrated series of accounting programs that function separately or as an entire accounting system. The series includes General Ledger, Accounts Receivable, Accounts Payable, and Inventory Control packages. All programs in the series feature expandable and contractable files and function on floppy or hard disk systems. The entire *Asset* series interfaces with SPI's *LogiQuest*, *ProCalc*, and *LogiCalc* programs.

The programs come in two versions. SPI will include the turnkey UCSDp-System operating system if required. The system includes the UCSDp-system, a text editor, file manager, and disk format. *(List Price: Asset $1,290; manuals only $50; $390 each)*

Requires: 64K, two disk drives.

Software Products International
10343 Roselle St. #A
San Diego, CA 92121
(714) 450-1526

Job Cost

527 A software package that handles budget quantities and amounts as well as month and job-to-date quantities. Users can record this system manually. All classification codes and descriptions are under user control. It handles up to 50 classes and 35 jobs. The program is designed for novice users and can interface with the manufacturer's *General Ledger* program. *(List Price: $485)*

Requires: 64K, two disk drives, 80-column monitor, 132-column printer.

Computer Systems Design, Inc.
P.O. Box 735
Yakima, WA 98907
(509) 575-0320

TCS Accounting Software

528 An accounting package that includes general ledger, accounts receivable, accounts payable, and payroll. The program generates reports. Sample data, manuals, and a year's subscription to *TCS Debits and Credits*, a quarterly newsletter, are included. *(List Price: $439)*

Requires: 64K, two disk drives.

Rocky Mountain Software Systems
P.O. Box 3282
Walnut Creek, CA 94598
(415) 625-1592

Payroll System

529 A program that handles a wide range of business situations, from reimbursing employees for out-of-pocket expenses and paying bonuses, to keeping track of vacation time, loans, advances, and repayments.

The program is also designed for quick reprogramming. Custom state and local tax calculation programming is included. Users have complete access to the tax tables, and the original commented source code is included.

Input data can be verified and edited, if necessary, before being sent to the system. A double-keying verification procedure is provided for elimination of data entry errors. A self-backup feature keeps a complete record of the details of each pay period.

Other program features include up to ten department names per disk, up to five automatic fixed deductions with a different amount for each department, and up to five special pay amounts or deductions for each employee each period.

The capacity of the system is 150 employees per 100K of disk storage space, with free space for a copy of the master file on the disk if automatic backup is used. *(List Price: $400)*

Requires: 48K, two disk drives.

Datasmith
P.O. Box 8036
Shawnee Mission, KS 66208
(913) 381-9118

General Accounting

530 Software designed for small businesses and professionals. Users make journal entries into the system and the program automatically posts ledgers, prepares financial statements, and closes the books. *(List Price: $425, IBM Product Center prices)*

Requires: Not available.

IBM Corporation
Systems Products Division
P.O. Box 1328
Boca Raton, FL 33432
(800) 447-4700, 322-4400 Illinois
447-0890 Alaska, Hawaii

Discounted Cash Flow

531 A program that solves over 40 business and financial analysis problems, including yield to maturity and true rate of return, with adjustments for variable income/expenditures in multiple time periods. *(List Price: $49 including documentation)*

Requires: 64K, two disk drives, DOS or CP/M-86.

Microsystems
7201 87th Ave. SE
Mercer Island, WA 98040
(206) 232-1513

General Ledger

532 A menu-driven accounting program that generates a flexible chart of accounts. It posts profit and loss automatically, and keeps a cash account in balance. It generates budget comparison reports, previous year comparison reports, and income and expense reports. Graphics capabilities are available. *(List Price: $349)*

Requires: 48K, one disk drive, printer.

International Software Alliance
1835 Mission Ridge Rd.
Santa Barbara, CA 93103
(805) 966-3077

Infotory

533 A menu-driven inventory management system with a data management feature that offers users the ability to create custom reports. Month-to-date and year-to-date sales and cost of sales information is summarized by departments, product groups, or other categories established by the user. Inquiries displaying the status of an item can be made while running other programs. Documentation includes screen illustrations for situations encountered when using the system. *(List Price: $425)*

Requires: 64K, two disk drives, 132-column parallel printer.

S.S.R. Corp.
1600 Lyell Ave.
Rochester, NY 14606
(716) 254-3200

HAL1000 Business Software

534 Five separate business modules: *1001 General Ledger, 1002 Accounts Receivable, 1003 Accounts Payable, 1004 Inventory, 1005 General Business Software.*

General Ledger records business transactions and generates income statements and balance sheets. The program can provide monthly, quarterly, and yearly summary reports. *Accounts Receivable* provides detail and summary reports to interface with *General Ledger*. *Accounts Payable* prints checks from the bank. *Inventory* records and reports either perpetual or periodic inventories. *General Business Software* provides four depreciation schedules, amortization tables, internal rate of return, present and future values, ratio analysis, lease/buy decision, and budgeting. All programs may be customized for the user's specific applications. *(List Price:* Inventory *$695, all others $495 each)*

Requires: 48K, one disk drive.

Keller Software
1825 Westcliff Dr.
Newport Beach, CA 92660
(714) 975-4943

Versareceivables

535 A menu-driven accounts receivable system that prints statements, invoices, and summary reports. Users may choose to invoice all customers, print customer mailing labels, generate monthly or periodic statements and invoices, allow for partial payments on open invoices, print out all commonly used accounts receivable reports, and keep a history of accounts, both current and aged. The program interfaces with other programs by the manufacturer. *(List Price: $99.95)*

Requires: 48K, two disk drives, DOS or CP/M-86.

H&E Computronics Inc.
50 N. Pascack Rd.
Spring Valley, NY 10977
(800) 431-2818, (914) 425-1535

Solomon Series Software

536 An integrated accounting package built around a single data base (MDBS). *Solomon I* includes general ledger, accounts payable, accounts receivable, payroll, fixed assets, order entry invoicing, cash receipts/disbursements, and name and address maintenance; *Solomon II* adds job costing; *Solomon III* adds general accounting and inventory control. *(List Price:* Solomon I *$2,595,* Solomon II *$3,495,* Solomon III *not available)*

Requires: 64K, Baby Blue, one hard disk drive.

TLB, Inc.
1120 Commerce Pkwy.

Accounts Receivable

539 An open-item financial package that ages invoices through 120 days and prints statements and labels. It can handle a maximum of 200 customers and 1,400 transactions, and is designed for novice users. It interfaces with the manufacturer's *General Ledger* program. *(List Price: $485, demonstration disk and documentation $75)*

Requires: 64K, two disk drives, 80-column monitor, 132-column printer.

Computer Systems Design, Inc.
P.O. Box 735
Yakima, WA 98907
(509) 575-0320

ACCOUNTING AND INVENTORY

Count/Up

540 A general ledger, accounts payable, and accounts receivable accounting system. The system consists of 24 programs and five menus, permitting 53 individual report records and up to 750 account numbers. It uses hash-coded index files and allows the user complete freedom in designing ledgers. *(List Price: $1,700; general ledger only, $550; accounts payable and accounts receivable $1,450)*

Requires: 64K, two disk drives.

Squire, Buresh Associates, Inc.
P.O. Box 2029
Worcester, MA 01613
(617) 832-6430

Inventory Control

541 An application package by BPI Systems, Inc. that provides quick access to the status of any inventory item, including list prices and quantity on hand, enabling sales orders to be checked and changed as they are entered. Customer invoices can be created and stock levels adjusted automatically. The program can alert users to items that must be reordered, produce the appropriate purchase orders, and log back orders and merchandise received. *(List Price: $425, IBM Product Center prices)*

Requires: 64K, two disk drives, printer.

IBM Corporation
Systems Products Division
P.O. Box 1328
Boca Raton, FL 33432
(800) 447-4700, 322-4400 Illinois
447-0890 Alaska, Hawaii

Star System 1

542 An integrated accounting system that consists of four modules: General Ledger, Accounts Receivable, Accounts Payable, and Payroll. All modules feature easy to use menu-driven programs. General Ledger with cash receipts and disbursements has check writing capability. It can stand alone or integrate with other Star accounting modules. Accounts Receivable offers an order entry function. Accounts Payable produces purchase orders. Payroll maintains all federal, state, and local tax tables, and produces a tax deposit history. *(List Price: Complete system $1,250, each module $400)*

Requires: 48K, two disk drives, 80-column monitor, 132-column printer.

Star Computer Systems
18051 Crenshaw Blvd.
Torrance, CA 90504
(213) 538-2511

Order Entry

543 A program that performs order entry/point of sale purchasing with reorder point and receiving. It includes 1,000 inventory items and 100 vendors and listings. *(List Price: $349)*

Requires: 48K, one disk drive, printer.

DP Software Associates
8459 N.E. 3rd St.
Coral Springs, FL 33065
(305) 753-5893

Small-Business Accounting

544 An accounting program aimed at small businesses that is based on Dome Bookkeeping Record #612. The program handles income, expenses, and payroll. *(List Price: $59.95; documentation only, $15)*

Requires: 64K, one disk drive.

Howe Software
14 Lexington Rd.
New City, NY 10956
(914) 634-1821

Master Ledger

545 A menu-driven general ledger system with three-level password security and a user-defined chart of accounts. These integrated programs are parameter driven and can be tailored by the user for custom financial statements. Accounting transactions are input via balanced batches and are corrected and posted at the user's preference. Reporting features include standard PNL reports, chart of accounts, general ledger and subledger listings, payable and receivable agings, and amortizations. For users wanting to run several accounting tasks and/or to charge their clients for this use, the program logs actual machine time and total pages printed. *(List Price: $600 Canadian)*

Requires: 64K, two disk drives, printer.

Micro Masters Software Ltd.
P.O. Box 513
Edmonton, Alberta
Canada T5J 2K1
(403) 922-3088

Accounts Receivable

546 An application package by BPI Systems, Inc. that helps manage a company's cash flow by tracking current and past-due receivables. The program provides the information necessary for accurate credit decisions, prepares monthly customer statements and past-due notices, maintains detailed customer files, and produces rapid analyses of customer account status. *(List Price: $425, IBM Product Center prices)*

Requires: 64K, two disk drives, printer.

IBM Corporation
Systems Products Division
P.O. Box 1328
Boca Raton, FL 33432
(800) 447-4700, 322-4400 Illinois
447-0890 Alaska, Hawaii

Versainventory

547 A menu-driven inventory control system that keeps track of all information related to inventory, prints all necessary reports, and gives users instant access to items that directly affect sales. Users can update the program through menu-driven processes. *Versainventory* interfaces with the manufacturer's other products. *(List Price: $99.95)*

Requires: 48K, two disk drives, DOS or CP/M-86.

H&E Computronics Inc.
50 N. Pascack Rd.
Spring Valley, NY 10977
(800) 431-2818, (914) 425-1535

Accounts Payable

548 A simplified accounts payable system for home or small business use. It allows for up to 99 vendors to be entered, and pays only one invoice per vendor per check. The system includes pre-check and post-check registers and prints checks on the delux check format #1002. *(List Price: $125)*

Requires: 64K, one disk drive, printer.

Solution Software Systems
3930 Whispering Trails
Hoffman Estates, IL 60195
(312) 893-5111

Star System 5

549 A legal time-keeping and billing program that tracks all payments, fees,costs, aged accounts, and unbilled time. It prepares bills, reports on attorney productivity, produces prebilling ledgers, and post-billing recap reports. It handles up to 1,500 case matters, 99 attorneys, five billing rates, and provides for a flexible definition of up to 250 work codes. *System 5* will integrate with *Star System 1* General Ledger. *(List Price: $950)*

Requires: 48K, two disk drives, 80-column monitor, 132-column printer.

Star Computer Systems
18051 Crenshaw Blvd.
Torrance, CA 90504
(213) 538-2511

The Boss

550 A financial accounting package that includes General Ledger, Accounts Receivable, and Accounts Payable modules. XEDEX will provide user support via a technical hot line service. *(List Price: $2,495, with Baby Blue $3,095)*

Requires: 64K, Baby Blue, one hard disk drive.

ACCOUNTING AND INVENTORY

PR-1

551 A payroll system that enables a company to prepare payroll for hourly, salaried, and commissioned employees while accumulating information for tax reporting. It generates monthly, quarterly, and annual returns to be filed with local, state, and federal governments. It prepares employee W-2 forms and maintains up-to-date personal and payroll Federal withholding tables, FICA tables, and precomputed or user-generated withholding tables for any state or locality. *(List Price: $248)*

Requires: 64K, two disk drives, 132-column printer.

Micro Architect Inc.
96 Dothan St.
Arlington, MA 02174
(617) 643-4713

General Ledger, Accounts Receivable

552 The menu-driven *General Ledger* program includes departments; monthly, quarterly, or year-to-date comparisons of expense items to month-by-month budget; repeating transactions; and monthly audit trail. The menu-driven *Accounts Receivable* interfaces with the *General Ledger* and prints aging reports and statements. Both programs include videotaped and written instructions. *(List Price: $500 each)*

Requires: 64K, two disk drives, printer.

Fogle Computing Corporation
357 E. Blackstock Rd.
P.O. Box 5166
Spartanburg, SC 29304
(803) 574-4950

Versapayroll

553 A menu-driven payroll system that keeps track of all government-required payroll information. When given employee names, the program does payroll calculations and displays totals on the screen. The user may accept totals, print/not print out checks, and post/not post totals to the *Versaledger* system.

Users have the options of overriding payroll deductions and receiving summaries of any employee's year-to-date payroll totals. The program interfaces with the manufacturer's other programs. *(List Price: $99.95)*

Requires: 48K, two disk drives, DOS or CP/M-86.

H&E Computronics Inc.
50 N. Pascack Rd.
Spring Valley, NY 10977
(800) 431-2818, (914) 425-1535

Big Four

554 A standard accounting package that includes general ledger, accounts receivable, accounts payable, and payroll systems. The program supports hard and floppy disks. It includes sample data for training and demonstration purposes, self-teaching manuals, automatic prompts for creating disk backups, and master file recovery programs for correcting hardware or operator errors. *(Available to dealers only; price determined by dealer's installation, training, and support)*

Requires: 64K, two disk drives, 132-column printer.

TCS Software
3209 Fondren Rd.
Houston, TX 77063
(713) 977-7505

Bonus Accounting

555 A general ledger accounting package that allows users to set up ledger accounts for home or business. Features include balance sheet and financial statements showing current balance, month-to-date, and year-to-date totals for each ledger account. Year-end totals for tax-deductible expenses and income can be calculated, and a transaction register shows posting details. A data-entry screen allows users to enter check registration information. *(List Price: $150)*

Requires: 64K, one disk drive, 80-column printer.

The Programming Shop
1164 Umbarger Rd.
San Jose, CA 95121
(408) 226-2157

Arnie

556 An accounts receivable system that handles sales and cash receipts, prints statements to customers, and furnishes reports for management of accounts receivable and cash flow. The program is designed for secretaries or bookkeepers with no knowledge of computers and limited knowledge of accounting.

The program can handle up to 163 customers, 652 invoices, and 1,280 transactions using the 40-track, double-density disk format. When users have fewer transactions, space can be used for more customers or invoices per customer. Features include operator-oriented programs and automatic posting to general ledger when the manufacturer's general ledger program is used. No programming knowledge is required for installation. *(List Price: $395 including program disks and instructions)*

Requires: 48K, two disk drives, parallel printer adapter, printer for 8½- by 11-inch paper.

Information Automation Corporation
2900 Turtle Creek Plaza #500
Dallas, TX 75219
(214) 559-2710

Glenda

557 A set of programs that produces financial statements and supporting information for businessmen and clerical workers with little knowledge of computers. It is based on transactions (checks, deposits, cash receipts, sales, and other journal entries) entered into the PC.

Updating of account balances and financial statements can be printed after entering journal entries. Users can run intermediate financial statements any time during the month. Users assign their own account numbers and arrange the captions and subtotals on the financial statements to meet their needs or match present statements.

Self-prompting programs guide users with detailed, nontechnical questions and statements. Once a task is completed, the program asks users if they are finished. Users are guided through the program again or returned to the system menu to select another task. *(List Price: $395 including program disk and instructions)*

Requires: 48K, two disk drives, parallel printer adapter, printer with 8½- by 11-inch paper.

Information Automation Corporation
2900 Turtle Creek Plaza #500
Dallas, TX 75219
(214) 559-2710

Payroll (Broderbund)

558 A payroll program that has a 300-employee, 15-division capacity, with five taxable categories and 30 deduction types. It computes federal and state income taxes for all 50 states through built-in tax formulas. Low-cost updates are available. It prints checks, check register, W-2 forms, and quarterly and summary reports. Although it is written in UCSD Pascal, it does not require a UCSD Pascal system. A hard disk is compatible. *(List Price: $395)*

Requires: 64K, two disk drives, printer.

Broderbund Software, Inc.
Business Software Division
1938 Fourth St.
San Rafael, CA 94901
(415) 456-6424

TCS Accounting Software

559 A four-module integrated accounting system that includes general ledger, accounts receivable (includes complete invoicing), accounts payable, and payroll (includes multiple statements). *(List Price: $439 including sample data and manual, individual modules $169)*

Requires: 64K, two disk drives, 132-column printer.

Rocky Mountain Software Systems
1280C Newell Ave. #147
Walnut Creek, CA 94596
(415) 625-1592

ACCOUNTING AND INVENTORY

ColorBIZ Inventory Application Software

560 A business application program that features data base retrieval capability; a browse feature for selective scanning; password security that restricts access to sensitive data; error checking; single-key responses; automatically identified reorder information; and user definable soft keys. On-line directions are also included. Defined reports include stock status, on order/order recommendation, master parts listing, inventory analysis, and physical inventory. Usage and margin analysis are provided by month and year to date. *(List Price: $498)*
Requires: 64K, two disk drives, printer.

ColorCorp
208 N. Berkshire
Bloomfield Hills, MI 48013
(800) 521-0793, (313) 335-2255

General Ledger with Payables

561 Software that has a 2,000 ledger account capacity with unlimited journal entries, 200 open payable accounts, 1,900 open invoices, 1,000 checks per disk, values to $9,999,999.99, and user-definable account numbers up to 10 digits. It prints checks, journal audit trails, balance sheets, income statements with budget, history, month and year-to-date percentage and dollar change, department reports, and check register. Though written in UCSD Pascal, a UCSD Pascal system is not required. A hard disk is compatible. *(List Price: $495)*
Requires: 64K, two disk drives, printer.

Broderbund Software, Inc.
Business Software Division
1938 Fourth St.
San Rafael, CA 94901
(415) 456-6424

Personal Computer/Personal Finance Program

562 A program that manipulates, integrates, and files data from checkbooks, bank statements, credit card reports, and other financial information into an accounting system. The information may then be displayed as reports on budget performance, expense and income histories, and cash flow. Color bar graphs may be displayed. *(List Price: $95)*
Requires: 64K, one disk drive, printer, 80-column monitor.

Best Programs
P.O. Box 2370
Alexandria, VA 22301
(703) 549-3663

Payroll (Applied Software)

563 A program that can handle 200 employees in 99 departments, working in multiple states, under five different pay rates. It also handles vacation, sick, and nontaxable pay rates. Included are six deduction fields and federal and state unemployment tax. *(List Price: $495, manual and demonstration disk $50)*
Requires: 64K, (other requirements not available).

Applied Software Technology
223 Hunnewell St.
Needham, MA 02194
(617) 444-5551

Micro Accounting Series, Bill of Materials

564 Six software packages. The "Micro" accounting software series includes *MicroLedger*, a general ledger package; *MicroPac*, an accounts payable package; *MicroRec*, an accounts receivable package; *MicroInv*, an inventory control package; and *MicroPers*, a payroll and personnel package. *Bill of Materials* is an expandable inventory system that holds accounts filed by item. All programs are written in BASICA. A modifiable source code is provided with every package. One-year warranty. *(List Price:* Micro-series *$140 each;* Bill of Materials *$350)*
Requires: 64K, two disk drives.

COMPUMAX Associates, Inc.
P.O. Box 7239
Menlo Park, CA 94025
(415) 854-6700

Inventory Control

565 An inventory control system that includes 1000+ line items, total and department list, reorder, backorder, YTD dollar amount and number, PTD dollar amount and number, margin, percent of departmental sales, last sale date, and last received date. *(List Price: $295)*
Requires: Not available.

Organized Bits
P.O. Box 303
Savannah, MO 64485
(816) 324-4314

Payroll Master

566 A payroll management program that can process up to 200 employees. It supports six user-defined deduction fields and gives definable pay rates for each employee. Multistate and mixed-department labor analysis are also offered. A Tecmar hard disk version is also available. *(List Price: $495)*
Requires: 64K, two disk drives, printer.

ASTEC
223 Hunnewell St.
Needham, MA 02194
(617) 444-5551

Data Manager, General Ledger

567 *Data Manager* allows users to define, enter, update, sort, select, and print reports from a data base of their own design. *General Ledger* aids in keeping account books and features data entry and error correction, trial balance, fast post, and various comprehensive reports. Automatic error detection helps keep books in balance. The program writes checks and makes journal entries in one operation. Both programs work with the manufacturer's *Payroll* program. *(List Price:* Data Manager *$450,* General Ledger *$300)*
Requires: 64K, two disk drives.

DATASMITH
P.O. Box 8036
Shawnee Mission, KS 66208
(913) 381-9118

Invoice Program

568 A business application program that creates printed invoices on two different printed forms, or will generate a printed invoice form. *(List Price: $95)*
Requires: 64K, two disk drives, printer.

Micro Research, Inc.
6938 S. Yukon Ct.
Littleton, CO 80123

Inventory Control Program

569 A complete inventory control program that functions as an on-line NCR cash register to generate invoices. The program generates a daily transaction register that can be used to update the general ledger. Features include complete records of stock ordered, received, and sold; purchase order and vendor tracing; yearly totals in dollars; sales-tax summaries; numerous reports showing stock dispositions; and cash register emulation and invoice generation. Designed for small- and middle-size businesses, it keeps track of all stock and transactions. *(List Price: $179.95)*
Requires: 64K, one disk drive, printer.

Alpha Computer Service
P.O. Box 2517
Cypress, CA 90630
(714) 894-6808

Accounts Receivable

570 Software that accommodates up to 1,000 customers and 2,000 transactions. Features include balance forward with aging to 120 days and sales summary by transaction type with 60 types allowed. The program uses Nebs form #9060 for statements. *(List Price: $249)*
Requires: 64K, one disk drive, printer.

Datacount, Inc.

(205) 749-5641

ITS

INTERACTIVE TUTORIAL SYSTEMS

SOLVES YOUR

TRAINING PROBLEMS

with a series of advanced tutorials designed to be the standard of the industry.

Order our first instructional module **"Principles of the IBM PC and Computer Programming"** at special introductory prices.

This initial lesson will train your secondary users — family, friends and employees — to develop an understanding of processing data using the IBM PC. To include: basic processing cycles, hardware, software, data and file formats. ITS will provide the beginner with the concepts and vocabulary necessary to communicate with the data processor.

ITS self-contained training systems are designed and written by educators active in state-of-the-art DP training.

This phase comes complete on one 320KB diskette at the **introductory price of $29.99** 160KB versions — 2 diskettes $39.95

Write for course descriptions on the following advanced tutorials:

1. IBM PC Instruction Set
2. IBM PC Disc Operating System and MACRO assembler
3. Structured Programming
4. Advanced Structured Programming
5. System Analysis and Design
6. Complete System — All 5 modules

ACCOUNTING AND INVENTORY

Sapana-Payroll-Track-I

571 Payroll software that stores 100 employee records on a single-sided floppy disk and 200 on a double-sided floppy disk. It is menu-driven and includes a user manual. Customizing is available at additional cost. *(List Price: $49)*
Requires: 64K, one disk drive, printer.

Sapana Micro Software
P.O. Box 748
Quincy, IL 62301
(217) 224-4337

Sapana-Expense-Track-I

572 A menu-driven program that stores 2,500 expense entries on a single-sided floppy disk, 5,000 on a double-sided floppy disk, and includes 99 expense categories, 99 different methods of payment, and deductible or nondeductible. *(List Price: $29 including manual)*
Requires: 48K, one disk drive, (printer optional).

Sapana Micro Software
P.O. Box 748
Quincy, IL 62301
(217) 224-4337

FMS II

573 A program for entering a month's checking, charge card, and cash accounts, and includes instant error correction. Users can audit all files by code and month with year-to-date totals. The program includes a self-prompting error-avoiding entry system, screen and printer routines, budget manager, search, account auditor, checkwriter, and item and code macros. It is single- or dual-disk compatible. *(List Price: $89.95)*
Requires: 64K, one disk drive, (printer optional).

Computerized Management Systems
1039 Cadiz Dr.
Simi, CA 93065
(805) 526-0151

Graphics General Ledger System

574 Software that accommodates up to 400 accounts and 1,100 transactions. The program does all standard G/L reports plus line or bar graphs for the current year, prior year, or budgets. Line graphs require a graphics board. *(List Price: $349)*
Requires: 48K, one disk drive, printer.

Datacount, Inc.
2207 Anderson Rd.
P.O. Box 2312
Opelika, AL 36801
(205) 749-5641

Easy

575 An integrated system of three modules for general ledger, accounts payable, and accounts receivable designed to improve and upgrade present accounting packages for business executives, accountants, and bookkeepers. It provides up-to-the-minute, detailed financial and management reports. Current to the last entry, all data is automatically transferred and balanced. It calculates aging and service charges, and prints invoices, statements, and checks. *(List Price: $749.95)*
Requires: 128K, two disk drives, (printer optional).

The Denver Software Company
14100 E. Jewell Ave. #15
Aurora, CO 80012
(303) 750-9980

Solomon Series Software

576 A series of general accounting programs. *Solomon I* provides general accounting facilities for small- to medium-size businesses. *Solomon II* adds a job-costing capability for service businesses such as law firms, job shops, service bureaus, and health card providers. *Solomon III* is designed for businesses that make, stock, and sell products such as manufacturers, import/export firms, distributors, dealers, and retailers. *(List Price:* Solomon I *$2,595,* Solomon II *$3,495,* Solomon III *not available)*
Requires: 64K, one floppy and one hard disk drive, CP/M-86, 132-column printer.

Computech Group Inc.
Main Line Industrial Park
Lee Boulevard
Frazer, PA 19355
(215) 644-3344

HAI Microware HAI-BAS

577 A modular business system that provides a filekeeper and seven accounting functions: general ledger, accounts receivable, accounts payable, inventory, invoice, bill of materials, and sales analysis. Each may be used separately or in combination to reduce data entry. Methods of operation are consistent for all functions. All reports, including sales analyses and corporate balance sheets, have a format determined by the user. Each posting to an accounting module generates a unique audit reference for control.

HAI Microware comes with its own operating system. *HAI-BAS*, a BASIC interpreter run-time module, is required for running the system and must be purchased separately. *(List Price: Each module $495,* Sales Analysis *$295,* HAI-BAS *$350)*
Requires: 64K, two disk drives.

Holland Automation USA Inc.
3400-D W. MacArthur Blvd.
Santa Ana, CA 92704
(714) 641-2844
TWX: 910-596-1832

Accounting Plus

578 A fully integrated accounting package that runs under Digital Research's CP/M-86. Programs include an integrated order entry, inventory control, sales analysis, purchase order, accounts payable, accounts receivable, payroll, and general ledger. *(List Price: $3,525)*

Requires: 64K, 20MB hard disk drive, CP/M-86.

Professional Micro Systems
4000 MacArthur Blvd. #3000
Newport Beach, CA 92660
(714) 851-8655

Accountant's Client Write-up

579 A general ledger system suitable for accounting offices and bookkeeping firms offering client write-up and financial report preparation, as well as for larger firms requiring stand-alone financial reporting. The system includes general ledger detail, working trial balance, general ledger summary, journal printing, master chart of accounting listing, payroll processing, fixed asset reporting, current month's and comparative balance sheets and income statements, and budgeting with comparisons. *(List Price: Not available)*

Requires: 64K, 20MB hard disk drive, printer.

Professional Micro Systems
4000 MacArthur Blvd. #3000
Newport Beach, CA 92660
(714) 851-8655

Inventory

580 A menu-driven, on-hand, reorder, and usage reports program that includes videotaped and written instructions. *(List Price: $600)*

Requires: 64K, two disk drives, printer.

Fogle Computing Corporation
357 E. Blackstock Rd.
P.O. Box 5166
Spartanburg, SC 29304
(803) 574-4950

EZEntry

581 An on-screen order entry system for telephone or mail order sales that stores 500 orders per disk. It prints customer invoices, with automatic extension of up to 200 product codes. It can be used for wholesale, retail, pricing discounts, and taxes. *(List Price: $99.95)*

Requires: 64K, two disk drives, IBM 80 cps matrix printer.

Systemics, Inc.
3050 Spring St.
West Bloomfield, MI 48033
(313) 851-2504

HAL3000 Statistical Software

582 A program that includes regression analysis; correlation coefficient; mean, median, and mode; linear and curvilinear interpolation; chi square; and tau. *(List Price: $395)*

Requires: 48K, one disk drive.

Keller Software
1825 Westcliff Dr.
Newport Beach, CA 92660
(714) 975-4943

The Data Line

583 A program that keeps accounts and budgets and can interface directly with the manufacturer's word processing software (*The Word Wire*) to format printed output. *(List Price: $79.95)*

Requires: 64K, one disk drive, 80-column monitor.

Soft Spot Micro Systems
24 Diane Dr.
Collinsville, CT 06022
(203) 379-7047

Versaform

584 A forms processing system that enables nontechnical users to build an information system around existing forms. Data can be entered in transactions of up to 99 lines from such documents as purchase orders, invoices, ledger cards, or medical insurance claims. The user creates a data base that may be formatted for printing on the original paper form and can summarize all forms in the file. Running subtotals can be reported, and the user may edit data entries. It supports up to 572K. Memory above 128K can be logically assigned as a disk file. It supports function keys and multiple modes on a monitor. *(List Price: $495)*

Requires: 128K, one disk drive, 80-column monitor.

Applied Software Technology
14125 Capri Dr.
Los Gatos, CA 95030
(408) 554-0604

INV-X

585 Software features for inventory management including a built-in sort/merge package, a key access method with hashing algorithm, a report writer, and capacity for 2,200 records on a 5-inch disk or 28,000 for unlimited disk storage. Other features include an order report for checking inventory items, a performance report, and an end-of-year processor for calculating economical order quantity. *(List Price: $298; manual only, $25)*

Requires: 64K, 132-column printer.

ACCOUNTING AND INVENTORY

Accounting Package

586 An integrated general ledger, accounts payable, accounts receivable, and payroll accounting package. Each program in the series may also be used separately. *(List Price: Each package $100; all four $350; manuals only, $20 each)*
Requires: 64K, one disk drive.

Software Laboratories, Inc.
6924 Riverside Dr.
Dublin, OH 43017
(800) 531-1309, (614) 889-5083
CompuServe: 71535,1670

Accounts Receivable

587 A complete invoicing and monthly statement generating package by Peachtree Software that tracks current and old accounts. A complete record is maintained for each customer, and the current status of each account is instantly available. The program prints invoices, statements, and aging reports, and maintains sales-tax information and the accounting detail for posting to the Peachtree General Ledger. Prompts allow inexperienced operators to use the system with minimal instruction. *(List Price: $595, IBM Product Center prices)*
Requires: 64K, two disk drives, 80-column monitor, printer.

IBM Corporation
Systems Products Division
P.O. Box 1328
Boca Raton, FL 33432
(800) 447-4700, 322-4400 Illinois
447-0890 Alaska, Hawaii

Payroll

588 Five modules for payroll, contractor, restaurant, farm, and piecework designed for novice users. The program processes complete employee payroll including printing checks and W-2 forms. It allows for automatic posting to the *Job Cost* and *General Ledger* programs by the same manufacturer. Users are able to maintain federal tax changes, FICA limits and percentage changes, FUTA limit changes, state unemployment limits, and state income tax changes. *(List Price: Each module $585)*
Requires: 64K, two disk drives, 80-column monitor, 132-column printer.

Computer Systems Design, Inc.
P.O. Box 735
Yakima, WA 98907
(509) 575-0320

Forecast Cash Flow

589 A program that forecasts cash flow using a short-term forecasting technique and indexes cash flows for a forecast period including seasonal pattern determination. It also forecasts inventory and production. *(List Price: $49 including documentation)*
Requires: 64K, two disk drives, DOS or CP/M-86.

Microsystems
7201 87th Ave. SE
Mercer Island, WA 98040
(206) 232-1513

Accounts Payable

590 A program that allows payment of invoices based on a pay date. The system can print checks and will update to the *Job Cost* and *General Ledger* programs by the manufacturer. Designed for novice users, it can handle a maximum of 300 vendors and 1,200 invoices. *(List Price: $485)*
Requires: 64K, two disk drives, 80-column monitor, 132-column printer.

Computer Systems Design, Inc.
P.O. Box 735
Yakima, WA 98907
(509) 575-0320

Financial, Inventory, Cost Accounting

591 A business package that includes financial, inventory, and cost accounting programs. It is designed for businessmen with little or no background. *(List Price: Not available)*
Requires: Not available.

Simple Structure Systems, Inc.
7114 Hawthorn Ave.
Hollywood, CA 90467

Execuware Economic Order Quantity

592 An inventory cost-control software package that minimizes inventory costs while maintaining ideal stocking levels. *EOQ* offers a built-in probability theory so users can simulate variations in demand and decide on optimum inventory levels. It allows the user to perform "what-if" analyses on high-cost or large-volume items and analyzes vendor discounts and potential inventory problems. *(List Price: $174.95)*
Requires: 64K, one disk drive.

Aeronca, Inc.
Microcomputer Software Division
4530 Park Rd. #348
Charlotte, NC 28209
(704) 525-9881

Accounting Plus

593 A fully integrated, menu-driven accounting system that tracks, reports, and summarizes accounting transactions. The program was designed to provide financial information for small-business managers. *(List Price: Not available)*
Requires: 128K, one hard disk drive, Baby Blue.

Software Dimensions, Inc.
6371 Auburn Blvd.
Citrus Heights, CA 95610
(916) 722-8000

Accountant

594 A menu-driven accounting system for CPAs and small- to medium-size businesses, including general ledger, accounts receivable, accounts payable, and payroll. The program includes comprehensive manuals and data files for training and practice. *(List Price: $365)*
Requires: 64K, two floppy disk drives or hard disk drive, 132-column printer.

Insoft, Inc.
10175 SW Barbur Blvd. #202B
Portland, OR 97219
(503) 244-4181

Peter

595 A set of programs to maintain data and perform calculations to produce payroll checks, summary accounting information, and government reports. The program will store as many employee names as the disk storage equipment can hold. For each employee the name, address, salary, and other data for calculating earnings and deductions are stored along with year-to-date and quarter-to-date totals of each earning and deduction item.

Up to six earning and ten deduction items can be used for all employees, and each employee can use any or all of these. The earning and deduction items can be manually entered per employee or pay period or can be calculated on an hourly rate, a percentage of gross pay, or with a graduated tax table. Reports will accommodate the earning and deduction items actually used.

The program accrues expenses and deductions, and compiles the proper journal entries to post to the general ledger. If the manufacturer's general ledger system is used, entries can be automatically updated without the need for manual posting. *(List Price: $495 including program disk and instructions)*
Requires: 48K, two disk drives, parallel printer adapter, printer for 8½- by 11-inch paper.

Information Automation Corporation
2900 Turtle Creek Plaza #500
Dallas, TX 75219
(214) 559-2710

April

596 Accounts payable systems designed for business people with little knowledge of computers, and secretaries or bookkeepers with no knowledge of computers and limited knowledge of accounting. Programs are operator-oriented with prompt messages to guide the operator through the program. No programming knowledge is required for installation.

Posting to general ledger is automatic when used in conjunction with the manufacturer's general ledger package. Programs in the system include *Initialize, Change General Information, System Menu, View Vendor,* and *Maintain Vendor File. (List Price: $395 including program disks and complete instructions; installation and training charges extra)*

Requires: 48K, two disk drives, parallel printer adapter, printer for 8½- by 11-inch paper.

Information Automation Corporation
2900 Turtle Creek Plaza #500
Dallas TX 75219
(214) 559-2710

Economic Order Quantity

597 An inventory system that provides businessmen with a tool to minimize costs. The program gives answers to "How much inventory should I order?" and "To what level should I allow my inventory to dwindle before placing an order?" The program calculates economic order quantity (EOQ) and order point.

The program uses sensitivity analysis and probability theory in calculating the order point. Sensitivity analysis affords users the opportunity to perform "what if" analysis and determine which variables cause EOQ and order point to vary significantly. *(List Price: $174.95)*

Requires: Printer recommended, (other requirements not available).

Execuware
4530 Park Rd. #348
Charlotte, NC 28209
(704) 525-9881

Versapayables

598 A menu-driven accounts payable system that helps users keep track of money owed. All summary reports, checks, and statements can be printed on tractor feed forms or plain paper. The program maintains records of current and aged payables, vendors, and due dates for payable transactions. *Versapayables* prints checks and detailed check registers automatically. The program interfaces with the company's other programs.*(List Price: $99.95)*

Requires: 48K, two disk drives, DOS or CP/M-86.

H&E Computronics Inc.
50 N. Pascack Rd.
Spring Valley, NY 10977
(800) 431-2818, (914) 425-1535

Inventory Program

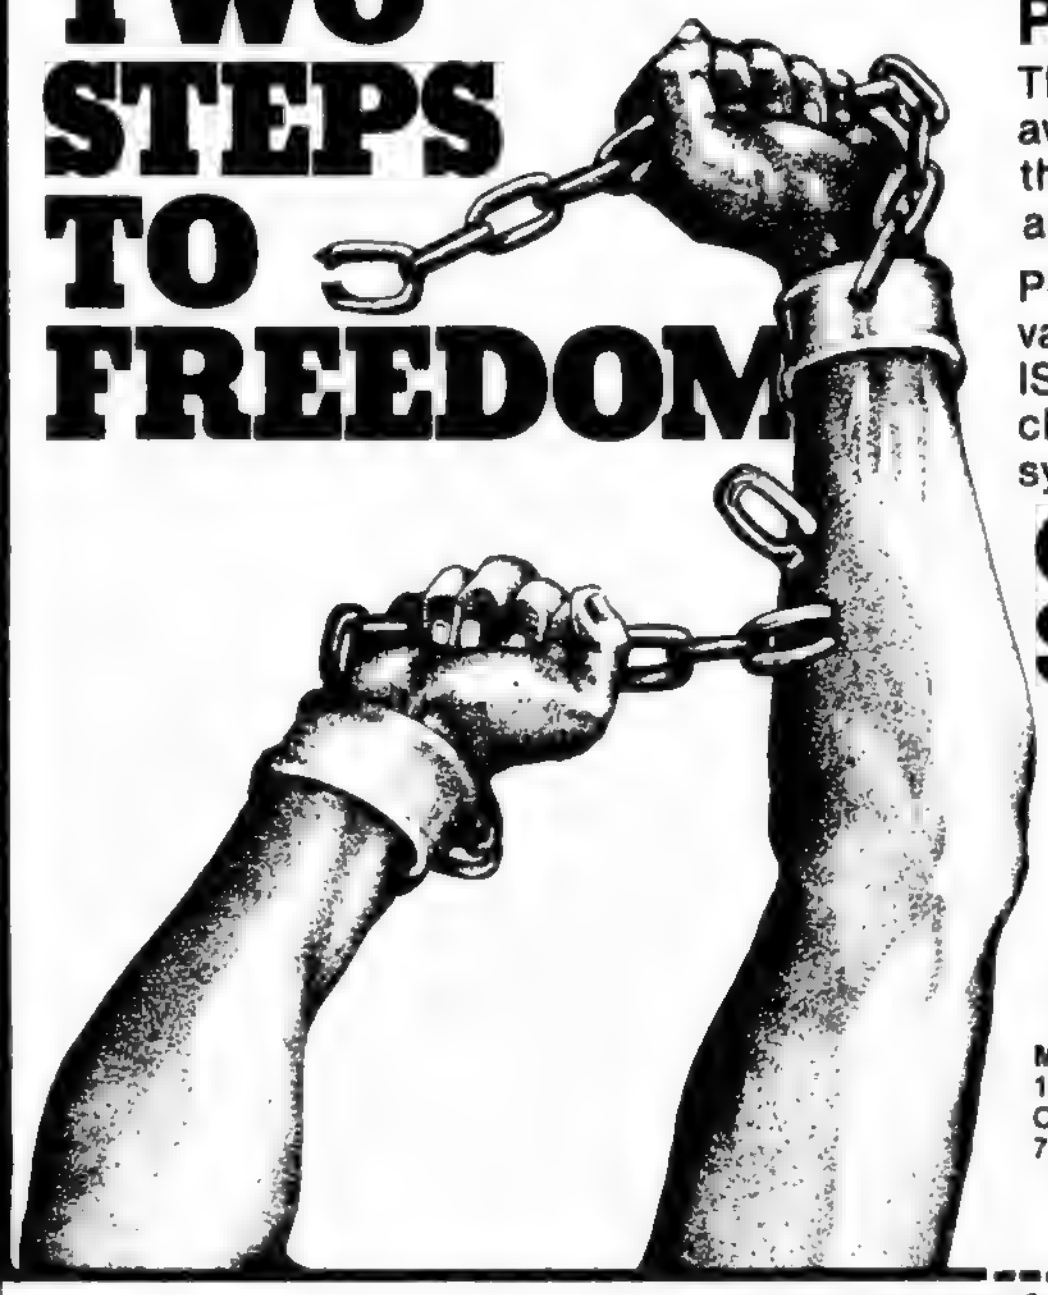

599 A business program that creates an inventory file of up to 1,800 items (for single-sided diskettes) or 3,600 items (for double-sided diskettes). *(List Price: $95)*

Requires: 64K, two disk drives, printer.

Micro Research, Inc.
6938 S. Yukon Ct.
Littleton, CO 80123

PROGRAMMING AIDS FOR YOUR IBM PERSONAL COMPUTER

TWO STEPS TO FREEDOM

PFAS $200 with manual

The fastest ISAM available for IBM-DOS,™ the UCSD p-System,™ and CP/M.™

PFAS is the multi-key, variable record length ISAM that gives you a choice of operating systems.

PHOSFORM $95 with manual

The advanced terminal input system for your IBM-PC.™

PhosForm speeds program development and documentation by enabling you to interactively design the user interface to your program.

ACCOUNTING AND INVENTORY

Osborne Accounting System

600 A general ledger, accounts payable and receivable, and a payroll program. *(List Price: $99 each)*

Requires: 32K, two disk drives, printer.

Mentor Computer Services
P.O. Box 8140
Santa Cruz, CA 95061
(408) 684-1617

JOB & INDUSTRY SPECIFIC

HAL2000 Engineering Software

601 Four engineering modules. *Civil Engineering* includes concrete and piping estimating, trench backfill, piping networks flow, and surveying closures. *Scheduling* contains CPM for estimating and construction, including start and end node listings for hundreds of activities. *Cost Engineering* records data using cost codes and provides detail and summary reports. *Electrical Engineering* includes 21 general purpose programs. Programs are customized to the user's specific applications. *(List Price:* Scheduling, Electrical Engineering *$495 each;* Civil Engineering *$595;* Cost Engineering *$695)*

Requires: 48K, one disk drive.

Keller Software
1825 Westcliff Dr.
Newport Beach, CA 92660
(714) 975-4943

Sydney Real Estate Analysis System

602 A fully interactive menu-driven system for real estate professionals. Its four main modules are real estate investment analysis, contemporary financing, brokers' statements of adjustment, and property record keeping. It also contains tax information to give after tax values in pro forma analysis. *(List Price: $1,895)*

Requires: 128K, two floppy disk drives or one hard disk drive, printer.

Sydney Development Corporation
600-1385 W. 8th Ave.
Vancouver, B.C., Canada V6H 3V9
(604) 734-8822
Telex: 04-54357

Police Communications Log System

603 A menu-driven, interactive program that allows police dispatchers to log and track incoming calls during a 24-hour period. A "Cars Out Summary Report" tracks police cars that have been dispatched but have not signed back in. Daily and weekly reports are produced from the 24-hour log. Two levels of password security prevent unauthorized use of the program.

Requires: 64K, two disk drives.

Microbase Software, Inc.
P.O. Box 4353
Indianapolis, IN 46240
(317) 877-4304

Insurance Systems Modules MIS 1-5

604 A series of five integrated insurance modules designed for independent insurance agents. *MIS-1* is the basis for all the other modules. It offers full marketing capabilities, integrated letter writing, and an unlimited client data base.

MIS 2 is an accounting module, allowing agents to invoice clients, print individual statements, and create accounts receivable summaries. *MIS 3* allows agents to enter cash receipts against outstanding "open" items owed by clients. *MIS 4* automatically produces the accounts current and accounts payable information for companies defined in previous modules. *MIS 5* automatically accepts postings from the invoice register, cash receipts journal, and disbursements journal. Additional modules are available from the manufacturer. All modules can be purchased on single- or double-density disks. *(List Price:* MIS-1 *$650;* MIS-1 *through* MIS-5 *package $2,500; manuals only, $25; package of five manuals $100)*

Requires: 64K, two disk drives, 80-column monitor, 80-column printer.

Metamorphics Inc.
154 Montgomery Ave.
Bala Cynwyd, PA 19004
(800) 523-0206, (215) 668-9000

The Drapery Business System

605 A comprehensive system providing functions for the drapery business in the areas of inventory, purchasing, order entry, calculation of workroom requirements, customer invoice, month-end profit and loss, and management reports. *(List Price: $5,000)*

Requires: 128K, two dual-sided floppy disk drives or one dual-sided floppy disk drive and one hard disk drive, printer.

Sydney Development Corporation
600-1385 W. 8th Ave.
Vancouver, B.C., Canada V6H 3V9
(604) 734-8822
Telex: 04-54357

Chiropractic Record System

606 An application system that provides for patient record keeping, patient billing, claims processing, and practice management reporting. It is designed to minimize the chance of operator error and reduce office personnel training. The system is based on processing individual transactions.

Various report formats and/or statements may be selected at the time of installation without major programming delays. A complete audit trail protects financial records. *(List Price: $2,000 including source code)*

Requires: 64K, one floppy disk drive, one hard disk drive.

Johnson Associates Software
P.O. Box 3069
Redding, CA 96049
(916) 221-0740

Threshold

607 A medical software package that does insurance filing including teleprocessing to Blue Cross/Blue Shield and Medicare. Unattended statement processing, complete security system with audit trails, daily update of statistical information, comprehensive management reports, instantaneous retrieval of all information, on-line help information, and electronic mailbox and message system are also provided. *(List Price: $5,500)*

Requires: 128K, one floppy disk drive, 15MB hard disk storage.

Physicians Practice Management
1810 S. Lynhurst, Ste. Q
Indianapolis, IN 46241
(317) 248-0357

Lumber Dealers Record System

608 A program that provides complete inventory management, accounts receivable, special estimate pricing, and management reporting. It is designed to minimize the chance of operator error and reduce office personnel training.

The application system is based on processing individual transactions and is equally usable in the front office or in the accounting office. Various report formats and/or statements may be selected at the time of installation without major programming delays. A complete audit trail protects financial records. *(List Price: $3,000 including source code)*

Requires: 64K, one floppy disk drive, one hard disk drive.

Johnson Associates Software
P.O. Box 3069
Redding, CA 96049
(916) 221-0740

Monitor

609 A program that captures over 450 data items regarding open-heart and related surgeries for use in statistical analysis. The system provides on-line help information for every item on every screen up to 50 screens, help information for each menu selection, electronic mailbox, user help for parameter-driven functions, and audit trails.

Other features include continuity of program operation, internal program standardization, user enhancement with complete standardization, and compatibility with other generated modules and packages. A full year of enhancements is supplied at no extra cost. Customizing is available on site if necessary. *(List Price: $3,500)*

Requires: 128K, one floppy disk drive, one hard disk drive, 132-column printer, COBOL run-time libraries.

Physicians Practice Management
1810 S. Lynhurst, Ste. Q
Indianapolis, IN 46241
(317) 248-0357

Lease Classification Package

610 A program that classifies leases for financial accounting purposes according to F.A.S.B. standard criteria. It prints classification documents for workpaper files. *(List Price: $55)*

Requires: 64K, two disk drives, Epson or IBM printer.

Professional Software Concepts
P.O. Box 483
Hazelwood, MO 63042

Window Ads

611 A software package for creating window ads on standard computer paper. The program can be used by both experienced and inexperienced computer users. *(List Price: $47.50; manual only, $6.95)*

Requires: Printer, (other requirements not available).

ATC Software
R2 Box 448
Estill Springs, TN 37330
(205) 837-4718

Gasoline Energy Distribution System

612 Software that includes a gasoline distribution plan, multiple fuel products, location inventory, tires, batteries, and accessories. It provides sales analysis by product and location, accounts receivable, and invoicing. Optional features include payroll, general ledger, and accounts payable. *(List Price: $1,000–$5,000)*

Requires: 64K, 5MB hard disk drive.

Comsen Inc.
20-A Erford Rd. #103
Lemoyne, PA 17043
(717) 737-2049

Electrical Engineering Pac, Civil Engineering Pac

613 *Electrical Engineering Pac* solves common DC and AC circuit problems. *Civil Engineering Pac* is a program series for solving common surveying problems. *(List Price:* Electrical Engineering Pac *$29.95,* Civil Engineering Pac *$79.95)*

Requires: 64K, one disk drive.

Alphanetics
P.O. Box 597
Forestville, CA 95436
(707) 887-7237

Fuel Oil Energy Distribution System

614 A program that includes degree day accounting zones, number of days, and will call. TBA inventory tracks all liquid fuel products as well as tires, batteries, and accessories. Additional features include accounts receivable, credit limits, finance charges, burner service contracts, invoicing, and dunning notices. Optional systems include accounts payable, general ledger, and payroll. *(List Price: $1,000–$5,000)*

Requires: 64K, 5MB hard disk drive.

Comsen Inc.
20-A Erford Rd. #103
Lemoyne, PA 17043
(717) 737-2049

MedAccount

615 A medical accounts receivable package designed for a single medical office or a number of offices sharing a common data base computer. It is available for both single and multiuser systems. A report-generating feature includes daily activity reports by doctor, patient lists, and monthly and quarterly patient activity reports. Users can add, scan, or update patient data on line using the patient's name, number, or social security number. The program handles as many offices as needed, with an unlimited number of doctors in each office.

MedAccount interfaces to SPI's *LogiQuest* and comes in two versions. SPI will include the turnkey UCSD p-System operating system if required. Included in the system are a text editor, file manager, and disk formatting utility. *(List Price: $2,500; manual only, $50)*

Requires: 64K, two disk drives, UCSD p-System.

Software Products International
10343 Roselle St., Ste. A
San Diego, CA 92121
(714) 450-1526

SMAC Processing Computer

616 A data processing link that interfaces between Technicon Corp.'s SMAC clinical laboratory blood analyzer and a data processing/reporting system. Results are collected at the rate of one result per second. It performs real-time quality control functions on the data and records results on disk. Lab technicians can edit results via a group of search and edit commands. Results and changes are logged on an Epson or equivalent printer as an audit trail.

The disk can be either taken to or transmitted to another data processing system for reporting once the entire batch of samples is approved. *(List Price: Cabling and interface $650, software license $7,500, optional installation $400/day plus expenses)*

Requires: 128K, two disk drives, asynchronous I/O board, Epson or equivalent printer, cabling, printer interface.

Persoft, Inc.
2186 U.S. Highway 51
Stoughton, WI 53589
(608) 233-1000

Point Of Sale

617 A program designed for auto parts, hardware, equipment, and other parts-number oriented industries. The program keeps track of inventories, prints invoices and management reports, and presents cumulative sales totals and gross profits. It is color- and menu-driven and a series of add, delete, and change commands will omit or restore data from parts lists. The program keeps track of monthly, quarterly, and yearly unit sales. Disk capacity limitation is 2,000 parts per disk. Average response time is less than 2 seconds. *(List Price: $295)*

Requires: 64K, two disk drives, printer.

Tom Leonard or Ali R. Dabiri
P.O. Box 308
Montgomery, WV 25136
(304) 442-5537

The 25th Hour, 25:02—Magazine/Book Reference

618 Software that organizes journals, magazines, newspapers, and books, cross-referencing the information according to author, primary and secondary topic, publication date, and key word. Each reference lists the publication, author, and topic/subtopic, and catalogs the issue, date, and page or location of each article. The program is menu-driven and uses single-command function keys. It handles up to 500 entries per disk drive and up to 1,400 entries on two disk drives. *(List Price: $69)*

Requires: 64K, one disk drive, 80-column monitor, 80-column printer.

Softrend Inc.
P.O. Box 1462
Charlottesville, VA 22902

YOUR TOOL FOR MODERN TIMES.

DEMANDS FINANCIAL SOFTWARE THIS SOPHISTICATED.

Announcing the Financier™ Personal Series. The most sophisticated financial software you can buy for your IBM® Personal Computer.

When you invest in one of the most advanced personal computers money can buy, it only makes sense to follow through with a software investment to match.

That investment is the Financier Personal Series. It's the integrated personal financial system designed from the ground up exclusively for IBM's Personal Computer.

Financier is a totally integrated software package that lets you capture and organize financial data regardless of your background in computers or accounting.

With Financier you can quickly and easily produce reports for budgets, net worth computation, bank accounts, property inventories, credit card usage, even detailed tax records. And, Financier's flexibility lets you maintain a virtually unlimited number of budget and tax accounts. The only realistic limitation on the number of accounts is your available disk space.

Financier is remarkably easy to use because its sophisticated data base management techniques require you to enter data only once. The data is then available to all of Financier's reporting functions, including automatic bill-paying and check-writing.

The Financier Personal Series is just one part of a complete financial planning and record keeping system for your IBM Personal Computer. Also available are the Financier Tax Series for personal and professional use, and the Financier Investor Series for portfolio management and securities analysis.

So, you've invested in the tool for modern times, invest in the software for modern times. The powerful, flexible Financier Personal Series.

"I'M SPENDING A LOT MORE TIME ON MY TENNIS."

Thanks to two innovative new software products from TCI, the time that I spend at my new IBM Personal Computer needn't interrupt my social calendar.

Agenda™

Have you ever forgotten an important event? Scheduled two meetings at or near the same time? These problems are solved by the AGENDA system that tracks all of your personal and business time. You simply enter data on scheduled meetings, projects, holidays, reminders, and dates to remember (birthdays, anniversaries, etc.) and AGENDA does the rest. There is an automatic check of tightly scheduled days, a perpetual calendar, and a preview of coming days, weeks, or month-at-a-glance either on your display or a printout to carry with you. User defined expenses can be tracked day to day. AGENDA even provides continuous clock display and alarm when on-line. Can handle up to 3,000 separate records. (Requires 64K, DOS, printer, and either 40 or 80 character display)

$65 includes diskette, manual, and shipping
$15 for manual only (refundable on diskette purchase)

Mailtrak™

Clubs, churches, sports teams, prospects, sales lists, membership organizations, fraternities, alumni, neighbors, volunteers. . . Whatever the list, it can be managed on TCI's MAILTRAK. Full name and address information (first and last name, two address lines plus city, state, country, and 9 digit zip). This is more than just a mailing list, with two phone numbers, five user defined mail codes, plus four activity codes with dates. On-screen editing and updating. Output includes phone directories master list, mailing labels (user selected format), file labels, and output file for the new IBM Easywriter program. Sort and select capabilities draw on all information to suit your specialized needs. Stores up to 1200 records on a standard diskette. (Requires 64K, DOS, Printer, and either the 40 or 80 character display)

$65 includes diskette, manual and shipping
$15 for manual only (refundable on diskette purchase)

JOB & INDUSTRY SPECIFIC

Jobtrax

619 A program designed for engineers, architects, and contractors that provides the ability to estimate initial project costs and resource requirements. It also includes the ability to monitor budget and schedule status during the project. *(List Price: $250)*
Requires: 96K, one disk drive, color/graphics adapter, parallel printer board, printer.

Omicron Software
Engineering-Science
57 Executive Park South #590
Atlanta, GA 30329
(404) 325-0770

Cost Estimating

620 Software for contractors, engineers, and architects. It provides a complete cost breakdown analysis with unit cost for materials, labor, and totals. *(List Price: $300)*
Requires: 64K, one disk drive.

Richard Caldwell
2063 43rd Ave.
San Francisco, CA 94116
(415) 661-7840

Dentist Invoice Generator for Public Aid

621 Software that prepares invoices for public aid for dentists' offices in Illinois. The program is menu-driven with a user manual. It stores 275 patients' accounts on a single-sided disk drive and 550 on a double-sided drive. Customizing is available at additional cost. *(List Price: $49)*
Requires: 48K, one disk drive, printer.

Sapana Micro Software
P.O. Box 748
Quincy, IL 62301
(217) 224-4337

Branchbanker

622 A menu-structured tool for financial institutions. The package currently consists of Master and Individual Retirement Account (IRA) modules. The company plans to develop an extensive set of programs that uses the Master Module as a prerequisite. *(List Price: Master Module and one accessory $595)*
Requires: 64K, printer, (other requirements not available).

Ampersand Corporation
128 S. George St.
York, PA 17405
(717) 845-5602

Real Estate Analysis System

623 A software package that allows real estate professionals, accountants, and attorneys to model commercial or residential real estate projects, perform "what-if" analyses, and evaluate partnership and joint venture arrangements. It generates up to six reports, including projections of operating income, tax implications, and cash flow analyses. Reports are in presentation quality format. *(List Price: $200)*
Requires: 64K, two disk drives.

Decision Support Systems
3234 Prospect St., N.W.
Washington, DC 20007
(202) 342-8172

Loan Analyzer

624 A software program for real estate professionals that calculates amortization schedules for complex real estate loans. Complete amortization schedules may be printed in presentation quality format. *(List Price: $95)*
Requires: 64K, one disk drive.

Decision Support Systems
3234 Prospect St., N.W.
Washington, DC 20007
(202) 342-8172

Real Estate Consultant

625 A software package that analyzes real estate transactions. Input questionnaires are provided. The program includes prompting and automatic error correction and computes amortization. It can be updated for the latest tax laws and answers investors' questions through extensive "what if" analyses. Both system functions and all input/output data are explained in a user manual that can function as a real estate investment tutorial. *(List Price: $195)*
Requires: 64K, one disk drive, 80-column monitor, printer.

CSI Consultant System Inc.
3887 State St. #111
Santa Barbara, CA 93105
(805) 964-7047

Insurance Data Base System

626 A package designed for independent insurance agents. It gathers information from insurance companies the agents represent and makes the information available on a single data base. Using standard insurance forms, agents input information on an account and compare the results offered by several companies. The program also creates graphs of the comparisons. *(List Price: $1,500)*
Requires: 64K, one disk drive.

Mirror Images Software
1223 Peoples Ave.
Troy, NY 12180
(518) 274-2335

Mister Landlord

627 A complete system designed for managers of apartment buildings. The master file contains information on each apartment and each tenant. The manager can determine the status of apartments, keep a general journal of all expenses, and review a monthly profit and loss statement. The system prints rent rolls; monthly rent bills; form letters such as leases, lease renewals and terminations, and notices of nonpayment; and user-designed form letters. *(List Price: $395)*
Requires: 48K, one disk drive, printer.

User-Friendly Software Inc.
P.O. Box 1192
Melville, NY 11747

L.P. Gas Distributors System

628 Software that provides route accounting, sales analysis, meter billing, and customer accounts receivable billing and control. It is designed to minimize the chance of operator error and reduce office personnel training. The application system is based on the processing of individual transactions. Various report formats and/or statements may be selected at the time of installation without major programming delays. A complete audit trail protects financial records. *(List Price: $3,000 including source code)*
Requires: 64K, one floppy disk drive, one hard disk drive.

Johnson Associates Software
P.O. Box 3069
Redding, CA 96049
(916) 221-0740

Software Aids for Piping Industry

629 A group of ten programs for the piping industry. The programs include a Plumbing Estimator for most plumbing take-offs, a Maximum Piping Working Pressure for determining flexibility in L or U pipe bends, and a Pipe Nozzle Reinforcer to determine whether a branch outlet requires a reinforcement pad.

Other programs include pipe cutting list take-off for prefabrication, pipe wall thicknesses, piping expansion analysis, heating estimator, cutback 90° elbows, steel beam sizing for midspan loading, and uniform span loading. *(List Price: Not available)*
Requires: 64K, one disk drive.

Pipe Prefabrication
P.O. Box 1376, Station B
Downsview, Ontario
Canada, M3H 5V6

JOB & INDUSTRY SPECIFIC

Church Membership and Contributions

630 A menu-driven program that maintains a list of all church members, church involvements, family relationships, commitments to four categories of church support, and weekly contributions. Totals for all categories and each member's contributions are available at all times. The ledger statement printout is available on demand for tax purposes. Yearly records for approximately 100 members are on each disk. *(List Price: $699)*

Requires: 64K, two disk drives, printer.

Cook Compusystems
309 Lincolnshire
Irving, TX 75061
(214) 253-6979

MicroCAD

631 An interactive, computer-aided design system that enables the user to construct and visualize objects three-dimensionally and to interpret drawing files in a variety of ways. Users can draw directly on screen, produce instant perspectives, plot on the printer, and edit images. Drawing files can be sent via telephone to service bureaus or drafting departments for further plotting. The system is especially useful for civil engineers, architects, or other design-oriented professionals who need to visualize three-dimensional creations. It supports monochrome or color display. *(List Price: $400)*

Requires: 64K, one disk drive.

Computer Aided Design
764 24th Ave.
San Francisco, CA 94121
(415) 387-0263

Physician's Assistant

632 A system that provides medical office business functions such as billing, receivables, encounter recording, forms, scheduling, and monthly statements. It also provides the capability for complete medical histories, financial and medical reports, security, backup, and remote access of medical records. Updates are supplied and a service contract is available. *(List Price: Complete package $18,995; software only, $6,495)*

Requires: 64K, one floppy disk drive, one hard disk drive.

Optimal Computing Solutions
P.O. Box 585
Bound Brook, NJ 08805
(201) 752-5830

Medical Record System

633 A system designed to minimize the chance of operator error and reduce office personnel training. The program provides complete patient record keeping, patient billing, claims processing, and practice management reporting.

The application system is based on processing individual transactions. Various report formats and/or statements may be selected at the time of installation without major programming delays. A complete audit trail protects financial records. *(List Price: $2,000 including source code)*

Requires: 64K, one floppy disk drive, one hard disk drive.

Johnson Associates Software
P.O. Box 3069
Redding, CA 96049
(916) 221-0740

Star System 7

634 A property management software package customized to handle cash disbursements and rent receipts for apartments, condominiums, and small commercial developments. It produces a variety of reports including tenant rolls, vendor lists, income statements, balance sheets, and budget analyses. *(List Price: $950)*

Requires: 48K, two disk drives, 80-column monitor, 132-column printer.

Star Computer Systems
18051 Crenshaw Blvd.
Torrance, CA 90504
(213) 538-2511

Oil Operator's Record

635 A program that keeps track of oil well expenses and income. Each disk maintains a separate accounting for one to 200 properties. A complete printout of expenses and income is available with totals and grand totals for each category. *(List Price: $999)*

Requires: 64K, two disk drives, printer.

Cook Compusystems
309 Lincolnshire
Irving, TX 75061
(214) 253-6979

L.P. Gas Energy Distribution System

636 A program that provides for L.P. gas distribution by degree, day, zones, number of days, and will call. TBA inventory tracks all liquid products as well as tires, batteries, and accessories. Accounts receivable, invoicing, and dunning notices are included. *(List Price: $5,000)*

Requires: 64K, 5MB hard disk storage.

Comsen Inc.
20-A Erford Rd. #103
Lemoyne, PA 17043
(717) 737-2049

PMS-II

637 A project management system a critical path network analyzer fo construction management, engineering and planning, research and development, high-tech manufacturers, government subcontractors, and educators. Baby Blue a CP/M-86 versions are used for the IBM PC

The program meets all government proje management reporting requirements. It computes critical paths and floats, with earl and late start and finish for each activity, fo over 1,000 activities per network. Report formats include GANTT charts and activity diagrams, all subject to the user's definition and selection. *PMS-II* interfaces with *RMS-* a resource management system. *(List Price:$1,295)*

Requires: 64K, 1MB disk storage, CBASIC Baby Blue version, CBASIC-86 for CP/M-8 version.

AHA, Inc.
1475 Rodriguez St.
Santa Cruz, CA 95062
(408) 475-8705, 475-7247

S3E, Steady State Systems Engineering

638 An interactive systems analysis program designed for power plant a chemical process thermodynamic analysis. consists of stand-alone modules linked by data base of system and component variabl Modules include *Mathpak* for curve fitting root finding, optimization, and matrix analysis; *Thermopak* for calculating properties of up to 14 species; *S3EPAK* includes commonly required systems and I modules. Other modules are *Heat Exchangers, Fluid Components, Reactor Components,* and *PSI Fuel Cell Libraries.* *(List Price:* Mathpak *$50*, Thermopak *$75*, S3EPAK *$50*, Heat Exchangers *$100*, Fluid Components *$50*, Reactor Components *$15*

Requires: 64K, one disk drive.

Physical Sciences Inc.
30 Commerce Way
Woburn, MA 01801
(617) 475-9030

Travel Agency System

639 A complete business system for travel agencies that keeps track sales for airline and train tickets. It produces weekly report similar to A.T.C. reports and tracks any pre-pays made for customers. A accounts receivable report is available on demand. *(List Price: $980)*

Requires: 64K, printer, two disk drives.

Solution Software Systems
3930 Whispering Trails
Hoffman Estates, IL 60195
(312) 893-5111

Aptmnt, Offer

640 Two programs for the real estate industry. *Aptmnt* (apartment building analysis) calculates the profit or loss to a buyer after purchasing property on the seller's price and terms. Users can also compute price and terms on a trial and error basis. They can specify profit and terms to obtain a required price and calculate all income and expense increases during the first 5-year period of ownership after buying at a particular price. By specifying the interest rate, users can obtain what the property should sell for after 5 years. The 5-year annual profit on the original investment in a profit-loss statement is also obtainable. A "what-if" may be queried on any parameter.

Offer computes how much money an offer would yield for a seller during the 5 years after the sale of property. The program calculates as many as three simultaneous offers on the same property. By using both programs, users can optimize an investment for buyers and sellers simultaneously. Both programs are on one disk without DOS. *(List Price: $400)*

Requires: 64K, one disk drive.

Norman Neinchel, Realtor
1777 Saratoga Ave. #208
San Jose, CA 95129
(408) 257-4411

Utility Billing System

641 A menu-driven system for processing water, sewage, and sanitation of small utilities. It handles up to 750 customers on a single-sided diskette or 1,550 customers on a dual-sided drive. Up to 15 different rate classes and/or cycle rates are supported on the same file. Rates and options are user-defined. *(List Price: $250, documentation/information packet $25)*

Requires: 64K, two disk drives.

Miracle Computing
313 Clayton Ct.
Lawrence, KS 66044
(913) 843-5863

Quikcalc Real Estate Investor

642 A financial analysis program for evaluating income properties and individual residences. Complex financing alternatives can be explored, including conventional mortgages, variable rate mortgages, full balloon payments, and interest-only loans. All analyses are summarized into an inclusive internal rate of return.

The program is designed for individual home buyers, realtors, and investors. A comprehensive, fully illustrated manual is included. *(List Price: $129.95)*

Requires: *VisiCalc*, (other requirements not available).

Simple Soft, Inc.
480 Eagle Dr. #101
Elk Grove, IL 60007
(312) 364-0752

Trucking System, Gateway

643 *Trucking System* provides for freight billing, automatic rating, shipper sales analysis, and driver settlements. It includes payroll (owner operated or company driver), an ATA maintenance system, trip reporting, mileage, fuel, and accounts receivable. *Gateway* is a menu generator for programmers. *(List Price:* Trucking System *$1,000–$9,000*, Gateway *$99.95)*

Requires: 64K, 5MB hard disk storage for *Trucking System*; 64K, two disk drives for *Gateway*.

Comsen Inc.
20-A Erford Rd. #103
Lemoyne, PA 17043
(717) 737-2049

Church Accounts

644 An adaptation of a spreadsheet for church accounting purposes. The program keeps track of expenditures and provides a printed record for budgeting and auditing purposes. *(List Price: $299)*

Requires: 64K, two disk drives, printer.

Cook Compusystems
309 Lincolnshire
Irving, TX 75061
(214) 253-6979

Custom Computer Systems

645 Customized software and training for churches, professionals, and schools. Among the packages available are mailing list, church membership and contributions, church accounts, oil operator's record, stockplot, and gradebook. *(List Price: Not available)*

Requires: Not available.

Cook Compusystems
309 Lincolnshire
Irving, TX 75061
(214) 253-6979

SPREADSHEETS

Fast Figure

646 This business program features a spreadsheet with flexible printing and file sharing. Includes depreciation and IRR functions, with tax and business templates also available. Designed primarily for business planning and "what if" analyses. *(List Price: $150)*

Requires: 64K, two disk drives.

Hourglass Systems
P.O. Box 312
Glen Ellyn, IL 60137
(312) 690-1855

VisiCalc

647 A multipurpose forecasting and planning software package for accountants, analysts, and business planners. Users create and manipulate an electronic worksheet of up to 63 columns and 254 rows. All values or formulas in this grid may be modified and *VisiCalc* automatically recalculates the entire worksheet using the new values. The worksheet's intersecting columns and rows define up to thousands of entry positions and allow a myriad of different "what if" situations and possible calculations. Cursor control keys permit scrolling in all four directions, and the screen may be divided into two windows to view different sections of the worksheet at once. Applications include budget planning, sales and cash flow projections, and market analyses.

VisiCalc is also distributed by VisiCorp as one program in an integrated "VisiSeries." *(List Price:* VisiCalc *by VisiCorp $250,* VisiCalc *by IBM $200)*

Requires: 64K, one disk drive, 40- or 80-column monitor, (printer optional).

VisiCorp
2895 Zanker Rd.
San Jose, CA 95134
(408) 946-9000

The PC Spreadsheet Report

648 An independent comparative analysis of spreadsheet simulation software for the PC. The report discusses the spreadsheet concept and examines features such as power and performance, ease of use, functions and programmability, editing and report formatting, consolidation of models, graphics and utilities, and integration with other software.

Programs reviewed include *VisiCalc*, *SuperCalc*, *MultiPlan*, *CalcStar*, *MBA*, *LogiCalc*, *MasterPlanner*, *PlannerCalc*, and other financial modeling tools. *(List Price: Not available)*

Requires: Not available.

John U. Zussman Associates
P.O. Box 7507
Menlo Park, CA 94025
(415) 854-6395

PlannerCalc

649 A spreadsheet planner written in English syntax. Procedural steps are entered in English with conventional mathematical logic. Individual comments are included along with line and column commands. The program has extensive help screens and is upgradeable, with 128 columns and 512 lines maximum. *(List Price: $50)*

Requires: 128K, two disk drives, DOS or CP/M-86.

Comshare Target Software
1935 Cliff Valley Way
Atlanta, GA 30329
(404) 634-9535

SPREADSHEETS

Scratchpad

650 A spreadsheet program with unlimited screen splitting, unlimited title locking, If/Then functions, features that consolidate up to four different spreadsheets at a time, and a merge feature. *(List Price: $295; manual only, $15)*

Requires: 48K, one disk drive, CP/M-86 or DOS.

SuperSoft, Inc.
P.O. Box 1628
Champaign, IL 61820
(217) 359-2112, 359-2691
Telex: 270-365

SuperCalc

651 An electronic spreadsheet designed for business people with no programming background. By changing one variable, business assumptions and long-range forecasts can be generated. Users with color monitors may display negative values in red and formulas in yellow. 256K users will be able to fill all 16,000 cells of the worksheet with 5-digit numbers—enough space to allow 10-year projections by month. *SuperCalc* can be purchased alone or with an optional 192K memory board by Vista Computer Company. *(List Price: $295 including disk and manual, $795 including 192K board)*

Requires: 48K, one disk drive (two recommended), (printer optional).

Sorcim Corporation
405 Aldo Ave.
Santa Clara, CA 95050
(408) 727-7634
Telex: 910-338-003

MicroPlan

652 Financial modeling, "what-if" analysis, and financial reports generated on the family of MicroPlan products. The MicroPlan spreadsheet, a menu-driven electronic worksheet for business applications, is the first in a proposed line of MicroPlan products. Applications include depreciation calculations, loan analysis, internal rates of return, tax computation, balance forward operations, and rolling forecasts.

A separate consolidation module handles three kinds of multiple table consolidations and automatically analyzes variances. Menus include their own built-in commands and displays, table formatting, data entry, math computation, financial computation, and report generation. *(List Price: MicroPlan $495, Consolidation Module $295)*

Requires: CP/M-86, BASIC-86.

Chang Laboratories, Inc.
10228 Stelling Rd.
Cupertino, CA 95014
(408) 725-8088

Easycalc

653 A calculating tool that can be used to compute budgets and records, project investment returns, and figure taxes. It provides the capabilities of a two-dimensional "what if" calculator program, including formulas, labels, and variable column widths, and will print to either a line printer or a disk file. Written in C language, the program comes with IRS Form 1040 and other tax templates. *(List Price: $124.95)*

Requires: 64K, one disk drive, printer.

Norell Data Systems Corp.
3400 Wilshire Blvd.
P.O. Box 70127
Los Angeles, CA 90010
(213) 257-2026

The Thinker

654 A spreadsheet program that allows users to answer "what-if" questions. Users can create numeric relationships with 16 different mathematical functions including row and column totals. Changing one value will cause all related values to be automatically recalculated. *(List Price: $49.95)*

Requires: 48K, one disk drive, 80-column monitor.

TexaSoft
1028 Madison Ave.
Dallas, TX 75208
(214) 941-8475, 495-5052

Visualize

655 A menu-driven program that is a documentation aid for the *VisiCalc* package. It allows users to produce permanent hard-copy documentation of all *VisiCalc* templates. The program produces three reports: The Layout Report allows users to print each cell in the spreadsheet and show the type of process in that cell; the Calculation Report allows users to sort spreadsheet calculations by rows; and the Anomalies Report lists unnecessary or redundant format entries in the spreadsheet program.

Three templates are provided with the package: Check Register, Balance Sheet and Operating Statement, and Cash Flow. *Visualize* can run on a monochrome or color/graphics adapter. *(List Price: $100)*

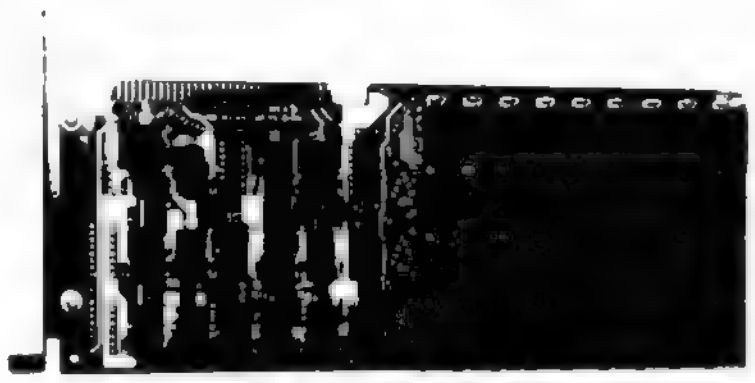

Requires: 64K, one disk drive, (printer optional).

Norell Data Systems Corporation
3400 Wilshire Blvd.
P.O. Box 70127
Los Angeles, CA 90010
(213) 257-2026

NEW FOR THE IBM PERSONAL COMPUTER
WHY STOP AT 256K OF RAM?

PC/RAM STACK
256K/512K Ram Extension Board
For The IBM Personal Computer

PC/RAM STACK allows expanding the IBM Personal Computer's memory by 512K in just one I/O expansion slot, leaving the other slots available for I/O functions and peripherals.

FREE SOFTWARE
With each 256K or 512K PC/Ram Stack purchased before September 1. "MDISK" software allows accessing all or part of PC/Ram Stack as if it were Disk Drive C:. Only 5 to 10 times faster.

SUGGESTED RETAIL

512K Model	$1195.00
256K Expandable to 512K	$795.00
256K Non Expandable Model	$725.00
64K Expandable to 256K	$495.00 each

Electronic Spreadsheet

656 A spreadsheet program that allows mathematical calculations to be done in three dimensions, displaying the relationships between rows and columns. It uses three descriptive files, one for each dimension, and permits users to look at one plane at a time. Users can print out final reports with 6-line column headings and full row descriptions, and intermediate text may be placed anywhere in the final report. The program has the ability to handle over 1 million numbers and is written in APC BASIC. *(List Price: Not available)*

Requires: 64K, two disk drives, APCBASIC.

American Planning Corporation
4600 Duke St., # 423
Alexandria, VA 22304
(703) 751-2574

LoadCalc

657 A program that converts any text file into a "visi" data file (DIF file). Text files can be captured with communication programs such as *VisiTerm* or *R/Net* and loaded into *VisiTrend/Plot* or *VisiCalc*. Data sources users might have are time-sharing systems, other personal computers, and data from software programs that do not produce DIF files but can save data to disk as text files. *LoadCalc* allows selective conversion of the data.

Any text file can be converted into a DIF file. The program uses data from many sources with Visiseries programs. The screen menu looks like a *VisiCalc* screen with similar commands. Fractions are interpreted and converted to decimals. Edit and select data for conversion by row and column. Each field is analyzed and saved as either Label or Value in a DIF file. No programming is required. *(List Price: $95)*

Requires: 64K, two disk drives.

Cypher
121 Second St.
San Francisco, CA 94105
(415) 974-5297

VisiCalc Real Estate Templates

658 Programs for office building planning, participating mortgage, hotel planning, and lease aging. Included are inflation adjustments, NPV, after tax analysis, and residual value calculation. *(List Price: Not available)*

Requires: Not available.

Maplewood Software Co.
28 Lancaster Ave.
Maplewood, NJ 07040

VisiCalc Real Estate Templates

659 A menu-driven system designed for real estate developers, brokers, accountants, attorneys, and financial planners. Menu selections appear on every screen, prompting users to load new templates on top of the one currently in memory. This overlay technique results in automatic screen formatting and presentation of new menu selections.

Both volumes are contained on 5¼-inch disks. Volume I contains Internal Rate of Return, A.C.R.S. depreciation, straight-line depreciation, declining balance depreciation, sum-of-the-year's digits depreciation, amortization system, mortgage loan analysis, and personal financial statement. Volume II contains income property investment analysis. *(List Price: $99.95 including user manual and reference text)*

Requires: 64K, IBM disk drive (either single- or double-density), Personal Software's *VisiCalc* disk, set of blank disks, (printer recommended).

Sofstar, Inc.
13935 U.S. 1, Juno Square
Juno Beach, FL 33408
(305) 627-5511

MergeCalc

660 A spreadsheet that extends the usefulness of *VisiCalc* by allowing users to add segments of a total business into a consolidated model. It enables users to perform all types of complex analyses such as variance analysis, percentage change reports, time change reports, share of market analysis, incremental sales, or investment analysis. Users can add monthly reports to get quarterly totals and apply seasonal adjustment percentages.

The program allows users to carry out addition, subtraction, multiplication, division, and exponentiation for up to 15 *VisiCalc* models at a time. It can perform any series of operations users can describe, using an equation with up to 10 levels of brackets. Users can also do the same operations on DIF files.

It is menu-driven with on-screen prompts, and individual rows and columns as well as individual cells can be exempted from calculations. All labels and logic are preserved, so the result is a working *VisiCalc* model. The program is not memory dependent, so users can perform operations that are impossible with *VisiCalc*. *(List Price: $125)*

Requires: 64K, one disk drive, *VisiCalc*, (printer recommended).

Cypher
121 Second St.
San Francisco, CA 94105
(415) 974-5297

B&L Spreadsheet Program

661 A spreadsheet program the size of which is limited only by memory capabilities. The program also has special table lookup features. *(List Price: $99.95)*

Requires: 64K, one disk drive.

B&L Computer Consultants
226 S. Cole, Dept. P-2
Boise, ID 83709
(208) 377-8088

DATA MANAGEMENT

Record Management System

662 A package of five machine-language programs that can be used to handle data input, editing, validation, on-line retrieval, and printed reports. Custom-designed data manipulation can be filled in by the user's BASIC programs. Features include a user-defined record format, optional two-level record hierarchy, ASCII text-formatted files, and direct access by key field. The program will handle up to 65,000 records and has built-in sort and merge capabilities. *(List Price: Single CPU $395, License Source Code $950)*

Requires: 48K, one disk drive.

Washington Computer Services
3028 Silvern Ln.
Bellingham, WA 98226
(206) 734-8248

Forms Designer, Forms Editor, Data Entry

663 A tool designed for Pascal programmers to interactively lay out a form on a screen. A form can be saved onto a DOS file and later accessed by a set of run-time subroutines. *Data Entry* is designed for use without programming effort. Users lay out a form by using the *Forms Editor* and *Data Entry* to display the form and input data to a disk file based on the form's layout. *(List Price: Forms Designer, Forms Editor, run-time subroutine, and Data Entry $175; Forms Editor and Data Entry $75; demo and documentation $25)*

Requires: 128K, one disk drive (two recommended).

Business Information Technologies
P.O. Box 619
Milpitas, CA 95035
(408) 262-1054

DATA MANAGEMENT

Easyfile

664 A program that has comprehensive search functions allowing users to search any word/phrase combination across all categories and display/print the results. Possible uses include storing bibliographies, receipts, recipes, or system requirements. *(List Price: $35; documentation $3)*
Requires: 48K, one disk drive.

Miracle Computing
313 Clayton Ct.
Lawrence, KS 66044
(913) 843-5863

FileAide

665 A program that enables users to input standard PC-BASIC sequential or random disk files. Users can also perform individual record edits or full-file global editing, extract data to create new files, design screen displays, and generate custom reports. Conditional expressions may be entered to fine tune and selectively perform all edits and displays or to control reporting. A special create-file option enables test data or empty files to be generated. *(List Price: $47)*
Requires: 48K, one disk drive, printer.

New Venture Systems
P.O. Box 2141
Chesapeake, VA 23320
(804) 482-1889

PCFile

666 A filing program that enables users to store and retrieve a variety of textual information such as bibliographic references, facts, anecdotes, and trivia. Text storage and retrieval is accomplished through key words or identification numbers. *(List Price: $29.95)*
Requires: 64K, one disk drive, 80-column monitor.

TexaSoft
1028 N. Madison Ave.
Dallas, TX 75208
(214) 941-8475, 495-5052

Order Entry System

667 A system that automatically locates and displays customer and item information, calculates taxes and discounts, and redisplays and reprints previously entered orders. All processing is done with menus and fill-in-the-blank screens. *(List Price: $325)*
Requires: 64K (128K recommended), one disk drive.

Distributed Software Systems
P.O. Box 1301
Northbrook, IL 60062
(312) 634-1511

The Data Reporter

668 A data base management system that features machine language searches and sorts, soundex searches, calculated fields, batch commands, password protection, user-specified fields, unlimited record lengths, and several printing options. *(List Price: $250)*
Requires: 64K, one disk drive, printer.

Synergistic Software
830 N. Riverside Dr.
Renton, WA 98055
(206) 226-3216

Comprehensive Information Management System (CIMS)

669 A menu-driven, relational DBMS that simplifies information or data processing for accounting functions, inventory control, performance reports, and other applications. Features include sorting, modifying, and updating information; automatic calculating; totaling; aggregate and relational functions; and extensive dynamic capabilities. *(List Price: $475 including user manual)*
Requires: 64K, two disk drives, (printer optional).

Business Data Systems
608 Fox Valley Dr.
Longwood, FL 32750
(305) 862-9695

List Manager

670 A program that permits the entry and maintenance of a complete name-and-address data base to provide for printing mailing labels, information lists, and miscellaneous reports. Output can be designed for continuous printed forms such as personnel lists, internal telephone directories, mailing lists, customer files, and sales contacts. Either monochrome or color display can be used. *(List Price: $47)*
Requires: 48K, one disk drive, printer.

New Venture Systems
P.O. Box 2141
Chesapeake, VA 23320
(804) 482-1889

Comsort

671 Software that allows users to sort and designate up to ten sort fields. Designated fields can be chosen from anywhere in the file with no restrictions on ordering. Users can build a file containing the sorted records or only record numbers. A user can also combine ascending or descending ordering of fields and save sort parameters for future use. It can also be used as a subroutine. *(List Price: $99.95)*
Requires: 64K, two disk drives.

Comsen Inc.
20-A Erford Rd. #103
Lemoyne, PA 17043
(717) 737-2049

Tiger Database

672 A program that allows users to collect information; search the data base; and update, select, and sort data for reports. Written in assembly language, the program includes menu displays, fill-in-the-blanks design, and a demonstration disk containing over 100 sample data bases for nearly every profession.

Features include optional data entry editing, password and scramble code security, calculated fields and user-defined defaults, comprehensive searching (range, wild card, prefix and suffix, not, sounds-like), and flexible reporting. *(List Price: $200)*
Requires: 64K, two disk drives.

Tiger Software Inc.
3857 Birch St. #600
Newport Beach, CA 92660
(714) 552-8650

Personal Pearl

673 A data base management program designed for nontechnical users that combines forms, report, and program generation. Users can create a custom-designed library of programs with the package. It can be used with both *SuperCalc* from Sorcim and *WordStar* from MicroPro in the current Z-80, 8080, and 8086 environment. *(List Price: $295)*
Requires: Printer recommended, (other requirements not available).

Relational Systems International Corporation
5002 Commercial St. S.E.
Salem, OR 97306
(503) 363-8929, 370-8653

Info-SORT

674 A program designed to be used as a stand-alone utility or to be interfaced with existing application programs. It uses assembly language for the sort routine and BASIC for user interface. It requires no knowledge of BASIC or machine language interfacing and sorts up to nine keys—independently, ascending, and descending. It includes or omits records with up to eight independent selections. Comparisons allow "less than," "greater than," and "equal to." Sort parameters can be easily specified and saved on disk for future use. The output file may be a sorted copy of the input file, a file of the relative record numbers of the sorted input file, or an index file containing the sorted keys and the relative record numbers. *Info-SORT* can interface with the manufacturer's *Info-GEN* and *Info-REPORTER* for producing custom reports. *(List Price: $145)*
Requires: 64K, 80-column monitor, (other requirements not available).

Info-Pros, Inc.
2102 Business Center Dr. #132
Irvine, CA 92715
(714) 851-8975

Filemanager

675 A disk-based file management system. Features include user-defined formats, indexing capability on one or two fields, fast sort and search on any combination of fields, and full-screen input and edit. Single keystroke commands allow users to create customized mailing lists, inventory and business records, and customer lists. *(List Price: $200)*

Requires: 64K, one disk drive.

Synapse Software
820 Coventry Rd.
Kensington, CA 94707
(415) 527-7751

EasyFiler

676 A data base management system that allows users to enter, manipulate, and report a variety of data. The system is designed to handle up to 100MB of data (assuming the disk will store that much). *EasyFiler* has its own limited editor, making it possible to create form letters or use the program as a stand-alone mailmerge. Each listing (record) in the data base can have up to 50 items, and any text field may contain up to 255 characters within a maximum record length of 1,000 characters. Seven different field types may be assigned. *(List Price: $400)*

Requires: 64K, two disk drives, 80-column monitor.

Information Unlimited Software
281 Arlington Ave.
Berkeley, CA 94707
(415) 525-9452

Data Handler

677 A data management program that can generate master data files and multiple screens for data input and maintenance. It can generate subfiles, permitting direct access to segments of a data record. Users compute fields of a record and utilize password features. Screen formatting includes reverse display options. It can be used to generate cross-reference directories of data files, reports with subtotals, and mailing labels. *(List Price: $250)*

Requires: 64K, two disk drives.

Comsen Inc.
20-A Erford Rd. #103
Lemoyne, PA 17043
(717) 737-2049

Info-GEN

678 A multikey file management system designed for first-time computer users. It aids the user in defining a master data file and designing its data entry screen. File maintenance, standard report, menu, and utility programs are generated as BASIC programs. The file access is an assembly language subroutine using a binary tree structure; no key or file reorganization is necessary. *Info-GEN* interfaces with the manufacturer's other software packages. (see *Info-SORT* and *Info-REPORTER*). *(List Price: $295)*

Requires: 64K, 80-column monitor, (other requirements not available).

Info-Pros, Inc.
2102 Business Center Dr. #132
Irvine, CA 92715
(714) 851-8975

VisiFile

679 A program that stores business records in a flexible format. It can be used for simple applications such as organizing a mailing list, or complex ones such as inventory management. A single disk stores up to 12 files. A maximum of 32,000 records can be stored within each file. Users with 64K of memory can specify up to 48 fields per record, and users with 256K can specify up to 128 fields. The program is menu driven and includes a help feature to aid user understanding. *VisiFile* is part of VisiSeries, a set of integrated programs by VisiCorp. *(List Price: $300)*

Requires: 64K, one disk drive.

VisiCorp
2895 Zanker Rd.
San Jose, CA 95134
(408) 946-9000

VisiDex

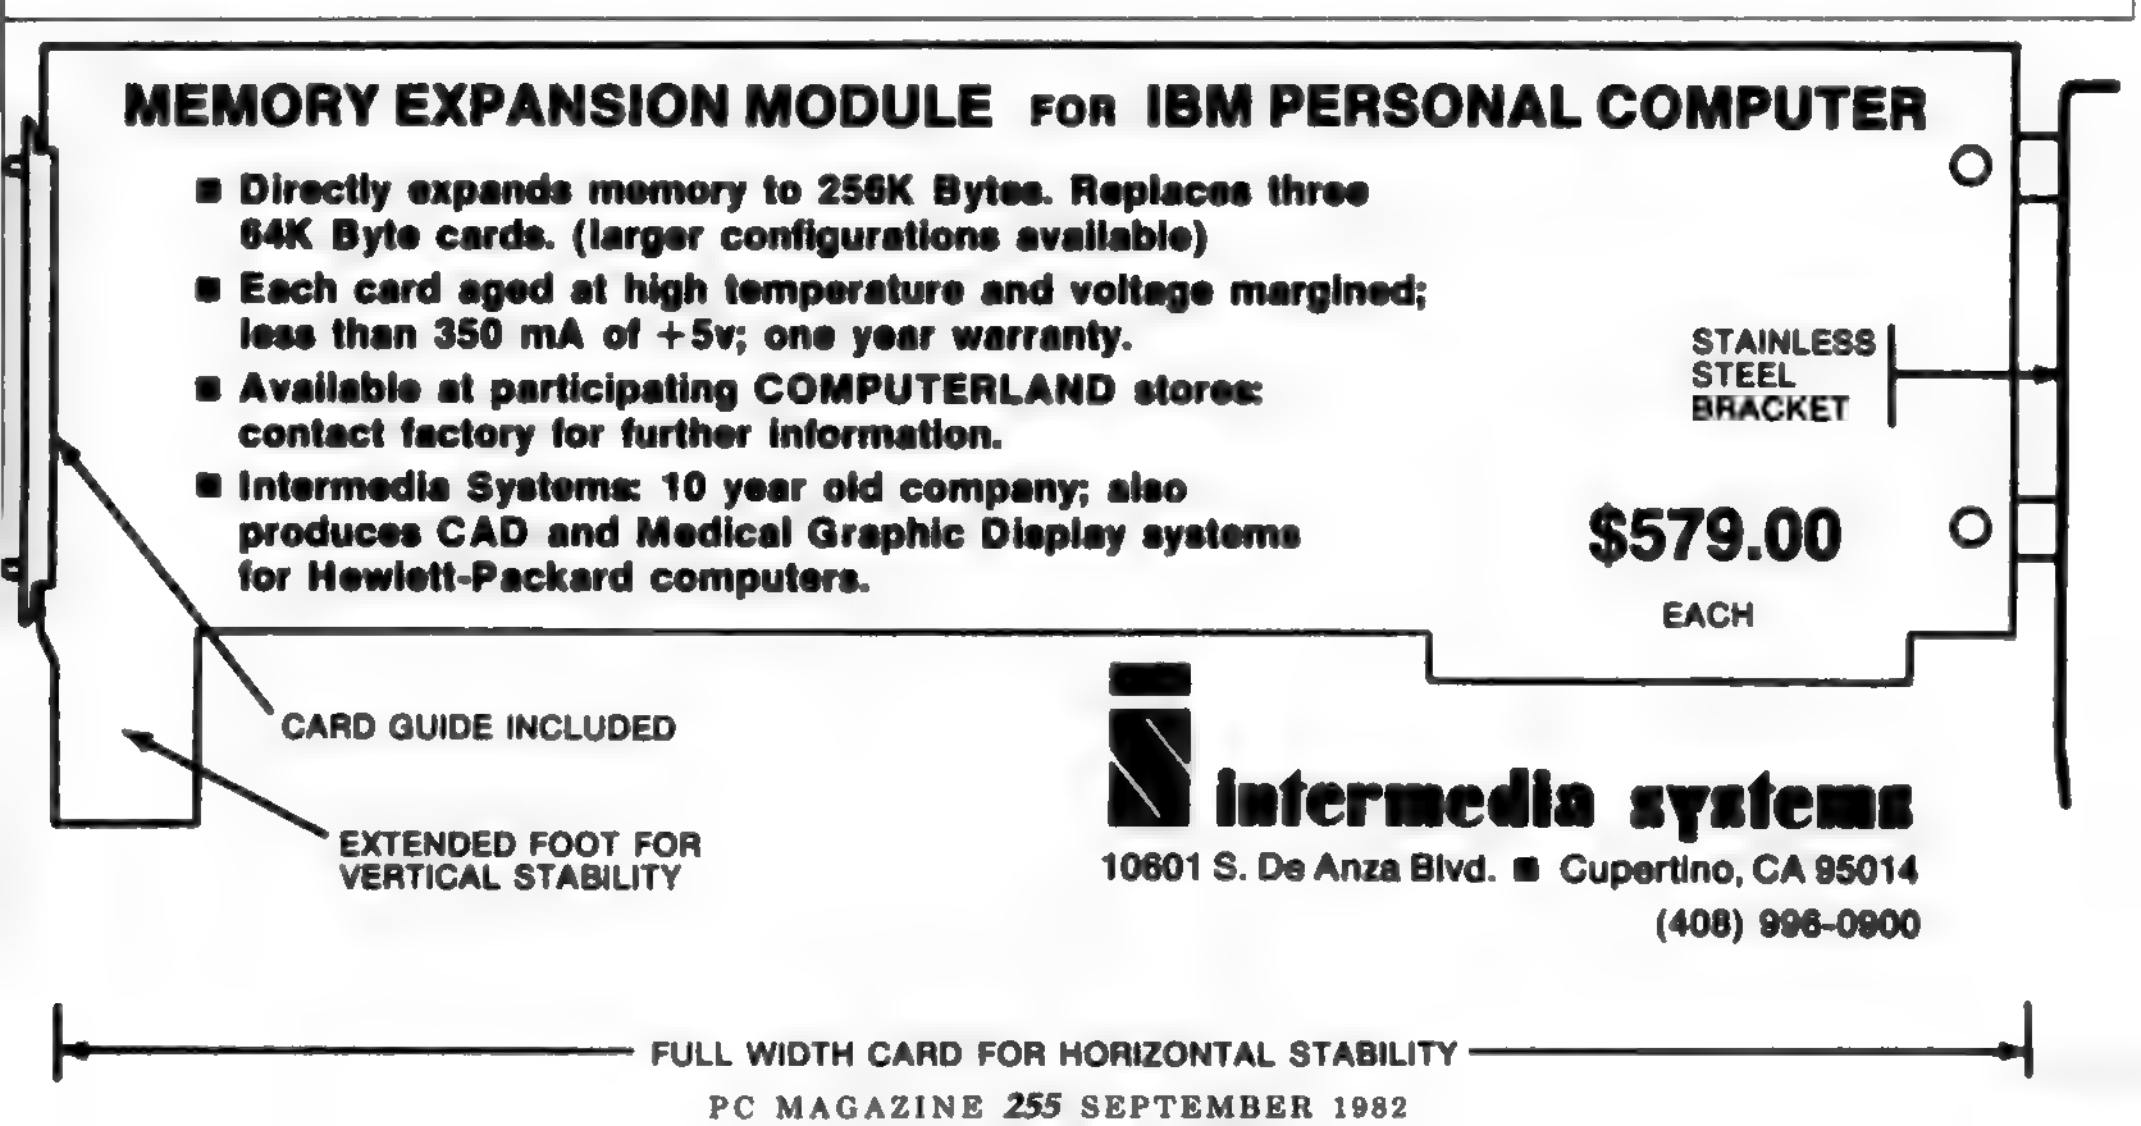

680 A personal business filing system that operates like a set of cross-referenced index cards. Applications include personnel information, sales reports, financial details, or short reports. A template of specific information can be created into which identical sets of data may be entered. Each "card" can be stored on disk and cross-referenced against a number of special words or dates (called "key words"). *VisiDex* is part of VisiSeries, a set of integrated programs by VisiCorp. *(List Price: $250)*

Requires: 64K, one disk drive.

VisiCorp
2895 Zanker Rd.
San Jose, CA 95134
(408) 946-9000

MEMORY EXPANSION MODULE FOR IBM PERSONAL COMPUTER

- Directly expands memory to 256K Bytes. Replaces three 64K Byte cards. (larger configurations available)
- Each card aged at high temperature and voltage margined; less than 350 mA of +5v; one year warranty.
- Available at participating COMPUTERLAND stores: contact factory for further information.
- Intermedia Systems: 10 year old company; also produces CAD and Medical Graphic Display systems for Hewlett-Packard computers.

$579.00
EACH

intermedia systems
10601 S. De Anza Blvd. ■ Cupertino, CA 95014
(408) 996-0900

DATA MANAGEMENT

FlexiData

681 A general purpose data file manager that enables complete development of stand-alone systems. A data dictionary is first created to define and describe data fields. The dictionary is then used to design data entry screens, inquiry displays, and custom reports. Screen, display, and report parameters may be saved and filed for later recall. All parameters may be combined and directly accessed through user-designed menus, thereby bypassing the usual *FlexiData* system prompts.

The system allows entry of conditional criteria to control displays and reports, with run-time prompting for variable parameters. Password access levels can be defined to control both reading and updating files at the field level. A browse option allows files to be searched for information. Defining data fields in the dictionary includes editing options, help messages, and fields that may be calculated from other fields. Either a monochrome or color adapter can be used. *(List Price: $495)*
Requires: 48K, one disk drive, printer.

New Venture Systems
P.O. Box 2141
Chesapeake, VA 23320
(804) 482-1889

QSORT

682 A general purpose sort program capable of sorting any records placed in memory. Used to sort mailing lists, stock instructions, and sample programs, it has a capacity of 8 million records. *(List Price: $25, documentation $3)*
Requires: 64K, one disk drive.

Miracle Computing
313 Clayton Ct.
Lawrence, KS 66044
(913) 843-5863

DataFax

683 A management system that organizes information into folders. Each folder contains individual "pages" of information that can be changed, added to, or deleted. Folders consist of screens and identifying keywords, which allow cross-referencing and file access. Users can expand to a hard disk and upload or download information between other programs. The program is compatible with the communications package, *DataLink*, by the same manufacturer. *(List Price: $299)*
Requires: 64K, two disk drives, 40- or 80-column monitor.

Link Systems
1640 19th St.
Santa Monica, CA 90404
(213) 453-1851

Btrieve

684 A file retrieval system that provides application developers with random and sequential keyed access to records in a data base. It includes an interface via subroutine calls for programs written in BASIC and other high-level languages. Other features include multikey access to an unrestricted number of records, automatic maintenance of key structures, multiple volume files, input/output buffering, built-in file integrity controls, and a set of utilities for file maintenance and creation. *(List Price: $295)*
Requires: 48K, one disk drive.

SoftCraft, Inc.
P.O. Box 66
Melbourne Beach, FL 32951
(305) 725-8665

The Data Handler

685 A program that provides file management in MMSFORTH. The program can address over 500K subfile size, permits all-data disks, and includes sample files and routines for mailing lists and checkbook balancing. *(List Price: $59.95)*
Requires: 48K, one disk drive, MMSFORTH V2.1.

Miller Microcomputer Services
61 Lake Shore Rd.
Natick, MA 01760
(617) 653-6136

T.I.M. III Version 3.2

686 A data base manager that is faster than earlier versions. It provides new features such as global search, a replace option, and a word processing interface with *WordStar/MailMerge, EasyWriter II, Select*, and other word processing programs. New printer options have been added for more diversified system configurations. *(List Price: $495)*
Requires: 64K, two disk drives.

Innovative Software
9300 W. 110th St. #380
Overland Park, KS 66210
(913) 383-1089

Dynaform

687 A program that combines with the *Final Copy* word processor for complete data entry and data management capabilities. Formats are interactively defined, and each file is stored and indexed with a keyed sequential access method (KSAM). Any file or group of files may be selected directly from the editor in *Final Copy* with full sorting powers. *(List Price: $295)*
Requires: *Final Copy*, (other requirements not available).

Ticom Systems Inc.
6015 Scarlett Ct.
Dublin, CA 94566
(415) 829-7550

Sort/Merge

688 A program that sorts sequential or direct files, builds and merges key-index or address-out files, and saves and reuses sort specifications. *(List Price: $65)*
Requires: 64K, two disk drives, Epson or IBM printer.

Professional Software Concepts
P.O. Box 483
Hazelwood, MO 63042

RL-1 Relational Database Management System

689 A DBMS that presents data in tabular format. This allows the user to answer questions by learning selection, projection, and join. The System includes relational data base, query language, relational editor, program interface, and file transfer programs. Several data processing application packages are also available. *(List Price: $495)*
Requires: 96K, two disk drives.

ABW Corporation
P.O. Box M1047
Ann Arbor, MI 48106
(313) 971-9364

MAG/sam

690 A keyed file management system that includes random, sequential, and generic record retrieval access. Other features include multiple key and record deletion with automatic space reclamation. *(List Price: $295; manual only, $25)*
Requires: 32K, one disk drive.

Micro Applications Group
20201 Sherman Way #205
Canoga Park, CA 91306
(213) 700-1426

MAG/base Levels I, II, III

691 A data base management system designed for end users as well as systems developers. Three levels offer progressively sophisticated functions. Multikeyed data files may be created, and reports, forms, and queries may be produced without programming. Written in CBASIC and CB-80, *MAG/base II* and *III* come with an Advanced Report Writer option, a report generator that allows users to read up to five files simultaneously. *(List Price:* MAG/base I *$295;* MAG/base II *$495;* MAG/base III *$795; Advanced Report Writer option $195; manuals only, $35-$55)*
Requires: 48K, 52K, two disk drives (180K each), CP/M-86.

Micro Applications Group
20201 Sherman Way #205
Canoga Park, CA 91306
(213) 700-1426

Before And After You Buy Your IBM Personal Computer

C Magazine is packed with
oformation for everyone inter-
ted in IBM Personal Com-
puters. Each issue brings you
nundreds of colorful pages
ith evaluations, insights, and
straight talk from respected
q.perts—professionals in comput-
e science as well as business, education,
w, and many other fields. PC covers soft-
nare, hardware, applications, and every topic of importance to the thousands of IBM Personal Computer users. For a limited time only, you can subscribe to PC at NO RISK and still receive a 25% discount off the newsstand price. Enter your subscription today. If not satisfied when you receive your first copy, return your mailing label within 15 days for a full refund. Act now so you won't miss an exciting issue. **Send $27 for 12 issues or your Visa or MasterCard number plus expiration date to: PC Magazine, 1528 Irving St., San Francisco, CA 94122.**

WHY A FORMS PROCESSING DATABASE?

Ever since the introduction of low-cost microcomputers, business professionals have asked for a system that lets office workers use the knowledge they have and the procedures they already understand.

The solution has arrived. VersaForm now provides you and your staff with a natural way to use a computer—a forms processing database system.

THE IDEAL WAY TO USE A COMPUTER

Just about any form in your office can provide a familiar and easily mastered interface to a personal computer. Simply copy a form to the computer screen and you're set.

BUILD YOUR DATABASE WITH ANY OF THESE FORMS

- Bill of Materials
- Client Billing
- Freight Documentation
- Insertion Orders
- Insurance Claims
- Inventory Ledgers
- Invoices
- Job Estimates
- Medical Records
- Personnel Histories
- Project Scheduling
- Purchase Orders

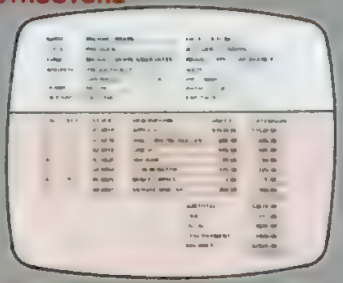

Unlike any other system, VersaForm gets you started on a computer, working the way you're working now . . . you can even use your existing paper forms.

UNIQUELY DESIGNED TO YOUR OFFICE REQUIREMENTS

Most forms have two parts. The form heading contains information that appears only once on each form, like customer name or project number. The transaction region, below, has a variable number of line item entries which might contain quantities, descriptions, unit costs and extensions. These entries require a system that does decimal alignment, tax calculations, subtotals, payments, running balances, and allows you to make changes at any time. Ordinary databases simply can't do it.

All these features and more are yours with VersaForm. A spectacularly useful print formatting capability enhances professional forms management. The magic of print formatting is the ability to produce from a single form in your database, several completely different printed forms. For example, from a patient record you can produce a history chart, an insurance claim, a statement and standard dunning notice.

EVERYDAY BUSINESS FORMS DEMAND A TWO-LEVEL RECORD STRUCTURE—

ONLY VERSAFORM HAS IT.

MANAGEMENT REPORTS IN A HURRY

The real power of a forms processing database is evident with VersaForm's reporting facility. You need only point to the data items within a form you want queried, sorted, counted, subtotalled, and totalled. There's no complicated format to enter—VersaForm automatically produces columnar formats, titled, dated and page numbered.

In just minutes, a detail or summary report is automatically produced. What's more, you can run the report again and again without having to re-enter the instructions.

APPLE II/III IBM PC HARD DISK DATABASE?

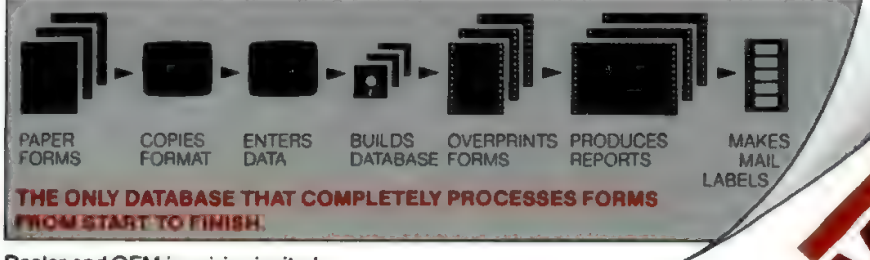

VersaForm supports both floppy and hard disk sub-systems. You can swap data files between different systems through a hard disk-based network. From remote locations data disks can be consolidated into company-wide reports.

OPEN-ENDED SYSTEM.

For special requirements, an optional OEM Pascal Interface provides sophisticated users and software developers with powerful VersaForm tools, allowing direct access to the B-tree indexed database. System integrators can add value by creating templates and writing custom interfaces.

Users say VersaForm is the most powerful and easy to use system around. That's because it's more than just a database; it's a true Business Form Processor.

See VersaForm today at your local computer store.

THE ONLY DATABASE THAT COMPLETELY PROCESSES FORMS FROM START TO FINISH.

Dealer and OEM inquiries invited

VersaForm™

Applied Software Technology
14125 Capri Drive
Los Gatos, CA 95030
408/370-2562

DATA MANAGEMENT

FABS/PC

692 An enhanced version of the FABS and FABS-II. This DOS-compatible 8086/8088 assembly language subroutine is designed to provide rapid access to large data files (up to 65K records depending on key size) and 512-byte nodes. Average access time is one second or less.

Variable length keys and duplicate keys are supported. Multiple primary keys can be maintained in a single tree providing primary access to data files on more than one key. ASCII keys can be specified, up to 100 bytes. Integer keys (0 to 65535) can be specified to occupy only two bytes in the tree. Multilevel sequencing is supported.

The program can be automatically loaded and made resident for use at any time by IBM BASIC. Data record keys are maintained in a key-sequential, multipath, balanced tree structure. SEARCH NEXT and SEARCH PREVIOUS commands provide sequential access to data files at several keys per second.

An extra name and address file in BASIC NAMADD is included as a usable example for applications programs. *(List Price: $195)*

Requires: 64K, (other requirements not available).

Computer Control Systems, Inc.
298 21st Terrace S.E.
Largo, FL 33541
(813) 586-1886

Condor Series 20

693 A data management program that contains the entry level *Series One* and *Series Two* programs. *Series 20* was written so first-time users could create programs. The program aids in simplifying information processing, inventory control, accounting functions, sales forecasting, personnel reporting, and other business applications.

Users can develop a completely menu-driven applications system without additional software or programming, and design custom applications programs in which the DBMS programs operate transparently.

The *Series One* entry level subset consists of a single file for transaction processing capabilities. *Series Three* allows for multiple-file and transaction processing. It includes the Condorquery feature for allowing up to eight data items as an index for a data base. *(List Price: $995)*

Requires: 80K, two disk drives, CP/M-86 or MS-DOS.

Condor Computer Corporation
2051 S. State St.
Ann Arbor, MI 48104
(313) 769-3988

Total Information Management (T.I.M.)

694 A data base management system that generates and summarizes files, mailing lists, and employee records. The data can be accessed and searched in a number of ways. *T.I.M.* provides help screens and function key legends as user aids. Capacities include 32,767 records per file, 40 fields per record, and 60 characters per field. *(List Price: $500)*

Requires: 64K, one disk drive, parallel printer.

Innovative Software, Inc.
9300 W. 110th St. #380
Overland Park, KS 66210
(913) 888-0154

Dataentr 200

695 A set of subroutines added to an application program to simplify programming and improve operational characteristics of keyboard data entry. A data entry form is "drawn" on the display screen. The subroutines use this as the only program necessary to control the application-keyed data entry.

After the complete screen of data has been entered, the system pauses for visual verification of data. If corrections are necessary, keying the field number allows the single field to be reentered. When the operator is satisfied all data has been input correctly, the Enter key releases data for the application program to process. *(List Price: $80)*

Requires: 64K, one disk drive.

Johnson Associates Software
P.O. Box 3069
Redding, CA 96049
(916) 221-0740

Easydata

696 A data base management program that allows information to be entered, retrieved, deleted, or displayed in report form. Processors within the system perform utility functions and protect the integrity of the files within the system. The program uses BASIC, but files written under *Easydata* can be used with other software, regardless of language.

The files are organized as random files using the binary tree linking structure as the data access method. Key fields defined in a record structure are automatically linked when a record is added or updated. This technique eliminates the need to sort or arrange a file when data is extracted or reported. *(List Price: $250)*

Requires: 64K, two disk drives, (printer optional).

Norell Data Systems Corporation
3400 Wilshire Blvd.
P.O. Box 70127
Los Angeles, CA 90010
(213) 257-2026

Info-REPORTER

697 A report-writer program designed for novices who wish to create, replace, or delete reports associated with a data file. After reports are designed by the user on the screen, a BASIC program is generated. Users with some BASIC programming knowledge can add additional statements to the report program.

Info-REPORTER outputs selectively to a parallel or serial printer, asynchronous communications port, or screen. Users specify printing for report titles; column headings and format; detail lines, content, and format; and total lines, content, and format. Multiple files can be used for input and output. Multiple levels of control breaks based on input or calculated data, with automatic totaling, subtotaling, and averages can be specified. Multiple file access methods are included. The program interfaces with *Info-SORT* and *Info-GEN* from the manufacturer. *(List Price: $195)*

Requires: 64K, 80-column monitor, (other requirements not available).

Info-Pros, Inc.
2102 Business Center Dr. #132
Irvine, CA 92715
(714) 851-8975

ISAM Database

698 The *ISAM* (Indexed Sequential Access Method) provides keyed access to data files for reading, writing, updating, and deleting records within a file. *ISAM* sorts, searches, updates, and provides dynamic disk space management. It supports record buffering, searching in both forward and backward, and access of up to seven *ISAM* files. A complete name and address program shows file statistics, addition, deletion, updating of records, and open/close file capabilities. *(List Price: $69.95)*

Requires: 48K, one disk drive.

Ensign Software
2312 N. Cole Rd., Ste. E
Boise, ID 83704
(208) 378-8086

Selector V

699 A self-contained triad that permits users to manage multiple file applications. The program includes two report generators that permit users to produce self-compacting labels up to eight on a line and multipage invoices or sales orders without line number limit, and with unlimited cross-referencing. The program must operate with Baby Blue, which requires an additional 64K of memory.

(List Price: $495)

Requires: Baby Blue, 48K, one disk drive.

Micro-AP, Inc.
7033 Village Pkwy. #206
Dublin, CA 94566
(415) 828-6697

DATA MANAGEMENT

Management Information System Builder

700 Software that is designed to enable nonprogrammers to build management information applications. The program includes data entry, query, report generation, data file listing, and sorting capabilities. Written in APC BASIC. *(List Price: Not available)*

Requires: 64K, two disk drives, APC BASIC.

American Planning Corporation
4600 Duke St. #423
Alexandria, VA 22304
(703) 751-2574

Name Directory

701 A data base management program capable of storing 1,200 records on a single disk. It produces mailing labels, record lists, and index-card copy according to user-defined catalog codes. It also sorts geographically by area codes, states, zip codes, or partial zip codes. When searching or write/editing records, information is displayed on the screen in an index-card format. The menu directory selection allows the user to search for a name, record groups, print list or mailing labels; write/edit records; and initialize new disks. Other features include interactive operator prompts and security lock for access. *(List Price: Not available)*

Requires: 16K, one disk drive, printer.

Tarrtec Enterprises
P.O. Box 81
Commack LI, NY 11725
(516) 543-6579

SEED-16

702 A data base management system under which both network and relational views of a user's data base are supported. It allows users to maintain an integrated data base for expansion of software systems, such as adding a record for another program to utilize without revising existing programs. Data is kept consistent and secure while passwords can protect the privacy of any portion of a data base.

A *Seed-16* data base can be accessed by programs written in FORTRAN, COBOL, or Pascal. Users can also use the Harvest query language or the Bloom report writer. *(List Price: $1,495, Harvest $745, Bloom $745)*

Requires: 192K, two floppy disk drives, (hard disk drive recommended).

Micro Decisionware
4890 Riverbend Rd.
Boulder, CO 80301
(303) 443-2706

R/DOS

703 An operating system that supports a relational data base. The user can create records of varying lengths (65K maximum) that contain a variable number of attributes, values, and subvalues. R/DOS handles the physical storage and recall of data, and provides users with a data dictionary for each file. Each dictionary entry associates a word with the relationship being defined, allowing the user to specify data, and allowing the PC to decide how it is to be done.

R/DOS supports up to 128K, printer and adapter, and additional disk storage, either floppy or hard. *(List Price: $300 for a transferable license to use the program on a single machine)*

Requires: 64K, one disk drive, serial interface.

Cosmos Inc.
10626 148th Ave. SE
Renton, WA 98056
(206) 226-9362

ViewData

704 A menu-driven program that includes interactive help manuals built into the software for overview and quick reference. The program supports multiple user-defined data tables and can be used to input/output forms. The forms serve as a window into the data table and are used to enter, browse, change, and print information. Since many different forms can be created for each table, each user can see the data table differently.

Other features include user-definable record size, field type, and width. User-defined print formatting is available for custom reports. Information can be retrieved in ascending and descending order.

Indexes are created for each data table on major and minor key fields. The program supports full read, write, and modify data security and includes backup, copy, and recovery capability. The program can support up to 40 fields per record and 26 forms per file.

Full support for hard disk drives and an optional Query Language are included. Query Language features include English-like commands, computed fields, increased report generation flexibility, batch posting and updating, and telephone communication between data bases. *(List Price: $225 including manual; manual only, $19.95; Query Language $75)*

Requires: 64K, two disk drives, (printer recommended).

Insoft, Inc.
10175 S.W. Barbur Blvd. #202B
Portland, OR 97219
(503) 244-4181
Source: ST1765

File Master

705 A comprehensive file maintenance program that allows users to define a file and maintain data in the file via full-screen displays. The record-oriented functions include add, change, delete, view, and append (automatic add). Record selection criteria can be specified for the find and print functions, which display records matching the search criteria and produce a user-customized sorted report respectively. Other functions include file statistics, initialization, reorganization, and support of DIF (*VisiCalc*) files. *(List Price: $79.95)*

Requires: Not available.

N.F. Systems
P.O. Box 76363
Atlanta, GA 30358
(404) 252-3300

Datamaster

706 A data base management system that provides variable-length records, user-defined input and report formats, reformatting, or previously entered data records. *(List Price: $800)*

Requires: 128K, two disk drives, printer.

MicroCorp
913 Walnut St., P.O. Box Q
Philadelphia, PA 19107
(215) 627-7997
Source: TCM033
CompuServe: 70335,1027

LogiCalc

707 A spreadsheet program that contains built-in financial functions such as linear regression, present value, depreciation, and consolidation operations. Conditional expressions allow "what if" processing to be used with relational and logical operators. Features include column formatting for manipulating column width and column precision, and a dump utility allowing users to obtain a hard copy of the model to facilitate audit trails. The Merge command allows two or more files to be combined, and the Print command allows output parameters to be varied according to user specifications.

If the report being printed exceeds the width of the printer, *LogiCalc* automatically splits the report into two or more pages, which can be laid side by side to form the complete report. *LogiCalc* interfaces with the manufacturer's *LogiQuest* (a relational data base), *Asset* (an accounting package), and a word processing program. *(List Price: $190)*

Requires: 64K, one disk drive.

Software Products International
10343 Roselle St., Ste. A
San Diego, CA 92121
(714) 450-1526

LogiQuest III

708 A relational data base that uses a subset of IBM's SQL relational query language and offers single and distributed processing capabilities. Features include multiple file processing, a user-definable screen mask (displaying up to eight pages per record), an arithmetic expression evaluator that combines fields in formulas, and "what if" conditional expression processing on selected fields.

The program scans for records containing partial information and finds records that qualify on a variety of search criteria, using relational and logical operators with multiple files. It also sorts records using up to 15 key fields. A report generator lets users define report formats, headings, page footings, subtotals, and level breaks. A built-in arithmetic and logic processor enables users to custom design specific reports. *LogiQuest III* interfaces with *LogiCalc* and *Asset*, also by Software Products International. *(List Price: $550)*

Requires: 64K, one disk drive.

Software Products International
10343 Roselle St., Ste. A
San Diego, CA 92121
(714) 450-1526

FileClerk

709 A data base management system that permits the creation of records up to 1,250 characters long, with user specification of as many fields within each record as desired. The user defines all fields and can choose to have records indexed or nonindexed. The program also handles numeric calculations up to 250 digits, and automatically creates a backup file for all records. *(List Price: $50)*

Requires: 48K, one disk drive, (printer recommended).

Software Laboratories, Inc.
6924 Riverside Dr.
Dublin, OH 43017
(800) 531-1309, (614) 889-5083

Comdat

710 A data base management system that permits the user to define entry and maintenance screens to a sequential, direct, or keyed data file. It generates reports and mailing or all-purpose labels. *(List Price: $250)*

Requires: 64K, one disk drive.

Comsen Inc.
20-A Erford Rd.
Lemoyne, PA 17043
(717) 737-2049

Mini Data Base Manager

711 A data base management program that sorts and edits up to three files of 100 records each. The files may be user-defined. *(List Price: $10)*

Requires: 48K, one disk drive.

Software Laboratories, Inc.
6924 Riverside Dr.
Dublin, OH 43017
(800) 531-1309, (614) 889-5083
CompuServe: 71535,1670

KeyWord in Context Reference (KWIC-REF)

712 A program that cross-references text for later retrieval by key word combinations. It has the capacity of 32,000 files and 32,000 key words, allowing thousands of cross-references. An on-line tutorial makes it easy to learn. *(List Price: $495)*

Requires: 64K, two disk drives, (hard disk recommended).

Chen Information Systems, Inc.
1499 Bayshore Hwy. #205
Burlingame, CA 94010
(415) 692-4358

Physician Office System (POS/1)

713 An accounts receivable system designed for easy learning and use. It is entirely menu-driven with full-screen data entry and correction capability. *(List Price: $950)*

Requires: 64K, two disk drives.

Chen Information Systems, Inc.
1499 Bayshore Hwy. #205
Burlingame, CA 94010
(415) 692-4358

dBASE II

714 A relational data management tool to help experienced and novice users construct and manipulate numeric and character information files. This English-like program-building language allows for sort, edit, or display of data base information directly from the keyboard. Users can also write menus and programs to support specific applications including general ledger, accounts receivable, accounts payable, sales-tax record, payroll, mailing labels, and inventory control. Full-screen editing includes Zip, a screen-formatting generating program. A 350-page manual, demo disk, and full system disk are also included. After-sales support is provided by user groups and dealers. *(List Price: $700)*

Requires: 128K, one disk drive, CP/M-86 or DOS.

9929 W. Jefferson Blvd.
Culver City, CA 90230
(213) 204-5570
Telex: 499-0285

FOR TRS-80 MODEL I OR III
IBM PERSONAL COMPUTER

★ **MORE SPEED**
10-20 times faster than interpreted BASIC

★ **MORE ROOM**
Very compact compiled code plus VIRTUAL MEMORY makes your RAM act larger. Variable number of block buffers. 31-char -unique wordnames use only 4 bytes in header!

★ **MORE INSTRUCTIONS**
Add YOUR commands to its 79-STANDARD-plus instruction set!
Far more complete than most Forths: single & double precision, arrays, string-handling, clock, graphics (IBM low-res. gives B/W and 16 color or 200 tint color display)

★ **MORE EASE**
Excellent full-screen Editor, structured & modular programming
Word search utility
THE NOTEPAD letter writer
Optimized for your TRS-80 or IBM with keyboard repeats, upper/lower case display driver, full ASCII.

★ **MORE POWER**
Forth operating system
Concurrent interpreter AND Compiler
VIRTUAL I/O for video and printer, disk and tape
(10-Megabyte hard disk available)
Full 8080 or 8088 Assembler aboard
(Z80 Assembler also available for TRS-80)
Intermix 35- to 80-track disk drives
IBM can read, write and run M.3 Disks
M.3 can read, write and run M.1 disks

MMSFORTH

THE PROFESSIONAL FORTH SYSTEM FOR TRS-80 & IBM PC

(Thousands of systems in use)

MMSFORTH Disk System (requires 1 disk drive, 32K RAM)
V2.0 For Radio Shack TRS-80 Model I or III $129.95*
V2.1 For IBM Personal Computer (80-col screen) . $249.95*

AND MMS GIVES IT PROFESSIONAL SUPPORT

Source code provided
MMSFORTH Newsletter
Many demo programs aboard
MMSFORTH User Groups
Inexpensive upgrades to latest version
Programming staff can provide advice, modifications and custom programs, to fit YOUR needs

MMSFORTH UTILITIES DISKETTE includes FLOATING POINT MATH (BASIC ROM routines plus Complex numbers, Rectangular-Polar coordinate conversions, Degrees mode, more) a powerful CROSS-REFERENCER to list Forth words by block and line; plus (TRS-80) a full Forth-style Z80 assembler requires MMSFORTH V2.0, 1 drive & 32K RAM)..... $39.95*

FORTHCOM communications package provides RS-232 driver, dumb terminal mode, transfer of FORTH blocks, and host mode to operate a remote FORTHCOM systems (requires MMSFORTH V2.0, 1 drive & 32K RAM) $39.95*

THE DATAHANDLER: a very fast database management system operable by non-programmers (requires MMSFORTH V2.0, 1 drive & 32K RAM) $59.95*

FORTHWRITE: fast, powerful Word Processor w/easy keystrokes, Help screens, manual & demo files. Full proportional w/tabs, outdenting. Include other blocks, documents & keyboard inputs— ideal for form letters (requires MMSFORTH V2.0, 2 drives & 48K RAM) $175.00*

MMSFORTH GAMES DISKETTE: real-time graphics & board games w/source code. Includes BREAKFORTH, CRASHFORTH, CRYPTOQUOTE, FREEWAY (TRS-80), OTHELLO & TICTACFORTH (requires MMSFORTH V2.0, 1 drive & 32K RAM) $39.95*

Other MMSFORTH products under development

FORTH BOOKS AVAILABLE

MMSFORTH USERS MANUAL - w/o Appendices $17.50*
STARTING FORTH: best! $15.95*
THREADED INTERPRETIVE LANGUAGES - advanced, analysis of FORTH internals $19.95*
PROGRAM DESIGN & CONSTRUCTION - intro. to structured programming, good for Forth $16.00*
FORTH-79 STANDARD MANUAL - official reference to 79-STANDARD word set, etc $13.95*
FORTH SPECIAL ISSUE, BYTE Magazine (Aug. 1980) - A collector's item for Forth users and beginners $4.00*

ORDERING INFORMATION: Software prices include manuals and require signing of a single computer license for one-person support. Describe your Hardware. Add $2.00 S/H plus $3.00 per MMSFORTH and $1.00 per additional book. Mass. orders add 5% tax. Foreign orders add 20%. UPS COD, VISA and M/C accepted, no unpaid purchase orders or refunds.

DATA MANAGEMENT

Super Index

715 Indexing that lets the computer be used as if it were a keyed file system. The user types in a key for the information to be stored, and then up to ten lines of data, which can be accessed in a variety of ways. *(List Price: $45; manual only, $10)*

Requires: 48K, one disk drive, (printer optional).

Metamorphics, Inc.
154 Montgomery Ave.
Bala Cynwyd, PA 19004
(215) 668-9000

Database Management

716 A data base management program that allows the user to define and manipulate files of any description. *(List Price: $49.95; documentation only, $15)*

Requires: 64K, one disk drive.

Howe Software
14 Lexington Rd.
New City, NY 10956
(914) 634-1821

Jinsam Executive

717 A data base management system that can accommodate almost any application. A simple five-letter file name can set in motion the production of reports, letters, billings, sales or research analyses, and modeling. Several users can access the data base to perform different tasks simultaneously. Five levels of password entry operate, and information can be restricted to one or two computers. It features 65,000 records of almost any length, an unlimited number of fields, an automatic calculator, and a free-form report generator. *(List Price: $795–$1,295 depending on options)*

Requires: 128K, two disk drives or one hard disk drive.

JINI Micro-Systems, Inc.
P.O. Box 274
Riverdale, NY 10463
(212) 796-6200

MDBS III

718 Data base management facilities with a free-form data description language that supports nine types of data items, data compression, data encryption, feasibility range checking, multiple relationships between record type pairs, and numerous performance control features. It is intended for serious application developers. *(List Price: $3,120)*

Requires: 64K, one disk drive.

ISE-USA
350 W. Sagamore Pkwy.
West Lafayette, IN 47906
(317) 463-4561

File-It

719 A menu-driven program designed for small to medium data storage needs. The program contains all the options of a data base package. Sorting, searching, and report generation are standard features and require no additional software or costs. The program can be used for keeping track of inventory records, parts lists, name/address/phone lists, and Rolodex systems. It is also compatible with hard disk drives with no modifications. Features include the ability to add data to files, and recall data by record number or item with an option to print. *(List Price: $75)*

Requires: 64K, one disk drive, 80-column monitor.

CMC Microproducts, Inc.
P.O. Box 220511
Charlotte, NC 28222
(704) 365-1481
Source: TCS818

The Formula

720 Data management software in which the user chooses from menu screens to create free-format reports, job streams, operator menus, and data base systems complete with data entry, logical and arithmetic data manipulation, and sorts. Designed to incorporate programming, analysis, and system design skills so business people, consultants, and others can easily use the system. It also includes documentation, configurability, and interface ability. *(List Price: $595; manual only, $60)*

Requires: 48K, two disk drives, DOS or CP/M-86, 80-column monitor.

Dynamic Microprocessor Associates
545 Fifth Ave.
New York, NY 10017
(212) 687-7115

Data Base Manager

721 A program that allows information to be accessed and searched by zip code, date, or region. It saves up to ten custom-designed reports and features "Soundex" phonetic search, which allows the user to locate a name or address without knowing the correct spelling. *Data Base Manager* holds up to 1,400 records per disk with DOS 1.0 and up to 2,800 records with DOS 1.10. An instructional tape accompanies the program. *(List Price: $185)*

Requires: 64K, two disk drives, (printer recommended).

Alpha Software Corporation
6 New England Executive Park
Burlington, MA 01803
(617) 229-2924

KSAM/PC (Keyed Sequential Access Method)

722 A keyed index file system that may be merged into a BASIC program and called using simple GOSUB from BASIC. It allows the user to key or index files by a meaningful field stored on disk and offers rapid random access to any record in the file by key field. Commands include Create, Open, Close, Read, Read Next, Write, Rewrite, Delete, and Kill. *(List Price: $69.95)*

Requires: 32K, one disk drive.

PRODATA Inc.
663 S. Capital Blvd.
Boise, ID 83702
(208) 342-6878

WORD PROCESSING / TEXT EDITING

PowerText

723 A comprehensive word processing system with stored format files to define correspondence styles. The system does all layout automatically with no limit to document length. *PowerText* supports virtually all printer functions and printers. Form-letter capability, automatic cover pages, and table of contents ability are provided along with automatic pagination, header and footer generation, and proper placement of closing material. A bootable system supports extended memory, RAM disk, double-sided double-tracking drives, and serial printer interfaces. No other software is needed. *(List Price: $399)*

Requires: 64K, two disk drives, printer.

Beaman Porter, Inc.
Pleasant Ridge Rd.
Harrison, NY 10528
(914) 967-3504

Window

724 A full-screen text editor that makes extensive use of the PC's screen and keyboard. All keys on the PC keyboard are fully supported. Users can create or edit text documents, correspondence, or programs in any of the popular programming languages.

Features supported include all cursor movements, scrolling in four directions, search and replace, insert and delete characters and lines, move and copy text, split and join lines, text files larger than available memory, and fully descriptive messages. *(List Price: $200 including documentation)*

Requires: 64K, one disk drive.

Intellect Associates, Inc.
P.O. Box 365
Holbrook, NY 11741
(516) 472-4449

Vedit

725 A full-screen editor that continuously displays the contents of the file the user is editing. Function keys enable the user to delete a character, word, partial or entire line, or to move a block of text to another place. The user determines keyboard layout and may use any available cursor and function keys. *Vedit* is also suitable for simple word processing and may be used with any popular text processor. *(List Price: $195; manual only, $15)*

Requires: 64K, one disk drive, DOS or CP/M-86.

CompuView Products, Inc.
1955 Pauline Blvd. #200
Ann Arbor, MI 48103
(313) 996-1299

WordStar

726 A screen-oriented word processing program that allows text entries and revisions to be displayed on the screen during typing as they will appear in print. *WordStar* has editing features including automatic text justification, automatic paragraph indentation, simultaneous printing and editing, and page-break displays. Text can be inserted, deleted, moved, copied, or read from files. Other *WordStar* features include help menus, horizontal scrolling, and column move. *(List Price: $495)*

Requires: 64K, printer, two disk drives.

MicroPro International Corporation
33 San Pablo Ave.
San Rafael, CA 94903
(415) 499-1200
Telex: 340-388

Wordix

727 A text formatter featuring automatic hyphenation, footnote placement, chapter and section numbering, table of contents generation, and user-defined macros and data base access and merging. *(List Price: $195)*

Requires: 96K, one disk drive, printer.

Emerging Technology Consultants, Inc.
P.O. Box 154
Louisville, CO 80027
(303) 666-9472

Formlet

728 A program that aids users in preparing form letters from a selection of prewritten and stored stock paragraphs. The program can store up to 10 letters on disk, and users may select among them at will. Users can also intermix fresh text. *(List Price: $57.95)*

Requires: 64K, one disk drive.

Contract Services Associates
706 S. Euclid
Anaheim, CA 92802
(714) 635-4055

Perfect Companion Full-Screen Editor

729 A file editing system that uses a full editing command set and true full-screen capability. Written in 8088 machine language. *(List Price: $325)*

Requires: 64K, one disk drive.

Software Innovations, Inc.
5505 Blair Oaks
P.O. Box 74815
Lewisville, TX 75056
(214) 370-8601

Mince, Scribble, FinalWord

730 *Mince* is a full-screen editor with an automatic virtual memory scheme and multiple buffers and windows for displaying and editing more than one file. It has automatic deletion recovery of text that has been deleted by the commands that work on words, lines, sentences, paragraphs, or user-defined regions.

Scribble is a formatter that allows users to choose a particular text format from numerous format options. It can also generate a table of contents with five levels of numbering, footnotes, indices, and appendices.

FinalWord is an integrated word processor that incorporates all the above features. New features include eight help menus to explain editing functions, walk-through lessons for document productions, state-save and crash recover that allow users to exit programs at any point without saving or writing the file and reentering the text intact in the buffer. *(List Price:* Mince *and* Scribble *$175 each, both $300,* FinalWord *$300)*

Requires: 64K, two disk drives.

Mark of the Unicorn
P.O. Box 423
Arlington, MA 02174
(617) 489-1387

The Programmer

731 A menu format that aids both experienced and nonexperienced BASIC programmers. Those who are familiar with BASIC can write commands using the package. Nonexperienced programmers can use the menu format to create programs. The menu provides questions and a list of available choices. *The Programmer* aids in developing and updating mailing lists, keeps track of catalog items, and serves as a graphics generator program. It can also create sounds or music, customize small-business accounting systems, interface with another computer device, or serve as a word processing program to print reports. *(List Price: $495)*

Requires: 64K, two disk drives.

Advanced Operating Systems
450 St. John Rd.
Michigan City, IN 46360
(800) 348-8558, (219) 879-4693

Star-Edit

732 A screen editor suitable for any text processing task including program writing and word processing. The editor can be learned easily by both programmers and nonprogrammers. *(List Price: $225; manual only, $15)*

Requires: 32K, one disk drive, CP/M-86 or DOS.

Supersoft, Inc.
P.O. Box 1628
Champaign, IL 61820
(217) 359-2112, 359-2691
Telex: 270-365

Write-On!

733 Word processing software with many formatting and printer commands that enable the user to easily type, edit, and print documents. The program automatically dates letters, maintains mailing lists, generates form letters, and works with most spelling checkers. Users can insert variables into documents during printing. A conversion program enables users to work with a mailing list on another system. Underlining and boldface work can be performed on Epson printers. *(List Price: $129.95)*

Requires: 64K, one disk drive, printer.

Datamost, Inc.
9748 Cozycroft Ave.
Chatsworth, CA 91311
(213) 709-1202

Super Editor

734 A full-screen editor that allows users to make changes to source code or word processing text on any line on the CRT screen. Features include full cursor positioning controlled from the keyboard; scrolling up or down; inserting lines and block copy; move, delete, and exclude commands. The program is written in assembly language. *(List Price: $55 including program disk and manual; manual only, $7)*

Requires: 48K, one disk drive, 80-column monitor.

Frank Schiele Software
1375 Tobias Dr.
Chula Vista, CA 92011
(714) 420-9860

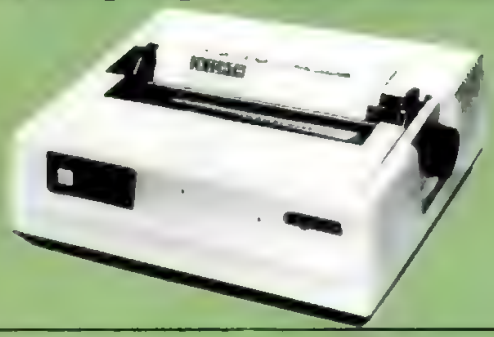

ProText

735 A text processor that uses 1- and 2-character commands to format text. Features include justification, centering, and print specifications. *(List Price: $75)*

Requires: 48K, (printer recommended).

ProActive Systems Corporation
505 Channing Ave.
Palo Alto, CA 94301
(415) 326-2722

Microline 82A DOT MATRIX PRINTER

$439.88 UPS DELIVERED

- 120 cps, bi-directional, logic-seeking print action
- Parallel & RS-232C interfacing standard
- True descenders on 9x9 matrix, full 96 character ASCII
- Program-selectable pitch, emphasis, & linespacing
- Rear & bottom paper paths take four-part forms

HHE SOFTWARE SOCIETY

Whether you're a first-time or vetran IBM PC user, you need a break on software prices. A **real** break. We took discount pricing one step further and created **The Software Society**. Members purchase software from us and earn up to 10% off our existing 10-?i% discounts for IBM PC software.

MMemberships usually cost $25—but until October 31st, 1982, readers of **PC** are invited to join **The Software Society** without charge. Simply mention this advertisement and a free membership is yours with your first purchase.

HHere's how **The Software Society** works:

WWhen you buy $300 worth of software, you receive 2% off on your next software purchase. Accumulate $600 in purchases, and you get a 4% discount. You get 6% after $900, and 8% at $1200. Once you've purchased $1500 worth of software, you have a standing 10% discount on **all** your IBM PC software purchases.

JLets imagine a **Software Society** member buys Micro Pro's **WordStar** ($495 list) for $384.88. He then receives 2% off on his next purchase: **MailMerge** ($150 list) for $124.88 less 2% (**$122.38**). If he purchases MicroLab's **Tax Manager** ($250 list) at $209.88, less 2% (**$205.68**), he's accumulated $712.94, putting himself in the 4% bracket. Add Visicorps **Visicalc** ($250 list) at $209.88, less 4% (**$201.48**), and his total is $914.42, placing him in the 6% discount bracket. Now add **VisiTrend/Visiplot** and **Desktop Plan I** ($600 list) at $499.76, less 6% (**$469.77**), and he's accumulated $1384.19 in purchases, which puts him in the 8% discount bracket. After accumulating $1500 of software, he'll get 10% off **all** purchases, like Innovative Software's **T.I.M. III** ($700 list) at $404.88 less 10% (**$364.39**), and Denver Software's **EASy** ($725 list) at $584.88, less 10% (**$526.39**)—that's over 25% off list price.

Software Society members save without obligation or risk. There are no annual dues, no minimum number of purchases, and no limit on your software discount. Further, there are no hidden charges: no 2% for handling, no 3-4% for credit cards, no 4-5% shipping, etc...you pay one price, and we pay UPS ground shipment on **all** orders. For your protection, **THE BOTTOM LINE** is a member of the Direct Mail Marketing Association.

Memberships will be FREE, through October 31st, to all readers of **PC** with their first purchases. Remember to mention this ad: membership is available only upon request and is not automatically issued with a first purchase. Our normal terms apply to **Software Society** members (see below).

Invest in IBM software today, and take a well-deserved break on software prices tomorrow. Become a **Software Society** member.

WORD PROCESSING / TEXT EDITING

Wordflex

736 A word processing program designed to take advantage of the specific features of the IBM Personal Computer, including its large addressing space and special function keys. It can be used with a high-resolution color monitor and can access 512K. *(List Price: $140)*

Requires: 96K, one disk drive.

Nemco
9 Walnut St.
Rutherford, NJ 07070
(201) 933-4933

Electronic Memo Register/ Tickler

737 A package that allows users to store memos electronically. The user types in a message and then assigns a date for its reappearance. Memos can be retrieved for a particular day or for an entire month. When updating a memo, only new information is typed in; the new data is automatically added to the old. *(List Price: $44.95; manual only, $10)*

Requires: 32K, one disk drive, 80-column monitor, (printer optional).

Metamorphics Inc.
154 Montgomery Ave.
Bala Cynwyd, PA 19004
(215) 668-9000

WordPlus

738 A word processing program that makes use of IBM PC function keys. It displays underlining and boldfacing on screen. A user-oriented learning guide is provided, and toll-free customer support lines are available for calls. *(List Price: $295)*

Requires: 64K, one disk drive.

Professional Software, Inc.
51 Fremont St.
Needham, MA 02194
(617) 444-5224

Wordnet86

739 A word processing program that incorporates data entry and text data merge capabilities. Using all the IBM PC's function and cursor control keys, its features include horizontal scrolling, block move and copy, search and replace, and numeric tabbing. Disk file handling, printed system interaction, and help files are menu driven. *(List Price: $395)*

Requires: 64K, two disk drives, printer.

Monoson MicroSystems, Inc.
51 Main St.
Watertown, MA 02172
(617) 924-2124

Text Master

740 A document formatter or text processor that allows users to print letters, documentation, and formatted program listings using simple commands. Approximately 40 commands control page layout such as margins and headings. It has text control for formatting, centering, and variable type fonts; variables for customizing letters are also included along with indexing and tables of contents. DOC is intended for users who can use a text editor to create the needed input files. The program supports different printers through a user-selectable control file. *(List Price: $99.95)*

Requires: Not available.

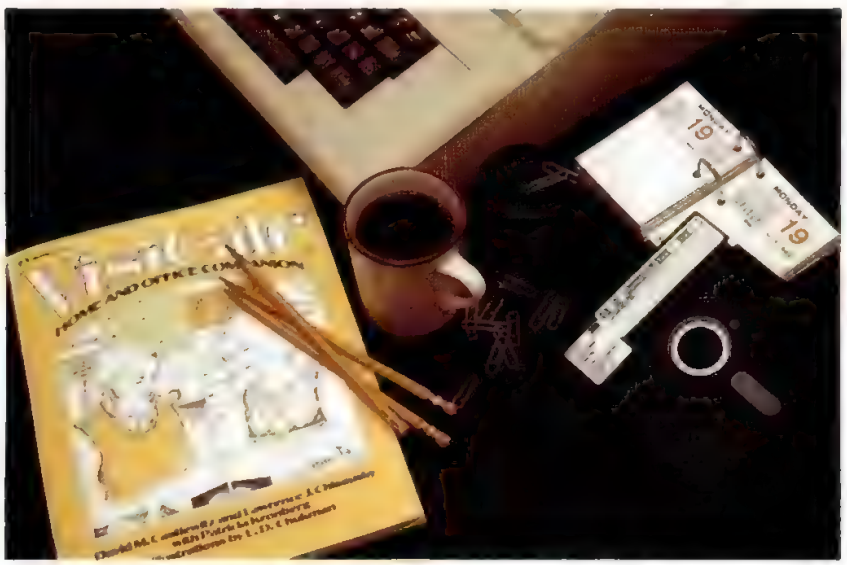

N.F. Systems
P.O. Box 76363
Atlanta, GA 30358
(404) 252-3300

Screen Master

741 A program that allows BASIC programmers to define a full-screen display or menu that can be used for full-screen input and output from a BASIC program. The program supports protected and unprotected fields, all possible characters, and color combinations. *(List Price: $79.95)*

Requires: Not available.

N.F. Systems
P.O. Box 76363
Atlanta, GA 30358
(404) 252-3300

Office Supplies

50 VisiCalc® models including Loans and Investments, Vacation Tour Planner, Inventory Control, Personal Finance, and more.

Includes the VisiCalc® model listing, sample printed reports, and a descriptive narrative for each model. VisiCalc Home and Office Companion accomodates most computers and all versions of the VisiCalc® program.

A handy source of reference and inspiration for beginners and experienced users alike. Models can be easily expanded to meet individual needs.

Master Word

742 A word processing program that incorporates the features and functions of the PC keyboard. The screen-oriented program includes paragraph formatting, hyphenation, and tabbing as in most standard word processors. Also included are columnar printing and decimal tab stops. The edit function allows search and replacement, block text movement, and file insertion. The formatting is done on the screen at the time of entry so the print image is available immediately.

The printing functions are part of the same program and include form-letter variable replacement, document merging, and automatic index creation. Subscripts, superscripts, and pause for change of the character type wheel or ball are supported. The program is designed to be integrated with the manufacturer's *Master Manager* and *Address Master* programs. *(List Price: $250 Canadian)*

Requires: 64K, one disk drive, letter quality printer.

Micro Masters Software Ltd.
P.O. Box 513
Edmonton, Alberta, Canada T5J 2K1
(403) 922-3088

Docuform

743 A document formatter that allows full use of the IBM printer's capabilities. It is designed for programmers using Irohnic's *Big Ed* text editor. Features include automatic pagination; automatic gathering of words to fit margins; file insert facility for large documents; bold face and 40, 80, and 132 characters per line typefaces; and error scan before printing. *(List Price: $50)*

Requires: Not available.

Irohnic Systems, Inc.
11195 25 Mile Rd.
Utica, MI 48087
(313) 781-4587

Benchmark 3.0

744 Word processing programs that can be operated after a day of self-training. Features include creation and deletion of documents; automatic selection of page length, margins, type style, spacing, and text justification; counter for cursor position by line or screen page, line, and character; automatic page breaks; and automatic search for text. It features horizontal scrolling, graphics, calculator, footnotes, hyphenation, column manipulation, and single-line centering. *(List Price: $499.95)*

Requires: 128K, two disk drives, DOS or CP/M-86.

Metasoft Corporation
711 E. Cottonwood Ln., Ste. E
Casa Grande, AZ 85222
(602) 836-0268

Transaid

745 A program designed to assist translators. It features utilities for conducting terminological research and for constructing and maintaining computerized dictionaries. The dictionary lookup in running text is provided in both on-line and batch modes. The system interacts with the translator to resolve ambiguities. General purpose computerized dictionaries are available for a number of major language pairs. Translation, edit, and review modules increase translation throughput. The translation can be printed as camera-ready copy or transported on magnetic media to a typesetter. *(List Price: $4,995 including a general purpose dictionary and subset)*

Requires: 64K, one hard disk drive, letter quality printer (multilingual desirable).

ALPS
750 N. 200 West #104
Provo, UT 84501
(801) 375-0090

FSEditor

746 A full-screen text editor with block/line copy, move, insert, delete, print, and append. No data is lost due to power failures or disk full. A demonstration disk is available. *(List Price: $125)*

Requires: 64K, one disk drive, 80-column monitor.

Cypress Software, Inc.
P.O. Box 8715
Coral Springs, FL 33065
(305) 755-1513

The Word Wire

747 A word processor for personal and small-business users, designed for letter writing, manuscript and copy development, and limited mailings. *The Word Wire* will interface with the manufacturer's *Data Line* software to produce formatted printed output. *(List Price: $89.95)*

Requires: 64K, one disk drive, 80-column monitor, dot matrix printer.

Soft Spot Micro Systems
24 Diane Dr.
Collinsville, CT 06022
(203) 379-7047

Word Processor (OMRIC)

748 A word processor that provides easy use for the novice. The user/tutorial manual and tutorial text files facilitate quick learning, enabling the user to begin with the more complex features of word processing.

Requires: 64K, one disk drive.

OMRIC Corporation
1268 Main St. #207
Newington, CT 06111
(203) 666-4240

Easytext

749 A word processor that performs common editing, correction, and formatting functions including word wrap, line cut and paste, and auto indentation. It features ten user-programmable function keys and split-screen capability that can be invoked while in the text editing mode. The system allows users to view text from different files or review portions of the same file. In this format, the upper portion of the screen displays current text in formatted form, while the remainder of the screen is used for normal text entry and alteration. Screen size can be adjusted by the user, and normal editing functions can be performed on either screen. *(List Price: $149.95)*

Requires: 64K, one disk drive, (printer optional).

Norell Data Systems Corporation
3400 Wilshire Blvd.
P.O. Box 70127
Los Angeles, CA 90010
(213) 257-2026

Runoff

750 A document-generating program familiar to users of DEC equipment. It provides direct compatibility with *Runoff* running on DEC equipment. Users can download *Runoff* source files from DEC machines, work on them on the IBM PC, and upload them with total compatibility. This program drives Epson and Diablo printers. *(List Price: $250; manual only, $25)*

Requires: 64K (96K recommended), one disk drive, printer.

Automated Office Systems
602 Lookout Dr. #213
Richardson, TX 75080
(214) 669-9966

PMate

751 A text editor developed by Phoenix Software Associates that includes full side scrolling and two visible cursors that can be manipulated from the command mode. Disks are used to manipulate files that are larger than memory. Features include a macro facility with equivalents of various command statements with prompting, and 11 general-purpose buffer registers for either text or macro storage. The macro can be assigned a keystroke sequence, allowing the editor to be customized to user specifications. It includes a configuration program that permits keyboard redefinition to emulate many editors and word processors. *(List Price: $195)*

Requires: 48K, two disk drives.

Lifeboat Associates
1651 Third Ave.
New York, NY 10028
(212) 860-0300
TWX: 710-581-2524
Telex: 640693

WORD PROCESSING / TEXT EDITING

Edix

752 A screen editor featuring multiple windows, multiple buffers, regular expression pattern matching, side-to-side scrolling, on-line help, and on-line tutorial. *(List Price: $195)*

Requires: 96K, one disk drive.

Emerging Technology Consultants, Inc.
P.O. Box 154
Louisville, CO 80027
(303) 666-9472

EasyWriter II

753 A word processing package that includes single-stroke function keys and a special Help feature for inexperienced users. Pages appear on the screen as they do on paper, complete with headers, footers, on-screen underlining, boldface, and double underlining. Printing can be done directly from the editor, eliminating the need to save short memos to disk. A simultaneous print and edit feature makes it possible to route up to ten documents to the printer while editing another. *(List Price: $350)*

Requires: 64K, two disk drives, 80-column monitor.

Information Unlimited Software, Inc.
281 Arlington Ave.
Berkeley, CA 94707
(415) 525-9452

QuickWrite

754 A program for text or program preparation that makes full use of the PC's keyboard to insure operation without requiring special control keys. Arbitrary blocks of text can be moved, deleted, or saved on a soft key for recall from any file. Editing and printing can occur simultaneously. Other features include search, text replacement, and word wrap. The program does not use special text formats, so it can be used for program editing as well as document preparation. *(List Price: $50)*

Requires: 64K, one disk drive.

XyQuest Inc.
P.O. Box 372
Bedford, MA 01730
(617) 275-7194

Edcon

755 A full-screen program editor that can be used to prepare text or programs. It offers the ability to use the keypad while allowing feedback in the form of full-screen editing. This program is written in assembly language. *(List Price: $45; manual only, $5)*

Requires: 32K, one disk drive.

Automated Office Systems
602 Lookout Dr. #213
Richardson, TX 75080
(214) 669-9966

WIN Editor

756 A full-screen text editor that allows users to type and edit several files simultaneously by dividing the screen into multiple windows. The user can insert, delete, overlay, and move text with 12 functions. All deleted text can be recovered or moved to a nameable buffer for safekeeping.

The program also acts as a word processor with word wrap, justification, centering, upper- and lowercase conversion, and left and right shifting to default or indicated margins. The auto-justify mode allows paragraphs to remain justified even if the user changes them in the middle. Special printing features and simultaneous printing are also supported with boldface, and underlining is displayed as such on the screen.

WIN is customizable. Functions may be assigned to any key, and modes may be set at start-up or during a session. The Macro facility may be used to create new commands. *(List Price: Not available)*

Requires: 64K, two disk drives.

Ivy Research Inc.
88 Yale Station
New Haven, CT 06520
(203) 789-0676

Word Grinder

757 A dictionary of over 86,000 words on computer media for proofreader or dictionary programs. Written in ASCII, it comes on seven single-sided or four double-sided data disks. It is compatible with *SpellStar* and *Spellguard* and it may be combined into their dictionaries using their dictionary maintenance procedures. *(List Price: $130)*

Requires: DOS or CP/M-86, one floppy disk drive, one hard disk drive, (other requirements not available).

Digital Word Systems
22458 Ventura Blvd., Ste. E
Woodland Hills, CA 91364
(213) 992-0514

Select

758 A word processing system that includes an on-screen, interactive teaching program *(Teach)* designed for the novice whose only interest in a computer is its ability to accomplish tasks. The program includes two 5¼-inch floppy disks containing the word processor, *Teach*, and installation instructions; *Superspell* (a proofreading program); *Merge Print* (a program that integrates mailing lists with any Select document); and a reference manual. *(List Price: $595)*

Requires: 64K, two disk drives, (printer optional).

Select Information Systems
919 Sir Francis Drake Blvd.
Kentfield, CA 94904
(415) 459-4003

Final Copy, Dynaform, Remcom

759 *Final Copy* is a word processing program that combines word and data processing with remote communications for microcomputers. It offers user-oriented menu prompts and one keystroke alphabetic commands. It sends final documents to the printer, console, or remote channel.

The *Dynaform* program integrates directly with *Final Copy* to provide complete data entry and data management capabilities. Formats are interactively defined, and each file is stored and indexed using Keyed Sequential Access Method (KSAM). Any file or group of files can be selected directly from the editor in *Final Copy* with full sorting powers. The Remote Communications module, *Remcom*, supports terminal type operations such as communications with a host computer. The package also supports direct system to system links with XON/XOFF protocols. *Remcom* is fully compatible with *Final Copy*. *(List Price:* Final Copy $495, Dynaform $295, Remcom $95*)*

Requires: Not available.

Ticom Systems Inc.
6015 Scarlett Ct.
Dublin, CA 94566
(415) 829-7550

Q Text Editor

760 A full-screen interactive text editor that scrolls up and down and conserves memory space (program occupies only 4K). Control keys can be customized. The program has search and replace functions and a stack-type auxiliary buffer. It edits only screen memory. *(List Price: $75)*

Requires: 48K, one disk drive.

International Software Alliance
1835 Mission Ridge Rd.
Santa Barbara, CA 93103
(805) 966-3077

PCWord 2.1, PCForms 2.1, PCScreen 2.1

761 *PCWord 2.1* is a full-screen, menu-driven text editor designed for optimum keyboard use. Functions include on-line "help," automatic file saving, and function key controls with menu commands in force.

PCForms 2.1 is a text-formatting system that supports macros nested ten deep and printer specifications for overstrike, double strike, etc.

PCScreen 2.1 is a screen input format generator. *(List Price: $49.95 each)*

Requires: 32K, one disk drive.

Single SOURCE Solution
2699 Clayton Rd.
Concord, CA 94519
(415) 680-0202

Word Perfect

762 A software package designed for multiple use by operators previously untrained in data processing. The system performs word processing functions including merge-document assembly, macro capability, text search, automatic headings, footers, pagination, and footnotes. It will support two letter quality printers. *(List Price: $545)*

Requires: 64K, two disk drives, 80-column monitor, printer.

Satellite Software International
288 West Center
Orem, UT 84057
(801) 224-8554

P-Edit

763 A multiuser context editor for program editing that also edits text. Function keys are labeled. Operators can enter any amount of text from the keyboard or from another file at any place in the text, and the context is maintained and updated. The system includes text search, macro capability, full screen display, document filing and retrieval, and scroll capability. *(List Price: $250)*

Requires: 32K, one disk drive, 80-column monitor.

Satellite Software International
288 West Center
Orem, UT 84057
(801) 224-8554

Big Ed

764 A line-oriented text editor written for programmers. Features include on-line Help screens; block move, copy, and delete; find and replace strings; copy to and from other files; block scrolling for List; user-defined tabs; cursor movement; and editing keys. Implemented in IBM Pascal. *(List Price: $125 including manual)*

Requires: 128K, one disk drive, printer.

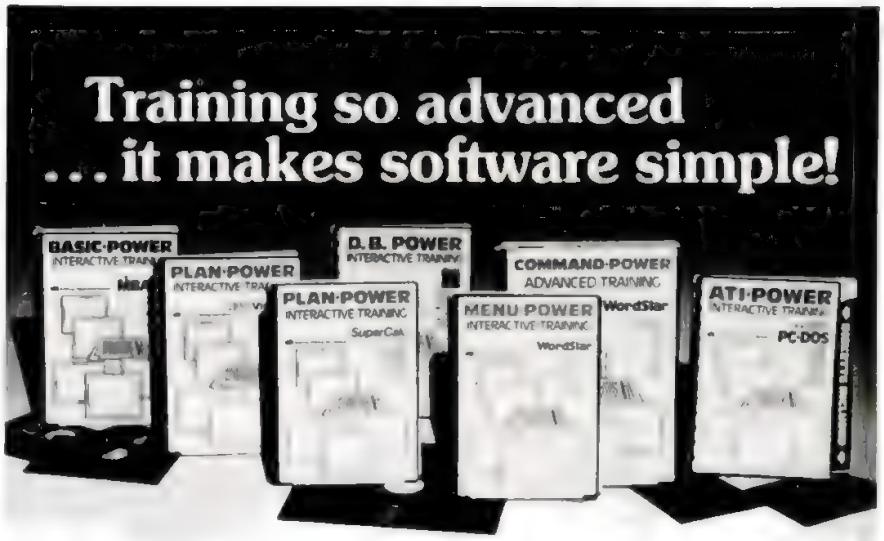

Irohnic Systems, Inc.
11195 25 Mile Rd.
Utica, MI 48087
(313) 781-4587

Easyproof

765 A spelling checker that lists unknown words, marks them in the document, or adds them to the 50,000 word dictionary. A system of algorithms and a prefix-suffix table compresses the dictionary into fewer than 31K of disk space. In-memory lookup processes over 4,000 words per minute. Users can add new words, prefixes and suffixes, and customize British spellings. *(List Price: $79.95)*

Requires: 64K, two disk drives, printer.

Norell Data Systems Corporation
3400 Wilshire Blvd.
P.O. Box 70127
Los Angeles, CA 90010
(213) 257-2026

Insert ATI's training disk into your IBM microcomputer — and in one hour — you'll be using your software like a pro!

With ATI's Interactive Training disk — you work interactively with your computer as it guides you through a series of simple, step-by-step, plain-English practice sessions. Handy reference guide included.

Save your valuable time! Build software skills fast! Order an ATI Interactive Training Program to match your software today, from ATI's leading dealer, SOFTWARE TRAINING COMPANY.

PLAN-POWER for VisiCalc (IBM)
PLAN-POWER for SuperCalc (IBM)
With PLAN-POWER VisiCalc or SuperCalc you'll learn financial planning functions like create, modify, manipulate, save, retrieve, label and print. You'll arrange and calculate complex mathematical data faster and easier than you ever thought you could. **$75.00 Each.**

ATI-POWER for IBM-DOS
With ATI-POWER PC-DOS you'll learn how to use 12 of the most common PC-DOS commands in less than one hour! You'll be able to display the directory, copy files and disks, rename files, and much more. You'll also be able to prepare, monitor, maintain, even troubleshoot your own system — like a pro! **$75.00**

D.B. POWER for dBASE II (IBM)
With D.B. POWER you'll be able to create a data base, enter data, sort data, add, modify, change, and edit important data to generate comprehensive reports — even develop mailing lists — in less than one hour! **$75.00**

BASIC-POWER for MBASIC (IBM)
With BASIC-POWER you'll be able to develop business applications programs that really work. You'll be able to write, enter, debug and use programs that analyze business expenses or organize mailing lists in less than two hours! **$75.00**

POWER PACK for WordStar (IBM)
MENU-POWER Interactive Training helps you create documents, edit with insert, delete and strike over, and print documents. In less that 45 minutes, you'll be able to use the WordStar menus to perform powerful word processing operations.
ATI's COMMAND-POWER Advanced Training is a powerful instructional document that teaches you to be a WordStar expert in only a few hours. You'll be able to create, revise, format, and print—even professional looking reports—by using advanced WordStar operations such as: cursor movement, block operations, search and replace, format control and more. **$75.00**

SUPERIOR TRAINING
SOFTWARE TRAINING COMPANY offers the best software training available. We carry products by American Training International — ATI is the leader in microcomputer training. ATI's staff has developed training programs for industry leaders like Digital Research, IBM, Xerox, NEC and Toshiba.

ProScript

767 A program that produces formatted documents when used in conjunction with standard text editors. Features include headings, footings, page and paragraph numbering, table of contents, and the ability to handle the emphasized, wide, and condensed print available on the standard IBM PC printer. *(List Price: $95)*

Requires: 48K, one disk drive.

SoftCraft, Inc.
P.O. Box 66
Melbourne Beach, FL 32951
(305) 725-8665

B&L Word Processing Program

768 A word processor that includes global search and replace, formatting capabilities, and the ability to move text from document to document. It works with color or monochrome monitor.

Requires: 64K, one disk drive.

B&L Computer Consultants
226 S. Cole, Dept. P-2
Boise, ID 83709
(208) 377-8088

Volkswriter

769 A word processor that includes an interactive on-screen tutorial and a complete reference manual. It uses 20 function keys with an on-screen reference guide. Like other word processors, *Volkswriter* is useful for writing proposals, correspondence, technical manuals, as well as sales letters and mailing lists. *(List Price: $195)*

Requires: 64K, (other requirements not available).

Lifetree Software, Inc.
177 Webster St. #342
Monterey, CA 93940
(408) 659-3221

APS Text Processing System

770 A program that contains a tag-driven text formatter designed to produce large documents from source text. Files may be "imbedded" with source text on request while the files remain open, allowing automatic letterhead inclusion in form letters. *(List Price: $445 if ordered with the* APS Advanced System; *$500 if ordered with the* APS Dual-Screen System*)*

Requires: 128K, two disk drives, printer.

Arrix Logic Systems, Inc.
P.O. Box 142
Don Mills, Ontario
Canada M3C 2R6
(416) 292-6425

APS Advanced System

771 A program that is identical to the *APS Entry System* with several enhancements. Files can be copied and automatically expanded to another length; advanced commands are included in the extended edit subsystem; a "browse" subsystem allows read-only access to files, and the utility subsystem contains a "sorted directory" that allows scrolling over the directory display. *(List Price: $300)*

Requires: 96K, two disk drives.

Arrix Logic Systems, Inc.
P.O. Box 142
Don Mills, Ontario
Canada M3C 2R6
(416) 292-6425

Forthwrite

772 Software that provides advanced word processing capability. Features include true-proportional printer drivers with tabbing; outdenting; form-letter capabilities; and block, file, and keyboard input. *(List Price: $175)*

Requires: 48K, two disk drives, MMSFORTH V2.1.

Miller Microcomputer Services
61 Lake Shore Rd.
Natick, MA 01760
(617) 653-6136

VersaText

773 A word processing system with four main modules: a screen editor, a text formatter that includes text justification, paging, and underlining, a data base program for mass mailing, and a unit that produces giant letters for notices and signs. *(List Price: $149)*

Requires: 64K, two disk drives, 80-column monitor.

TexaSoft
1028 N. Madison Ave.
Dallas, TX 75208
(214) 941-8475, 495-5052

APS Entry System

774 This is a menu-driven program comprising a full-screen edit and utility subsystem, the latter for allocating, deleting, and renaming files. It supports user-defined, fixed-length records with no file size limitations. Screen can be scrolled horizontally to the right or left to accommodate records longer than the display. *(List Price: $150)*

Requires: 64K, one disk drive.

Arrix Logic Systems, Inc.
P.O. Box 142
Don Mills, Ontario
Canada M3C 2R6
(416) 292-6425

Spellguard

775 Software that aids users in eliminating spelling and typographical errors in written materials prepared with a word processor or text editor. The program is used in conjunction with a word processor to find spelling and typographical errors. It proofreads a document for spelling mistakes and typing errors by using a 20,000-word dictionary. Large text files such as manuscripts and manuals can be proofread in a few minutes. The program is compatible with many existing word processors and is written entirely in machine language. *(List Price: $295 including manual)*

Requires: 32K, two disk drives, DOS or CP/M-86.

Innovative Software Applications
The Plaza Building
1150 Chestnut Ln.
Menlo Park, CA 94025
(408) 727-7634

Textplus

776 A word processing and list management program that edits and formats text, creates and sorts lists, prints mailing labels, produces personalized mass mailings, and creates bar graphs. *(List Price: $200)*

Requires: 64K, one disk drive, 80-column monitor, IBM or Epson printer.

Owl Software Corp.
1605 E. Charleston Blvd.
Las Vegas, NV 89104
(800) 824-7888, 982-6243 California

APS Dual-Screen System

777 This program has all the features of the *APS Advanced System*, as well as allowing two sessions to be conducted concurrently. The screen can be allocated to either session alternately with a function key command. *(List Price: $360)*

Requires: 128K, two disk drives.

Arrix Logic Systems, Inc.
P.O. Box 142
Don Mills, Ontario
Canada M3C 2R6
(416) 292-6425

Check The Chart Before You Choose Your New 16-Bit Computer System.

Columbia Data Products' New Multi-Personal® Computer, Featuring IBM-PC® Compatibility, Excels In Professional, Business And Industrial Applications. Check it out.

Columbia Data Products' MULTI-PERSONAL® COMPUTER can use software and hardware originally intended for the IBM® Personal Computer . . . while enjoying the flexibility and expandability of all Columbia Data's computer systems.

Available operating system software includes single-user MS-DOS® or CP/M 86® or multi-user, multi-tasking MP/M 86® or OASIS-16®, with XENIX® available soon, providing users with a host of compatible software packages for personal and professional business and industrial applications. A large selection of higher level languages are also available, including BASIC, FORTRAN, COBOL, PASCAL and MACRO Assembler.

Our standard 16-Bit 8088 hardware configuration provides 128K RAM with parity, two RS-232 serial ports, Centronics parallel printer port, interrupt and DMA controllers, dual floppy disks with 640K storage, Winchester disk and keyboard interfaces, and eight IBM-PC compatible expansion slots . . . and lists for only $2995. Winchester hard disk configurations, featuring cache buffer controllers for enhanced disk access performance are also available, starting at $4995.

So, when you need to grow, why gamble and hassle with independent third party hardware and operating system vendors which may or may not be compatible . . . not to mention the hidden expense and frustration of implementing peripheral drivers in the different operating systems and upgrades? Who needs the finger-pointing when things don't work out?

After you review our chart, you will agree . . . for overall 16-Bit microprocessor superiority, expandability, flexibility, compatibility and real economy, Columbia Data is your *total source.*

Our Multi-Personal Computer . . . the 16-Bit system born to grow!

Get yours now.

WATCH OUT.
The OINKS are loose!

Pig out on fun with
PIG PEN
(for the Apple II* *and* the IBM-PC!)

Here's the newest and freshest idea in dot-maze games. You'll go hog-wild at the way Pig Pen's clever switches make this the most intriguing game you ever got hooked on!

With Pig Pen you run the maze leaving dots wherever you go! And the 4 beady eyed pigs are out to stop you. Take a potent, pulsing pig pill and you can zap the pigs, turning them into delicious ham hocks! Why be 'boared' with the old-fashioned versions. Get the freshest – have the most fun of all! Oink, oink!

$29.95 in Apple or IBM versions. At your computer store, or from:

DATAMOST INC

9748 Cozycroft Ave.

*Above, natural oak table & shelf unit, $195. printer table, $165.

Right, stained oak, $195 printer table, $165.

WORD PROCESSING / TEXT EDITING

IEDIT

778 A full-screen editor suitable for both program development and word processing. Users may modify the program to meet their own requirements. Capabilities include full function and special key support, block move/copy, paragraph formatting, page numbering, and multiple copy printing. A spelling checker can be applied to both program development and word processing. *(List Price: $150)*
Requires: 48K, one disk drive.

Innovative Technology, Inc.
2387 Blackstone
Ottawa, Ontario, Canada K1B 4H3
(613) 521-8391

PCForms

779 A text formatter that offers five main functions: set text characteristics, text formatting, page control, printer control, and macros. Macros (repeated functions grouped under another command) are user-defined and may be nested up to ten levels deep. Text may be formatted within lines by embedding commands. Switches allow specifications of additional files later, causing the program to wait for user intervention in case of error, and can sound a tone when the user is needed. A sister program, PCWord, combines to provide full word processing capabilities. *(List Price: $49.95)*
Requires: 32K, (other requirements not available).

Single SOURCE Solution
P.O. Box 578
Concord, CA 94522
(415) 680-0202

EasyWriter

780 An application by Information Unlimited Software that transforms the PC into a word processor. Features include upper- and lowercase text creation and filing, editing, formatting, and final printing of documents or correspondence. Files are stored on 5¼-inch diskettes, allowing information to be easily inserted, deleted, or corrected. Three menus are displayed: the File Menu, Editor Menu, and Additional Commands Menu. The program is designed to accommodate users of various skill levels.

IBM *EasyWriter Version 1.1* features enhanced capabilities and is faster and easier to use than *Version 1.0*. Current owners of IBM *EasyWriter 1.0* may exchange that version for *EasyWriter 1.1* at no cost, through authorized IBM PC dealers. *(List Price: $175, IBM Product Center prices)*
Requires: 64K, one disk drive, printer.

IBM Corporation
Systems Products Division
P.O. Box 1328
Boca Raton, FL 33432
(800) 447-4700, 322-4400 Illinois
447-0890 Alaska, Hawaii

SuperWriter

781 A text processing system with the ability to create, edit, and print reports, letters, and other documents. It performs print merge (form letter generation) and proofreads documents for spelling errors. *(List Price: $395)*
Requires: 64K, one disk drive, printer.

Sorcim
405 Aldo Ave.
Santa Clara, CA 95050
(408) 727-7634

Full-Screen Editor

782 A program that allows users to build text or program files one screen at a time using text editing features. Users can overtype or insert characters, scroll up or down, left or right, and copy or move entire blocks of text. The change command allows one or all occurrences of a character string to be changed to the new string. When used with the Find and Change function keys, Change allows users to preview potential changes.

An enhanced print formatter is included to provide underlining as well as the type fonts supported by Epson/IBM printers. It supports left and right margins and can fold long lines onto a new line. It also provides pagination and titles. *(List Price: $29.95)*
Requires: Not available.

Nota Bene Software
P.O. Box 497
Glenview, IL 60025

Wordvision Writing Tool

783 A word processing program designed for use by writers, rather than clerical workers. It provides control over such features as delete copy, move, one-key phrases, transposition, capital and lowercase letters. Users have control over margins, tabs, indents, underlining, boldfacing, single and double spacing. The program comes with color stick-on labels for all PC function keys. *(List Price: $49.95)*
Requires: 64K, one disk drive, 80-column monitor, printer.

PROAID™

Announcing a series of applications for use on the IBM Personal Computer.

- **COMDATA*** —A data base management application permitting user to generate multiple, flexible screens for input and maintenance of keyed, direct or sequential data files. Application includes report generation capabilities, sub-files, passwords, cross reference directory of data files, and mailing or all purpose labels.

 Price $250

- **COMORG*** —Menu generator of one main, fourteen sub-menus and fifteen options per menu. Easy to generate and modify as you add to or delete programs from your application.

 Price $ 90

- **COMSORT*** —Will sort any files on PC. Unlimited key size. User can save sort specifications for future use and incorporate as sub-routine in programs.

 Price $ 80

All applications are supported by **COMSEN** and include detailed, user oriented documentation.

WORD PROCESSING / TEXT EDITING

Proof Reader, Grammatik

784 *Proof Reader* is a menu-driven program featuring the *Random House Dictionary*. It looks up words and does not rely on root-word analysis. Full interactive corrections show the complete context of unknown words. A menu choice is offered to correct, learn, or accept words. All corrections are double checked.

Grammatik detects typos, punctuation and capitalization errors, unbalanced parentheses, and quotation marks. It analyzes writing styles for average sentence length, word length, and word use profile. It finds nonstandard usage and spelling errors, and overworked and wordy phrases using a customized dictionary. Errors are optionally marked for correction and sent to a printer or displayed on screen.

Users should specify system type, operating system, number of drives, memory size, and format when ordering. *(List Price:* Proof Reader *$129,* Grammatik *$150, both $250, manuals $15 for both, $8 each)*
Requires: 64K, one disk drive.

Aspen Software Co.
P.O. Box 339-P
Tijeras, NM 87059
(505) 281-1634

Easyspeller

785 An innovative spelling checker and proofreading package. It contains a vocabulary of over 88,000 words stored in 94K of disk space. It flags misspellings and offers the user a chance to substitute the correct spelling. The system can create supplementary dictionaries for jargon and abbreviations, and allows the user to correct the same mistake within a file by pressing a single key. The system displays the entire line in which the flagged word appears, enhancing reading ease. It will check any ASCII file written in DOS format. *(List Price: $175)*
Requires: 64K, two disk drives, 80-column monitor.

Information Unlimited Software, Inc.
281 Arlington Ave.
Berkeley, CA 94707
(415) 525-9452

Newtext1

786 A text processor that functions like *Script*, the IBM mainframe text processor. Features include text nesting (to 14 levels), automatic table of contents, and index generation. *(List Price: $125; manual only, $25)*
Requires: 64K, one disk drive.

DB/DC Software Associates
P.O. Box 4695
Manchester, NH 03108
(617) 682-6629

ProEdit

787 A full screen editor that offers horizontal and vertical scrolling, block manipulation, selective and global operations. Source code and documentation come with disk. *(List Price: $50)*
Requires: 32K, one disk drive.

ProActive Systems
505 Channing
Palo Alto, CA 94301
(415) 326-2722

PCWord

788 A full-screen text editor that contains a Help module. Top and bottom of screen are both clearly indicated during editing. It offers global search ahead and back, replace, automatic save, and paging up and down. The user may redefine function keys for convenience. It combines with *PCForms* to create a word processing system for under $100 *(List Price: $49.95)*
Requires: 64K, (other requirements not available).

Single SOURCE Solution
P.O. Box 578
Concord, CA 94522
(415) 680-0202

MAILING LISTS

Mail-XI

789 A mailing list program with multiple sort keys, multiple filter criteria, field selection, record delete, and record update. It features an optional report writer that lets users specify report formats on line without programming. Included are 9-digit zip codes and remark fields. A selection code ranging from 0 to 32,767 is used to classify the mailing list. The date field can be used for creation dates, last referenced dates, or expiration dates.

The report writer can be used to print labels or reports of expired records, unexpired records, or records expiring within 60 days. The report generator lets users select a record range, a selection code range, and a sort field. The number of lines on a page, the size of a label, and the width of a print line can be set by an on-line command. *(List Price: $288; without report writer $198; manual only, $22)*
Requires: 64K, one disk drive, printer.

Micro Architect Inc.
96 Dothan St.
Arlington, MA 02174
(617) 643-4713

Mailing List (Caldwell)

790 A program that displays mailing lists on screen, allows changes to the list, and prints out names and addresses on labels. It uses variable-length fields, a variable number of lines, and has over 400 entries per disk. *(List Price: $40)*
Requires: 64K, one disk drive.

Richard Caldwell
2063 43rd Ave.
San Francisco, CA 94116
(415) 661-7840

Personal Mailer

791 A professional mailing list data base that may be searched, sorted, or printed. It reads and writes files for word processors, spelling checkers, or data base managers. *(List Price: $65)*
Requires: 64K, one disk drive, 80-column monitor.

Computer Age of San Francisco
825 Masonic Ave. #6
San Francisco, CA 94117
(415) 921-7792

1st Class Mail

792 Software that offers custom label formatting of up to nine lines per label with up to nine labels across, custom punctuation, multiple labels for each entry, a user-selected message on any line of the label, and a user-defined screen format. It prints single or tractor-feed envelopes with optional return address, master lists, specially sorted lists, foreign addresses, and 10-digit zip codes.

Multiple disk capability provides extension and separation of data files. *1st Class Mail* features flexible default entries and fast multikey search and sort routines. It provides printer controls for custom label printing and allows expanded print or other special printer capabilities. *(List Price: $124.95 including disk, manual, and binder)*
Requires: 64K, one disk drive (two recommended), printer.

Continental Software
11223 S. Hindry Ave.
Los Angeles, CA 90045
(213) 417-8031

Mailing List (Zeta)

793 A menu-driven program for large mailing lists that permits selection of some entries by use of a selection field. Some functions are performed by assembler routines. *(List Price: $129.95 including documentation)*
Requires: 64K, one disk drive, 80-column monitor.

Zeta Products
Box 147
Georgetown, TX 78626
(512) 863-3079

MAILING LISTS

Benchmark Mail List

794 A key-driven, self-training, self-prompting list keeper. Features up to 99 lists per disk, full utilization of function keys, and the ability to merge with word processing software. *(List Price: Not available)*
Requires: Word processor with keyboard merge feature.

Metasoft Corporation
711 E. Cottonwood Ln., Ste. E
Casa Grande, AZ 85222
(602) 836-0268

Mailing List (W.A. Dirks Co.)

795 A mailing list program that provides either menu-driven or direct-running mail list capability. Files may hold up to 1,100 names. Entry verification facilities are provided, as well as the ability to print up to four labels across. Features include sorting on any field and selecting on any single field based on user input. Source code is included to facilitate user modifications. *(List Price: $79; manual only, $14)*
Requires: 48K, one disk drive, printer.

Wayne A. Dirks Co.
801 E. 10th
Hutchinson, KS 67501
(316) 665-7074

Super Mail

796 A mailing list manager system that features user-defined fields and prompting, selective search and option to print, single- and multifield sorts, and universal label printing. *(List Price: $50)*
Requires: 64K, two disk drives, parallel printer.

Enhanced Technology Associates
3929 Lynn Ave. South
Minneapolis, MN 55416
(612) 929-7889

Mailing List (Alpha)

797 A program that maintains and prints lists in any form selected from a data base of names, addresses, or numbers. The data base can be expanded, changed on screen, sorted, searched, or reformatted, using search and sort routines in six possible combinations. Program capabilities include formatting labels, adding promotional messages to each label, and printing multiple copies of labels. *Mailing List* holds 900 records per disk on DOS 1.0 and over 1,500 records with DOS 1.10. An instructional tape accompanies the program. *(List Price: $95)*
Requires: 64K, one disk drive, (printer optional).

Alpha Software Corp.
6 New England Executive Park
Burlington, MA 01803
(617) 229-2924

EZLabel, EZMemo

798 *EZLabel* produces mailing labels and phone lists with 1,000 addresses per disk. Information can be sorted by zip code, last name, or user-defined codes. It can be used with *EZMemo*, a line-oriented word processing program. It creates custom form letters using *EZLabel* files. Users can select any dot matrix type style and create, edit, and save memos. *(List Price: $39.95 each)*
Requires: *EZLabel*—48K, one disk drive, dot matrix printer; *EZMemo*—64K, two disk drives; IBM printer for both.

Systemics, Inc.
3050 Spring St.
West Bloomfield, MI 48033
(313) 851-2504

Mailing List (Alphanetics)

799 A program that prints single- or double-width labels and machine sorts either alphabetically or by zip code. *(List Price: $29.95)*
Requires: 64K, one disk drive.

Alphanetics
P.O. Box 597
Forestville, CA 95436
(707) 887-7237

Mailtrak

800 A name and address mailing system that prints master listings, telephone directories, and mailing and file labels sorted in a variety of user-selected sequences. Up to 1,200 names can be stored on each disk. Files are in DOS format and can be read by this or other compatible packages such as IBM's *EasyWriter*. Reports can be printed in compressed, emphasized, or double-strike modes. Written in BASIC, the system utilizes random access files. *(List Price: $65; manual only, $15)*
Requires: 64K, one disk drive, printer.

TCI Software
6107 W. Mill Rd.
Flourtown, PA 19031
(215) 836-1406

Mailing List (N.F. Systems)

801 A mailing list program that prints one, two, or three labels and sorts by last name or zip code. *(List Price: $64.95)*
Requires: 64K, one disk drive, (printer optional).

N.F. Systems, Ltd.
P.O. Box 76363
Atlanta, GA 30358
(404) 252-3302
Source: TCK071

Mailing List (Sofware Lab)

802 A program that functions as a personal and business mailing list for the PC. It stores up to 500 entries, which can be sorted by any field maintained in the list. *(List Price: $50)*
Requires: 48K, one disk drive.

Software Laboratories, Inc.
6924 Riverside Dr.
Dublin, OH 43017
(800) 531-1309, (614) 889-5083 Ohio

Mailing List (S.P. Cook)

803 A menu-driven program that sorts on all fields and has an option to print out a sublist of names, called by number, which will provide lists without retyping. It has an optional selection of mail label or envelope printing for an envelope feeder. It addresses envelopes at a rate of 1,200 per hour and prints membership lists. The last field can be used for accounts receivable with totals provided at the end of printout. *(List Price: $89)*
Requires: 64K, two disk drives, printer.

Samuel P. Cook
309 Lincolnshire
Irving, TX 75061
(214) 253-6979

MailMerge

804 A file-merging program used with *WordStar* to perform word processing projects such as personalized form letters, invoices, and mailing labels. Can "boilerplate" legal documents from a variety of standard paragraphs. *(List Price: $150)*
Requires: 64K, dot matrix or daisy wheel parallel or serial printer, two disk drives.

MicroPro International Corporation
33 San Pablo Ave.
San Rafael, CA 94903
(415) 499-1200
Telex: 340-388

Sapana-Mail-Track-I

805 A mailing program that stores 1,160 records on single-sided and 2,330 on a double-sided floppy disk, and may be searched, sorted across seven data fields, and printed. The program handles 9-digit zip code. It is menu-driven and includes a user manual. *(List Price: $29)*
Requires: 48K, one disk drive, printer.

Sapana Micro Software
P.O. Box 748
Quincy, IL 62301
(217) 224-4337

Mail Management

806 A program that generates mail lists and labels, and sorts and extracts on user-specified fields. All work is done within the main data base, which includes over 1,000 names. Features include rapid sorting capabilities. *(List Price: $39.95)*
Requires: 64K, one disk drive, printer.

Alpha Computer Service
P.O. Box 2517
Cypress, CA 90630
(714) 894-6808

Pony Express

807 A mailing program that prints records on levels one to five across, on 132-character-wide paper, 80-character-wide paper, or with cheshire format. Other features include unlimited numbers of files, machine code sort, record selection with an unlimited number of selection codes, automatic repeat routines for entering records, and correction and deletion routines for updating files. Up to ten files can be merged. Documentation is included. *(List Price: $169)*
Requires: 64K, two disk drives.

Computech
975 Forest Ave.
Lakewood, NJ 08701
(201) 364-3005

Mail Manager

808 A mailing list program that creates and updates address files. Subfiles can also be created, and files can be merged or sorted using a variety of key fields. The program prints mailing labels, envelopes, and lists. *(List Price: $129)*
Requires: 64K, one disk drive, printer.

Starware
1629 K Street NW #551
Washington, DC 20006
(202) 466-7351

Mister Lister

809 A commercial-quality mailing list program that includes over 1,000 entries per floppy disk. Entries include company name, contact name, address and telephone numbers. Four option tables with 26 descriptors each are provided along with three sorting modes, company name, contact name, or zip code. The program also prints mailing labels in user-defined format and on fanfold postcards, if required. A master disk list with one line per disk entry can be printed with only the entries the user requests. Also included with the program is the FORTH computer language. It is compatible with *WordStar* and *MailMerge*. *(List Price: $79.95)*
Requires: 64K, one disk drive, (printer recommended).

International Computers
13048 Olive Blvd.
Creve Coeur, MO 63141
(314) 878-8838

Mailing List (Howe)

810 A mailing list program that maintains lists of up to 1,128 names per diskette. It prints four-line labels in one, two, three, or four columns. *(List Price: $79.95; documentation only, $15)*
Requires: 64K, one disk drive, printer.

Howe Software
14 Lexington Rd.
New City, NY 10956
(914) 634-1821

Address Master

811 A standard name and address package with user-defined categories for selection of mailing label printing or form letter printing. The program provides the above features when used in conjunction with the manufacturer's *Word Master* program. *(List Price: $75 Canadian)*
Requires: 64K, one disk drive, printer.

Micro Masters Software Ltd.
P.O. Box 513
Edmonton, Alberta, Canada T5J 2K1
(403) 922-3088

The Addressor

812 A name and address filer system that produces an alphabetized directory on the printer that can be inserted into a 2-inch by 3-inch binder. Birthdays, anniversaries, and other important dates may be included. It also prints address labels. The package includes a tutorial on setting up the filing system, a detailed manual, and a disk that may be backed up. *(List Price: $19.95)*

Single SOURCE Solution
P.O. Box 578
Concord, CA 94522
(415) 680-0202

Mailing Label Program

813 A mailing list program that stores 150 records on one disk drive and 600 on a second. Sixteen fields are filed under three categories. Five sorting options give printing flexibility. *(List Price: $65)*
Requires: 48K, one disk drive, printer.

MBS Software
12729 N.E. Hassald St.
Portland, OR 97230

COMMUNICATIONS

LogOn

814 Software that exchanges text, binary, and data files from a micro to another micro, mini, or mainframe computer at 300 baud. Users can send and receive messages on bulletin board systems, and access on-line data bases. The program supports auto-dial and redial, and features a directory, redefinable keyboard, and column settings from 1 to 80. *LogOn* is written in UCSD Pascal. *(List Price: $150)*
Requires: 128K, Pascal, two disk drives, modem.

Ferox Microsystems, Inc.
1701 N. Ft. Myer Dr.
Arlington, VA 22209
(703) 841-0800

EDS Communicator/Text Editor

815 A communications and text editing program that transfers data from various sources to the PC, including *VisiCalc* files, text files, and any source programs in ASCII format. The text editor modifies and manipulates data to the format needed. Auto-dial and auto-answer functions allow one-button dial-up to send and receive messages, electronic mail, and graphic images.

Auto-logon allows multilayer security and passwords to be bypassed, giving instant access to a variety of networks and network bulletin boards such as Networks, Networks II, Dow Jones, CompuServe, and The Source through Telenet and Tymnet. *(List Price: $180)*
Requires: 48K, one disk drive, 80-column monitor, serial interface, modem, (Hayes Stack Smartmodem required for auto-dial, auto-answer).

Electronic Data Systems Corporation
7171 Forest Ln.
Dallas, TX 75230
(214) 661-6188

Asynchronous Communications Support Program

816 Software that turns the PC into a communications terminal with various computers supporting ASCII. It communicates between two PCs and accesses computers running IBM VM/370 or TSO operating systems if they are equipped with appropriate interface hardware. Access is made by local cable connection or over remote common carrier lines. An upload/download facility transfers data and program files. *(List Price: $40, IBM Product Center prices)*
Requires: 64K, one disk drive, serial interface, modem.

IBM Corporation
System Products Division
P.O. Box 1328
Boca Raton, FL 33432
(800) 447-4700, 322-4400 Illinois
447-0890 Alaska, Hawaii

COMMUNICATIONS

Communicator/Text Editor

817 A communications and text editor program that allows the PC to communicate with any Bell 103 compatible system, including word processors, mainframes, minis, and micros. It also enables the PC to communicate with networks and services; to transfer data files, *VisiCalc* files, BASIC and other source code in text format; to edit and create ASCII files and program source code; and to provide the means to translate program code to PC usable code.

Features include color, intensifications, sound, and automatic spill-over files when memory is full. Data can be input from disk or keyboard and inserted between existing data in memory. *(List Price: Not available)*

Requires: 48K, one disk drive, Hayes Stack Smartmodem, 80-column monitor, serial interface.

Electronic Data Systems Corporation
7171 Forest Ln.
Dallas, TX 75230

Comload

818 An intelligent communications package that allows communication with a wide variety of computer systems. It can upload and download text files and save data on disk. Program features include a scrolling window and word wrap. *(List Price: $99.95)*

Requires: 64K, one disk drive, serial interface (printer optional).

Dalton Systems
P.O. Box 5034
Willowick, OH 44094
(216) 928-6033

Mainframe Communications Software

819 A remote job entry station emulator for the PC. *EM 3780* may be used with any host computer supporting the IBM 2780/3780 BISYNC protocol. *(List Price: $650)*

Requires: 48K, one disk drive, DOS or CP/M-86, Advanced Communication Card manufactured by A.S.T. Research of Irvine, California.

Wilmot Systems, Inc.
122 E. 42nd St. #205
New York, NY 10168
(212) 661-3063

Move-it

820 A program that allows users to send and receive files (CP/M, PC-DOS, CP/M-86) from one computer to another, using standard RS-232 serial lines or modems. An error-checking protocol implements the transfer, and functions can be controlled from the local computer, allowing the remote computer to remain unattended.

Move-it can send and receive files between "wire-connected" computers, enabling offices with several computers to send data between them, even if the computers support different disk formats. The program will transfer files from high-capacity to low-capacity disks by allowing the substitution of empty disks for full ones during the process.

Features include directory displays of local and remote disks, message transmittal to the remote computer, and display of "retries" during transfers. Use of the "dumb terminal" mode allows users to access time-sharing systems and control smart modems. *(List Price: $150)*

Requires: 32K, serial interface, modem.

Woolf Software Systems
23842 Archwood St.
Canoga Park, CA 91307
(213) 703-8112

Forthcom

821 Communications software in MMSFORTH that allows the PC to operate as a terminal on any computer phone line, provides printer spooling, transfer of ranges of FORTH blocks with data compression and error checking. Menu-driven standard operation to 1200 baud, and modular RS-232-C routines in source code for custom applications to 9600 baud are also featured. *(List Price: $39.95)*

Requires: 32K, one disk drive, serial interface, modem, MMSFORTH V2.1.

Miller Microcomputer Services
61 Lake Shore Rd.
Natick, MA 01760
(617) 653-6136

APPLE-IBM Connection

822 A program that permits the user to send standard files from one computer to another. Communication can be controlled from either computer, send or receive. The program requires two computers, either two PCs or an Apple and a PC. It comes with a short instructional tape. *(List Price: Not available)*

Requires: Two computers, each with one disk drive, 64K, and communications boards.

Alpha Software Corp.
6 New England Executive Park
Burlington, MA 01803
(617) 229-2924

Dow Jones Reporter

823 A program that enables users to gather business information from the Dow Jones News/Retrieval Service. It provides easy access to financial news, stock market quotations, and company profiles. Users can view articles from the *Wall Street Journal*, *Barron's*, and the Dow Jones News Service. As well as providing current news, it also allows review of past news concerning specific companies or industries. *(List Price: $100 including 1 hour of connect time during non-prime time, IBM Product Center prices)*

Requires: 64K, one disk drive, asynchronous communications adapter, modem.

IBM Corporation
Systems Products Division
P.O. Box 1328
Boca Raton, FL 33432
(800) 447-4700, 322-4400 Illinois
447-0890 Alaska, Hawaii

PCModem

824 A basic communications package offering both CP/M and ASCII file transfer at speeds up to 300 baud. The function key is driven for ease of operation. It works with most modems. Auto-dial and special functions available with the Hayes Smartmodem. *(List Price: $49.95)*

Requires: 64K, one disk drive, (printer optional).

Solution Software Systems
3930 Whispering Trails
Hoffman Estate, IL 60195
(312) 893-5111

PCModem II

825 An enhanced version of the original *PCModem*, it supports the new Hayes Microcomputing *Smartmodem* 1200, which will operate at speeds of 0-300 baud and 1200 baud. It is also Bell 212A-compatible and is able to conduct unattended file transfer between *PCModem II* programs. *(List Price: Not available)*

Requires: 64K, one disk drive, (printer optional).

Solution Software Systems
3930 Whispering Trails
Hoffman Estates, IL 60195
(312) 893-5111

LogOn

826 An auto-dial, auto-answer communications software package that features menus, directory of frequently called numbers and host computer configurations, automatic retransmission of erroneous data, selectable number of columns (screen width), and ability to "chat" off-line without losing carrier. Written in UCSD Pascal 4.0. *(List Price: $150)*

Requires: 64K, serial interface, one disk drive.

Ferox Microsystems
1201 N. Ft. Myer Dr.
Arlington, VA 22209
(703) 841-0800

Ascom

827 An interactive telecommunications program for time-sharing and data transfer. Text and program files transfer through protocols that synchronize file transfer. The "conversation mode" transmits and saves data and controls remote computers. Batch processing permits command files that eliminate repetitive sign-on and security procedures. *Ascom* also includes commands for displaying directories and files on the host computer. *(List Price: $175)*

Requires: 48K, one disk drive, asynchronous communications adapter, CP/M-86 or DOS.

Dynamic Microprocessor Assoc.
545 Fifth Ave.
New York, NY 10017
(212) 687-7115

PCModem

828 A communications program that links the IBM PC with the D.C. Hayes Smartmodem. All changes are initiated with a function key, and a main menu displays function key definitions. Features include automatic dialing from a menu of phone numbers and the ability to send and receive ASCII files. The program provides the ability to print all text as it comes in over the telecommunications line. *(List Price: $49.95 including an operations manual)*

Requires: 64K, 80-column monitor, one disk drive, IBM communications adapter (or equivalent), D.C. Hayes Smartmodem.

System Software Services
1765 Raleigh Ln.
Hoffman Estates, IL 60195

Dataease

829 A data base system for the business community. Users can define data-entry forms through a menu-driven forms editor. Full cursor and editing features are provided. Individual records can be recalled by partial specification of any field. The system provides password protection with three levels of security. *(List Price: $795)*

Requires: 128K, two double-sided disk drives, printer.

Software Solutions, Inc.
57C Wedgewood Rd.
Stratford, CT 06497
(203) 377-3268

Interm

830 A communications program that turns the IBM PC into an intelligent terminal. Features include compatibility with VT52, H19, and Z19; uploading and downloading of files; renaming, deleting, and copying files; fully programmable protocol with stop bits, parity data bits, and full/half duplex; and 110, 300, 600, 1200, 4800, or 9600 baud operation. *(List Price: $200; manual only, $20)*

Requires: 64K, one disk drive, asynchronous communications adapter, 80-column monitor.

Automated Office Systems
602 Lookout Dr. #213
Richardson, TX 75080
(214) 669-9966

COMMUNICATIONS

E-Mail

831 An electronic mail facility that provides users with the flexibility to customize the program for different uses, from interoffice mail to bulletin boards. Program features include user programmability where versatile functions are provided for most applications, but the program has also been designed for user-added modules to increase functionality and flexibility. Other features include user-defined passwords for selected caller access, a scheduler function for unattended transfer between two systems, user-defined verbiage to customize to the user's application, soft-key support; log files to record activity; support of on-line printer and disk storage; full documentation to insure compatibility of modifications and additions. Users need some knowledge of BASIC to use the program. *(List Price: $250)*

Requires: 64K, two disk drives, serial and printer interface, D.C. Hayes Smartmodem.

Jones Engineering Associates, Inc.
P.O. Box 26134
Charlotte, NC 28213
(704) 455-9616

PC-Talk

832 A full-featured communications program that permits simultaneous printout, uploading, and downloading of disk files, a dialing directory with auto-dialing, programmable input keys, user-definable communications protocol, elapsed time display, and selective stripping of characters. It operates at speeds up to 1200 baud, has XON/XOFF support, on-screen help commands, and self-printing complete documentation. Users may obtain a free copy of the program by sending a blank formatted disk in a postage-paid return mailer to the publisher. Or send a $25 advance order. *(List Price: $25 suggested contribution)*

Requires: 64K, one disk drive, asynchronous communications adapter.

FREEWARE
The Headlands Press, Inc.
P.O. Box 862
Tiburon, CA 94920

Asynchronous Communications Support Package

833 A program used with the Asynchronous Communications Adapter that enables the user to communicate with other devices without the need for programming. The PC can be used as an asynchronous (start/stop) terminal to exchange programs and data files with a host system. Common settings such as parity, stop bits, and baud rates are specified interactively at program initiation. Programs can be sent from the PC to a host or received by the PC from a host. *(List Price: $40, IBM Product Center prices)*

Requires: Asynchronous communications adapter, 16K; communications programs written in BASIC require one disk drive, 32K. (Users are responsible for obtaining necessary modems, cable, and communications options for attaching their system to peripheral devices).

IBM Corporation
System Products Division
P.O. Box 1328
Boca Raton, FL 33432
(800) 447-4700, 322-4000 Illinois
447-0890 Alaska, Hawaii

Software for the IBM Personal Computer...from SuperSoft

C compiler

A professional quality compiler suitable for ny programming task. Supports most Unix ersion 7 "C" features. Produces highly otimized executable code. $500.00.

Star-Edit

Very powerful screen oriented text editor. ext is formatted exactly as it appears on the reen. Resembles the "EMACS" editor. uitable for any text processing task from rogram writing to word processing. $225.00.

ScratchPad

The Ultimate Spreadsheet. The finest ectronic worksheet available which includes e following state-of-the-art advancements: very cell on the spreadsheet can be used. onsolidate numerous spreadsheets. Screen ay be split as often as you wish. More. $295.00.

Disk-Edit

Provides ALL the raw information on your isk in both HEX and ASCII. You can scroll rough that information and alter it with a set f text editing commands. Extremely powerful isk utility. $100.00.

BASIC compiler

A superset of standard BASIC. Accepts the ost popular syntax. Supports many extensions o the language. Long variable names are llowed and line numbers are not required. Few hanges needed to compile programs written or the IBM BASIC interpreter. $500.00.

FORTRAN

Full WATFIV FORTRAN IV which meets and exceeds the ANSI 1966 standard. Supports many advanced features including variable character strings and recursive subroutines with static variables and complex variable types. $425.00.

Investment TaxPac

Maintains a complete catalog of information on your investments and tax records. Simplifies investment analysis. $200.00.

Diagnostics II

A complete set of diagnostics routines allowing you to check every component of your hardware to pinpoint any malfunctions that may occur. $125.00.

Optimizer

A business problem solver which uses the linear programming technique to solve complex numeric problems. Optimal solutions are provided, and a "what if" analysis is available. $200.00.

All products available for both IBM PC DOS and CP/M-86.

Available from fine dealers everywhere or directly from SuperSoft.

Japanese distribution:
ASR Corporation International

Now, for the IBM: The FinalWord!

The only word processing software package you'll ever need

How could anyone call their word processor The FinalWord? Take the best features of the most popular word processors, combine them and add a few more in one text editor/formatter and you'd be off to a good start. Then, write the program in C to allow user customization and make it capable of supporting any printer on the market and you'd be ahead of everybody else. If you went one step further and made your word processor transportable from one terminal to another you'd have—The FinalWord.

Supports multiple printers: The FinalWord allows you to produce high-speed draft copies on one printer, and letter-quality on another. It also means you'll never need another version just because you bought a new printer.

User-installable on different hardware: With The FinalWord you can upgrade your system and still have a familiar screen display. And since we've written The FinalWord in C, new versions are available almost as soon as new computers.

Features that put you in control: Look at what you get with The FinalWord: automatic generation of Table of Contents, Index, footnoting and chapter/section numbering; enhanced command sets (delete/move a letter, word, sentence, paragraph, page); multiple buffers and windows, deletion recovery, true proportional spacing and more. And because we wrote The FinalWord to be easily reconfigured for different systems, our price can be lower.

Features	The FinalWord™	WordStar™
Full-Screen Editing	Yes	Yes
Directory Access while Editing	Yes	Yes
Simultaneous Printing while Editing	Yes	Yes
External Commands while Editing	Yes	Yes
Video Highlighting	Yes	Yes
Automatic Footnotes	Yes	No
User-Defined Commands	Yes	No
Multiple File Editing	Yes	No
Deletion Recovery	Yes	No
Supports Multiple Printers	Yes	No
Crash Recovery	Yes	No
Dynamic Include Files	Yes	No
Suggested Retail Price	**$300**	**$495**

The FinalWord for the IBM personal computer requires 64K, IBM DOS, and a printer or communications adapter; otherwise, The FinalWord requires a 56K CP/M system and any video terminal with cursor positioning character sequences. It is presently available in 8" standard format for the TRS-80 Model II, Vector Graphics and Altos Systems. There are compatible versions for the HP-125, Xerox 820, Cromemco, Micropolis and Dynabyte Systems, and there are 5¼" versions for the Heath/Zenith Z-89, Northstar, Apple and Superbrain. **Coming Soon: The FinalWord for the DEC Personal Computer.**

The FinalWord is available through leading retailers, Westico, and Discount Software, or directly from:

Mark of the Unicorn, Inc.
PO BOX 423
Arlington, Massachusetts 02174
(617) 489-1387

Dealer and OEM inquiries invited.

TM The FinalWord is a trademark of Mark of the Unicorn. WordStar is a trademark of MicroPro International.

Mark of the Unicorn

COMMUNICATIONS

Communications Package

834 A menu-driven program that makes it easy to set up a communications channel and send and receive files. It provides on-screen status information and can send predefined messages at fixed times. Included is a translation table for customization. Supported baud rates are 75, 110, 300, 600, 1200, 1800, 2400, 4800, and 9600. *(List Price: $40)*
Requires: 48K, one disk drive, asynchronous communications adapter.

Personal Computer Products
1400 Coleman Ave., Ste. C-18
Santa Clara, CA 95050
(408) 988-0164

Lync Data Communications

835 A data communications program with two modes of operation: Lync and Term. In Lync mode local or remote directories can be displayed, and user-defined routines can be executed. The program allows the user to enter Send, Fetch, Dump, Load, Term, and Hexdump modes. In Term mode an input file can be opened, and data can be written to the file. It uses full or half duplex, and executes user routines. Lync mode can be entered. *(List Price: $125)*
Requires: 48K, one disk drive, modem, asynchronous communications adapter.

International Software Alliance
1835 Mission Ridge Rd.
Santa Barbara, CA 93103
(805) 966-3077

E/Lync Data Communications

836 A data communications program that operates in two modes: Lync and Term. In Lync mode a message typed on either terminal is viewed on both terminals; any file can be sent to another system; and the user can exit the program or switch to Term mode. In Term mode the microcomputer becomes a data communications terminal allowing hook up to such files from The Source, etc. The user can exit the program or switch to Lync mode while in Term mode. *(List Price: $30)*
Requires: 48K, one disk drive, asynchronous communications adapter, modem.

International Software Alliance
1835 Mission Ridge Rd.
Santa Barbara, CA 93103
(805) 966-3077

Crosstalk 2.0

837 Communications software that allows DOS-based microcomputers to access data stored on almost any ASCII dial-up computer system regardless of disk format incompatibilities. Designed for micro users who need access to large time-sharing systems, who subscribe to information utilities such as The Source or CompuServe, or who need to exchange data or program files among networked micro users.

Crosstalk allows CP/M systems to emulate a "very smart" terminal by automatically dialing a system, establishing access through passwords, and loan in data at full modem speed for off-line editing.*(List Price: $195)*
Requires: 64K, one disk drive, modem, serial interface.

Microstuf, Inc.
1900 Leland Dr. #12
Marietta, GA 30067
(404) 952-0267

Micro Link

838 A communications program that exchanges files and conducts keyboard conversations either over the telephone or via direct cabling with other micros or mainframe computers. Features include the ability to send and receive text, machine language programs, and data files without conversion. Other software may be used by the computer at the other end of the communications link. *(List Price: $89)*
Requires: 32K, one disk drive, CP/M-86, serial interface, modem.

Digital Marketing
2363 Blvd. Circle
Walnut Creek, CA 94596
(415) 938-2880

Micro/Terminal

839 A program that allows users to exchange data with mainframes, minis, and data bases such as The Source, Dow Jones, or CompuServe. It features a built-in text editor, facility for printing data as it is received, and the ability to create automatic sequences that initiate exchanges with other systems. Users can create a directory that automatically provides *Micro/Terminal* with correct file names, telephone number, baud rate, flow control, duplex mode, and data format for frequently called services or systems. It can also construct automatic log-on and information retrieval procedures, so users need not intervene to receive daily or regular information transfers.*(List Price: $100)*
Requires: 64K, two disk drives, serial interface.

Microcom
1400A Providence Hwy.
Norwood, MA 02062
(617) 762-9310

R/Net (Relational Network)

840 A software interface that connects the IBM PC directly or remotely to minicomputers supporting ADDS terminals. It supports ADDS cursor control and allows data sent to the PC to be stored on its own disk storage. Data from a relational data base may be retrieved and stored on the PC and operated on by the microcomputer without further impact on the data base machine's limited resources. It allows the PC to perform word processing and *VisiCalc* business plan projections using data from the data base. *(List Price: $200 including floppy disk, documentation, conversion table)*
Requires: 48K, one disk drive, asynchronous communications adapter.

Cosmos Inc.
10626 148th Ave. SE
Renton, WA 98056
(206) 226-9362

EMU-TEK Emulation Software

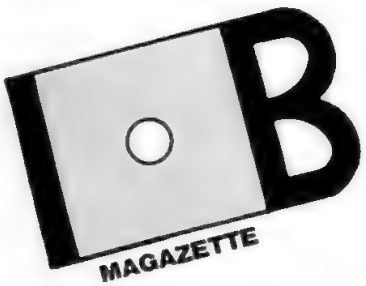

841 A software package that provides emulation of some or all features of the Tektronix 4006, 4010, 4012, 4014, 4015, or 4016 graphic CRTs. Graphic CRTs are useful in time-sharing or dedicated environments for all types of scientific and engineering work. The package provides light pen and joystick support. *(List Price: Not available)*
Requires: 64K, one disk drive, asynchronous communications adapter.

FTG Data Systems
10801 Dale, Ste. M-2
P.O. Box 615
Stanton, CA 90680
(714) 995-3900

Intelliterm

842 A full-capability communications program that features separately scrolling windows. It allows the user to set up a bulletin board with optional CBBS module.*(List Price: $150)*
Requires: 64K, one disk drive, (printer optional).

MicroCorp

COMMUNICATIONS

TE100 (UT100 Terminal Emulator)

843 A software package that allows the PC to function as a Digital Equipment Corporation (DEC) VT100, VT101, or VT102 terminal. The TE100 implements almost all DEC features including setup mode, character attributes, line and character insert and delete, and modification of terminal characteristics. *(List Price: $125)*

Requires: 48K, one disk drive, monitor, serial interface, modem.

Persoft, Inc.
2186 U.S. Highway 51
Stoughton, WI 53589
(608) 233-1000

VideoLink 88

844 A menu-driven communications package that turns the PC into an intelligent terminal capable of acquiring and recording information from other computers. Time and money saving features for users of The Source, Tel-Net, or Time Net include selective recording of information to disk or printer for future review and editing. *(List Price: $59.95)*

Requires: 64K, serial interface, modem.

Windmill Software, Inc.
1058 Joan Dr.
Burlington, Ontario
Canada L7T 3H2
(416) 632-6279

R/NET, R/UPLOAD

845 A family of software products designed to transfer data stored on a centralized data base machine to a PC work station. *R/NET* lets the PC serve as an intelligent work station, allowing minicomputer data base management systems to "talk" to the PC. The program receives data sent from the data base machine and stores it on the PC's disk, where it is processed without using any of the minicomputer's limited resources.

R/UPLOAD works with *R/NET* to provide the ability to move files from the PC to the minicomputer data base management system. Data is collected at the work station and sent to the minicomputer.

In both programs the baud rate is controlled by a function switch, which may be set at rates ranging from 300 to 9600. Both programs will address up to 128K and can utilize additional floppy or hard disk storage. *(List Price: R/NET $200, R/UPLOAD $75.)*

Requires: 32K, one disk drive, serial interface, modem.

Cosmos, Inc.
10626 148th Ave. SE
Renton, WA 98056
(206) 226-9362

GRAPHICS

HP7470 Plotter Demo

846 Four demonstration programs for an HP7470 or HP7225 plotter that can be modified to serve users' particular needs and data. The *Birthday Plot* creates spiral plots from random points. The *12-Month Trend* program plots a 12-month moving average for two sets of data. The X-axis is labeled with months and the Y-axis is labeled in thousands of dollars. Labels and data values can be modified to suit users' needs. *Phone Chart* plots a ledger sheet for entering names, addresses, and phone numbers. *Display Slides* can be used to create posters or presentation slides. Users design the placement of text on the video display. The plotter prints the poster or slide. *(List Price: $24.95)*

Requires: 48K, one disk drive, HP7470 or HP7225 plotter.

Ensign Software
2312 N. Cole Rd., Ste. E
Boise, ID 83704
(208) 378-8086

I-Plot

847 A plotting program that accepts data from the keyboard or a data file created by another program. After data is entered, up to six data sets can be plotted in line, scatter, bar, or pie charts. It also overlays combinations of presentations. Completed plots may be saved or dumped to a printer. The program is menu-driven and data can be corrected by reentering on screen. *(List Price: $250)*

Requires: 128K, one disk drive, color/graphics adapter.

Management Solutions, Inc.
17660 Millbrook Dr.
Chagrin Falls, OH 44022
(216) 543-9263

Presentation Graphics

848 A package that generates and stores complex business information in graphic form such as pie charts, bar charts, and graphs. The package has a medium- and high-resolution color display generator, software, and a choice of video-graphic recorders for 35mm slides, 8x10 overheads, and other common visual formats. Satellite software packages and leases are also available. *(List Price: $22,500)*

Requires: 128K, one disk drive, serial interface, color monitor.

CENTEC Management Briefing Graphics
11260 Roger Bacon Dr.
Reston, VA 22090-5281
(703) 471-6300

PCcrayon

849 A graphics design aid that enables the user to create and save color/graphics symbols and add motion and music to the creations. It comes with predefined symbols and fonts. *(List Price: $44.95, demonstration disk $10)*

Requires: 64K, color/graphics adapter, (other requirements not available).

PCsoftware
4155 Cleveland Ave.
San Diego, CA 92103

VisiTrend/Plot

850 Graphics software that allows users to take data entered through *VisiCalc* and create charts and graphs along with statistical reports including linear regression, standard deviation, mean, median, and the like. Displays may be saved on disk for later use in presentations. Graphs may be printed with the IBM or Epson with Graftrax and several other graphics printers. *VisiTrend/Plot* is part of "VisiSeries," a set of integrated programs by VisiCorp. *(List Price: $300)*

Requires: 64K, one disk drive, color/graphics adapter.

VisiCorp
2895 Zanker Rd.
San Jose, CA 95134
(408) 946-9000

Typo

851 A program that creates business graphics for group presentation. It enables users to customize any standard text with specific dates and information. Users compose ideas on the screen, experiment with different word arrangements, correct errors, and select from a variety of typefaces for final printout with a graphics-equipped dot matrix printer. Printed pages can be used as masters for overhead transparencies. *(List Price: $75)*

Requires: 64K, one disk drive, IBM or Epson printer with Graftrax.

Radio Technology
8 N. Main St. #111
West Hartford, CT 06107
(203) 232-9974

Project Management Graphics

852 A program that generates multicolor outputs on H.P. multicolor plotters. Critical path networks required in project management are calculated, plotted on CRT, edited, stored, and graphed on the X-Y plotter. Access is via the PC's ten user function keys. *(List Price: $295)*

Requires: 64K, two disk drives, H.P. multicolor plotter.

Polymer Projections, Inc.
1407 Bethlehem Pike
P.O. Box 312
Flourtown, PA 19031
(215) 836-7100

Monochrome Slide Editor and Organizer

853 An aid in developing high-quality slide presentations for the monochrome display. Text and graphics may be mixed on the screen with a variety of attributes supported for all characters. The Organizer allows access to slides using Page Down and Page Up keys for paging backward and forward through slides. *(List Price: $75)*

Requires: 48K, one disk drive.

Digital Learning Systems, Inc.
168 E. Main St.
Denville, NJ 07834
(201) 627-7917

Chart Pro

854 A program that produces graphics on the screen (monochrome or color) and with the Epson or IBM printer. It produces charts, bar graphs, and linear data from information the user enters directly or through *VisiCalc* files. *(List Price: $75)*

Requires: 64K, one disk drive, Epson or IBM printer, (*VisiCalc* optional).

Micro Control Systems
431 Vinyard Point Rd.
Guilford, CT 06437
(203) 643-4897

Print-Graf, Micro-Graf

855 Two programs designed to work individually or together to print out medium- or high-resolution graphics screens on an Epson or IBM printer and to create charts and graphs. *Print-Graf* prints the graphics screen as a user wants it. For a full-size page the program can orient a 6.6 x 9.0 picture sideways on a page and locate it where the user needs it. If a user needs to put graphics on a page with typing, the program can center a 3x5 printout upright on the page. Reverse or normal printout is also available.

Micro-Graf creates charts and graphs of data automatically. Users type in data, select the X-Y scales, input titles for the axes and the chart, and select a line, bar graph, or linear regression line. The program allows users to change the scales, titles, or formats, and try different combinations of data. *(List Price: Print-Graf $44.50 including manual, Print-Graf and Micro-Graf $79.50, both programs with Epson Graftrax-Plus $149.50)*

Requires: 48K, two disk drives, color/graphics adapter, Epson Graftrax with either Epson or IBM printer.

Micro-Z Electronic Systems
P.O. Box 2426
Rolling Hills, CA 90274
(213) 377-1640

Slide Pro

856 A menu-driven program that uses the function keys as its primary input medium. It permits interactive generation of charts suitable for use in making overhead projector slides. Charts are created using a variety of prestored shapes with words and color added interactively. Different colors produce different shadings on the hard copy unit. It produces black and white charts on normal printer paper. *(List Price: $49.50)*

Requires: 64K, color/graphics adapter, Epson or IBM printer.

Micro Control Systems, Inc.
230 Hartford Turnpike
Vernon, CT 06066

GraphPower

857 A menu-driven package that creates business graphics on Hewlett-Packard and Houston Instrument pen plotters. It creates full-color pie charts, bar and stacked graphs, line graphs, text, and reports on paper or transparencies ready for business presentations. *GraphPower* may be used alone or by accessing DSS/F data files. *(List Price: $299)*

Requires: 64K, two disk drives.

Ferox Microsystems, Inc.
1701 N. Ft. Myer Dr. #611
Arlington, VA 22209
(703) 841-0800

The Graphics Generator

858 A graphics program that creates, edits, formats, saves, and recalls graphs using single-keystroke commands. It allows users to create bar charts, pie charts, line graphs, and function graphs as color or monochrome displays. Editing features include adding or deleting data items, functions, or data sets. Graphs are automatically modified to reflect changes in data. Capabilities also include superimposing two graphs, merging bar charts, and plotting up to ten curves on one graph. *(List Price: $200)*

Requires: 64K, one disk drive, color/graphics adapter, (IBM printer with Graftrax-80, or Epson printer with Graftrax-80 optional).

Robert J. Brady
Bowie, MD 20715
(800) 638-0220, (301) 262-6300

Slide Pro

859 A graphics program that produces copy that can be thermofaxed for overhead projection slides. The user moves the cursor around, drawing flow charts and block diagrams. *(List Price: $75)*

Requires: 64K, one disk drive, color/graphics adapter, printer.

Micro Control Systems
431 Vineyard Point Rd.
Guilford, CT 06437
(203) 643-4897

GRAPHICS

Glyphix

860 A graphics sketch-pad program that assists in the development of images and diagrams on the IBM color/graphics screen. The program, written in Advanced BASIC, is not list-protected, but is code structured and commented so users can modify the code to serve their needs.

The program offers users full and easy access to all BASICA graphics features. A single-pixel flashing cursor is steered about the screen with the eight outer keys of the numeric keypad. The program can draw vertically, horizontally, and to any 45-degree angle for rapid isometric sketches. Lines can be drawn between any two points on the screen using the RAY command.

Used with the manufacturer's *Frieze* graphics utility program, graphic images created with *Glyphix* can be saved to disk or dumped to a printer with the PrtSc key. *(List Price: $24.95)*

Requires: 48K, one disk drive.

Starside Engineering
P.O. Box 18306
Rochester, NY 14618
(716) 461-1027

PC-Graf

861 A business graphics package with bar graphs, histograms, scatter (dot) graphs, line graphs, and hi-lo (stock) charts. The programs use data created with *VisiCalc* and similar programs. Graphs and charts are automatically displayed on the screen using the PC's high-resolution graphics capability. Full documentation is included. *(List Price: $125)*

Requires: 48K, color/graphics adapter, (other requirements not available).

von Leivendyke Enterprises
Silvermine Ave.
Norwalk, CT 06850
(203) 846-4973
Telex: 643-103

Pixprint

862 A graphics package that prints any graphics picture, medium- or high-resolution, black and white or color. Colors are translated into shades of gray. It prints graphics even without a graphics video board from a picture stored on diskette. It prints in four different sizes, from playing card format to full-blown poster. Documentation includes BASIC programs to drive it and tailor it to special needs. *(List Price: $49.50 USA, $57 Canada)*

Requires: 48K, one disk drive, Epson or IBM printer with Graftrax.

Microtaure Inc.
200 Rideau Terrace #706
Ottawa, Ontario
Canada K1M 0Z3
(613) 745-6661

Chartman

863 A business graphics program that allows users to present data in two- or three-dimensional graphics. The program is menu driven, uses single function keys, and converts numerical data into over 15 types of graphics charts. The charts can be printed out, produced on Hewlett-Packard plotters, transferred onto transparencies (to be displayed on overhead projectors), or stored on disk. *Chartman* interchanges data with *VisiCalc*, plotting information that has already been analyzed by that program. *(List Price: $380)*

Requires: 64K, one disk drive, color/graphics adapter.

Graphic Software, Inc.
P.O. Box 367
Kenmore Station
Boston, MA 02215
(617) 491-2434

Elate

864 An interactive diagramming template for system designers, allowing different diagrams to be created, manipulated, and printed in a real-time mode. *Elate* combines a light pen with a keyboard; the light pen selects and manipulates a group of standard design symbols displayed on the screen's margin, and the keyboard allows text entry and diagram paging. *(List Price: $300)*

Requires: 64K, RGB monitor, color/graphics adapter, printer, light pen.

Graphical Interactions
2927 Shannon Ct.
Santa Clara, CA 95051
(408) 249-7780

Video Etch

865 A drawing program that allows users to create and save high-resolution graphic line etchings. *Video Etch* has applications in engineering, drafting, education, and graphics program development. Stored etchings may be called from other BASIC programs. *(List Price: $49.95)*

Requires: 64K, one disk drive, color/graphics adapter.

Alphanetics
P.O. Box 597
Forestville, CA 95436
(707) 887-7237

Chart Pro

866 Business graphics software designed to produce bar and dot charts. Data is input from the keyboard in response to menu prompts. Data can also be displayed in a variety of formats. *(List Price: $49.50)*

Requires: 64K, (Epson or IBM printer optional). Other requirements not available.

Micro Control Systems, Inc.
230 Hartford Turnpike
Vernon, CT 06066

NCAPT Software System

867 A sophisticated language for numerical control programming, including point, line, circle, tabulated cylinder, vector and matrix definitions, conditional branching and looping logic, and cutter compensation. This is an application module of the GDX Graphics System. *(List Price: $5,500 including documentation)*

Requires: 1MB hard disk storage, Baby Blue.

FTG Data Systems
10801 Dale #M-2
P.O. Box 615
Stanton, CA 90680
(714) 995-3900

Bar Graph

868 Software that displays all typed-in data in bar graph form, allowing users to visualize numerical data graphically. *(List Price: $25)*

Requires: 48K, one disk drive, (printer optional).

Metamorphics, Inc.
154 Montgomery Ave.
Bala Cynwyd, PA 19004
(215) 668-9000

Pixbuilder

869 A graphics package that provides a graphics editor, a picture interpreter, and a communications package that allows pictures to be sent in a compact, universal format through a modem or any computer to computer line. It is written in assembly language to increase the speed in image processing and display. It fully supports light pen handling. The editor supports the use of both monochrome and graphics display (full menus and on-line documentation on the monochrome). *(List Price: $249.95 USA, $299.95 Canada)*

Requires: 48K, one disk drive, Epson or IBM printer with Graftrax.

Microtaure Inc.
200 Rideau Terrace #706
Ottawa, Ontario
Canada K1M 0Z3
(613) 745-6661

Mirrorgraphics Business Systems

870 A software package that provides a graphics facility for a variety of business applications. It creates high-resolution graphs and charts from data in a unified data base. *(List Price: $34.95)*

Requires: 64K, one disk drive.

Mirror Images Software
1223 Peoples Ave.
Troy, NY 12180
(518) 274-2335

Psssstt...

(Jingle Bells, Jingle Bells, Jingle All The...)

We're really not rushing the season. We wouldn't even mention it if we didn't think you'd want to know.

The **Strictly Soft Ware** Holiday Catalogs (Apple & IBM) are going to be ready early this fall. More software than ever. Same great prices. And with a customer service and technical support program that's so good that...well, let's just say someone at the North Pole is on our mailing list.

If you're already on the **Strictly Soft Ware** list, you'll automatically receive our Holiday Catalog. If you're not on the list, call us (toll-free) at 1-800-848-5263. Bulk mailing starts Oct. 1.

Don't be left out in the cold by not ordering the free **Strictly Soft Ware** Holiday Catalog. It may be the nicest present you get this year.

IBM SPECIALS

Write-On	**$99.99**	**Visicalc**	**$189.99**
Word Star	**$239.99**	**Visidex**	**$189.99**
Volkswriter	**$159.99**	**Desk Top Plan**	**$189.99**

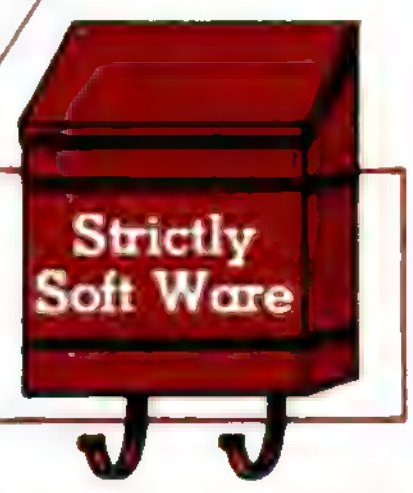

Above Specials In Effect Until Oct. 1.

Holiday Gift Idea #1

The ***Strictly Soft Ware*** *Subscription Plan. Prepayment allows the account to be drawn upon for whatever you want, whenever you want. When we send the package, we'll provide a balance statement as well. Here's a gift that can last all year long.*

Holiday Gift Idea #2

The ***Strictly Soft Ware*** *Gift Certificate. Here's the perfect way to take the guesswork out of holiday giving. A gift certificate and the* ***Strictly Soft Ware*** *holiday catalog guarantee the perfect gift for everyone on your holiday list.*

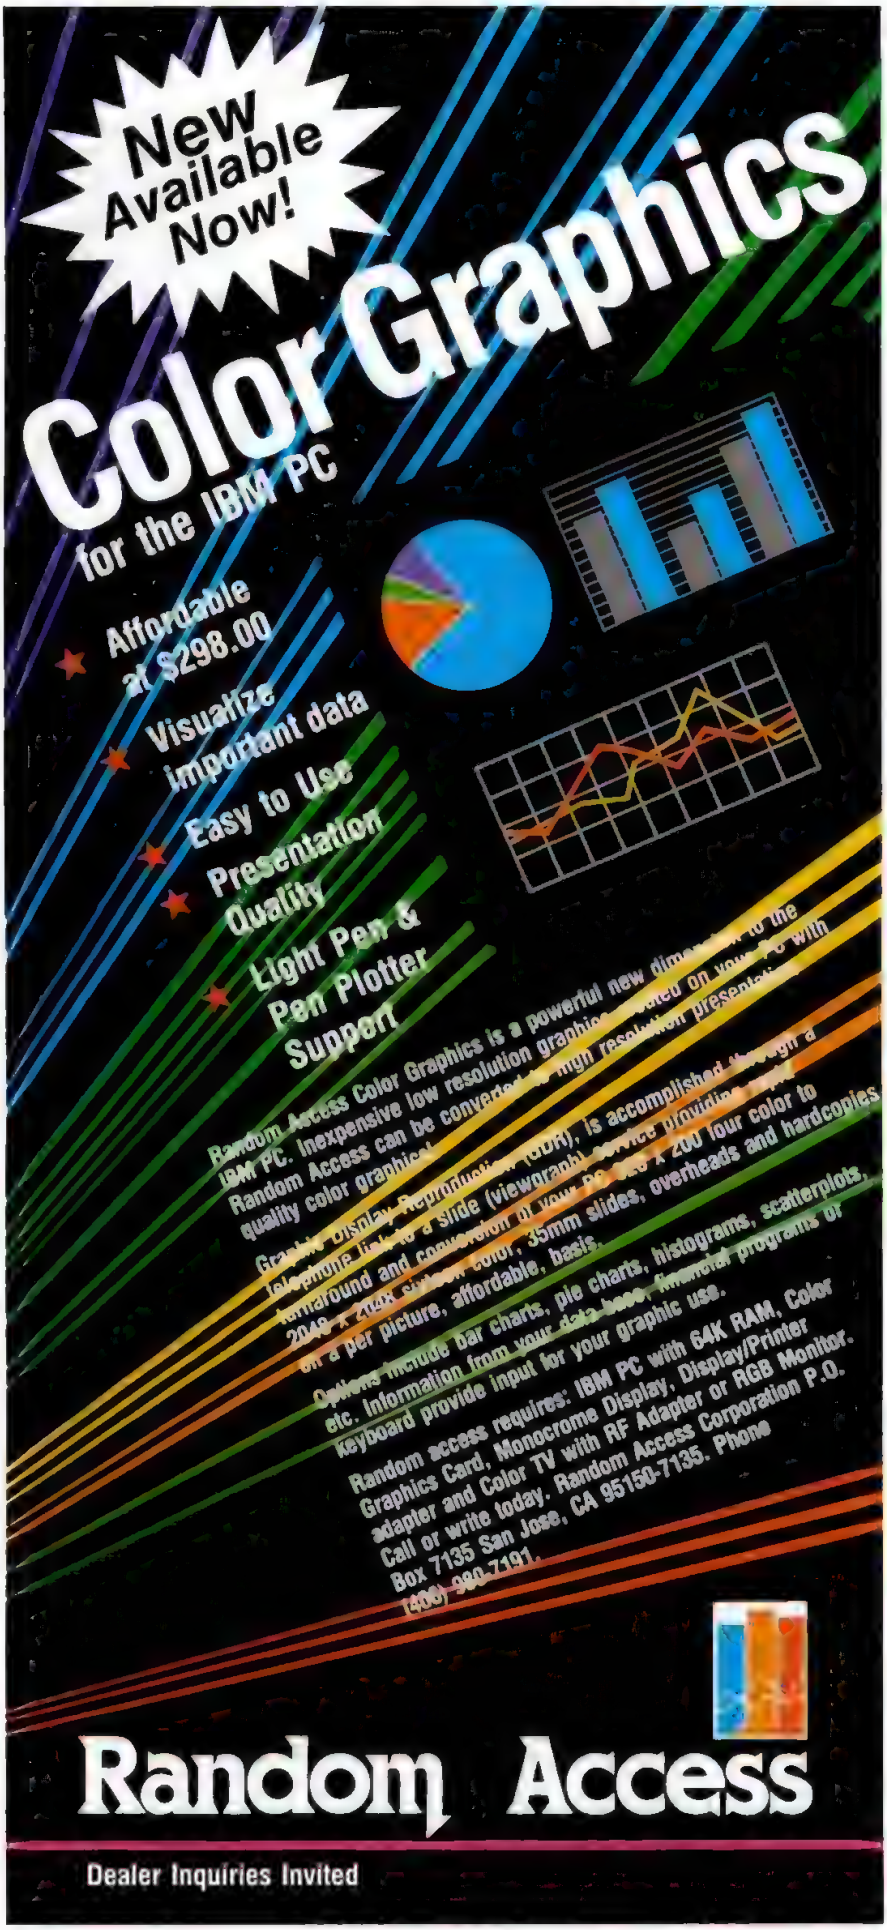

MasterCard VISA

We take Master Card or VISA (include card # and expiration date). Ohio residents add 5.5% tax. Include $2.00 for postage. 3% discount if check accompanies order.

Send for free catalog. Prices subject to change. Hrs.: 9-9 weekdays; 9-6 Sat.

Plotrax

871 A software product for engineering, scientific, and business applications. It plots X-Y coordinate from disk files onto the screen with high-resolution graphics and includes a statistical routine to perform linear or polynomial regression of the data. The user can switch between the plotter menu and the actual screen plot until satisfied with the screen image. The option of dumping the graphics screen to the printer is also included. *(List Price: $97)*

Requires: 64K, one disk drive, color/graphics adapter, Epson MX-100 printer.

Omicron Software
Engineering-Science
57 Executive Park South #590
Atlanta, GA 30329
(404) 325-0770

Transplot

872 Software for engineering, scientific, and business applications that provides capability for dumping a graphics screen image to an Epson MX-100 printer, typically in less than 3 minutes. *(List Price: $39)*

Requires: 64K, one disk drive, color/graphics adapter, Epson MX-100printer.

Omicron Software
Engineering-Science
57 Executive Park South #590
Atlanta, GA 30329
(404) 325-0770

GDX Interactive Graphics System

873 A collection of programs and modules for the creation, manipulation, and display of geometric data in two and three dimensions. Individual modules are specialized for drafting, printed circuit layout, and numerical control applications. Subroutine sets are available separately for graphic display processing, editing, and I/O interface. A path length optimization module is also available separately.

Support is available for plotters, digitizers, light pens, paper tape, and other devices. The data base structure uses 32-bit integers for high resolution, minimal disk requirements, and fast processing. The system is customized to the user's needs. *(List Price: Not available.)*

Requires: Not available.

FTG Data Systems
10801 Dale #M-2
P.O. Box 615
Stanton, CA 90680
(714) 995-3900

RANSFORM YOUR IBM® TOTALLY
RAPHICS + BUFFERING + TERMINAL

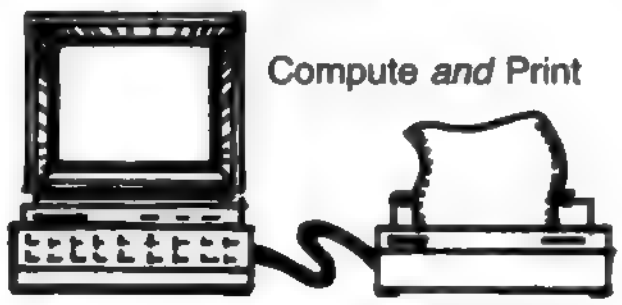

Computer—Printer Output Buffering

Buffer sizes software selectable 16K, 32K, 48K, 64K
Uses any standard memory expansion boards
Buffer size reselection for different sized output jobs, at keyboard level
Buffers time consuming graphics reproduction as well as text
Print speed no longer determines processing speed of your PC. Printer virtually functions *independently* of the computer.

Dot Matrix Graphics Hard Copy Reproduction

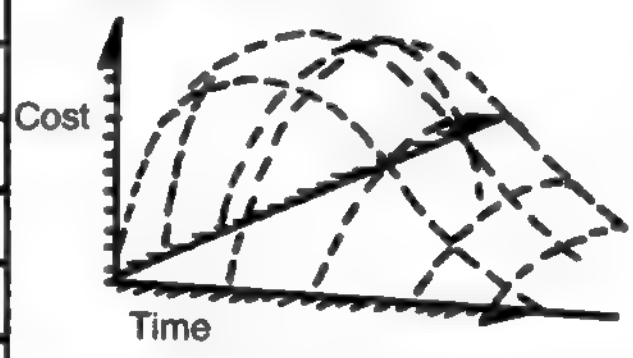

Full Color or B/W tones
Uses any standard memory expansion boards
All Hires and Medium resolution modes
4 dot scale sizes for 4 different blow-up sizes
Whole graphics screen, or any subsection can be reproduced
Picture rotation, across or along length of page
'Shift'-'PrtSc' feature to make snapshot copies at keyboard level
Dot patterns and tones are user redefinable
Inversion of color/BW for any graphic mode
Colors on Prism 132/80 can be swapped and mixed as desired
Compatible with:
Epson MX80-80FT-100
NEC 8023
C-ITOH PROWRITER I/II
Okidata 82, 83 with graphics
IDS Prism 132/80, with or without color options

Terminal Emulator

Recommended Retail

$85⁰⁰

Less than $29 per function!

Terminal Emulator Data Aquisition

- RS-232 direct connect or modem connect to remote computer
- Full communications, data logging, printing, viewing and storage
- Software permitting intelligent graphics terminal emulation also will be available
- All functions settable from keyboard

This unique device meets the standard, beats the standard and will be the standard for IBM users and software, worldwide.

Educational, Personal, and Entertainment Software

The fourth section of the PC Product Guide consists of three groups: Educational, Personal, and Entertainment Software. A few programs with other applications are described at the end of the section. The Educational Software has two general applications. The first kind is tutorial software that teaches skills and concepts. The second group comprises professional programs for developing courses or for school or class administration.

The tutorial programs teach such things as the history of computers, how to use computer hardware, and how to program in BASIC. Other programs teach math, vocabulary, spelling, and typing skills. Professional programs include software for teachers who want to develop computer-assisted instruction (CAI) and teachers and school administrators who need to keep track of test grades, course averages, and student attendance.

When choosing tutorial software, check the age group and educational level for which the program is designed, and make sure it teaches skills and concepts that are right for the students. Also make sure that your computer has all the hardware required by the program so you can take advantage of features such as graphics, color, or sound. Try to see a demonstration of the program, and make sure that clear instructions are provided for everyone who uses the program, either on the screen or in the documentation. Finally, check that answers to test and quiz questions are provided, again, either on the screen or in the documentation.

The second group, Personal Software, comprises programs for personal finances and home use. The finance programs are designed to help keep budgets, prepare taxes, maintain telephone directories, and manage cash, checkbook, and credit cards. Many of these programs can also be used in small businesses. Home use software includes cookbook and diet programs, and even a data base of names for children. One set of programs in this group covers solar energy. The programs carry out tasks such as calculating solar energy and evaluating solar hot water heating systems.

When selecting personal and home use software, you are the person who knows what you need. To be practical, look for programs that carry out tasks you need to have done. You may also choose programs simply because you want to learn about a particular application. As with all software, make sure the program suits the requirements of your hardware and that it makes good use of all the features.

A third group in the Educational, Personal, and Entertainment section is Entertainment Software for sports and games. Sports software keeps track of scores and other statistics. Some of the sports included in the descriptions are golf, bowling, and gymnastics.
Games software includes a variety of fantasy games, space games, mystery games, and card games such as bridge and blackjack. Also included are question and answer games in which the program asks you increasingly more difficult questions, and simulation games about topics such as operating a business.

The games in this section make good use of PC hardware. Many of them feature high-resolution graphics, animation, color, and sound effects. In fact, playing games is a good way to see some of the PC features in action.

When choosing entertainment software, consider your PC system and the sports or game program requirements. Beyond that, we can't say much more than have fun!

Software Requirements

FOR ALL SOFTWARE PRODUCTS we have listed memory, operating system, language, disk drive, interface, monitor, and printer requirements where available from manufacturers. Software requires DOS and BASIC except where other operating systems or languages are listed. Check with manufacturers and dealers before making a purchase to assure that software is compatible with your IBM PC.

EDUCATIONAL

The Data Reporter

874 A data base management system that features machine language searches and sorts, soundex searches, calculated fields, batch commands, password protection, user-specified fields, unlimited record lengths, and several printing options. *(List Price: $250)*

Requires: 64K, one disk drive, printer.

Synergistic Software
830 N. Riverside Dr.
Renton, WA 98055
(206) 226-3216

The Keyboard, T.E.L., BBASIC, ABASIC

875 The *Keyboard* is an illustrated program that teaches keyboard functions through step by step instructions. *T.E.L.* teaches PC users about subjects such as cities, flowers, political leaders, animals, musicians, sportsmen, celebrities, and historical people. Users can also create their own subject fields.

BBASIC teaches users to program the PC with BASIC. Functions include arithmetic functions, differed mode, print, input, loops, flow chart, and simple graphics. *ABASIC* shows functions of Advanced BASIC for the PC including file manipulations, string and substring manipulations, structured programming, advanced graphic functions, and colors. *(List Price: Not available)*

Requires: 64K, one disk drive, color/graphics adapter.

Computrickx, Inc.
533 Fifth St.
Santa Rosa, CA 95401
(707) 544-8363

Principles of the IBM PC and Computer Programming

876 A series of advanced tutorials designed to train users to develop an understanding of processing data using the IBM PC. The tutorials provide the beginner with the concepts and vocabulary necessary to communicate with the computer. They include basic processing cycles, hardware, software, and data and file formats. Other advanced tutorials will include structured programming, system analysis and design, IBM PC Disk Operating System, and Macro Assembler. *(List Price: One 320K disk $29.99, two 160K disks $39.95)*

Requires: 64K, one disk drive.

Interactive Tutorial Systems
1266 Soldiers Field Rd.
Boston, MA 02135
(617) 783-3187

Teacher Aide

877 A program that enables teachers to maintain and control student information files, test grades, course averages, and classroom attendance. Test scores can be tabulated to provide overall statistics on student and classroom performance, or detailed statistics to enable test question item analyses to be calculated. A special create-tests option allows a data base of test questions to be maintained, from which individual tests can be generated either automatically or under user control.*(List Price: $57)*

Requires: 48K, one disk drive, printer.

New Venture Systems
P.O. Box 2141
Chesapeake, VA 23320
(804) 482-1889

School Executive

878 A menu-driven program that automates record keeping functions for a school administrator's office. Modular and coded in interpretive BASIC, the program's menus provide access to student, class, teacher, and grade information. Printed reports include class rosters, student schedules, grades, and students by category. *(List Price: Full system, one year's upgrades, and telephone support $1,245; user guide and demonstration disk $45; demonstration disk only, $15)*

Requires: 64K, two disk drives, printer.

The Coach

879 An on-line training program that aids users in running the manufacturer's *Software Fitness* program. *The Coach* is a lesson-driven program for use with *Computer Lessons*. A separate computer lesson for each of the *Software Fitness* program applications is included.

Open Systems, Inc.
430 Oak Grove #409
Minneapolis, MN 55403
(612) 870-3515
TWX: 910-576-1743

School Daze

880 A program that allows users to perform many common and uncommon conversions such as liters to quarts, furlongs to inches, and grains to scruples. The package is especially useful for history students who want to create a chronological time line of appropriate dates and events. *(List Price: $25; manual only, $10)*

Requires: 48K, one disk drive.

Metamorphics, Inc.
154 Montgomery Ave.
Bala Cynwyd, PA 19004
(215) 668-9000

FAST FIGURE™
FROM HOURGLASS

Save data entry time with the added dimension of file sharing. Fast Figure™ adds depth to data using full math, trig, business depreciation, NPV, IRR and growth functions. Features include cell level operation and control, prompting menus and flexible printing, all at a surprising price. Disk worksheets available for tax, business, investment and personal work.

$150 THE SOFTWAREVOLUTION HAS BEGUN

Available for leading computers including: Apple II* and Z-80* card, IBM-PC*, Osborne* and CP/M* systems.

Software

EDUCATIONAL

Friendlyware

881 A three-disk software package designed as a starter system to take the novice to a more advanced stage while showing the potential power and capabilities of the PC. Programs range from basic introduction to home and business applications to thinking games. *(List Price: $49.95)*

Requires: 64K, one disk drive.

FriendlySoft, Inc.
213 Pebblebrook
Arlington, TX 76014
(817) 277-9378

Arithmetic Games

882 Two sets of arithmetic drill and problem-solving programs for students in second grade and up. Students have a choice of playing the games individually, competing with the computer at any of three skill levels, or playing with a classmate. Set 1 includes *Beano* and *Rockets*; Set 2 includes *Discovery Machine* and *Number Chase*. Each set includes one disk and an instruction card.*(List Price: Each set $60)*

Requires: 64K, one disk drive.

Science Research Associates, Inc.
155 N. Wacker Dr.
Chicago, IL 60606
(800) 621-0476, (312) 984-7000

Fact Track

883 A program by Science Research Associates that helps students learn basic arithmetic skills. It is organized according to levels of difficulty. Mastery of the program's 390 questions (sums and products of 1-digit numbers) can be measured in two ways: correct answer and rate of response. *(List Price: $90, IBM Product Center prices)*

Requires: 64K, one disk drive, color/graphics adapter.

IBM Corporation
Systems Products Division
P.O. Box 1328
Boca Raton, FL 33432
(800) 447-4700, 322-4400 Illinois
447-0890 Alaska, Hawaii

The Instructor

884 A tutorial program for first-time computer users or those who want to learn better and faster methods of using the PC.*(List Price: $60)*

Requires: 64K, one disk drive, (printer optional).

Individual Software, Incorporated
24 Spinnaker Pl.
Redwood City, CA 94065
(415) 591-4166

Gradebook

885 A program that aids a teacher in maintaining a gradebook. Grades for up to 28 weeks for 35 or more students are recorded. Grade averages are automatically calculated and letter grades are assigned according to a standard scale that can be adjusted to the teacher's requirements. Grades can be changed or the lowest grade ignored in the grade-average calculation. The program is menu-driven, and names can be entered once and carried over to different classes. *(List Price: $99)*

Requires: 64K, two disk drives, printer.

Cook Compusystems
309 Lincolnshire
Irving, TX 75061
(214) 253-6979

eduCAItor advoCAIte Authoring System

886 Software that allows nontechnical people to write computer-aided instruction (CAI) courses. The system features branching capability to permit an unlimited number of student learning paths. It enables users to insert, delete, or revise course data. Automatic learner statistics to simplify student or lesson evaluations are also provided. *(List Price: $590)*

Requires: Not available.

eduCAItor, Inc.
38 Main St.
Hudson, MA 01749
(617) 562-6222

Typing Tutor

887 An interactive, touch-typing instruction and drill program that can be personalized to suit individual needs and skill levels. The program creates individualized typing drills requiring gradual increases in speed and accuracy. All drills are based on a built-in vocabulary, and progress is monitored by keeping track of the keys known and those being learned.*(List Price: $25)*

Requires: 48K on disk drive system, 32K on cassette recorder.

IBM Corporation
Systems Products Division
P.O. Box 1328
Boca Raton, FL 33432
(800) 447-4700, 322-4400 Illinois,
447-0890 Alaska, Hawaii

Touch Typing Made Easy

888 Fifteen lessons designed to teach touch typing. Program features include on-screen keyboard to help users avoid hunt and peck typing methods. Available on monochrome disk.*(List Price: $24.95)*

Requires: Not available.

Alkazar Associates
2638 S. Lynn St.
Arlington, VA 22202

Face Maker

889 An educational game that teaches children between 5 and 8 years old to communicate with a computer. The program uses menus and a joystick to teach children how a computer can be used to create and manipulate graphics images. A blank face outline can be completed by selecting from menus of eyes, ears, and hair. Faces can be named and saved on an initialized disk.

Children can also write very simple programs to animate the face with a series of expressions: smiles, winks, frowns, and wiggling ears. Expressions make appropriate noises when the face adopts the expression. A memory development game is included that allows the computer to perform a sequence of expressions with the face.*(List Price: $40)*

Requires: 64K, one disk drive, (color monitor recommended).

Spinnaker Software
26 Brighton St.
Belmont, MA 02178
(617) 484-8444

Story Machine

890 A sound and animation game designed for children ages 5 to 9. Children learn how to communicate with a computer by using a keyboard while developing their ability to write sentences and paragraphs. A list of words is provided including nouns, verbs, prepositions, and other parts of speech.

Children can write any sentence using the word list and type it onto the screen. Several sentences can be sequenced to form a paragraph. Sentences and paragraphs can be animated using full-color graphics and sound. Stories can be saved on an initialized disk.*(List Price: $45)*

Requires: 64K, one disk drive, (color monitor recommended).

Spinnaker Software
26 Brighton St.
Belmont, MA 02178
(617) 484-8444

Easylearn

891 A CAI (computer-assisted instruction) system that uses sound, graphics, and monochrome separately or in combination for training purposes, business presentations, schools, or home use. Courses of up to 2,000 screens can be developed using either monochrome or color displays. The system includes various preprogrammed sounds and an interface for support of other audio responses.*(List Price: $170, documentation $10)*

Requires: 48K, two disk drives, 80-column monitor.

Miracle Computing
313 Clayton Ct.
Lawrence, KS 66044
(913) 843-5863

ATI-Power for PC-DOS

892 An interactive training program that teaches 12 of the most common PC-DOS commands in less than one hour. The user learns to display directory, copy files and disks, rename files, and perform other functions. The program also teaches monitoring, maintenance, and trouble-shooting. *(List Price: $75 including manual)*
Requires: 48K, one disk drive.
Software Training Co.
1025 Ocean Ave. #204
Santa Monica, CA 90403
(213) 306-7015

Plan-Power for SuperCalc, VisiCalc

893 An interactive training program that teaches financial planning applications of either *SuperCalc* or *VisiCalc*. The user learns to create, manipulate, retrieve, and print data via instructions on the disk. After completing training, the user can arrange and calculate complex mathematical data. *(List Price: $75 including manual)*
Requires: 48K, one disk drive.
Software Training Co.
1025 Ocean Ave. #204
Santa Monica, CA 90403
(213) 306-7015

PC Poetry

894 Software that displays new poems. Titles include "Life," "Time," "Answer Man," "Xmas Wish," and more. Eight different poems are included. *(List Price: $19.95)*
Requires: 48K, one disk drive, 80-column monitor.
Business Application Systems
P.O. Box 36008
Oaklandon, IN 46236
(317) 897-5350

Mr. Math Arithmetic Tutor

895 An educational program that reinforces basic arithmetic skills taught in grades 1 through 5. The student can select addition, subtraction, multiplication, or division, and proceed at his or her own pace through ten levels of complexity. Problems are generated randomly so they differ from session to session. A scoring system for competition is also provided.*(List Price: $29.95 including a 30-page instruction manual)*
Requires: 64K, one disk drive.
TERM Computer Services
P.O. Box 725
New Providence, NJ 07974

Computertutor

896 Software that teaches novice users how to run a PC. The program includes an interactive disk, a DOS reference card, function key labels, and a guide to IBM manuals. *(List Price: $39.95)*
Requires: 48K, one disk drive.
Comprehensive Software
P.O. Box 90833
Los Angeles, CA 90009
(213) 743-5508

IBM BASIC Programming Course

897 Ten self-paced lessons to introduce neophytes to BASIC programming. Lessons include an introduction to programming, variables, arrays, subroutines, arithmetic commands, input and output routines, and graphics.*(List Price: $39.95)*
Requires: 64K, one disk drive for graphics section, color/graphics adapter.
Alphanetics
P.O. Box 597
Forestville, CA 95436
(707) 887-7237

For Quality Software • Multiple Entry Modes • Comprehensive Documentation

OMRIC

SCREEN MACHINE™

Makes possible high-speed cursor-positioning, scrolling, erasing, and text handling for users of Pascal, FORTRAN, COBOL, and Assembler. (For IBM-PC)

SPACE GUARDIAN™

Traversing the local galaxy to search out and destroy alien spacecraft, you will need logistic and tactical skills in your crucial mission to save planet Earth. (For IBM-PC)

GENTERM™

Conforming to most protocols involving character-by-character or line-by-line communication, this package can equip your computer system to communicate with other micro-, mini-, or mainframe computers. (For IBM-PC, Osborne I, or any CP/M Computer)

BLINGSPLATZ™

Real-time arcade game named for the eerie horde of intergalactic creatures whose relentless attack on your space patrol will challenge all your skills. (For IBM-PC)

CHAMPION DRAUGHTS™

How about playing checkers against the wily computer? Don't worry... the caliber of the computer's play can be selected to match your own. (For IBM-PC)

OMRIC Corp., 1268 Main St., Newington, CT 06111

Fact Track

898 A computer drill of addition, subtraction, multiplication, and division. It aids students in developing quick, automatic responses to arithmetic operations. The computer reports student speed and performance, showing which operations should receive additional practice. A choice of difficulty and type of drill is available, and students may work competitively against a set goal. The computer provides mixed practice with calculations and extension skills.*(List Price: $100 including disks and a teacher's guide)*

Requires: 64K, one disk drive.

Science Research Associates, Inc.
155 N. Wacker Dr.
Chicago, IL 60606
(800) 621-0476, (312) 984-7000

WISC-R Computer Report

899 A program that provides printed psychological profiles based on student performances on the WISC-R tests for elementary-aged children. Profiles are compiled from WISC-R subtest scores; GE scores of reading, spelling, and arithmetic; and other specialized tests. The report is intended to be one component of a final analysis interpreted by a psychologist. It includes a 55-page manual. *(List Price: $495)*

Requires: 64K, one disk drive, 80-column monitor, printer.

Southern Microsystems for Educators
P.O. Box 1981
Burlington, NC 27215
(919) 851-6552

BASIC-Power for MBASIC

900 An interactive training program that teaches the user to analyze business expenses; organize mailing lists quickly; and write, enter, debug, and use business programs. *(List Price: $75 including manual)*

Requires: 48K, one disk drive.

Software Training Co.
1025 Ocean Ave. #204
Santa Monica, CA 90403
(213) 306-7015

Unistar I

901 A program for developing individual educational reports for children with learning disabilities at the elementary through junior high school levels. It features a visual bar chart profile of the pupil's present functioning level, illustrating strengths and weaknesses. It also includes a series of 700 individualized goals and objectives tailored to the individual student. *(List Price: $650)*

Requires: 64K, one disk drive, 80-column monitor, printer.

Southern Microsystems for Educators
P.O. Box 1981
Burlington, NC 27215
(919) 851-6552

Power-Pack for WordStar

902 A training package that teaches the user to perform *WordStar* word processing functions. The user can learn to create, edit, and print documents, as well as control format and search and replace. *(List Price: $75 including manual)*

Requires: 48K, one disk drive.

Software Training Co.
1025 Ocean Ave. #204
Santa Monica, CA 90403
(213) 306-7015

The Independent Guide to IBM Personal Computers

CSR Trainer 3000

903 A computer-assisted instructional system that runs on the IBM PC and simulates IBM's IIAS/IIPS system. IIPS is a widely used instructional delivery system within large IBM facilities. With CSR Trainer 3000, IIPS courses can be authored and/or presented to students on an IBM PC. Courseware takes advantage of interactive self-study methods. Courses available now from CSR include Introduction to Data Processing, the IBM Personal Computer, and JES3 System Design, Operation, and Problem Resolution. Additions to the catalog of courses are planned. Courses authored on the IBM PC may be uploaded through a telecommunications link to a large mainframe using IIPS. *(List Price: $5,000)*

Requires: 64K, one disk drive.

CSR Computer Systems Research, Inc.
P.O. Box 45
Avon, CT 06001
(203) 678-1212

Micro Discovery

904 A program that introduces students to the microcomputer through everyday language and hands-on experience. Students need no prior experience. Disk programs provide graphic presentations while computer simulations call for student involvement and provide an example of real-life work situations.

Students learn the basics of theory, operation, capabilities, programming, and terminology. They also consider the implications of the computer's impact on society. The *Student Worktext* is appropriate for a wide range of students. The program can be taught in a 6-week period with minimal teacher involvement.*(List Price: $190 including two disks, 20 copies of* Student Worktext, *and* one Instructor's Guide.*)*

Requires: 64K, one disk drive.

Science Research Associates, Inc.
155 N. Wacker Dr.
Chicago, IL 60606
(800) 621-0476, (312) 984-7000

Personal Computer Tutor

905 A program that teaches users BASIC at their own pace through animation, reinforcement, and hands-on experience.*(List Price: Each level $35, set of three levels $95)*

Requires: 64K, one disk drive (introductory), two disk drives (intermediate), color/graphics adapter.

Software Quality Associates
P.O. Box 50083
Palo Alto, CA 94303
(415) 324-8088, 321-4208

Word Whiz, States and Caps

906 Two interactive learning programs for children in grades 1 through 6. *Word Whiz* is a spelling program adaptable to different skill levels. *States and Caps* uses high-resolution graphics and sound enhancements to teach names of U.S. states and capitols.*(List Price:* Word Whiz *$29.95,* States and Caps *$29.95)*

Requires: 64K, one disk drive, color/graphics adapter.

Alphanetics
P.O. Box 597
Forestville, CA 95436
(707) 887-7237

WAIS-R Computer Report

907 A program based on the WAIS-R test for adolescents and young adults. It compares individuals with standard, chronologically based psychological achievement levels; lists personal strengths and weaknesses; checks for signs of brain injury, schizophrenia, emotional disturbance, and other behavior disorders; and makes recommendations based on all these factors. It is designed to supplement a psychologist's report, with the psychologist adding his own observations, interpretations, and recommendations. *(List Price: $495)*

Requires: 64K, one disk drive, 80-column monitor, printer.

Southern Microsystems for Educators
P.O. Box 1981
Burlington, NC 27215
(919) 851-6552

Sunmax

908 An educational game in which as many as nine players try to guess the correct angle for a fixed flat-plate solar collector to maximize the solar energy available for home heating, hot water heating, or home air conditioning in more than 200 cities around the world. Written in BASIC.*(List Price: $8)*

Requires: 16K, (other requirements not available).

Solartek
RD#1 Box 255A
West Hurley, NY 12491

Computer Discovery

909 Educational software that teaches computer history, hardware and software concepts, how to write simple programs, and the computer's role in society. Workbooks at the junior and senior high school reading levels are available.*(List Price: $200)*

Requires: 64K, one disk drive, color/graphics adapter.

Science Research Associates, Inc.
155 N. Wacker Dr.
Chicago, IL 60606
(800) 621-0476, (312) 984-7000

Cross Clues

910 A word game that calls on vocabulary, spelling, and word-structure skills as two players compete to uncover the hidden words in an interlocking grid. Luck may influence the outcome, and players of different abilities may choose the amount of time allotted for each turn. Novices are guided through a sample game and learn by doing. The game includes oversize characters, graphics, and optional sound. For ages 12 and up.*(List Price: $29.95)*

Requires: 64K, one disk drive.

Science Research Associates, Inc.
155 N. Wacker Dr.
Chicago, IL 60606
(800) 621-0476, (312) 984-7000

Math Drills

911 An educational software program that offers practice in addition, subtraction, multiplication, and division with randomly generated problems in any difficulty range. The user's scoreboard monitors progress, number right, number wrong, average, speed, best prior average, and best prior speed. Another scoreboard presents problems missed on three consecutive guesses and supplies the correct answers. *(List Price: $39)*

Requires: 36K, one disk drive, 80-column monitor.

Starware
Dept. P2
3901 Davis Pl. N.W.
Washington, DC 20007
(202) 466-7351

D.B. Power for dBASE II

912 An interactive training program that emulates *dBASE II* and teaches the user its most common commands in 40 minutes. It guides the user through each step of preparation, maintenance, and monitoring of data bases. *(List Price: $75 including manual)*

Requires: 48K, one disk drive.

Software Training Co.
1025 Ocean Ave. #204
Santa Monica, CA 90403
(213) 306-7015

SpeedRead

913 A speed-reading tutor that trains users to recognize recurring words and phrases. It can be used as part of a self-study tutorial or as a teaching aid when used in conjunction with high school or college texts. It is recommended for ages 12 through adult. *(List Price: $59.95)*

Requires: 64K, one disk drive.

Optimized Systems Software, Inc.
10379 Lansdale Ave.
Cupertino, CA 95014
(408) 446-3099

EDUCATIONAL

Educational Package

914 A series of programs that use sound and color to aid parents in teaching children reading and arithmetic. *Numbers* program teaches basics and advances to fractions. *Vocabulary* teaches the preschooler letters and basic words, advancing to sentences. *(List Price: $50)*
Requires: 128K, one disk drive, color/graphics adapter.

Personal Computer Products
1400 Coleman Ave., Ste. C-18
Santa Clara, CA 95050
(408) 988-0164

FORTH Computer-Assisted Instruction Course

915 A program that teaches novices the FORTH language. The self-prompting program includes the FORTH language and FORTH editor. Users can proceed at their own speed and query the program for help as they learn to write and execute FORTH programs. *(List Price: $59.95)*
Requires: 64K, one disk drive.

International Computers
13048 Olive Blvd.
St. Louis, MO 63141
(314) 878-8838

PERSONAL

Shopping Organizer

916 A program with which users enter shopping lists into the PC, including pertinent information about coupons or specials. Each list can be printed out in the same order the items appear in the grocery store. *(List Price: $25; manual only, $10)*
Requires: 48K, one disk drive, (printer optional).

Metamorphics, Inc.
154 Montgomery Ave.
Bala Cynwyd, PA 19004
(215) 668-9000

Savings Account Analysis

917 A home finance program that uses four variables of which any three must be entered to obtain the fourth variable. The variables are the original amount in the account, the final amount in the account, the interest rate, and the number of periods. The user can select any number of compounding periods in a year and the program provides on a period-by-period basis the original balance, the interest for the period, and the final balance for the period. It also computes the total interest earned over the total number of periods and the final balance. It can be used with the manufacturer's other financial programs. *(List Price: $100)*
Requires: 64K, one disk drive, (printer optional).

Design Data Systems Corporation
5270 N. Park Place N.E.
Cedar Rapids, IA 52402
(319) 373-1571

Comput-a-Sketch

918 Software designed for children that allows users to draw single-line designs in the horizontal and vertical dimensions by using the PC keypad. *(List Price: $10)*
Requires: 48K, one disk drive, color/graphics adapter.

Software Laboratories, Inc.
6924 Riverside Dr.
Dublin, OH 43017

DataCase Announces Professional Quality Carrying Cases for the IBM Personal Computer

Carrying Case Features
- Durable Hardshell Construction
- Protective Hardware
- Shock Absorbing Interior
- Operation of Computer in Case
- Caster Base Option
- Economy, Standard, Airline Models

DataCase offers carrying cases for many of the popular small business and personal computer systems.
DataCase also designs and manufacturers custom cases to specifications.

DataCase

Home Track Diskette

919 Four programs that keep track of important home data: *Chekbook* records checking account transactions; *Blakbook* is an address book; *Datebook* informs users of upcoming events; and *Numbers* is a magnetic record of account numbers. *(List Price: $20)*

Requires: 64K, one disk drive.

Kejon E-ware
5105 Liles Rd.
Raleigh, NC 27606
(919) 851-6552

Chequemate Plus

920 A program that provides home financing features including checks, charge cards, cash control, automated teller transactions, accounts payable, budgeting, graphs, balance sheets, and income statements. Complete reports may be printed or reviewed on the screen. *(List Price: $150)*

Requires: One disk drive, printer, 80-column monitor.

Masterworks Software Inc.
25834 Narbonne Ave.
Lomita, CA 90717
(213) 539-7486

Home Secretary

921 A series of programs to aid in home management. Programs include a personal directory of telephone numbers, birthdays, anniversaries, and personal relationships. Also included are a household inventory, checkbook register, daily/monthly calendar of up to eight daily user-specified activities, a recipe file, a credit card inventory, a home and car maintenance record, medical records, and a user-defined personal financial record. *(List Price: $79.95)*

Requires: 64K, one disk drive, printer.

Alpha Computer Service
P.O. Box 2517
Cypress, CA 90630
(714) 894-6808

Eliza

922 An artificial intelligence demonstration program. *Eliza* functions as a nondirective psychotherapist that analyzes each statement as the user types it in and then responds with its own comment or question.

The program is a version of the original *Eliza* developed at the Massachusetts Institute of Technology in 1966 for mainframe computers. *(List Price: $25, source program $20)*

Requires: 64K, one disk drive.

Artificial Intelligence Research Group
921 N. La Jolla Ave.
Los Angeles, CA 90046
(213) 656-7368, 654-2214

Household Inventory

923 An inventory program that helps users keep track of household possessions. Records are updated and cross-referenced electronically and track up to 100 items by room, serial number, and date of purchase. *(List Price: $95; manual only, $25)*

Requires: 48K, one disk drive, printer.

Metamorphics, Inc.
154 Montgomery Ave.
Bala Cynwyd, PA 19004
(215) 668-9000

Fifty Programs For the PC

924 This set of 50 programs includes a selection of home and business programs, games for adults and children, and several utilities. The programs include straight line depreciation, weight control, credit card and salesmen's expense registers, biorhythms, and many more. *(List Price: $50)*

Requires: 48K, one disk drive.

Software Laboratories, Inc.
6924 Riverside Dr.
Dublin, OH 43017

SOFTWARE FOR YOUR IBM PC

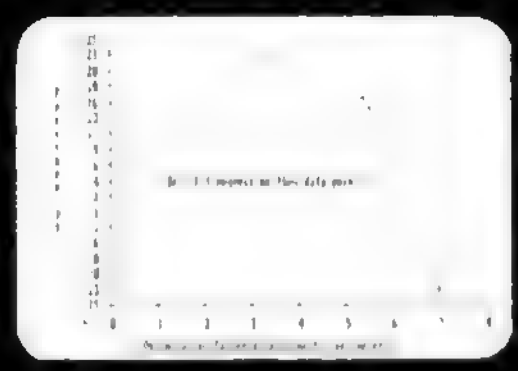

SOFTWARE

- **TRANSPLOT** can turn your Epson or IBM printer into a graphics plotter! In less than 3 minutes, with **TRANSPLOT** you can have a hard-copy of any image produced on your screen, including x-y plots, bar charts, pie charts, pictures, or other graphics images. Includes "samples" program and easy to follow user's guide. $27.
- **PLOTRAX** is a user friendly, menu driven plotting program. You can easily switch between plotting or statistics menu, and the screen plot with single keystrokes. When you are satisfied with the plot or graph's appearance on the screen a single keystroke sends the plot to your printer. You can do regressions, normal (dual or tri-axial), semi and log plotting. Flexible! Includes demonstration files and easy to use manual. $97
- **SORT** is a super fast multi-key sorter-merger program for single or multiple files. You can use it with PLOTRAX for sequencing unsorted data, or in other sorting applications. $27 ($15 with PLOTRAX).
- **JOBTRAX** is a planning and monitoring tool for engineering, architectural, and construction projects. You can easily plan manpower and resource requirements and monitor project budget and schedule status with easy-to-read graphical reports, and important status information. Built in screen editor. $250
- **CROSFIRE** (a video game), **DRWBOARD** (a program which lets you create your own pictures), and **CROSSREF** (a program which cross references variables in other programs) are included on each software diskette at no extra cost. (thru 9/30)

HARDWARE

- **GRAFTRAX**plus is a set of three plug-in Epson EPROMS which upgrade early models of the MX-80 and the IBM printer to provide graphics capability (MX-100's are standard with graphics capability). Includes Manual $58

PERSONAL

Home Budget

925 A home financial management program that analyzes income and expenses and prints monthly and year-to-date summaries. *(List Price: $59.95; documentation only, $15)*

Requires: 64K, one disk drive, printer.

Howe Software
14 Lexington Rd.
New City, NY 10956
(914) 634-1821

Home and Business Expense Organizer

926 A home and business financial program with built-in self-teaching learn mode and fast-path quick mode. The program organizes and itemizes expenses; features built-in sales tax table; and calculates sales-tax automatically; YTD reports; and audit trails. *(List Price: $60)*

Requires: 64K, two disk drives, printer.

Castish International Corporation
1636 Carmelina Ave.
Los Angeles, CA 90025
(213) 826-4600

Personal Appointment Calendar (PAC)

927 A calendar program that keeps track of appointments for a year at a time, with up to eight appointments each day. Appointment changes can be made and appointments for any day may be printed. Step-by-step instructions are included. *(List Price: $49.95)*

Requires: 32K, one disk drive, (printer optional).

V.J. Demuro
8459 N.W. 3rd St.
Coral Springs, FL 33065
(305) 753-5893

M.65 Astrological Research System

928 A software system designed by astrologers for the professional astrologer. It functions both as a complete chart service and as a research data base. The user can store thousands of charts and accompanying identifiers, and search a data base for a wide variety of report results. The purchase includes a year's subscription to the user newsletter. The program can be adapted for nonastrological uses. *(List Price: $300)*

Requires: 64K, two disk drives, printer.

Matrix Software
315 Marion Ave.
Big Rapids, MI 49307
(616) 796-2483, 796-0381

Kid's Package, Home Package, Fun Package, Business Package

929 A four in one package. Each program may also be purchased separately. *Kid's Package* is for children ages 3 to 15; *Home Package* contains household and shopping lists; *Fun Package* is a game series, and *Business Package* contains tax return and loan amortization programs. *(List Price: $20 each)*

Requires: 48K, one disk drive.

Software Laboratories, Inc.
6924 Riverside Dr.
Dublin, OH 43017
(800) 531-1309, (614) 889-5083
CompuServe: 71535,1670.

Tax Planning Model

930 A program designed to work with *VisiCalc*, *SuperCalc*, or *MultiPlan*. It consists of four spreadsheet files, each of which contains a format for filling out taxes on either a professional basis or for personal finances.

The professional program has formats for calculating unmarried/single 1040 returns, unmarried/head-of-house 1040 returns, married/joint 1040 returns, married/separate 1040 returns, and corporation 1120 and partnership 1065 returns. The personal package contains all the above formats except corporate and partnership. *(List Price: Personal $100, professional $150)*

Requires: 64K, one disk drive, *VisiCalc*, *SuperCalc*, *Multiplan*.

Pansophics, Ltd.
Whistlestop Mall
P.O. Box 59,
Rockport, MA 01966

Smart Checkbook

931 A personal finance package that includes a data base manager, a check writer, budget and tax information, and reports and tables. The program will support an unlimited number of checkbooks and credit card accounts, and over 2,000 items may be entered on a 160K diskette. The program detects checkbook errors and includes a self-teaching tutorial. *(List Price: $149)*

Requires: 64K, one disk drive.

Softquest
P.O. Box 3456
McLean, VA 22103
(703) 281-1621

PCNotebook

932 A data management program to use as a checkbook program, name and address file, recipe file, and any other data put in a notebook. Designed for home or small business. *(List Price: $69.95)*

Requires: 64K, one disk drive.

Solution Software Systems
3930 Whispering Trails
Hoffman Estates, IL 60195
(312) 893-5111

Budget Tax Deductions Record

933 A program that enables users to keep a record of all tax-deductible expenditures. Deductions such as medical expenses, charitable contributions, and car expenses are printed and categorized in user-defined categories. *(List Price: $39.95)*

Requires: 64K, one disk drive, printer.

International Computers
13048 Olive Blvd.
Creve Coeur, MI 63141
(314) 878-8838

Household Aids

934 A software package that includes six programs to help organize homeowners' paperwork. *Household Inventory* keeps track of 26 categories of possessions. *Vital Records* lists important numbers, safe deposit box contents, wills, and insurance. *VCR Index* keeps a master file of all recorded programs. *Resume* updates and prints resumes as needed. *Personal Statement* covers topics pertinent to a personal financial statement. *Name/Address/Phone* keeps name and address information plus two miscellaneous fields. *(List Price: $49.95)*

Requires: 64K, one disk drive, (printer optional).

N.F. Systems, Ltd.
P.O. Box 76363
Atlanta, GA 30358
(404) 252-3302

Checking Account Analysis

935 A home finance checking account program that allows users to enter all checks and deposits from their monthly statements and checkbook registers. It then computes checkbook balances. Users can make a one-time entry of automatic payments or deposits and the dates they occur, and they will be included in the balance each time they occur.

The program turns a checkbook register into a data base, allowing users to access by checkbook number, date, or tax-deductible status. It can be used with the manufacturer's other financial software programs. *(List Price: $100)*

Requires: 64K, one disk drive, (printer optional).

Design Data Systems Corporation
5270 N. Park Place N.E.
Cedar Rapids, IA 52402
(319) 373-1571

SLI-Writer

936 A text editor that enables users to create, edit, and print letters. It is designed for home use. *(List Price: $10)*

Requires: 48K, one disk drive.

Software Laboratories, Inc.
6924 Riverside Dr.
Dublin, OH 43017
(800) 531-1309, (614) 889-5083 Ohio
CompuServe: 71535,1670

Bowling League Secretary

937 Software that maintains and updates league statistics for bowling leagues. Both individual and team records are maintained by entering each team member's three weekly scores. Individual fields include team number, individual name, average, handicap, total pins, total games, highest game, highest series, and all individual weekly scores.

Fields for team records are team number, name, wins, losses, percentage, total pins, high team game, high team series. Both standard reports and user-formatted reports are available to the screen and printer. *(List Price: $39.95)*

Requires: 96K, one disk drive, (printer optional).

If You Have A Printer

You need our PRINTER OPTIMIZER. We have two gripes with computer printers: one, no matter how fast they print they're much slower than a computer. So here you are with all this processing speed, sitting there waiting for your printer to finish. Two, almost all printers offer a bunch of features like various type sizes, forms control, graphics, enlarged character sets, etc. - but how are you supposed to access these features? Oh sure, the printer manual says: "print an ESC character followed by a CONTROL "K" followed by a three digit value equal to the desired page length...", but how do you do this in the middle of your spreadsheet program? And how do you access all those extra symbols and graphics with a puny half-ASCII keyboard?

Before Mediamix grew into Applied Creative Technology Inc., the idea people there decided to develop the Cuisinart® of the computer industry - a "magic box" that features 64,000 to 256,000 characters of spooling printer buffer, total character retranslation capability including macros, a keyboard that lets you directly select complete printer control sequences with the ease of a pushbutton car radio, adapts serial printers to parallel computers and visa versa, plus many more imaginative features. So many useful features that regardless of the printer you own - our PRINTER OPTIMIZER will bring your printer "up to speed" with the rest of your system and let you take full advantage of it.

If You Need A Letter Quality Printer

Consider our affordable alternative. For those of you who did not see the review of our product in the July issue of BYTE, we produce a little white box that converts an IBM Electronic Typewriter into a high quality Serial or Parallel computer printer. And now our ETI² (Electronic Typewriter Intelligent Interface) attaches to other brands of electronic typewriters. There are a number of arguments in favor of choosing this route over a mere computer printer and we have a brochure on the subject that you should read.

We apply technology creatively, and you'll find that not only can we communicate the results to you, but each product is better than anything else like it on the market. Call 1-800-433-5373 and we'll send you more information about our company and our products.

STAR.

WE'RE MAKING A

NAME FOR OURSELVES.

Building a reputation for quality printers of astronomical value, from components on up.

Making a name for ourselves in printers is only natural when we've been making the highest quality precision parts for over 30 years. And although Star's reputation in microperipherals has only begun to grow, the watch and camera industries worldwide have been relying on Star components for nearly 3 decades.

Quality manufacturing is what we're building our reputation on. Star is a true manufacturer, not merely an assembler. We even design and manufacture the computer controlled machines that make our parts. With unlimited production capabilities, Star's factories can operate 365 days a year, 24 hours a day, producing more than 100 million parts a month. It is this kind of productivity and total quality control that assures you of getting the very finest printer for the very lowest price.

And the best product for less is what you can depend on getting from Star. Star offers you a full line of reliable printers, printers with divergent technologies to meet your specific needs. And there's more. You get a low cost, high quality printer with a wide spectrum of interfaces to choose from—backed by Star's superior service network, there if you need it.

Star. We're going to be the quality printer you can count on, from components on up. And that's no pie in the sky promise.

star micronics·inc

MAKING A NAME FOR OURSELVES

200 PARK AVENUE, NY, NY 10166

PERSONAL

Budget Analysis

938 A home finance program with which users can set up budget subcategories coinciding with all household expenses. As many as ten subcategories may be entered for each of the 14 main categories included in the program. After the categories are established, estimated expenses and incomes are entered for each subcategory on a month-by-month basis. Actual amounts can then be entered for each month.

The program compares actual amounts spent to estimated amounts and shows the deficit or surplus for each subcategory. The total surplus or deficit is computed for each main category, each month, and year to date. The program can be used with the manufacturer's other financial software. *(List Price: $100)*

Requires: 64K, one disk drive (printer optional).

Design Data Systems Corporation
5270 N. Park Place N.E.
Cedar Rapids, IA 52402
(319) 373-1571

Budget Master

939 A program designed to assist in keeping track of home inventory and financial budgeting. By entering household assets and expected assets, household liabilities and expected liabilities, personal income and expenses, the program produces a budget for any desired time frame.

Daily financial transactions can be entered into the system, and up to eight budget periods can be stored for display on the screen or printer. The actual income/expenditures can be compared to the budget and a revised budget produced. Comparisons can be produced in graphic display format on the screen or printer. Included in the program is an amortization capability displaying a variable interest rate, mortgage term, and payment breakdown. *(List Price: $200 Canadian)*

Requires: 64K, one disk drive, (printer optional).

Micro Masters Software Ltd.
P.O. Box 513
Edmonton, Alberta, Canada T5J 2K1
(403) 922-3088

Diet

940 A program that determines the user's basal metabolism from input data and responds with a printout of daily caloric needs. The user adjusts eating and exercising patterns to fit the program-created schedule.*(List Price: $25; manual only, $10)*

Requires: 48K, one disk drive, (printer optional).

2312 N. Cole Rd., Ste. E
Boise, ID 83704
(208) 378-8086

The Home Accountant Plus

943 Personal software that provides a 100-budget-category maintenance file and keeps track of up to five checking accounts, plus cash and credit cards. It provides bank reconciliation, allows automatic transactions and custom search and retrieval of transactions, and maintains transaction history. It allows for multiple disks and can switch between monochrome and color video display. Graphics for any category are by bar graph, line graph, and trend analysis. Enhanced graphics are not available on monochrome display. The program provides forecasting ability and can print checks, personal balance sheets, net worth statements, and reports of forecasts.*(List Price: $150 including two program disks, manual, and binder)*

Requires: 64K, one disk drive.

Continental Software Co.
11223 S. Hindry Ave.
Los Angeles, CA 90045
(213) 417-8031

Performance Analysis of Passive Solar-Heated Buildings

944 A program that calculates heating load, solar energy, and the auxiliary energy required per month and year. It is based on the solar load ratio method developed at Los Alamos Scientific Laboratory. *(List Price: $200)*

Requires: One disk drive, (other requirements not available).

Richard Caldwell
2063 43rd Ave.
San Francisco, CA 94116
(415) 661-7840

Money Maestro

945 A financial record-keeping package that provides budget tracking and tax reporting. Designed for sole proprietors, freelancers, and families, it allows for money management without using double-entry accounting software. Expenses and receipts can be tracked as needed. The program reports totals by category or payee, including monthly and year-to-date budgeted vs. actuals. Data files are stored in BASIC sequential format.*(List Price: $200)*

Requires: 64K, one disk drive, (printer recommended).

Innosys Incorporated
2150 Shattuck Ave. #901
Berkeley, CA 94704
(415) 843-8122

EZMoney

946 A checkbook and cash management system for personal or small-business use. It has 100 user-defined categories and reconcile statements. Reports are year-to-date and monthly.*(List Price: $44.95)*

Requires: 64K, two disk drives, Epson or IBM printer.

Systemics, Inc.
3050 Spring St.
West Bloomfield, MI 48033
(313) 851-2504

Check Register

947 A checkbook monitoring program with up to 40 ledger/budget headings that print check register or ledger files, or totals by month. It keeps track of uncleared checks and has spread capability for checks entered. *(List Price: $39.95)*

Requires: 64K, one disk drive, (printer optional).

N.F. Systems, Ltd.
P.O. Box 76363
Atlanta, GA 30358
(404) 252-3302
Source: TCK071

Household Inventory

948 An inventory system that enables homeowners to keep track of up to 100 separate items in each of 25 rooms. The value, purchase price, serial number, date of purchase, and miscellaneous information can be stored for each household item. Businesses can use the package for inventory control.*(List Price: $95; manual only, $25)*

Requires: 48K, one disk drive, 80-column monitor, printer.

Metamorphics Inc.
154 Montgomery Ave.
Bala Cynwyd, PA 19004
(215) 668-9000

PCHMS - Personal Computer Home Management System

949 A software package that helps manage personal, household, and business data in a home setting. It maintains addresses and phone numbers, medical and dental information, and more. The user may define up to ten custom files and has a choice of monochrome or color output. Also included are a printing calculator, memo writer, metric converter, date and digital clock display, 20-year calendar, and directory of state abbreviations.*(List Price: $89.95 including a backup utility program and user guide)*

Requires: 64K, one disk drive, color/graphics adapter, (printer optional).

Arlington Software + Systems
97 Bartlett Ave.
Arlington, MA 02174
(617) 641-0290

PERSONAL

PC/Personal Finance Program

950 An accounting system designed for both accountants and novices, which keeps detailed and identified records of income, expenses, and budgets. Items are filed into one of 43 categories users establish to suit their needs. Features include a variety of reports on a monthly, last 12 months, year-to-date, and annual basis. It prints 80-, 132-, or 233- (with an Epson MX-100 printer) column condensed character spreadsheet reports to suit configuration.

The program sorts and totals tax-deductible items in nine different categories; it monitors credit card payments and debt; reconciles bank statements using an on-the-screen form the user fills in; and it maintains and balances checkbooks, keeping the user's checkbook on a single disk.

It rolls over financial information from year to year and can keep several years' worth of statistics on a single disk. The program also displays bar graphs (in color if desired) of cash flow, budget performance, income or expense category trends, or checkbook balances. *(List Price: $95)*

Requires: 64K, one disk drive.

BestPrograms
P.O. Box 2370
Alexandria, VA 22301
(703) 549-3663

Credit Master

951 A system that prevents overcharges on credit cards or multiple submissions of the same charge. The program logs purchases and compares them to invoices. *(List Price: $50 including documentation)*

Requires: 48K, one disk drive.

Fogle Computing Corporation
P.O. Box 5166
Spartanburg, SC 29304
(803) 574-4950

Automated Telephone Directory

952 A program that develops a personal telephone directory of names, addresses, telephone numbers, and pertinent comments related to each entry. Directory information can be changed, added to, or deleted from the data file. The program prints entries of up to six lines on "one-up" mailing labels. *(List Price: $50)*

Requires: 64K, one disk drive, 80-column monitor.

Microbase Software Inc.
P.O. Box 40353
Indianapolis, IN 46240
(317) 877-4304

Personal Financial Management

953 A financial record keeping and budgeting system for family and personal use that prints income and cash flow statements, balance sheets and net worth statements, actual vs. planned variance reports, and miscellaneous worksheets. A debt amortization program is also included.*(List Price: $75)*

Requires: 64K, two disk drives, Epson or IBM printer, monochrome display.

Professional Software Concepts
P.O. Box 483
Hazelwood, MO 63042.

Auto-Dialer, Micro-Minder

954 Two programs geared for personal applications. *Auto-Dialer* is a personal and business telephone list that interfaces with the Hayes Smartmodem to auto-dial the user's phone. One thousand names and numbers can be stored on disk. *Micro-Minder* is a personal reminder calendar and weekly organizer that includes an "auto-report" feature to help keep the user on schedule.*(List Price:* Micro-Minder *$29.95,* Auto-Dialer *$19.95)*

Requires: 64K, one disk drive.

Alphanetics
P.O. Box 597
Forestville, CA 95436
(707) 887-7237

Home Finance Program

955 Software designed with the average household in mind. Its four modules include budget analysis, savings and checking account analysis, and loan amortization.*(List Price: $100 each)*

Requires: 48K, one disk drive, (printer optional).

Roll Data of Iowa Inc.
5270 N. Park Pl. N.E.
Cedar Rapids, IA 52402
(319) 373-1571

Personal Programs PAC

956 A menu-driven anthology of programs that alphabetically sort names and addresses, balance checkbooks (and print out the results), establish loan payment records, do English/metric conversions, and keep track of messages on a message board.*(List Price: $39.95)*

Requires: 64K, one disk drive.

Alphanetics
P.O. Box 597
Forestville, CA 95436
(707) 887-7237

Sunheat 1

957 An interactive program that allows users to configure and evaluate solar hot water heating systems. Solar energy values, outside temperatures, and amount of cloudiness are customized for specific locations. Typical hot water usage values and time distribution can be selected, or users can input their own requirements.

Written in BASIC, the program can contain some or all of the following components: solar collector, heat exchanger, preheat hot water tank, and hot water tank.

The program helps design the user's solar hot water system, and then calculates on a monthly basis how much solar energy can be collected and used by it, plus the percentage of total hot water needs that can be supplied by solar energy on a monthly and yearly basis. *(List Price: $29)*

Requires: 16K, (other requirements not available).

Solartek
RD# 1 Box 225A
West Hurley, NY 12491

Sunsim-2

958 A home use program that simulates a solar home by using flat-plate, tracking solar collectors that follow the sun and are normal to it throughout the day. Ali days are cloudless. Since flat-plate collectors are used, the diffused and reflected solar radiation is calculated and included in the energy collected. A program option allows users to specify the solar collector's efficiency or use the default value.*(List Price: $49)*

Requires: 16K, (other requirements not available).

Solartek
RD# 1 Box 225A
West Hurley, NY 12491

Sunsim-3

959 A program that uses concentrating, tracking solar collectors to simulate a solar home. The concentrating collectors remain normal to the sun throughout each cloudless day but do not collect diffuse or reflected solar radiation. A collector efficiency input option is included in the program.*(List Price: $49)*

Requires: 16K, (other requirements not available).

Solartek
RD# 1 Box 225A
West Hurley, NY 12491

Sunsim-4

960 A program that calculates the energy available from the sun and demonstrates its use for domestic space heating, cooling, and hot water heating. The program's energy distribution system shows the transfer of solar energy from the collectors to the thermal storage, heat exchanger or chiller, and then to the living area. Cumulative energy and temperature values are displayed, including solar energy collected and used, backup (nonsolar) energy used, and thermal and hot water storage temperatures.

Default values are built into the program, or users can input their own requirements for size of home, volume of thermal storage, and area and angle of solar collector.

The program calculates the solar energy available per hour at any location, including solar atmospheric losses, diffuse and reflected radiation, and seasonal variations in atmospheric transmission.*(List Price: $59)*
Requires: 16K, (other requirements not available).

Solartek
RD# 1 Box 225A
West Hurley, NY 12491

What Do We Name The Baby?

961 A program that enables prospective parents to electronically find a name for their new child. The data base includes over 2,500 names and variations. Parents choose names according to sex, initial letter, number of syllables, ethnic origin, and group designation. The computer prints out possible names.*(List Price: $25; manual only, $10)*
Requires: 48K, one disk drive, (printer optional).

Metamorphics Inc.
154 Montgomery Ave.
Bala Cynwyd, PA 19004
(215) 668-9000

Computer Chef

962 An automated recipe file and cookbook that contains over 70 kitchen-tested recipes from salads to desserts. Users may enter their own recipes or type in ingredients on hand for *Computer Chef's* menu suggestions. When more servings are needed, or there is less of an ingredient than called for, the program will automatically scale the recipe to fit. Copies of the recipes are printed out. The program is written in C language.*(List Price: $34.95)*
Requires: 64K, one disk drive, printer.

Norell Data Systems Corporation
3400 Wilshire Blvd.
P.O. Box 70127
Los Angeles, CA 90010
(213) 257-2026

Gymnastics Scoring System, Women's Division

963 Three programs written in BASIC that handle individual and team registration, and determine individual, team, and super-team champions. The program will track Elite plus Class I through Class IV results by age (11 and under, 12 to 14, 15 and over) and will report complete results, plus tie breakers, by class and age categories. *(List Price: $195)*
Requires: 64K, one disk drive, 80-column monitor, printer.

GAMES

Temple of Apshai

965 A fantasy game in which players experience life in a world of ancient legends and monsters while searching for fame and fortune. They can take the part of more than 15 million characters generated by the game program. The same character can be returned to the dungeon again and again, growing in power and experience.

The program sells the player equipment, keeps track of it, draws a map of the appropriate section of the dungeon, handles the rules, and allows the player 18 options from which to choose during the course of an adventure. The game includes a fully illustrated 48-page book of lore and a command summary card. *(List Price: $39.95; Current owners receive the new version for $5 when they return their cassette or disk)*
Requires: 64K, one disk drive, color/graphics adapter.

ANNOUNCING SEMINARS IN PC PROGRAMMING

TWT Seminars are designed to help you learn to use your IBM Personal Computer effectively. Even if you primarily intend to use purchased software, your PC is probably idle much of the time, and there are many things it could be doing if you knew how to go about it. Topics:

- IBM PC/DOS Operation
- Application Planning; File Design
- BASIC Programming: Intro. and Advanced
- Sample Applications

Public Seminar Schedule: (9am-3pm or 3pm-9pm)

Atlanta: Sept. 27-30	San Francisco: Oct. 4-7
Houston: Oct. 18-21	New York: Nov. 1-4
Dallas: Nov. 15-18	Los Angeles: Dec. 13-16

Our instructors are available nationwide for private seminars on these subjects as well as VISICALC, PASCAL, and APL (when available).

GAMES

The Original Adventure

966 A game that allows users to explore "Colossal Cave": treasure-seeking, overcoming mythical adversaries, and becoming initiated into the "spells" that operate inside the cave. The PC serves as guide and adviser throughout by describing the cave's interior sights and sounds. When the cave's puzzles are solved, users receive a free, serial-numbered "Certificate of Wizardness." Written in C language, the program uses either IBM's monochrome display or color/graphics adapter. *(List Price: $24.95)*

Requires: 64K, one disk drive.

Norell Data Systems
3400 Wilshire Blvd.
P.O. Box 70127
Los Angeles, CA 90010
(213) 257-2026

Bridge Tutor

967 A program that teaches beginners and helps advanced players review and develop their Bridge skills. Full-color graphics teach rules and strategy from social to tournament play and give feedback on bids and leads. The package teaches the Standard American bidding system and includes the Precision Club and Scientific bidding systems. *(List Price: $60)*

Requires: 64K, one disk drive, color/graphics adapter.

Computrickx, Inc.
533 Fifth Street
Santa Rosa, CA 95401
(707) 544-8363

Casino Blackjack

968 A Blackjack game that simulates casino play. Players set casino rules and can also specify up to seven hands, up to nine decks, shuffle point, play speed, min/max bets, bankroll, insurance, surrender, double down, and dealer's play on soft 17. A player can request to see cards left in the deck, hit/stand odds, simple card count, and advanced card count during play. Both monochrome and color graphics versions are available. *(List Price: $24.95)*

Requires: 64K, one disk drive.

Survey Systems Inc.
7507 Princeton Ave.
College Park, MD 20704

Games Package 1, Chomp, Astro Attacker

969 *Games Package 1* includes ten games for the PC aimed at both adults and children, and ranging from *Cribbage* to *Othello* to *Space Trek*. *Chomp* and *Astro Attacker* utilize the PC's color graphics. *Chomp* is similar to *Pac-Man*, while *Astro Attacker* is similar to *Astro Blaster*.

Also available are buttons and bumper stickers for PC owners: an "IBM-PCs Eat Apples" sticker or a "Me And My PC" button. *(List Price:* Games Package 1 *$29.95*, Chomp *$29.95*, Astro Attacker *$29.95*, *buttons and stickers $2 each)*

Requires: 48K, one disk drive, color/graphics adapter for *Chomp* and *Astro Attacker*.

Ensign Software
2312 N. Cole Rd., Ste. E
Boise, ID 83704
(208) 378-8086

Nemesis, Dungeon Master

970 *Nemesis* is a role-playing game modeled on *Dungeons and Dragons*. The player is represented by the cursor on the terminal screen and travels through a world populated by more than 200 different kinds of monsters.

Dungeon Master allows users to create many different dungeons by editing and constructing the necessary elements such as maze maps, item tables, and monster tables. Both games are available on 5¼-inch floppy disks. *(List Price:* Nemesis *$45*, Dungeon Master *$40)*

Requires: 64K, one disk drive, CP/M-86 or DOS.

SuperSoft, Inc.
P.O. Box 1628
Champaign, IL 61820
(217) 359-2112, 359-2691
Telex: 270-365

Adventure

971 A game of journeys through a labyrinth of caves in a quest for 15 treasures. Users descend to the depths of "Colossal Cave," fraught with pitfalls, puzzles, perils, and treacherous adversaries. With each increase in skill level, sections of the cave with greater treasures and greater hazards open up. Performance is rated according to one of nine categories from amateur to seasoned adventurer. *(List Price: $30)*

Requires: 32K, one disk drive.

IBM Corporation
Systems Products Division
P.O. Box 1328

PCfootball

972 A game the user plays against the computer or against an opponent. It features a full field, a scoreboard with a running clock, and music. *(List Price: $29.95, demonstration disk $8)*

Requires: 64K, one disk drive, 80-column monitor.

PCsoftware
4155 Cleveland Ave.
San Diego, CA 92103

Erinnen

973 A game that solves colorful picture puzzles and scores points. Included are 45 full-color puzzles, and more are available. *(List Price: $32.95, additional puzzles $15 each, demonstration disk $7)*

Requires: 64K, color/graphics adapter, (other requirements not available).

PCsoftware
4155 Cleveland Ave.
San Diego, CA 92103

Astro-Dodge

974 A game that involves the destruction of meteoroids while confronting hostile enemy ships. Alternate speed levels are available. *(List Price: $39.95)*

Requires: 64K, color/graphics adapter.

Software Digital Marketing
2670 Cherry Ln.
Walnut Creek, CA 94596
(415) 938-2880
Telex: 17-1852

Football Game

975 A player's team is pitted against an opponent who figures odds on every play and makes surprise movements. The game can be played on either a graphics or monochrome monitor. *(List Price: $15)*

Requires: 64K, one disk drive.

Computerenergy Corporation
P.O. Box 6267
Denver, CO 80206

Bowling League Secretary

976 A program that processes league score data and produces reports with league and player weekly statistics. It maintains averages, handicaps, high scores, money paid, and names and addresses. Other options are available. It is available for one league or multileague processing. *(List Price: $49 for one league, $495 for multileague)*

Requires: 64K, two disk drives, DOS or CP/M-86.

Microsystems
7201 87th Ave. SE
Mercer Island, WA 98040
(206) 232-1513

Man in the Moon

977 A game to shoot faces as they appear on the screen. They appear more frequently as the score increases. *(List Price: $14.95)*

Requires: 48K, one disk drive.

Anthony A. Schultz
310 153rd St.
Calumet City, IL 60409

Games

978 A package of ten games including *Othello, Qubic, Blackjack, Star Trek, Presidents Quiz, Famous Americans Quiz, Cribbage, Blackbox, Mastermind,* and *Kingdom. (List Price: $29.95)*

Requires: One disk drive, (other requirements not available).

Arrington Software Service
9522 Linstock
Boise, ID 83704
(208) 377-1938

PCube

979 A Rubik's cube simulation that displays an unfolded cube and keeps track of twists on either a monochrome or color monitor. Color displays allow for changing between Width 80 and double-sized Width 40 under cassette BASIC. A blank, formatted disk and self-addressed envelope must be included with payment. *(List Price: $10)*

Requires: 32K, color/graphics adapter.

PCube
PC Magazine
1528 Irving St.
San Francisco, CA 94122

Master Breakdown

980 A break-out arcade game in which action intensifies with each round completed. Players knock out bricks from the top of the screen. If a brick hits a player's paddle, he or she loses the ball in play. *(List Price: $50 Canadian)*

Requires: 32K, one disk drive, (joysticks optional).

Micro Masters Software
P.O. Box 513
Edmonton, Alberta, Canada T5J 2K1
(403) 922-3088

Painter I, II, Palate, Saucer

981 *Painter I* allows users to draw and display objects in 12 colors simultaneously. Images can be saved to disk and loaded into basic arrays. *Painter II* has the same features as *Painter I* except it is in black and white, in 640 by 200 mode. *Palate* shows users how to get 12 distinct colors in 320 by 200 mode: 512 color selections are available. *Saucer* is a color graphics program in which the user defends the world against an alien invasion. *(List Price: $24.95 for all four programs including disk and manual)*

Requires: 64K, one disk drive, color/graphics adapter for *Saucer* and *Painter I*, (joystick optional for *Painter I* and *II*). Other requirements not available.

Micro-G
P.O. Box 102
Duluth, GA 30136
(404) 476-5779

Las Vegas Blackjack

982 A reproduction with sounds and graphics of Las Vegas Blackjack including multideck play, splits, double-down, and insurance bets. It teaches card counting with any card weight and keeps a running count. *(List Price: $39.95 including a 35-page instruction manual)*

Requires: 64K, 80-column monitor.

Quala
1014 Griswold Ave.
San Fernando, CA 91340
(213) 365-9526

Arithmetic Games: Sets 1 and 2

983 Two game sets by Science Research Associates that develop and refine the user's mathematical skills. Each set has two games. Set 1 includes *Beano* and *Rockets*. The object of *Beano* is to match all the numbers on a game card displayed by the computer, by adding, multiplying, subtracting, or dividing numbers the computer randomly selects. In *Rockets* players move rockets across a playing field by adding, multiplying, subtracting, or dividing randomly selected numbers.

Set 2 includes *Discovery Machine* and *Number Chase*. In *Discovery Machine* the computer displays a number, does a secret calculation, and displays a new number. The player must discover what mathematical function the computer used to get the new number. *Number Chase* develops logic skills. The player must guess a secret number selected by the computer based on clues provided by the computer. *(List Price: Set 1 $60, Set 2 $60, IBM Product Center prices)*

Requires: 64K, one disk drive, color/graphics adapter.

IBM Corporation
Systems Products Division
P.O. Box 1328
Boca Raton, FL 33432
(800) 447-4700, 322-4400 Illinois
447-0890 Alaska, Hawaii

Recreational/Educational Software

984 A series of games including *Blackjack, Mathtutor, Ping-Pong, Simple Simon, Biorhythm, Flying Faces.* A color/graphics adapter is not required. *(List Price: $19.95 each; diskette $5.95)*

Requires: One disk drive.

Reds
P.O. Box 585
Bound Brook, NJ 08805

GAMES

Stock Market

985 A game that simulates trading on the stock exchange. Each player can invest $10,000, and up to 20 people can play at one time. Players buy and sell three categories of stocks: preferred stocks, blue chip stocks, and speculative stocks. Market movements occur randomly. *(List Price: $10)*
Requires: 48K, one disk drive.

Software Laboratories, Inc.
6924 Riverside Dr.
Dublin, OH 43017
(800) 531-1309

Drag Race

986 A one- to three-player racing game in which players design the car of their choice in the unlimited dragster, pro stock, or stock racing class. The game uses factual car design information. Players specify horsepower, rear end ratio, tire diameter, and tire width. One may race against friends or try to beat the computer. Race length up to 9,000 feet may also be chosen. *(List Price: $10)*
Requires: 48K, one disk drive.

Software Laboratories, Inc.
6924 Riverside Dr.
Dublin, OH 43017
(800) 531-1309

Planet

987 A simulation of the world economy. Under a limited budget, using factual economic formulas, the players' decisions affect the population, the food supply, nature, and the happiness of the people. How long can you rule the planet until it self-destructs? *(List Price: $10)*
Requires: 48K, one disk drive.

Software Laboratories, Inc.
6924 Riverside Dr.
Dublin, OH 43017
(800) 531-1309

Omegabug

988 A game that features fast action and requires thought and speed. It can be adjusted for different levels so that even preschoolers can play, and it runs on both black and white and color monitors. *(List Price: $20 including manual)*
Requires: 64K, one disk drive.

Personal Computer Products
1400 Coleman Ave. #C-18
Santa Clara, CA 95050
(408) 988-0164

Executive Suite

989 One of a series of games designed for executives. It simulates the race up the corporate ladder and portrays the dynamics of working in the corporate environment. *(List Price: $40)*
Requires: 64K, one disk drive.

Armonk Corporation
610 Newport Center Dr.
Newport Beach, CA 92660
(714) 760-3955

Everest Explorer

990 A resource management game in which the player tries to scale Mt. Everest without losing supplies or guides. Players watch out for icefalls, storms, and sudden descents. *(List Price: $19.95)*
Requires: 48K, one disk drive.

Acorn Software
634 North Carolina Ave. S.E.
Washington, DC 20003
(202) 544-4259

PC Man

991 A high-resolution video game written in assembly language. Players must eat as many dots as they can before the monster eats them. *(List Price: $29.95)*
Requires: 48K, one disk drive, color/graphics adapter.

Orion Software
P.O. Box 2488
Auburn, AL 36830

Podlaserium

992 An arcade-style game in which the player must destroy alien pods to save the universe. It retains the top five scores permanently. Features include fuel and ammo bonuses, pod shields, pod bombs, sound on/off, and game freeze commands. Strategy and skill are required to use fuel and ammo effectively. *(List Price: $34.95)*
Requires: 48K, one disk drive, 80-column monitor.

DP Computer Services Company
5019 N. Washington Blvd.
Arlington, VA 22205
(703) 276-1333

Championship Blackjack

993 A game that uses full-color display and sound. Up to six players may participate and players set all casino conditions and rules. The cards are always in view, and the game uses a blackjack-table layout. The PC can also participate as a player.

Players can use a double exposure feature to see the dealer's cards during the game, and tournament play is also available. The program can serve as a tutorial by showing players the correct play at any time, whether they use basic strategy or the Julian Braun Point-Count system. *(List Price: $34.95 including documentation; demo disk and documentation only, $8)*
Requires: 64K, one disk drive.

PCsoftware
4155 Cleveland Ave.
San Diego, CA 92103

Projectile

994 A game for one or two players that features four levels of play, moveable players, variable terrain, and an ammunition market. Optional sound is available. *(List Price: $20)*
Requires: 48K, one disk drive, 80-character monitor.

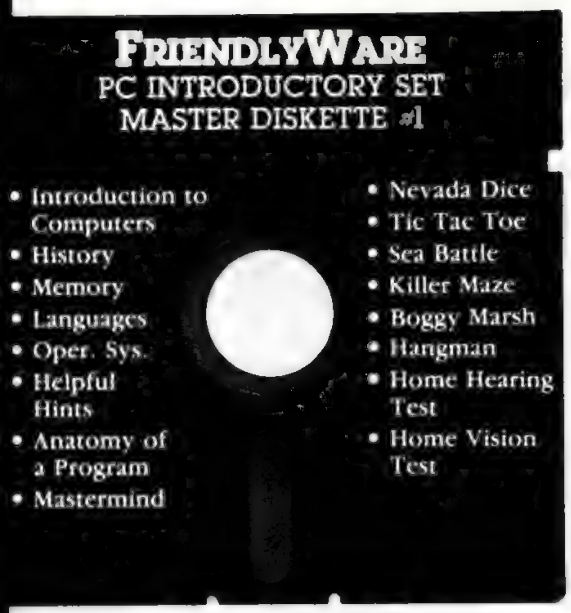

KK Games
251-D Quinby Rd.
Rochester, NY 14623
(716) 424-1676

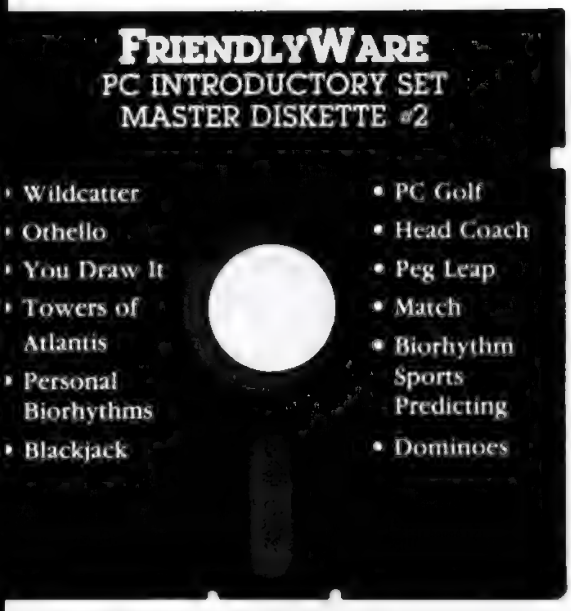

Games Volume I, Startrek

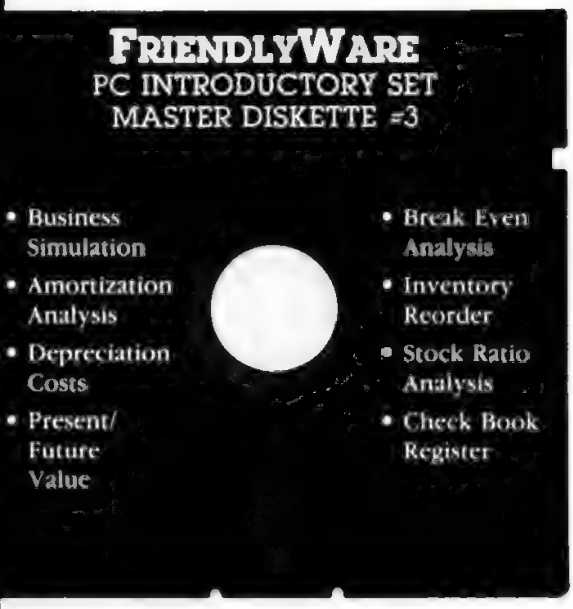

995 *Games Volume I* includes five games: *Cryptography* contains 100 messages to decode; *Blackjack* includes doubling down, splitting, and changing dealers; *Match It* involves duplicate symbols to match a computer-generated sequence; in *Blackbox* the player determines the location of atoms by firing projectiles through a box; and *Bomb Run* drops bombs on enemy targets. All programs utilize the PC's special function keys and sound capability.

In *Startrek* players use phasers and photon torpedoes to battle Klingons. The level of difficulty can be set at the beginning of the game. An instruction manual is included. *(List Price:* Games *$29.95*, Startrek *$34.95)*
Requires: 48K, one disk drive, 80-column monitor.

(800) 835-2246, 583-8645

Slynx, Dungeoneer, Medusa, Viper

1,000 *Slynx* runs around the Ivy Corral trying to eat as much food as it can without running into a wall. The game can be played at 10 skill levels. In *Dungeoneer* players must find and bring back the Ivy Grail. The game uses full-screen graphics and sound. With *Medusa* players must trap the Medusa monster before it destroys them. In *Viper* players are pitted against the Viper in an attempt to capture a treasure. All games use graphics and sound, and include a save-score feature. *(List Price:* Slynx, Medusa *$34.95 each;* Dungeoneer *$39.95;* Viper *$29.95)*

Requires: 64K, one disk drive.

Ivy Research Inc.
88 Yale Station
New Haven, CT 06520
(203) 789-0676

Midway Camp, Computer Stocks and Bonds, Voyager, Galaxy, Computer Draw Poker

1001 A five-game package. In *Midway Camp* the object is to invade and capture Midway Island by surprise; in *Computer Stocks and Bonds* players choose a general strategy and invest in stocks that fit their game plan, utilizing a "bear" or "bull" market; in *Voyager* (a solitaire game) players explore the four levels of an alien spacecraft's mazelike interior in 3-dimensional simulated graphics; in *Galaxy* players send their galactic fleets to explore and conquer the universe; and in *Computer Draw Poker* (a solitaire five-card stud game) players are pitted against four computer-controlled "players." *(List Price:* Midway Camp *$21,* Computer Stocks and Bonds *$25,* Voyager *$25,* Galaxy *$25,* Computer Draw Poker *$21)*

Requires: *Midway Campaign, Galaxy* and *Computer Draw Poker* 48K; *Voyager* 48K; color/graphics adapter; *Computer Stocks and Bonds* 64K.

The Avalon Hill Game Company
4517 Harford Rd.
Baltimore, MD 21214
(301) 254-5300

PC Cube

1002 A simulated Rubik's Cube for the PC. *(List Price: $20)*

Requires: 48K, one disk drive, color/graphics adapter.

C.C. Smith
10626 Eastwood Ave.
Silver Spring, MD 20901
(302) 890-6833

Milky Way Merchant

1003 A trading strategy game in which players determine the needs of different planets and sell appropriate goods. *(List Price: $20)*

Requires: 48K, one disk drive.

Davell Custom Software
P.O. Box 4162
Cleveland, TN 37311
(615) 336-3055

Games Package I

1004 A collection of ten games for children and adults. The games include *Qubic, Othello, Kingdom, Cribbage, Blackbox, Space Trek, Blackjack, Mastermind, Americans Quiz,* and *Presidents Quiz. (List Price: $29.95)*

Requires: 48K, one disk drive.

Ensign Software
2312 N. Cole Rd., Ste. E
Boise, ID 83704
(208) 378-8086

Jotto

1005 A word game for one or more players versus the computer. The player(s) and *Jotto* each think of a secret five-letter word. The object is to guess *Jotto*'s word before it guesses the player's word. Suitable for ages 9 to 90. *(List Price: $29.95)*

Requires: 64K, one disk drive, 40 or 80-column monitor.

Word Associates
55 Sutter Street #361
San Francisco, CA 94104
(800) 227-3800 ext. 1138, 792-0990 California

VideoTrek 88

1006 A game in which the object is to save democracy from evil villains using an arsenal of photon torpedoes, phasers, and antimatter pods. Five skill levels are available for novices and sophisticated players. Features include sound effects and graphics displays. *(List Price: $34.95)*

Requires: 64K, one disk drive.

Windmill Software, Inc.
1058 Joan Dr.
Burlington, Ontario
Canada L7T 3H2
(416) 632-6279

Tachyon, Spyder, Hextasy, Battleship

1007 Four video games that feature color graphics and sound. *Tachyon* is an action-packed space game; *Spyder* keeps the player busy trying to avoid an invasion of descending spiders; *Hextasy*, for one to four players, pits the players' strategy against the computer's; and *Battleship* recreates the familiar board game on the screen, adding color and sound. *(List Price: $39.95 each, Battleship $29.95)*
Requires: 64K, one disk drive, color/graphics adapter.

Mirror Images Software
1223 Peoples Ave.
Troy, NY 12180
(518) 274-2335

Cycletron

1008 A real-time graphics game that is written in assembly language and features multiple playing screens. It can operate with a color or monochrome monitor, silent or with sound, and either from a keyboard or a joystick. Complex compilers, real-time graphic editors, and some real-time software were developed for the Space Shuttle. *(List Price: $89)*
Requires: 64K, one disk drive.

United Systems Corporation
401 E. Indian School Rd. #202
Tempe, AZ 85012
(602) 263-0442

Backgammon, Bowling

1009 Tournament-quality Backgammon against the computer on a color/graphics display. In *Bowling* one to four players test their skills in a real-time game with bowling-pin action. *(List Price: $24.95 each including disk and manual)*
Requires: Color/graphics adapter, (other requirements not available).

C&C Software
54 Sonoma Ave.
Goleta, CA 93117
(805) 685-8802

Starcruiser Commander

1010 An updated version of *Startrek* adapted to the PC keyboard, prompting, and sound features. The game can be played at various levels of difficulty. *(List Price: $20)*
Requires: 64K, one disk drive.

Kejon E-ware
5105 Liles Rd.
Raleigh, NC 27606
(919) 851-6552

Family Games I

1011 A games package that includes *Androids*, which pits computer-controlled, man-eating androids against a player in a survival match. *Paddle-Whack* is a variation of the pong-type games. *Golf* lets the user try to improve a handicap or break par. *Gunnery* provides practice in firing surface-to-air missiles, and in *Mazer* players move destroyer tanks through a maze of explosive obstacles. *(List Price: $20)*
Requires: 48K, one disk drive.

Kejon E-ware
5105 Liles Rd.
Raleigh, NC 27606
(919) 851-6552

Family Games II

1012 A games package that includes *Phoenix*, a classic hangman game in which if the player fails to guess the word, he or she is eaten by the Phoenix. *Nim* and *Tic Tac Toe* are games of logic for two players. *Wumble* gives jumbled letters for the player to unscramble. In *Cryptor* the user guesses a correct number sequence in as few tries as possible based on program-given clues. *(List Price: $20)*
Requires: 48K, one disk drive.

Kejon E-ware
5105 Liles Rd.
Raleigh, NC 27606
(919) 851-6552

Zork I, Zork II

1013 The object of *Zork I: The Great Underground Empire* is to discover the 20 treasures of Zork and escape with them and your life. *Zork* features interaction in complete sentences (rather than the standard two-word parser). In *Zork II: The Wizard of Frobozz* the Wizard attempts to confound the user's quests using his capricious powers. *(List Price:* Zork I *$39.95,* Zork II *$39.95)*
Requires: 48K, (other requirements not available).

Infocom, Inc.
55 Wheeler St.
Cambridge, MA 02138
(617) 492-1031

Deadline

1014 An interactive fiction game in which the user is one of eight characters, each with a different personality and motivation. Characterization is interdependent. *Deadline* features over 25 possible endings, dependent on the amount of "evidence" gathered. *(List Price: $49.95)*
Requires: 48K, one disk drive, 40- or 80-column monitor.

Infocom, Inc.
55 Wheeler St.
Cambridge, MA 02138
(617) 492-1031

Cashman

1015 An arcade-style game featuring fast action and sound effects. The object is to make money by eating dollar signs, while outrunning government agents. Available for either monochrome or color graphics interface. *(List Price: $39.95)*
Requires: 64K, (other requirements not available).

Gross National Products, Inc.
174 Central St.
North Reading, MA 01864
(617) 664-3815

PC/Games I

1016 An anthology of five games: *Blackjack, Gollum's Tunnel, Mortar, Mars Lander,* and *Kismet*. *(List Price: $20)*
Requires: 64K, one disk drive.

Micro Express
3857 Birch St. #109
Newport Beach, CA 92660
(714) 859-7575

Batrek, Goppa-Gop, Chase

1017 A series of three games. *Batrek* pits the user and the Starblazer ship against enemy craft. *Goppa-Gop* is similar to *Pacman* games. *Chase* is a simple game of chase for two young players. *(List Price: $20)*
Requires: Color/graphics adapter and/or paddles, (other requirements not available).

GAMES

Space Guardian, Butterflies, Mega-Volt, Champion/ Draughts, Jovian Odyssey, Blingsplatz

1018 A series of six games. *Space Guardian* players travel the galaxy searching and destroying alien warships. With *Butterflies* players try to catch butterflies, put them in jars, and keep them there. The game is keyboard controlled. With *Mega-Volt* a high-energy chamber generates ball lightning. Players must catch balls as they randomly leave the chamber before they penetrate an antimatter barrier.

Players can pit themselves against their PC with *Champion/Draughts*, play friends, or even let the PC play itself. The program has different skill levels. With *Odyssey* the player is lost over one of Jupiter's moons and must find a landing spot while avoiding meteors and volcanic eruptions. A split screen gives both a profile and overhead view of the surface. The game is keyboard controlled. With *Blingsplatz*, players must defend their space patrol from the attacking Blingsplatz. This ground-to-air battle game is keyboard controlled. *(List Price: $34.95 each)*

Requires: 64K RAM, one disk drive; *Space Guardian* and *Champion/Draughts* 80-column monitor.

Omric Corporation
1268 Main St. #207
Newington, CT 06111
(203) 666-4240

Snooper Troups Series

1019 A series of interactive mysteries using high-resolution graphics and animation that is designed for users age 10 to adult. The player is a private detective trying to determine which of nine suspects committed a crime and what the criminal's motive was. Players drive around town, question witnesses, search houses for clues, and use the snoop computer to develop background data. Players learn to design overall strategy for acquiring information; test, classify, and relate individual pieces of data; and develop and test hypotheses. *(List Price: $50 for each installment of the series)*

Requires: 64K, one disk drive, (color/graphics adapter recommended).

Spinnaker Software
26 Brighton St.
Belmont, MA 02178
(617) 484-8444

Hi-Rollers, Poker Parlay

1020 Four casino action games: *Slots, Craps, Roulette,* and *Blackjack.* One to four players follow all standard casino gaming rules. *Poker Parlay* allows the computer to play five-card draw, five-card stud, six-card stud, seven-card stud, and others. The game includes full card displays, buy in, raises, folds, and even borrows from the bank. *(List Price:* Hi-Rollers *$47;* Poker Parlay *$37)*

Requires: 48K, one disk drive, color/graphics adapter.

New Venture Systems
P.O. Box 2141
Chesapeake, VA 23320
(804) 482-1889

Ken Uston's Professional Blackjack

1121 A game for adults that teaches the computer-developed blackjack strategies of a professional blackjack player. It allows the player to "take on the tables" at a choice of over 50 casinos by actively simulating the playing environments at each, taking into account variations in house rules and dealing systems. The program operates in both color and monochrome. *(List Price: $89.95)*

Requires: 48K, one disk drive.

Intelligent Statements, Inc.
P.O. Box 600
Holmes, PA 19043
(800) 345-8112, 662-2444

Floppy Frenzy

1022 A video game that uses IBM's color graphics capability and the speed of the 8088 processor. The object is to lay traps to weaken and ensnare magnet monsters before they destroy your floppy disk. Extra points are earned by clearing the screen at higher levels where evil dustmen lurk. *(List Price: $39.95)*

Requires: 64K, one disk drive, color/graphics adapter.

(416) 632-6279

Stellar Defender, Game Master

1023 *Stellar Defender* is a space game in monochrome or color. *Game Master* provides dice rolling and bookkeeping functions for fantasy role-playing games. An advanced version provides chart rolling and other commands. Documentation is available for *Game Master*. The advanced version has all functions included in the BASIC version. *(List Price:* Stellar Defender *$14.95;* Game Master *monochrome version $19.95, advanced version on monochrome disk $24.95)*

Requires: Not available.

Alkazar Associates
2638 S. Lynn St.
Arlington, VA 22202

Galaxy Master

1024 A video space game with the choice of sound or silence. The program automatically chooses a color graphics mode or text mode for the monochrome display, and uses the 25th display line as a scoreboard. *(List Price: $29.95)*

Requires: 48K, one disk drive, 80-column monitor.

Info-Pros, Inc.
2102 Business Center Dr. #132
Irvine, CA 92715
(714) 851-8975

The Warp Factor

1025 A game of sensor and scanner readings, energy allocation for weapons, shields and warp engines, and battle damage. Multiple computer-as-opponent scenarios include Reman Chase (with the Cloaking Device, Plasma Torpedoes, and Neutral Zone), Attack on Star Base, Attack on Base Station, and Dogfight. The two-player version allows each player to choose starships from a different empire, creating situations from skirmishes to all-out space war. A diskette, four data cards, and rule book are included. *(List Price: $39.95)*

Requires: 64K, one disk drive.

GAMES

Free Enterprise

1026 A strategy game that simulates the challenge of operating a business. Each player acts as an executive of a firm competing with others. Players compete by making decisions about production runs, prices, advertising, and other variables affecting the total financial strength of a company. The choice of three different levels allows novices to compete with experienced business people. The game is for one to six players, adolescents to adults. The package includes a player's guide, a decision-recording pad, a record-keeping pad, and one disk. *(List Price: $60)*

Requires: 64K, one disk drive, (printer recommended).

Science Research Associates, Inc.
155 N. Wacker Dr.
Chicago, IL 60606
(800) 621-0476, 621-0664

Asylum

1027 An adventure game that features full sentence input, over 1,200 locations, and three-dimensional graphics. *Asylum* comes in a vinyl folder with a complete manual. The program runs in machine language on a self-booting disk and requires no DOS or BASIC. Three-dimensional graphics showing your location are done with the standard IBM monochrome display. No graphics board is required. *(List Price: $39.95)*

Requires: 48K, one disk drive, 80-column monitor.

P.O. Box 2141
Chesapeake, VA 23320
(804) 482-1889

Trilogy, Set the Hostages Free

1030 *Trilogy* is a fantasy game in which players try to find a magic ring. Players must make it past dragons and fight with dwarf armies. *Hostages* is an interactive game with music, sound, and character graphics. The game centers around three heroes who must break through a prison wall to free hostages. *(List Price: $29.95 each)*

Requires: 48K, one disk drive, 80-column monitor.

TexaSoft
1028 N. Madison Ave.
Dallas, TX 75208
(214) 495-5052

Question

1031 A game based on an artificial intelligence model. To play, the user thinks of an animal, city, or famous person and the computer asks questions to guess the subject. The computer becomes "smarter" as the user feeds it information and categories. Users can switch disks midgame, so the categories are limitless. The computer's increasing body of knowledge is pitted against the user's ability to answer questions accurately. *(List Price: $45)*

Requires: 64K, one disk drive, (printer optional).

Alpha Software Corp.
6 New England Executive Park
Burlington, MA 01803
(617) 229-2924

GO FOR IT!

Ok, football fans, now you can play a hard-charging game right on your own green turf. A game where you're the coach . . . you're the quarterback . . . you're the whole damn team! You call every play . . . want to go for it? . . . or punt?

The opposition is tough. Your wiley IBM Personal Computer, figuring odds on each play . . . determined to win at all cost.

Sounds like fun? You bet. And its available **now** for you to play on either green turf or graphics. Football requires one drive, 64K memory, and your game plan.

To order, send $15 + $2.50 shipping/handling to: Computerenergy Corporation, PO Box 6267, Denver, CO 80206, and we'll send you a great game of football. We'll refund the fifteen bucks if you aren't completely satisfied, so why not go for it?

GAMES

Star Thrower

1032 A space game designed to teach 6 to 10-year-olds how to use a programming language. The game consists of maneuvering spacemen around a playing field in space, reaching a small star before the opponent, and throwing it through a goal on the edge of the playing field. Players work through a series of on-screen tutorials in which they learn to program their spacemen with competitive strategies. A simple programming incorporates fundamental programming concepts such as conditionals and subroutines. *(List Price: $45)*

Requires: 64K, one disk drive, (color monitor recommended).

Spinnaker Software
26 Brighton St.
Belmont, MA 02178
(617) 484-8444

Arcade I

1033 A package of five games: *Mastermind, Acey Deucey, Groan, Beat the Computer,* and *Microbase Downs. (List Price: $19.95)*

Requires: 64K, one disk drive, 80-column monitor.

Microbase Software Inc.

WHAT'S ECC?

ECC (Error Correction Code) is a polynomial derivative which is used to detect and correct errors. In simpler terms, this means that the computer will detect and automatically correct data errors sometimes generated spuriously in the equipment.

VR Data's HARD DISK III has this feature. If your system will abend or die during a data error or if you must always have the correct data for your functions, ECC is a necessity. This feature has filtered down from the larger computer systems and is now used by manufacturers of superior micro computer products.

Imagine a 5 meg Winchester Hard Disk with the following features:

ALL FOR $1899. Complete

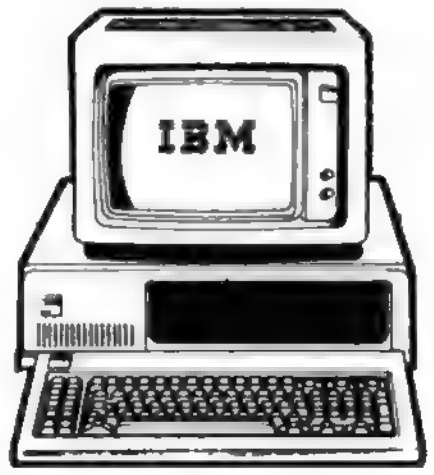

- ECC—onboard buffer
- FCC approval—Heavy Duty Power Supply
- Automatic power on with system
- Heavy duty linear power supply
- Gold plated contact on all connectors
- Heavy gauge aluminum chassis
- 115/230 VAC 60/50 HZ Standard
- State-of-the-art controller
- 2 pass forced air cooling system

ONLY FROM VR data

Support

Section five of the PC Product Guide features accessories, services, publications, user groups and clubs, and dealers. Accessories include items such as printer ribbons, hardware covers, and cleaning kits for PC maintenance. Also listed are products that increase PC efficiency: keyboard and monitor extension cords, and specially designed furniture such as computer cabinets and printer stands.

The next group is Services which covers such things as training, consulting, and programming. Specialized services include disk copying, data bases for software searches and exchanges, manufacturer telephone hot lines for technical assistance, and typesetting directly from word processing systems. We've also covered descriptions of information networks such as The Source and CompuServe. These service networks link personal computers to data bases stored on large computers and provide electronic mail, shopping, banking, access to financial information and news wires, and the ability to program using large computers.

The publications group comprises Books, Catalogs, and Periodicals. The books feature introductions to the PC for novice users as well as technical information for advanced users. Topics include PC hardware; operating systems; applications programs such as word processors and spreadsheets; and programming in BASIC, FORTRAN, and Pascal. Applications for math, science, and business and home financial management are also covered. The periodicals, some of which are available on diskette, consist of monthly and bimonthly publications for PC owners. These publications provide hardware and software product information, reports on marketing trends, and information for users of applications programs.

The next group in the Support section, User Groups and Clubs, lists organizations that help PC users meet and exchange information. Electronic bulletin boards are also included. Bulletin board services enable users to compose and store messages for other computer users on a communications system such as The Source, CompuServe, or a system organized by a user group.

The Dealers group provides information about IBM PC dealers, and dealers and distributors of PC-related products. IBM Product Centers and dealers are listed in alphabetical order by state. For many of the dealers and distributors, specific information about product lines and services is also included.

Support

ACCESSORIES

Memory Jogger

1037 Programmer's aids that are 8½- by 11-inch, easel-mounted reference cards listing commands, statements, and functions for the PC. Instruction sets are alphabetized and color-coded. They are available for BASIC and PC-DOS. *(List Price: $10 each)*

JC Computer Specialists
P.O. Box 3465
Federal Way, WA 98003
(206) 839-8268

Easy Find Reference

1038 A reference card with 14 panels of information on how to debug BASIC programs. These explain how to get BASIC started; commands associated with controlling BASIC for the development of program execution; and functions related to mathematics, string manipulation, and I/O. It also provides an alphabetized description of over 80 BASIC statements, including disk statements and advanced versions; miscellaneous functions; user logic tables and variables; and graphic and color programming information. *(List Price: $2.50)*

Minimagic Company
104 Park Rd. #34
West Hartford, CT 06119
(203) 233-6261

Printer Stands, Baskets, Shipping Cases

1039 A variety of printer stands, baskets, shipping cases, and other options. A desk-top model printer stand and two stand-up printer stands with different widths are available along with a printer stand basket.

Computer shipping cases for the PC with keyboard for the monitor or for the full system with keyboard monitor and printer are also available. Locks and casters for the cases can also be purchased.

A video film recorder to produce color photos or slides from monitor graphics is available with a complete selection of dust covers. Keyboard extension cables and a monochrome monitor extension cable set are also available.

The Computer-Mate desk with a recessed bay for the CPU and disk drive. The desk comes in 4- and 5-foot models. *(List Price: Computer-Mate desk 4-foot $399, 5-foot $499)*

Computer Mate, Inc.
1006 Hampshire Ln.
Richardson, TX 75080
(800) 527-3643, 442-4006
(713) 491-6550, (214) 669-9370
TWX: 910-867-4763

Computer Furniture

1040 Hardwood and hardwood veneer computer tables, shelves, and printer tables available in oak or birch with a natural or stained finish. *(List Price: 46-inch work table $175, with top-sider shelf unit $195; 36-inch work table $170; printer table $165; top-sider shelf unit $30)*

Lawrence Wood Works
11th and Haskell
Rt. 2, Box 407
Lawrence, KS 66044
(913) 842-7797

Printer Replacement Ribbons

1041 Ribbons for various types of computer printers including replacement ribbons for the Epson MX-80 and MX-100 printers. Epson ribbons are available in black and in colors (blue, green, red, and brown). The MX-80 ribbon is ½ inch by 20 yards; the MX-100 ribbon is ½ inch by 30 yards. *(List Price: MX-80 $8.50 each, MX-100 $13 each)*

Aspen Ribbons Inc.
1700 N. 55th St.
Boulder, CO 80301
(800) 525-0646, (303) 444-4054
Telex: 45-0055

Cartridge Ribbons

1042 A service that offers new cartridge ribbons, reloaded cartridges, or loops only. Reloads are sold on an exchange-only basis. After used cartridges are sent in, they are reloaded and returned by UPS. Cartridges are cleaned and tested after reloading. Torn or jammed film ribbons with substantial unused portions are repaired without charge when accompanied by an order. A minimum order is six new ribbons. The company carries Epson, NEC, TRS-80, Diablo, Wang, and Qume/Lanier ribbons. *(List Price: Epson MX-70, MX-80 IBM Matrix Fabric $6.50 new, $3.50 reloaded)*

Ben Torres Ribbon Service
416 E. State St.
Redlands, CA 92373
(714) 792-0831

Electroniture

1043 A combination computer cabinet and solid oak desk. The unit has a large work surface, document holder, and storage space for peripherals and software. It also has room for a small printer, and an optional, matching solid oak stand accommodates both back- and bottom-feed printers using 15-inch and smaller fanfold paper. An optional wire paper bale is available. *(List Price: Desk unit $895, stand $225, paper bale $25)*

The Bench Collection
1387-D Cass Rd.
Santa Rosa, CA 95401
(707) 526-1074

User's Starter Kit

1044 A kit that includes a library case for diskette storage, a head-cleaning disk, cleaning solution, disk labels, write-protect labels, backup and archive labels, and mylar hub rings. All accessories are packaged in a container suitable for reuse. *(List Price: $29.95)*

100-RALLY Corporation
2575 E. Bayshore Rd.
Palo Alto, CA 94303
(415) 856-9900

Compucart

1045 An ergonomically designed mobile computer work station that occupies approximately 4 square feet and can be secured with one lock when not in use. It includes an adjustable keyboard shelf and comes with an optional printer cart with accessory drawer, paper supply shelf, wire basket, and a multi-outlet electrical box. The Compucart offers security by returning the computer to the closed position when not in use or when running unattended. Compucart is available in almond or English oak. *(List Price: Compucart $595; printer cart $225; optional printer, cart drawer, paper-catch shelf, electrical outlet $40 each)*

Compucart
P.O. Box 2095
Tampa, FL 33601
(813) 251-2431

PerfectData Series

1046 Cleaning and maintenance products. The Flexible Disk Drive Head Cleaning Kit removes contamination such as oxide deposits, smoke particles, oil, and dust from read/write heads. The Tech Maintenance Kit allows users to clean computer and peripheral components such as tape paths, guides, and read/write heads. The Video Display Cleaning Kit cleans terminal screens and keyboards, and neutralizes static charges. The Anti-Static Kit removes static buildup. The Print Wheel Type Element Cleaner cleans the elements on letter quality printers. Micro Maintenance Kit combines components from all other PerfectData products into a single package for users starting a preventive maintenance program for their microcomputer system. PerfectData 200 simultaneously cleans and lubricates both sides of hard and floppy disks while still in jackets. *(List Price: Head Cleaning Kit $29.95, Micro Maintenance Kit $39.95, Tech Maintenance Kit $24.95, Video Display Cleaning Kit $12.95, Anti Static Kit $5.95)*

ACCESSORIES

Anvil Computer Systems Cases

1047 A line of computer carrying cases made from ABS plastic with 5/32-inch ply sidewall material and steel riveting, affording protection from impact damage. The cases conform to the Air Transportation Association specifications for air worthiness. Features include permanently affixed ID tags, recessed handles and latches, and interior partitioning and foam lining for shock absorption. Standard designs are available for disk drives, modems, CRTs, and printers. Custom designs are also available. *(List Price: custom built cases $100–$400)*

Anvil Cases, Inc.
4128 Temple City Blvd.
P.O. Box 888,
Rosemead, CA 91770
(800) 423-4279, (213) 575-8614
TWX: 910-587-4935

Snuffer 60 Automatic Fire Extinguisher

1048 A clean agent fire extinguisher that discharges 6 pounds of Halon 1211, a nonconductive, noncorrosive agent that minimizes the risk of thermal shock to computer components and magnetic record media. The extinguisher is available in portable or stationary models with a five-year warranty. *(List Price: $250 each)*

Technology House
P.O. Box 4281
Warren, NJ 07060
(201) 755-2483

Flexible Disks

1049 Floppy disks available for every 5¼-inch disk drive. The rated life is 12 million passes without errors. Disks undergo a burnishing, overcoating, and lubricating process, and are offered with reinforced hub rings as a standard feature. *(List Price: Single side, double density $4, reversible floppy $4)*

Requires: One disk drive.

Omni Resources corporation
4 Oak Pond Ave.
Millbury, MA 01527
(617) 799-0197

Dustcover

1050 A dust cover of rigid, smoked bronze plastic that provides keyboard protection. *(List Price: $12)*

NH III Computer Accessories
9402 Burtis St.
South Gate, CA 90280

Hi-Rise

1151 A rack for video screen and disk drives that positions the system unit above the video monitor where it is easy to reach and offers shade to the screen. The screen is tilted for improved viewing. Constructed of wood, it comes in colors complimentary to the IBM PC. *(List Price: $79.95)*

Hi-Rise Office Aides
7201 Alhambra Blvd.
Miramar, FL 33023
(305) 966-4982

PC-Rover

1052 A mobile station for the PC that is 24 inches high, 13 inches wide, and 20 inches deep. It allows the PC to be removed from the desk top, clearing the work area for other tasks. Features include a lighted power-on indicator and convenience outlets for plugs and cables. *(List Price: $295)*

Tecmar Inc.
23600 Mercantile Rd.
Cleveland, OH 44122
(216) 464-7410
Telex: 241735

Custom-Designed Furniture

1053 Solid oak furniture custom-designed for all standard personal computers. A basic table and cart design can be enhanced with custom-designed accessories including a breadboard shelf for a detachable keyboard, a basket to hold printer output, a disk hanger, and a document storage device. *(List Price: $150–$600)*

Williams and Foltz
1816 Fourth St.
Berkeley, CA 94710
(415) 644-2022

DiscSavers

1054 Vinyl sleeves for 5¼-inch and 8-inch diskettes that provide a four-color filing system, a secure fit, and durability. Packaged 12 or 10 (8") per box, they are available in red, blue, yellow, and green. *(List Price: $6.29 for 5¼-inch, $8.75 for 8-inch)*

Rockroy Inc.
Computer Products Division
7721 East Gray Rd. #103
Scottsdale, AZ 85260
(800) 528-2361, (602) 998-1577

Miscellaneous Accessories

1055 Products from Computer-Mate: Printer stands, a desk-top model measuring 18x10x8 inches. Stand-up models measuring 18x12x26.5 inches or 24x20x25.5 inches are also available with a printer stand basket.

Computer shipping cases for the IBM CPU and keyboard and for the IBM monochrome monitor are available. Shipping case locks and casters can also be purchased.

A video film recorder that turns color graphics on the monitor into full-color photos or slides.

Extension cables and keyboard extension cable 3-foot, 5-pin din cable connects keyboard to CPU, $35; monochrome monitor extension cable set, includes 3-foot, 9-pin monitor extension cable and 3-foot power extension cable. This set connects the monitor to the CPU, $55.

A desk for protecting components provides ample storage and work space. It has a master switch for simultaneous activation of systems, adjustable leg levelers, and roller drawers for storage. Four-foot and 5-foot models available.

Computer-Mate, Inc.

SERVICES

Comp*U*Star

1105 A discount, electronic shop-at-home service for home computer users and subscribers to interactive cable television systems. Users access the data base and view listings of more than 30,000 products from over 200 manufacturers. Products are discounted up to 40 percent below list price and include major appliances and athletic and home entertainment equipment. The service features home delivery, monthly listings of discounted bargains, consumer hints, and product evaluations. Comp*U*Star is accessible via a nationwide data communications network, Tymnet, or any two-way cable television network that operates as a data communications gateway. Warranties on all products. *(List Price: $25 membership fee; prime time 15¢ per minute, non-prime time 5¢ per minute)*

Requires: 48K, one disk drive, modem, communications—serial, asynchronous, ASCII.

*Comp*U*Star*
777 Summer St.
Stamford, CT 06901
(203) 324-9261

Programming Service

1106 An organization that provides software for small business applications, specializing in programs for manufacturers' representatives engaged in selling. The programs are data base types with routines for cash flow predictions, sales records analysis, and accounting functions.

Programs for small machine shops are also available. Routines include job costing, machine scheduling, payroll, accounts payable, accounts receivable, and general ledger. Programs are connected to avoid multiple data inputs. *(List Price: Depends on clients' needs)*

Brennan Ventures Inc.
P.O. Box 1253
York, PA 17405

Freedom Network

1107 Network access to all electronic mail, Telex, TWX, International Telex, and Fax Gram services that convey messages between a variety of different terminals and devices. The network performs protocol conversion and speed throttling to eliminate incompatibility and provide real-time interconnection of previously incompatible protocols and speeds on both public and private networks.

Graphnet, Inc.
329 Alfred Ave.
Teaneck, NJ 07666
(800) 336-5100

The Source

1108 A communications network that enables users to access information libraries that store data on business, financial, scientific, public affairs, sports, educational, and other subject areas. The extensive data base also includes major news wires and newspapers, an entertainment library that contains 74 games, and 72 bulletin boards (users can place notices to buy and sell equipment or exchange ideas). Source users can receive news, transmit text, reproduce documents, or communicate information. The Source also includes a classified ad service. A Chat feature allows typewritten "conversations" with other subscribers, and SMAIL (Source Mail) allows subscribers to access a mailbox and 2,000-character storage bank. Subscribers can use The Source to program in languages such as BASIC and FORTRAN.

An advanced data base called Source Plus is available at additional cost. Source Plus features include commodity reports, a record of bills before Congress, and Comp*U*Star, an electronic department store. *(List Price: Initial subscription costs $100 and may be purchased from retail computer stores or directly from The Source. The subscription is a one-time-only fee. Charges for Source use are based on connect time and type of service accessed, with a $10 monthly minimum. Rates vary with time of day, from $4.25 an hour between midnight and 7 a.m., to $18 an hour for prime-time use—7 a.m. to 6 p.m. Monday through Friday)*

Requires: 300 baud rate no parity, modem with full duplex, ASCII 8-bit code with one stop bit, RS-232-C interface, ability to emulate a dumb terminal.

The board meeting's been postponed indefinitely. They're hooked on Gray Flannel Fun™ by Armonk.

GRAY FLANNEL FUN

Introducing Gray Flannel Fun from Armonk Corporation.

The first series of computer games designed for executives, not teenagers.

These games demand wit, intelligence, and sophistication. Our newest is Executive Suite.™ It's more fun than a hotly-contested merger. But be warned. Like all our games, it's incredibly addicting.

Gray Flannel Fun and our companion line of serious business software — Professional Solutions™ are both designed for the IBM personal computer.

Gray Flannel Fun. Because man does not live by capital gains alone.

1148 Educating financial executives in the benefits of microcomputer technology. Product enhancement assignments customize cash management software and include consulting work that is not dependent on existing software. Consulting assignments include client float analyses, high-point study of cash management operations, and computer security audits. Client support services, cash management seminars, and technical product support services are available.

300 Mercer St. #26-0
New York, NY 10003
(212) 454-0970

Computer Tamers

1149 Engineers offering assistance and advice to businesses and professions. Programming services include troubleshooting, maintenance, customization, development, and program and data conversion. Equipment services include selection, user orientation, printer adaptation, and media transfer.

1514 Manhattan Beach Blvd.
Los Angeles, CA 90266
(213) 641-7110 ext. 312, 545-9482

Cook Compusystems

1150 Consultation services providing custom computer systems for churches, professionals, and businesses utilizing IBM and Seattle Computer components. The company is also a distributor for Scotch diskettes and Seattle Computer components.

309 Lincolnshire
Irving, TX 75061
(214) 253-6979

Cobb Associates

1151 Systems integration, consulting, training, and ongoing support in spreadsheet applications, accounting systems, and word processing. Includes assistance in evaluating, selecting, and installing software to meet specific user requirements. Full support services provided for computerization including planning, system selection, and installation training.

55 Wheeler St.
Cambridge, MA 02138
(617) 497-5643

Computer Consultants

1152 Consultants certified in CDP, CPA, and computer audit. Services include assistance with selection of new systems, modification of existing systems, and staff training.

P.O. Box 11034
Washington, DC 20008
(202) 966-2855

CATALOGS

IBM PC Software Catalog

1153 A catalog that lists programs, books, evaluations, and uses of the PC and PC-compatible products. Sections include electronic spreadsheets, word processing, and data base management.

UOI Company
15445 Ventura Blvd. #1092
Sherman Oaks, CA 91413

UCSD p-System Applications Catalog

1154 A catalog that informs SofTech Microsystems licensees and users about the variety of UCSD p-System-compatible applications available from independent software distributors. Applications listed in the catalog are available for use on various machines and for different versions of the UCSD p-System. The appropriate vendor must be contacted for specific hardware availability. Products marketed directly by SofTech are not included in the catalog.

SofTech Microsystems
9494 Black Mountain Rd.
San Diego, CA 92126
(714) 578-6105
TWX: 910-335-1594

Software Vendor Directory

1155 A reference tool that is organized into three main sections with four appendices. The first two sections give information on microcomputers and operating systems, and provide indexes to the third section. The third section lists the vendor's number, name, address, and telephone number, corporate officer or owner, hardware and software categories, and tradename when appropriate. A 6-month update service is available. *(List Price: $57.95 without updates, $100 with two updates)*

Micro-Software Services, Inc.
P.O. Box 482
Nyack, NY 10960
(914) 358-1340

The Catalog for Modern Times

1156 A comprehensive selection of hardware accessories and software programs that is available free to IBM PC users.

Computer Specialties
1253 Broadway
El Cajon, CA 92103
(714) 579-8380

Software Desk Reference

BOOKS

The IBM Personal Computer: An Introduction to Programming and Applications

1159 Practical programming applications from mailing lists to graphics and games with simple, tutorial-style questions. The book includes an introduction to BASIC and Advanced BASIC, and an overview of *VisiCalc*. *By Larry Goldstein, Ph.D; (Robert J. Brady Company, Bowie, Maryland, 1982); hard $19.95, soft $14.95.*

Some Common BASIC Programs, IBM Personal Computer Edition

1160 A guide to 76 business and home management programs. Subjects include finance, statistics, math, and home budgeting. Each program comes with a description, BASIC source code, and operating instructions. All have been tested and debugged. *By Peter M. Burke (OSBORNE/McGraw-Hill, Berkeley, 1982); 195 pages $14.95.*

Osborne CP/M User Guide, Second Edition

1161 The second edition of *CP/M User Guide* encompasses the newest CP/M developments, including CP/M-86. Written for users at all levels, it covers the history, technical aspects, and functions of CP/M, as well as the use of built-in and transient commands, assembly language utilities, high-level languages, and applications programs. It encompasses several CP/M derivatives including MP/M and CP/NET (the network-oriented operating system). Appendices list CP/M-compatible programs, command summaries, languages, and products. *By Thom Hogan (OSBORNE/McGraw-Hill, Berkeley, 1982); $15.95; 280 pages.*

IBM/PC Survivor's Manual

1162 A primer for the IBM PC that should accompany the documentation IBM provides new owners. It is as elementary as teaching how to insert a floppy disk or describing the keyboard. Some shortcuts are taught. The manual is divided into five step by step lessons: Inspecting the Hardware, Meeting DOS, Booting Up, Putting DOS to Work, and Moving from DOS to BASIC.

When the reader finishes the manual, he or she should be ready to learn BASIC or use professionally written programs. The manual defines terms and is fully indexed. The author assumes the reader/user has two disk drives, DOS, and a monochrome display. *By John Sigmund Mayer (Mayer Associates, Huntington, New York, 1982); 35 pages; $11.95.*

FORTRAN Coding Guide

1163 A guide that aids software departments in formalizing standard practices. It provides an easily applied methodology that ensures the construciton of top-down programs that are structured and easy to test and maintain. *(Associated Technology, Estill Springs, Tennessee, 1982); 40 pages; $20.*

Learning IBM BASIC for the Personal Computer

1164 A book that covers the use of BASIC for the PC and shows readers how to start writing their own custom software. *By David A. Lien (CompuSoft Publishing, El Cajon, California, 1982); $19.95.*

DON'T (How To Care For Your Computer)

1165 A guide to computer and peripheral preservation that has advice on the computer, floppy disks, hard disks, the CRT terminal, printer tape units, software, and documentation. *By Rodnay Zaks, (Sybex, Berkeley, 1982); 222 pages; $11.95.*

Your First Computer

1166 A beginner's guide to small computers that includes selection criteria for computers, peripherals, languages, and application packages. *By Rodnay Zaks (Sybex, Berkeley, 1982); 264 pages; $8.95.*

BASIC For Business

1167 Sample BASIC programs that cover business applications such as sales reports, financial statements, graphs and charts, depreciation calculations, and cost/profit analyses. *By Douglas Hergert (Sybex, Berkeley, 1982); 224 pages; $12.95.*

Introduction to Word Processing

1168 A book that covers concepts common to all word processing systems. It analyzes all features in detail, from screens to scrolling to formatting, and delineates what to look for when purchasing hardware and software. *By Hal Glatzer (Sybex, Berkeley, 1982); $12.95.*

Introduction to Wordstar

1169 Step by step instructions for using *Wordstar*. The book includes information on editing copy, moving and deleting blocks of text, checking copy for spelling accuracy, creating and merging files, on-screen formatting and designing special print effects. A dictionary of commands used in *WordStar, SpellStar,* and *MailMerge* is included. Every entry includes a diagram of the keys used to perform the command. *By Arthur Naiman (Sybex, Berkeley, 1982); 208 pages; $11.95.*

Practical BASIC Programs, IBM PC Edition

1170 A book that offers 40 useful programs at a cost of less than 50 cents each. Each program has been tested or debugged. Programs include financial management, math, checkbook reconciliation, and home budgeting. Each is presented with a description, sample run, practice problems, and BASIC source listing. *By David Wilson (OSBORNE/McGraw-Hill, Berkeley, 1982); 170 pages; $15.99.*

VisiCalc Applications

1171 Accounting and management programs ranging from financial statements to master budgets to model pricing and investment strategies. *By Stanley R. Trost (Sybex, Berkeley, 1982); 200 pages; $11.95.*

BASIC Exercises for the IBM Personal Computer

1172 Fifty BASIC exercises for the PC user. The book presents exercises in math, business, operations research, games and statistics that gradually become more difficult. Each exercise has a statement and analysis of the problem, a solution with a flow chart, and a program with detailed commentary. *By J.P. Lamoiter (Sybex, Berkeley, 1982); 232 pages; $13.95.*

Introduction to Pascal

1173 Pascal features covered in detail, from basic definitions to complex data structures. An extensive appendix presents listings of all symbols, key words, and rules of syntax. *By Rodnay Zaks (Sybex, Berkeley, 1982); 422 pages; $15.95.*

Discount Buyer's Guide to the PC

1174 Information on purchasing equipment directly from manufacturers. *(Micro Express, Newport Beach, California); $3*

87/88-Guide

1175 A guide designed as an introduction to the optional 8087 and the IBM MACRO Assembler. Intended as a reference for the IBM PC and a tutorial for assembly language programmers not familiar with the strongly typed and structured language used by the 8087/8088 family of processors. It has assembly language listings and includes a description of how to write Macros that call the 8087. *(MicroWare, Kingston, Massachusetts); $18.95.*

iAPX88 Book, iAPX86, 88 User's Manual, Introduction to ASM86, Component Data Catalog

1176 Literature on Intel's line of solid-state components, including descriptions of the 8088 microprocessor. The *iAPX88 Book* describes the 8088 microprocessor. The *iAPX86, 88 User's Manual* provides information on the 8086, 8087, and 8088 chips. *Introduction to ASM86* is for 8086 and 8088 assembly programmers. The *Component Data Catalog* gives reference information for Intel's line of solid-state components. *(Micro Match, Tujunga, California,* iAPX88 Book, 1981, *$12.95;* iAPX86, 88 User's Manual, 1981, *$15.95;* Introduction to ASM86, 1981, *$13.95;* Component Data Catalog, 1982, *$15.95)*

VisiCalc for the IBM Personal Computer

1177 A guide to running *VisiCalc* programs on the PC that provides machine-specific examples, solutions, and explanations on how *VisiCalc* programs interact with underlying files. *By Edouard Desautels (Wm. C. Brown Company Publishers, Dubuque, Iowa, 1982); $16.95; 160 pages.*

VisiCalc for Business

1178 Working models for use with *VisiCalc*. It answers "what if" questions about budget, cash flow, break-even, forecasts, leases, depreciation, investments, inventory, loans, payroll, quotations, advertising, ratios, and statistics. *By Douglas Cobb (Que Corporation, Indianapolis, 1982); $14.95.*

Inside the IBM Personal Computer

1179 Supplements the IBM manuals for programming system DMA and interrupt controller. It provides information on design expansion; slot add-in boards; program add-in boards using BASIC, assembly language, and DOS; and using DOS and BIOS functions from user program add-in boards. *(Tenley Design, Washington, D.C.); $10.*

IBM Personal Computer Technical Reference Manual

1180 The manual discusses the PC and its operations in depth and detail. It is divided into three sections and includes many descriptive block and data flow diagrams. Section One is an overview of the hardware and reviews each component.

Section Two discusses and locates major components of the main system board. The section covers I/O channels, keyboard, casette and speaker interfaces, switches, power supply, and includes maps of I/O addresses and system memory. Also included are discussions on the monochrome display, the parallel printer adapter, and the color/graphics monitor adapter.

Section Three discusses ROM (read only memory), BIOS (basic input/output system), parameter passing, and interrupt vectors. Also included are five appendices comprising ROM and BIOS listings, assembly instructions, schematic circuitry diagrams, and tables listing symbols, keys, and characters with corresponding hex and decimal codes. *(IBM Corporation, Boca Raton, Florida); $49.95.*

Indexed By Mary Professional Catalog

1181 An index of available IBM PC software that is updated quarterly. Each entry is indexed alphabetically by application and vendor. It includes software descriptions, hardware requirements, operating requirements, and warranty information. *(MegaBae, Inc., Menlo Park, California, 1982); $10, four for $32.*

Inventory Management for Small Computers

1182 A book and software package that tracks inventory starting at the cash register. The program automatically posts sales arrivals; prepares purchase orders; analyses of activity; and reports sales, orders, physical inventory, and location. It features "Quick Register," which prints sales invoices and updates inventory. Each record is approximately 80 characters long. *By Chuck Atkinson (Dilithium Press, Beaverton, Oregon, 1982); $16.95, $250 with disk.*
Requires: 32K, one disk drive.

Your IBM Personal Computer: BASIC and Applications

1183 One of a series of over ten books designed to introduce and explain basic programming languages, machine functions, and user applications for beginning through moderately advanced users. Each text includes a broad range of examples, programs, and exercises to encourage familiarity with the PC. *By Seymour V. Pollack (CBS College Publishing, New York, 1982); $16.95.*

32 BASIC Programs for the IBM Personal Computer

1184 Programs include home uses, educational uses, games, graphics, and mathematics. *By Tom Rugg and Phil Feldman (Dilithium Press, Beaverton, Oregon); $19.95, $48.95 with disk.*

How To Get Started With MS-DOS

1185 A tutorial and overview of the PC for beginners. Sections include IBM hardware; files, records and disks; commands and utilities; backup procedures; line editor; word processing; MS-DOS BASIC, tables and maps, error messages, and commands; BASIC commands; a glossary; and a comparison of CP/M and MS-DOS. *By Carl Townsend (Dilithium Press, Beaverton, Oregon, 1982); $13.95.*

32 VisiCalc Worksheets

1186 Thirty-two programs, including games and novelties, business applications, household applications, statistical analysis, and models. Users may either type the programs or order them on disk. *By Ted Lewis (Dilithium Press, Beaverton, Oregon, 1982); $19.95.*

Some Common BASIC Programs, IBM Personal Computer Edition

1187 Seventy-six practical programs on finance, statistics, home budgeting, and organization. Each program has a functional description, BASIC source code, and operating instructions. All are fully documented, tested, debugged, and ready to use. *By Peter M. Burke (OSBORNE/McGraw-Hill, Berkeley, 1982); $14.99; 195 pages.*

The IBM Personal Computer

1188 The history of the PC along with features, applications, and background on design characteristics. *(Tab Books, Blue Ridge Summit, PA); $17.95 hard, $10.95 soft.*

Support

BOOKS

Practical Pascal Programs

1189 Forty UCSD Pascal programs covering finance, management decision, statistics, science, and math. The user's key in the supplied listings compile the program. The book includes instructions, sample runs, and practice problems. *By Greg Davidson (OSBORNE/McGraw-Hill, Berkeley); 192 pages; $15.99.*

Made Easy Series

1190 OSBORNE/McGraw-Hill has released a "Made Easy" series of publications for spreadsheets and word processing software packages. *VisiCalc Made Easy* by David M. Castlewitz (160 pages) is a tutorial for *VisiCalc* usres. It includes sections on creating a *VisiCalc* model, commands and functions, and techniques for enhancing existing applications.

SuperCalc Made Easy by Chris Wood (160 pages) is a tutorial for *SuperCalc* users that includes detailed descriptions of *SuperCalc* commands and functions and special programming tricks applied to specific problems.

WordStar Made Easy by Walter A. Ettlin (125 pages) includes 14 accelerated lessons. Each lesson provides hands-on instruction and sample exercises on how to write business letters, legal documents, manuscripts, and sales reports. The book includes a detachable *WordStar* command sheet. *(OSBORNE/McGraw-Hill, Berkeley).*

IBM Personal Computer Handbook

1191 A comprehensive guide and resource directory for PC users that includes word processing, networking and financial applications, data base use, software development, and choosing the most appropriate system. The handbook also features reviews of hardware and software and a resource directory for products and services. *Edited by Dzintar E. Dravnieks, et al (And/Or Press, Berkeley, 1982) $29.96 hard, $17.95 soft; 448 pages.*

Introduction to the UCSD p-System

1192 A book that explains how to use the p-System operating system. It discusses how to edit, translate, and run a program, and how to optimize memory. A comprehensive appendix is included. *By Charles W. Grant and Jon Butah (Sybex, Berkeley, 1982); 250 pages; $14.95.*

IBM Personal Computer User's Guide

1193 A book with separate sections for novice and experienced PC users. For novices the book has a functional overview of PC hardware and software, a section outlining step-by-step operating instructions, explanations of the PC's internal operations, and tutorials in IBM BASIC. For the experienced PC user, sections cover advanced IBM BASIC programming, DOS, graphics and sound, and printer and I/O interfaces. A chapter on trouble shooting and IBM's problem definition procedure is also included with appendices providing tables, DOS procedures, and additional resources. *By Lyle J. Graham (OSBORNE/McGraw-Hill, Berkeley, 1982); $16.95; 385 pages.*

VisiCalc: Home and Office Companion

1194 A compendium of 50 *VisiCalc* models including sample printouts, narratives, and coordinate listings. Users can enter their own data or substitute labels or lists of entries to tailor models to their specific needs. They can also custom design new models using algorithms and modeling techniques. The models cover seven areas, from loans to investments and general business and household aids. All models can also be entered on *SuperCalc. By David Castlewitz, Lawrence Chisausky, and Patricia Kronberg (OSBORNE/McGraw-Hill, Berkeley, 1982); $15.99; 182 pages.*

IBM PC Expansion and Software Guide

1195 Evaluations of over 300 products that can be used with the IBM PC. Separate sections include hard disk storage, expansion boards, planning tools, operating systems, and software. Included are text and advertising. *By Chris DeVoney, Tom Henderson, Davie Reed, Doug Cobb (QUE Corporation, Indianapolis); $19.95.*

IBM's Personal Computer

1196 A three-section publication produced by a team of writers. The first section sketches the history of the IBM Corporation and describes the PC hardware, peripherals, and software. The second section covers available software and gives brief evaluations of presently available packages. Section three covers various aspects of computer communications such as using the PC as a terminal for a mainframe and using The Source. Appendices include a list of BASIC commands, a list of software publishers, and a command-by-command comparison of PC-DOS and CP/M-86. *By Richard Summi, Chris DeVoney (QUE Corporation, Indianapolis); $14.95.*

ADA Reference Manual, The ADA Programming Language, ADA, An Introduction

1197 ADA, a language developed by the Department of Defense for mainframe computers, combines features of the ALGOL and PASCAL languages. JANUS, by RR Software is a language based on ADA and adapted to microcomputing. *The ADA Reference Manual by the Department of Defense $10;* The ADA Programming Language *by I.C. Pyle $17;* ADA, An Introduction *by H. Ledgard price not available. (Springer-Verlag, Inc., Secaucus, New Jersey).*

Using Your IBM Personal Computer

1198 A practical guide to computing in BASIC on the IBM Personal Computer. It shows you how to use the keyboard, display screen, disk, and printer with packaged software, and teaches you how to program in BASIC. A complete reference of key information for programmers is included. *By Lon Poole (Howard W. Sams & Company Inc., Indianapolis, 1982); $16.95; 400 pages.*

Practical BASIC Programs, IBM P.C. Edition

1199 Forty fully documented programs for business and home use. Programs range from financial management, math, and science, to checkbook reconciliation and home budgeting. Each program is presented with a description, sample run, practice problems, and BASIC source listings. *By David Wilson (OSBORNE/McGraw-Hill, Berkeley, 1982); $15.99; 170 pages.*

Some Common Pascal Programs

1200 Seventy-six programs on finance, management decisions, statistics, math, and science that have been tested and debugged and are ready for immediate use. The programs present an overview of Pascal and provide users with enough background to invent applications or modify existing programs to meet their specific needs. All listings are accompanied by program descriptions and examples. *By Greg Davidson (OSBORNE/McGraw-Hill, Berkeley, 1982); $14.99; 195 pages.*

Softalk For the IBM Personal Computer

1201 A monthly magazine that is complimentary for 1 year to all owners of PCs in the United States, and $2 per copy to others. The magazine is geared to nontechnical readers and features "Beginner's Corner" for PC neophytes. Features and articles cover various aspects of the PC. Regular features include "System Notebook," a technical column, "Marketalk News," "Reviews" (new products writeups), "Newspeak" (an overview), and "Bestsellers" (software hits).

Softalk Publishing Inc.
11021 Magnolia Blvd.
N. Hollywood, CA 91601
(213) 980-5074

Sourceview

1202 A publication that analyzes software trends and reviews programs. The periodical provides a forum for new software companies interested in achieving distribution channels. *(List Price: Annual subscription $15.)*

Sourceview
P.O. Box 578
Concord, CA 94522
(415) 680-0202

COMPendium

1203 A monthly periodical guide to the contents of computer publications. The bulk of the magazine consists of synopses of all noneditorial articles appearing in 20 major personal computer magazines (from *BYTE* to *TRS-80 Microcomputer News*) and of directories of book, hardware, and software reviews found in those publications. It includes "Infoservice," classified advertising from user groups, newsletters and stores. *(List Price: Annual subscription $18, $20 in Canada)*

Epicurious Publishing Company
P.O. Box 129
Lincolndale, NY 10540

MMSFORTH Newsletter

1204 A 16-page bimonthly newsletter with topics such as beginning to advanced FORTH applications and theory. It also includes new MMS products and modifications. *(List Price: Annual subscription $10 for licensed users)*

Miller Microcomputer Services
61 Lake Shore Rd.
Natick, MA 01760
(617) 653-6136

W.P. News

1205 A bimonthly subscription newsletter on word processing for writers who work with computers. It includes equipment and software reviews, interviews with writers, book and product reviews, and articles on choosing and using word processors. *(List Price: Subscription $20, single issues $2, back issues $4)*

Word of Mouth Enterprises
1765 N. Highland Ave. #306
Hollywood, CA 90028
(213) 854-4161
SOURCE: FT1793

SATN

1206 A bimonthly publication designed to give users of *VisiCalc* a greater range of application ideas and techniques. It includes tutorials, in-depth articles about *VisiCalc*, and problem solving techniques. *(List Price: Six issues $30)*

SATN Subscriptions
P.O. Box 815
Quincy, MA 02169

SuperNews

1207 Information for novice users that includes updates, new applications, and hints on using *SuperCalc*. *(List Price: Free to registered SuperCalc owners)*

SORCIM Corportion
405 Aldo Ave.
Santa Clara, Ca 95050
(408) 727-7634
Telex: 910-338-2003

Software/Hardware Directory and Reference Guide for the IBM Personal Computer

1208 A semiannual directory with updates published monthly. It includes columns on software, hardware, consulting services, supplies, retailers, and help wanted. Updates include free listings of user groups, owners, and article reviews. *(List Price: One directory and six updates $10)*

Sapana Micro Software
P.O. Box 748
Quincy, IL 62301

IBM Personal Computer Journal

1209 A monthly magazine that publishes software and hardware reviews, new product announcements, and technical articles. Included is a reader's forum, a vendor directory, an owner information exchange section, and classified advertisements. *(List Price: Annual subscription $18, sample copy $2)*

CRC Publishing
10057 Commerce Ave., Dept. 1
Tujunga, CA 91042

Personal Computer Journal

1210 A monthly diskette-based magazine with quick reference cards, inserts for IBM manuals, and an illustrated journal. Each issue has eight documented, ready to use programs including arcade games, filing systems, and graphics. *(List Price: Annual subscription $85, individual issues $10)*

Personal Computer Journal
W. 2317 Garland
Spokane, WA 99205

Dr. Dobb's Journal

1211 The July 1982 issue features a technical comparison of the operating systems for the IBM PC, MS-DOS, and CP/M-86. High-resolution graphics on the PC are discussed in another article which also includes a memory map, graphics dump routine, and line generator subroutine. Two PC word processors are reviewed. *(List Price: Annual subscription $25, each back issue $3.50)*

People's Computer Company
1263 El Camino Real
P.O. Box E
Menlo Park, CA 94025
(415) 323-3111

Spreadsheet

1212 A bimonthly newsletter published by InterCalc, an international organization of user groups that specialize in spreadsheet programs. The newsletter features tips, formulas, programs, and applications, as well as member-contributed articles. *(List Price: Annual membership $25 including* Spreadsheet*)*

InterCalc
P.O. Box 254
Scarsdale, NY 10583

Telex: 640693

PC Perspectives Newsletter

1215 A monthly newsletter geared toward professional users. Applications of software and hardware associated with the PC are covered. Other topics include new products, new software, hardware technology, user experiences, general news, local computer networks, office and factory automation uses, and process control uses of the PC. *(List Price: Annual subscription $195, Foreign $245)*

Architecture Technology Corporation
P.O. Box 24344
Minneapolis, MN 55424
(612) 935-2035

Starware Personal Computer Products Buyer's Guide

1216 A monthly catalog with over 400 IBM PC-compatible products. The catalog includes books, furniture, hardware, and software. *(List Price: Annual subscription $12, single issues $1)*

Starware, Inc.
1701 K. St. NW #800
Washington, D.C. 20006
(202) 466-7351

Personal Computer Age

1217 An application-oriented, monthly publication for computer novices and technical users. Includes tutorials, hardware/software reviews, monthly columns, application programs, and articles on business, law, graphics, education, and music. *(List Price: Annual subscription $18)*

Personal Computer Age
10057 Commerce Ave.
Tujunga, CA 91042
(213) 352-7811

Computer Trader

1218 A monthly publication of classified and display advertising for buying, selling, and trading computer equipment. Articles on the IBM PC are included. *(List Price: Annual subscription $10, single copies $1)*

Computer Trader
Chet Lambert, W4WDR
1704 Sam Dr.
Birmingham, AL 35235
(205) 854-0271

I.B. Magazette

1219 A national user group and program exchange. Each issue (on disk) will be mailed to the user who then copies and returns it with input on programs, questions, or other comments. *(List Price: Each issue $10)*

Requires: 48K, one disk drive.

Minneapolis, MN 55416
(612) 929-7889

User Groups, Clubs, and Bulletin Boards

Finding a PC user nearest you.

User groups, clubs, and bulletin board services have been organized across the country to help PC owners find answers to questions and problems, provide information on the computer market, and create an opportunity to meet other PC owners.

The following is a list of associations open to membership for all IBM PC enthusiasts. For your convenience, we have alphabetized groups by city under state name. Asterisks refer to clubs that offer bulletin board service. At the end of the list are bulletin boards that, to our knowledge, are independent of user groups.

Bulletin Boards

The following is a list of bulletin boards that, to our knowledge, are independent of user groups.

Montana

IBM-PC BULLETIN BOARD SERVICE
George Peck
2324 Rehberg #30
Billings, MT 59102
(406) 656-9624

Open 24 hours a day, 7 days a week.

Ohio

COMPUSERVE
5000 Arlington Centre Blvd.
Columbus, OH 43220
(800) 848-8990

A bulletin board service and information for home financing programs, electronic mail, games, work space, newspapers, and the Associated Press Wire Service. It also includes User ID, password, and one free hour of user time. Cost: $20, $5 per hour of connect time.

Virginia

BULLETIN BOARD SERVICE
3277 Victor Cir.
Annandale, VA 22003
(703) 560-0979

A technical bulletin board open 24 hours a day, 7 days a week.

THE SOURCE
Source Telecomputing Corporation
1616 Anderson Rd.
McLean, VA 22102
(703) 821-6660

Anyone on-line on The Source may post a message on the PC Bulletin Board. Contents of the Bulletin Board include commercial advertisements for software and hardware products; user messages about the PC; and the *PC Gazette*, an electronic journal that monitors, edits, and classifies bulletin board items. Cost: $100.

JOIN THE SOFTWARE REVOLUTION...

OWN YOUR OWN SOFTWARE CENTRE!™

We started a software revolution! A revolution begins with an original idea. Ours was The Software Centre in Los Angeles; The Original Software Store and the first to offer a comprehensive selection of IBM, PC Software, CPM business software, games, books, magazines and computer supplies—over 1500 square feet.

It was an idea whose time had come, and now we are in the process of international expansion, with plans to open Software Centres around the world.

Free Software Centre franchise information kit. If you would like to be in the vanguard of the software retailing industry and want to own your own business, write for our free franchise information kit with complete details. **"The Original Software Store"™**

Software Centre INTERNATIONAL

MAIL TODAY!

☐ **Yes,** I'm interested in owning my own business. Please send me the Software Centre franchise information kit.

☐ **FREE Software '82 Catalogue** Please send me your free 58-page catalogue of the latest microcomputer software featuring an IBM, PC selection and technical books.

Software Centre International™ Attn: Dept. FI/PC

INEXPENSIVE and EASY-to-USE SMALL BUSINESS SOFTWARE for your IBM PC

EZLabel
- Mailing labels & phone lists
- 1000 addresses per diskette
- Sort by zip code or last name
- Sort by user defined codes
- 48K - One Drive - BASIC

EZMoney
- Checkbook & cash management
- 100 user defined categories
- Reconcile statements
- Reports by month,
- Year-to-Date
- 64K - Two drives - BASICA

EZMemo
- Easy-to-use word processing
- Custom form letters using addresses from EZLabel files
- Print in any IBM PC type style
- Line by line editing
- 64K - Two drives - BASICA

EZEntry
- On screen order entry for phone or mail order sales
- Stores 500 orders per disk
- Prints custom invoices
- Up to 200 product codes
- Automatic extension, taxes
- Wholesale & retail pricing
- 64K - Two drives - BASICA

All software designed for ease-of-use by new IBM PC owners. For advanced users, file formats are published in the users guide. IBM PC 80 CPS Matrix Printer and Monochrome Display recommended.

FLEX YOUR IBM WITH MAYNARD

IBM COMPATIBLE. ECONOMICAL. READY TO SHIP.

Now you can stretch your IBM Personal Computer* capabilities with peripherals from Maynard Electronics. Maynard offers a quality line of easy-to-install floppy drive controllers, memory expansion, and serial and parallel interfaces. Maynard peripherals are designed to combine functions to conserve I/O slots for greater flexibility. Ready to ship — at dramatic cost savings.

FLOPPY DRIVE CONTROLLERS WITH SERIAL OR PARALLEL PORTS

Floppy Drive Controllers are completely compatible with the Personal Computer* Optionally available on the boards are a serial RS232C type port with 20 ma current loop or a parallel port for connecting the IBM printer or equivalent. Includes cable to floppy drives.

	Part No	Price
Floppy Controller	FDC	$195
Controller w/ Serial Port	FDC/SP	$285
Controller w/ Parallel Port	FDC/PP	$269

MEMORY BOARDS WITH 1 OR 2 OPTIONAL SERIAL PORTS

Memory Boards include parity, are compatible with IBM memory boards. Complete with instructions for installation. All boards expandable to 256KB. 1 or 2 RS232C type serial ports are optionally available on the memory boards.

	Part No	Price
256KByte	MEM256	$555
192KByte	MEM192	$470
128KByte	MEM128	$385
64KByte	MEM64	$295

Any of the above Memory Boards with one serial port add $100 — two serial ports add $175

INTERNAL FLOPPY DRIVES

Complete instructions for simple installation. All drives are tested in an IBM Personal Computer system before shipping.

	Price
Single Head	$265
Dual Head	$340

16KBYTE MEMORY EXPANSION

The 16KByte memory expansion kit plugs into the main chassis.

Part No	Price
MEM16	$ 25

Ask About the New Maynard 8" Drive Controller. We Also Sell Amdek and Epson Products.

LEADERS IN SOFTWARE TECHNOLOGY
Presents
THE SORT

General Sort and Merge Utility
Created exclusively for the IBM Personal Computer
$95

THE SORT SORTS:

- BASIC, PASCAL, FORTRAN COBOL and MailMerge files
- sequential, random files
- records organized by items and lines
- multiple line records like MailMerge*, or sorts records in fixed column position (Binary or BASIC Random files)

THE SORT PROVIDES:

- for all common data types (string-text, integer, real, double precision)
- external and internal data representations
- interactive parameter preparation
- uses a parameter file so THE SORT can be run in batch processes

Requires 48 K and one disk drive, but uses all available memory

Also OMS SOFTWARE DEVELOPMENT SERIES

A. PASCAL SCREEN UNIT Access screen and keyboard from Pascal program - $40
B. PASCAL DOUBLE PRECISION ARITHMETIC PACKAGE Increase your Pascal integer arithmetic precision to 32 bits! $40
C. UTILITY PACKAGE - converts video modes, opens communication lines, speeds up I/O, Sets Epson and NEC tabs $25

Please send me _____ copies of THE SORT @ $95
_____ copies of Pascal Screen Unit @ $40
_____ copies of Double Precision Arithmetic @ $40
_____ copies of Utility Package

IBM PC ACCOUNTING SOFTWARE 75% OFF

Why pay IBM $1785 for the Peachtree software (GL, AP, AR) when for only $439 you can have completely equivalent software? Including payroll!

General Ledger-detailed reports for company and departments comporative financial statements (month, YTD, previous year)

Accounts Receivable - instant customer account information (current and aged) with complete invoicing including open item and statement capabilities.

Accounts Payable - current and aged payables, complete vendor/voucher history, check writing, cash flow management reports.

Payroll - all types of employees. Multiple statements, user modifiable tax tables, W-2 and 941 printing (month, quarter and YTD totals)

Includes **source code**, sample data and user manuals (540 pg.) CA residents add 6½% tax End users only system requires 64k, 2 disk drives, DOS, and 132 column printer (compressed mode OK)

IBM PC, Peachtree, MS-DOS are trademarks of IBM Corp, MSA, Retail Sciences Inc. and Microsoft respectively

THREE EASY TO USE/ HIGH PERFORMING SOLUTIONS

A Must For Your IBM PC

Info-SORT **only $145**

— **Fastest** Sort/select on the market for the IBM PC
— Uses quickest technique known; written in Assembler
— Execs as a DOS utility, or can be CHAINed in BASIC
— Sorts strings, integers, single or double precision nos.
— Outputs entire records, index file, or record number
— Typical time to sort 500 records (64 bytes) on a 6 byte string key and build an index file is under **15 seconds**. We challenge any other micro sort to beat it.

Info-GEN **only $295**

— **Fast Access**, multi-key record management system designed for the "First Time User"
— Assembler B-Tree file access — No reorganization necessary
— Up to 10 primary keys/Generic find function
— 8 field types/auto editing/default values
— Calculated fields/unerase function
— Multiple selection criteria for record reporting

Info-REPORTER **only $195**

— **Easy To Use** report writer for custom report creation.
— User designs report on the screen and specifies titles, column headings, detail lines, control breaks, total and calc lines.
— Creates special forms
— Interfaces with Info-SORT and Info-GEN, or with your own application programs.

All three available today for the IBM PC W/64K, 80x25 screen, 2 disk drives, and BASIC

Info-Pros, inc.
2102 Business Center Dr., #132 Irvine, Ca. 92715
(714) 851-8975
Dealer, OEM and Corporate inquiries welcome

Add Professional Screen I/O to your IBM PC-DOS Basic Programs!

Only $35

Now your PC screen I/O can work like an IBM mainframe! Merge our efficient Basic code into your own program, and you can easily display a full-screen input format as protected information. To enter data you simply fill in the blanks.

- Features optional Alpha or Numeric field checking, with 'BEEP" sound and rejection of invalid characters.
- Your entered data displayed in high intensity.
- Uses normal cursor control, tabs and backspace.
- Includes fully documented Basic source code.
- Screen format specifications, stored in data statement, be changed in seconds.
- Simplifies programming; eliminates cumbersome question/answer code.

Source code on disk, including shipping $35
Mass residents add 5% sales tax.

GAME I/O ADAPTER+

Game I/O Adapter

- Interfaces With Popular Paddle Systems
- Interfaces With Graphics Systems
- Allows X, Y Control
- Analog Control Via 16 Pin Connector

Access-Master

A Disk Accessor Used Within Any Basic Program
- Interfaces With Screen-Master
- Utilizes The Latest S.K.R.A.M.® Techniques
- Sequential Processing Of Random Access Files In Key Order
- Keyed Access For Direct Record Retrieval
- Random Retrieval By Record Number
- Access Files With Keys Up To 30 Bytes In Length
- Multiple Methods Of Record Access (5 Types)
- Interfaces With Existing Basic Programs
- Eliminates Hours Of Development Time

Screen-Master

Generates Screen Input Format
- Defines Defaults
- Table Searching (Handling)
- Date Checking (Leap Year Included)
- Special Handling Routines Available For Each Field Through Gosubs
- General Title Formatting
- Utilizes Special Function Keys
- Define Where Each Field Input Goes Into The Record
- Key Length (Maximum 30 Characters)
- Program Various Sound Responses

Model 953A EPROM PROGRAMMER

- Programs 2508, 2758, 2516, 2716, 2532 and 2732 five volt EPROMS.
- Complete - no personality modules to buy.
- Intelligent - microprocessor based, programs and verifies any or all bytes.
- RS-232 serial interface - use with computer or terminal.
- Verify erasure command - verifies that EPROM is erased.
- Extended diagnostics - error output distinguishes between a bad EPROM and one which needs erasing.
- May be used for extremely reliable data or program storage.
- All power on programming socket under processor control. LED warning light indicates when power is applied.
- Complete with Textool zero insertion force socket.
- High performance/cost ratio.
- Standard DB-25 I/O connector

IBM
personal computer
UCSD
p-System™IV-1

A superior implementation of the UCSD p-SYSTEM is available NOW for your IBM Personal Computer.
Network Consulting has added many features which the professional programmer will find useful. These features are not available from any other sources.

- Hard disk support for Corvus, Tall Grass Technology and others
- 25% more floppy storage, without adding or modifying hardware, retaining compatibility with standard IBM diskettes
- Double sided/double tracking/fast stepping floppy disk drive support
- RAM disk support (uses up to 512k RAM)
- Adaptable system support for adding custom I/O drivers
- Remote Terminal support
- XON/XOFF flow control for serial printers
- Disk write verification
- and more!

Standard p-System features include:

- Program chaining
- Standard I/O redirection (including command files)
- Dynamic program overlays
- Support for asynchronous processes and concurrency primitives in Pascal
- Fast Pascal, Fortran and Basic compilers, all producing universal p-code programs
- A powerful screen oriented editor that runs in both programming and text editing modes
- A Native machine Code Generator that processes your Pascal, Fortran and Basic programs to convert parts of them to Native machine code
- Dynamic runtime binding of separately compile programs and units.
- Turtlegraphics for easy graphics displays
- Print spooler for background printing
- Symbolic debugger
- Extended memory support
- A library of program modules and other utilities

Behind The Lines/Kathleen Burton

The inside story of the product guide

Publisher and Editor-In-Chief David Bunnell assigned a seemingly impossible project to *PC*'s fledgling editorial staff: We were to compile a comprehensive product guide that would list every compatible hardware and software product and support service available for the IBM PC. David had conceived the project some months earlier, wanting to debunk the myth that the PC was unsupported. The fruits of our research would be featured in *PC*'s September 1982 issue, coinciding with the first anniversary of the IBM PC.

Our editorial department was in a state of flux. After putting out two issues, we'd outgrown our offices at 1528 Irving St. We'd gone monthly and we had to move. Within 3 days Managing Editor Susan R. Keller recreated the ed department. She compiled a list of over 1,000 manufacturers' names and coordinated a massive mailing, sending a letter requesting detailed product descriptions and price information about IBM PC-compatible products. Six blocks from the main office, we communicated via telephone. Editorial Assistant Cindy Hamburger, Staff Writer Susan Hurley, Editor Kearney Reitmann, and Production Coordinator Joe Matazzoni joined the project. "Welcome to *PC*" had hardly left our lips when the trickle of incoming press releases swelled to a deluge.

No two press releases were alike. Some were hand carried by executives in town for the day while taxis idled outside. Others arrived on elegant paper with 8x10 photos neatly stapled to the backs. Some were postcard scrawls requiring the sleuthing of a Sherlock Holmes. One manufacturer described his wares as "better than sliced bread and *VisiCalc*."

Seth Novogrodsky joined our staff as technical editor. His job was to wade through the hundreds of press releases, filtering out anything that wasn't PC-compatible. Later in the project Seth read every listing for technical accuracy.

By then the flow of press releases was criss-crossing the office like a ribbons on a maypole. The writers held technical writing rap sessions, encircling Seth's desk with files of manuscript questions.

Photograph: Jeannier Potter

Staffers smile after the deluge.

Lunch was taken in shifts with someone always left behind to answer the insatiable phones. Lunches evolved into chop suey editing sessions. After lunch the office would become as quiet as a university library the day before finals, with copy editors, proofreaders, and writers hunched over their desks, staring with tunnel vision at manuscript paper. By mid-afternoon, while the telephone lines blinked on hold, Cindy fielded calls with the tact and aplomb of a diplomat, and by 3 o'clock the office and its ensuing din once again resembled San Francisco an hour after the 49ers won the Super Bowl.

Manuscripts moved among boxes at every stage of production: one for non-PC-compatible products, one for press releases that required more information, one for copy editing, one for Technical Consultant Doug Cobb, and finally the one earmarked for the typesetter. The entire flow of materials from press release arrival to copy editing took approximately 3 weeks.

The monumental task of creating a style sheet and training proofreaders fell to Copy Editor Evelyn Spire. To keep the copy flowing through proper channels and to ensure that the forthcoming issues remained on schedule, Evelyn managed a free-lance staff of proofreaders.

We laughed, typed, dialed, read, and worked together in one big room. Like an air traffic controller during an LAX rush hour, Susan R. Keller surveyed the process.

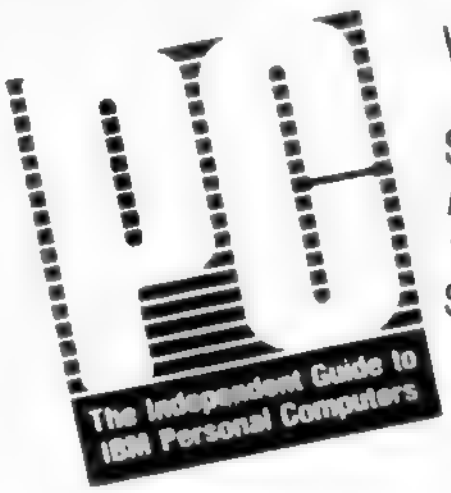

Design Director Brian Dessin Day and his art staff, and Jacqueline Poitier and her production department pulled out all the stops, put in double shifts, and burned the midnight oil to get the issue out. While the rest of San Francisco barbecued, played video games, and went wine tasting in the Napa Valley, we worked steadily against a deadline. Press releases flooded the office at the rate of 50 a day. Manufacturers called to confirm receipt of their press releases. Many needed technical questions answered and missing information filled in.

Standing back for a moment to take an overview, we were tempted to extend the deadline and take the rest of the afternoon off. But the project had acquired its own unstoppable momentum.

The upshot is: Support for the IBM does exist ***/PC.***

MOVING?

If you plan to move, please notify our Subscriber Service in advance. Processing your address change takes 4 to 6 weeks. For the fastest service possible, send your subscriber label along with your new address. Remember, the Post Office will not forward magazines to your new address unless you arrange to pay additional postage in advance. Please help keep your *PC* subscription current. We don't want you to miss a single issue.

THE PERSONAL INVESTOR™

Successful investors spend hours scanning stacks of publications looking for information on their investment interests. **They keep up to the minute and accurate records, analyze their holdings, and keep a sharp eye on stock prices and volumes. *The Personal Investor* software does the time consuming work, while giving you the facts you need to make wise investment decisions.**

The *News/Terminal* automatically connects your computer with the *Dow Jones News/Retrieval Service* or manually to other terminal services to collect financial news and reports.

The *Stock Portfolio* records and reports on stock purchases, commissions, dividends and splits. It also keeps a sales transaction ledger that helps you with your taxes and shows actual profits and losses (after commissions). The portfolio can be manually updated or automatically updated by the *Dow Jones* service.

***Quotations* on the stocks in your portfolio and any stocks you add to that list are collected each time the portfolio is updated by the *Dow Jones* service. These quotes are stored and can be viewed on the monitor screen or printed.**

***The Personal Investor* includes one password to *Dow Jones News/Retrieval Service* and one hour free usage.**

The IBM PC version requires 128K and one disk drive ($145.00). The Apple II version requires 48K and one or two drives ($145.00). *Dow Jones News/Retrieval Service is a trademark of Dow Jones and Company Inc. The Personal Investor* can be purchased from many Computerland and other retail computer stores. For more information or the location of your nearest dealer call or write:

Graphics screen dump for IBM or Epson MX-80 printers with Graftrax option. Becomes a permanently resident part of DOS. Executed by pressing Alt-PrtSc. Make hard copies of any screen. $24.95.
THE SECOND SOURCE, P.O. Box 23567
Washington, D.C. 20024

ANOTHER FULL-SCREEN EDITOR
A full-featured editor with find, change, insert, and delete functions. Moves, copies, and deletes blocks of lines. $29.95.
NOTA BENE SOFTWARE, P.O. Box 497
Glenview, IL 60025

ATTRIBUTE INQUIRY MANAGEMENT (AIM)
A data base inquiry system with fast file inquiry. User-defined data entry screen and reports. Up to 15 definable fields plus 10 user-defined attributes. Inquiry on up to five attributes; 400–800 records per data base. No need to build indexes or perform sorts. Ideal for insurance agents, personnel agencies, real estate agents, stock market, general data base inquiry $200.
COMPUSOFTWARE, INC., 6350 LBJ #271
Dallas, TX 75240 (214) 392-0051

AUTOMATIC SCREEN DESIGN AID (ASDA)
Available for the IBM Personal Computer is a powerful software tool that will end the time-consuming task of programming screen layouts. ASDA allows you to simply type the desired screen layout directly on the CRT including text description, graphic characters, input fields, output fields, or input/output fields, as well as any attribute (high intensity, reverse image, blink, etc.). ASDA then will generate all the basic code to handle the screen. The code generated can be merged, chained to, or used as a skeleton start for a program. Save time and effort as you design professional screens with ASDA. Dealer inquiries invited. ASDA only $99.
SOFTMARK, INC., 446 Colonial Ave.
Layton, UT 84041 (801) 546-2000

BASIC CROSS-REFERENCE PROGRAM
This program will produce an indented listing of a BASIC program. It will also produce a sorted cross-reference listing of all variables, subroutines (GOSUB), program branches (GOTO), BASIC key words, numeric constants, string constants, and remarks. Any combination of options may be selected. The output can be sent to a disk file, console, printer, or RS-232 device. The program is written in assembly code to insure fast execution. Requires: PC-DOS, 64K, one disk drive. Price: $30.
A & J SOFTWARE, 16489 Gladiola Ave.
Rosemount, MN 55068

BASIC INSTRUCTION COURSE
IBM PC BASIC instruction course is designed to make the user knowledgeable and fluent in using the IBM PC. Defines each command and explains how it can be used. $50 tape. $55 disk. Send for catalog.
NATIONAL SOFTWARE, P.O. Box 5187
North Branch, NJ 08816

BASIC PROGRAM CROSS-REFERENCER
An excellent program development and documentation tool for your IBM Personal Computer. Locates all your variable names by line number, sorts them alphabetically, and prints them following the program listing. $30.

Use this pattern program to create your own entry/update program to a random access file. By merely putting your values into data statements in the program, and designing the screen to your specifications, you can create a file management program in a fraction of the normal time. And the final result will be a well-documented program that will also be easy to modify. Manipulate and modify field sizes and locations easily with this programming aid. Send $45 for diskette with source and documentation. Watch this directory for more from . . .
A. ERIC EASTMAN CO., 620 W. 1950 North
Bountiful, UT 84087 (801) 292-0664

BIG ED, DOCUFORM
A powerful, line-oriented text editor; on-line help, block move, copy and delete, copies to/from other files. Forgiving—OOPS recovers accidental deletes, UNDO recovers edits, optional skip on find and replace. Versatile—optional word wrap, user-controlled block scrolling, user-defined tabs, single-character commands. Requires 128K. $125.

An easy to use document formatter with comprehensive manual. Automatic gathering to fit user-defined top, bottom, left, and right margins; file insertion for large documents; full IBM printer capability support including bold-face, 40-, 80-, and 132-character typefaces. User-defined automatic centering, pagination, titles, headers, and date. Requires dual drives and IBM printer. $50. Both BIG ED and DOCUFORM $150.
IRONIC SYSTEMS, INC. 11195 25 Mile Rd.
Utica, MI 48087 (313) 781-4587

BYTE ONE
We have developed a fully integrated accounting package combined with a flexible interactive data base management system, which is user-friendly in a modular structure for the IBM PC. Requires 64K and a two-drive minimum. System and software sale to consultants and end users. Available October with 24-hour customer service.
BYTE ONE, 5252 Thorntree, Irvine, CA 92715

CHEETAH COLORGRAPHICS PACKAGE
Lets you create professional color visuals from scratch with in-house confidentiality in less than 7 minutes. With our Satellite package, one Cheetah center turns all your PCs into private graphics generators. The secret? CENTEC's Presentation Graphics Software linked to a Ramtek color display generator (480 x 1288). Output options include 35mm, 8 x 10 overheads, prints or printouts—all inexpensively and quickly. Slides average less than $5. Write or call for by-return-mail info pack showing how you can expand your IBM Personal Computer into a business graphics system.
Todd Martin, CENTEC CORP.
11260 Roger Bacon Dr.
Reston, VA, 22090 (703) 471-6300

COMPU-LOAN
Unique Amortization System essential to every PC owner. Enhances financial decision-making capacity on business and personal levels. Analyzes regular or irregular loans. Fully documented. Introductory price $50. See ad this issue for details.
BENCHMARK CREATIONS, P.O. Box 31861
Raleigh, NC 27622

COPYPC
Makes backup copies of many protected programs including *VisiCalc*, *EasyWriter*, and *Volkswriter*. Recovers usable data from damaged disks. Available now, $34.95 (CA residents add 6½% sales tax).
NAGY SYSTEMS, 4411 Geary Blvd.
San Francisco, CA 94118
(415) 751-2233

CREDIT MASTER
Prevent overcharges on your credit cards—or multiple submissions of the same charge. Software logs your purchases and compares to your invoice. Excellent documentation. $50.
FOGLE COMPUTING CORP., P.O. Box 5166
Spartanburg, SC 29304 (803) 574-4950

CUSTOM PROGRAMMING
Professional consultant available for custom programming and training on the PC. In-house training tailored to your needs as an executive, programmer or home user.
John J. Springfield, 37 Parker St.
Newton Centre, MA 02159 (617) 969-5183

CUSTOM SCIENTIFIC PROGRAMS
Created for research biologists. I'm a full-time research scientist on a college of medicine faculty. At home, I will write a program to handle data generated by your experiments. For a quotation, send all information to:
Saul Lowitt, Ph.D., 2131 Brookhaven Dr.
Sarasota, FL 33579

DATA BASE DATA STORAGE AND RETRIEVAL SYSTEM
An easy to use data base manager. Number of files/records limited only by disk space. Up to 12 user-defined fields per record. Written in BASIC. Source code and documentation on diskette. $49.95.
RES CONSULTANTS, 2635 Ferry Landing
Sugarland, TX 77478 (713) 980-4395

DATA'EASY
IBM/PC becomes a cash register with: *Retail Sales/Inventory*, $245. Customer, credit, description, on-hand, price lookups. Sales, charges, commissions, tax reports. *Time Billing* $225 like above with rates and hours. Fast and easy. Dealer inquiries requested.
Kip Koehler/DATA CONSULTING GROUP
877 Bounty Dr. #EE203
Foster City, CA 94404 (415) 349-4001

DISKLOOK
Displays everything on your diskettes, including hidden and erased files. Displays every sector, graphically maps space utilization and file location, and more. A valuable tool. $20 plus $5 postage and diskette.
Peter Norton, 1716 Main St., Ste. D
Venice, CA 90291

EXTENDED DIRECTORY AND MONITOR
EDIR lists directories without the annoying problem of names rolling off the top of the screen. Files are listed horizontally and EDIR halts when the screen is full. EDIR has the added benefit of telling the user how much space is used in meaningful terms. The number of allocation units used for each file as well as the total available and remaining is reported.

The MONITOR allows users having the monochromatic and color adapter to switch dynamically between the different displays.
ALTA SYSTEMS, INC., P.O. Box 9802 #181
Austin, TX 78766 (512) 836-7351

Directory

The Independent Guide to IBM Personal Computers

FLOPPY DISK LIBRARIAN
Up to your ears in files and disks? Use your PC to keep an easy-to-update catalog. Program maintains entries for each file and disk with date, size, your comments, and cross-references. PC DOS 64K; 30-day money-back guarantee. Send $39.95, CT residents add sales tax.
LITTLE BIT, 469 Edgewood
New Haven, CT 06511 Source: TCE348

FORTH FOR IBM PERSONAL COMPUTERS
Complete program development systems including interpreter/compiler with virtual memory management, custom screen editor, line editor, assembler, decompiler, and many utilities. Floating point math extensions, cross compilers, and other options also available.
LABORATORY MICROSYSTEMS
4147 Beethoven St., Los Angeles
CA 90066 (213) 306-7412

FSEDITOR
Full screen text editor for IBM PC. 80–254 char lines, block/line copy, move, insert, delete, print, append—no data lost due to power failures, disk full, etc. 64K, one drive, 80-column display, and DOS required. Price $125. Demo disk available.
CYPRESS SOFTWARE, INC., P.O. Box 8715
Coral Springs, FL 33065 (305) 755-1513

FULL-SCREEN DISPLAY INTERFACE (FSDI)
An interactive screen development aid for the serious programmer. It drastically reduces development time for BASIC programs. Generates separate routines, manipulates all screen I/O, all keyboard input, and provides many support functions. $50.

Compress removes all comments from BASIC programs and places as many statements on one line as possible. Can cut program size by 50 percent. *Decompress* performs opposite function. $50.

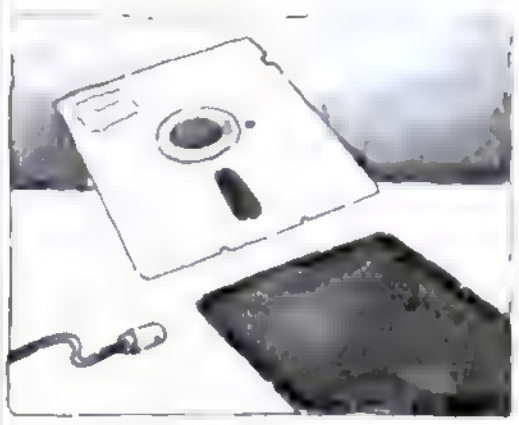

Startrek is a great new version of an old game. $25. Minimum system requirements are IBM PC, 64K, one disk drive.
BYTE ONE, 5252 Thorntree, Irvine, CA 92715

GAMBLER'S DELIGHT
Slot machine—keno—poker—blackjack—craps. Learn to play and win. Authentic reproductions of Las Vegas. Best full-color graphics. Requires 48K, disk, color board. All five for $34.95. Check, Visa, MasterCard.
ALIEN SOFTWARE, 1686 Chattanooga
Claremont, CA 91711

GAMES (VOLUME 1), STARTREK
Contains Matchit, Blackbox, Bomb Run, Blackjack, and Cryptography, $24.95. *Startrek* (Version 1.2) $29.95. Both require 64K, one disk drive, 80x25 monitor, and DOS BASICA Visa and MasterCard. Dealer inquiries invited.
ZETA PRODUCTS, P.O. Box 147
Georgetown, TX 78626 (512) 863-3079

HANGMAN
An educational and fun game for IBM PC. 400-word library at four levels of difficulty. Easy for children to use on their own. Supplied on diskette. Only $19.95.
DEMURO & ASSOC., 8459 NW 3rd St.
Coral Springs, FL 33065.

HELP, STARTREK
You don't have to remember PC-DOS commands. *Help* prompts you for commands and parameters, then passes your response to DOS for execution. Menu-driven with on-line editing. Specify 48K or 64K. $15. *Startrek*—the game. 48K, 80-column monitor only. $24.
Richard C. Waikel, 743 Walnut
Fort Wayne, IN 46804

HIGHCALC
The first real civil engineering package. No wonder IBM showed interest. *Highcalc* is a highway design/construction package for the contractor and engineer, sophisticated cut and fill calculations, interactive graphics, ISAM used for information and handling.
SOFTOV CONSULTANTS, 360 Bloor St. East
#R102, Toronto, Ontario, Canada M4W 2M3

IBM/PC SURVIVOR'S MANUAL
Short, easy-to-read and understand primer for absolute beginner on IBM PC. $11.95 plus $2 shipping.
MAYER ASSOCIATES, 755 New York Ave.
Huntington, NY 11743 (516) 921-7876

INVESTMENT TAX ANALYST
VisiCalc models for estimating Federal income taxes, both before and after a series of investments is made. Determine tax effects for up to 6 years on regular tax, minimum tax, investment interest limitation, investment tax credits, of partnerships, real estate, oil and gas, and other tax shelters. Suitable for individuals and tax planners. 40-page manual, sample data, and diskette. $125.
AIS MICROSYSTEMS
1007 Massachusetts Ave. N.E.
Washington, DC 20002, Source: TCN024

MAIL MANAGER
Add, edit, and delete listings. Sort by name, city, state, zip code, or sort code. Completely interactive program. Two sizes of labels (15/16x3½ and 2$^{15}/_{16}$x4¼). Can be customized to your label. $39.95 check or money order, $59.95 for custom sizes. Send samples.
JD ENTERPRISES, 3009 N. 61
Milwaukee, WI 53210

MAPMAKER/GRAPHICS ILLUSTRATOR
Draw and paint multicolor maps, charts, create quizzes and instruction sequences from the keyboard. No joysticks, no programming required. Very creative. Disk based, 50 picture files per disk. IBM PC, 64K, BASICA, color graphics card, color monitor or RGB. Send $29.95 plus $2 shipping for disk and manual.
ALPYNE SOFTWARE, R.R. 3 Box 184
New Fairfield, CT 06810

MINI-WRITER
Utilize the PC-BASIC editor, or any editor, to build files to be printed by *Mini-Writer*. All features of the IBM Printer (including Graftrax) are supported. Excellent for resumes, letters, reports, etc. Price only $24.95.
UNITED COMPUTER CONSULTANTS INC.
2608 Fox Cir., Walnut Creek, CA 94596

MONEY MAESTRO
Money Maestro is a financial record-keeping package that provides budget tracking and tax reporting. Sole proprietors, freelancers, and families can realize the benefits of automated money management without investing in double-entry accounting software. By tailoring the category list and payee list with a few simple commands, expenses and receipts can be tracked as needed. *Money Maestro* reports totals by category or payee, including monthly and year-to-date budgeted vs. actuals. Data files are stored in BASIC sequential format. *Money Maestro* requires 64K and DOS, and is available for $200.
INNOSYS INCORPORATED
2150 Shattuck Ave., Ste. 901
Berkeley, CA 94704 (415) 843-8122

MORE ENSIGN SOFTWARE
Electronic Disk program modifies PC-DOS 1.10 to create the equivalent of a disk drive in memory. You establish how many 64K blocks of memory are for your system, and the rest of the memory is allocated to your electronic disk. Use COPY to transfer files to and from the electronic disk. Programs "scream" with speed by accessing the electronic disk rather than the physical drives. $69.95.

Cross Reference prints all variables in your program and the line numbers where they are found. The program also cross-references all line referencing statements such as GOTO, GOSUB, IF-THEN-ELSE, etc. You know if a line number is referenced by another part of the program. Will cross-reference either the ASCII or the binary form of your program saved on disk. Listing is to the screen, parallel printer, or serial printer. $24.95.

HP7470 plotter demonstration disk contains seven useful examples: birthday plot, charts, forms, text slides, polar function, Archimedes spiral, logos. $24.95.

Bowling League Statistics maintains all league statistics, membership, handicaps, and team standings. Ideal report system for a league secretary. $99.95.

Bumper Stickers, vinyl, removable. $2 each, "I OWN AN IBM," "IBM PCs EAT APPLES." 2¼-inch buttons to wear, $2 each. "I OWN AN IBM," "ME AND MY PC," "ASK M ABOUT MY BABY."
ENSIGN SOFTWARE, 2312 N. Cole Rd., Ste.
Boise, ID 83704 (208) 378-8086

MR. MATH ARITHMETIC TUTOR
Program generates problems in all four type of arithmetic at ten levels of difficulty. Unique feature allows student to work out all problems directly on the screen—no pencil or paper needed! Complete annotated solution shown if answer is incorrect. Includes 30 page instruction manual. $29.95. Requires one disk drive and 64K.
TERM COMPUTER SERVICES, P.O. Box 725
New Providence, NJ 07974

NEWTEXT1
Available NOW. A comprehensive text processor that functions like IBM's own mainframe text processor—*Script*. Use *Newtext* in conjunction with an editor to produce professional appearing books, manuals, reports, memos, or labels. Unique features include text nesting (to 14 levels), automatic table of contents, and index generation. $125 (manual $25).
DB/DC SOFTWARE ASSOCIATES
P.O. Box 4695, Manchester, NH 03108
(617) 682-6629

ORDER ENTRY SYSTEM
High-performance machine language order entry system for the IBM PC. Utilizes menus and fill in the blank screens. Customer and item information automatically looked up and displayed. System will print purchase orders and sales analysis reports. Automatic calculation of discounts and taxes. Requires PC-DOS. $325.
DISTRIBUTED SOFTWARE SYSTEMS, INC.
P.O. Box 1301, Northbrook, IL 60062
(312) 634-1511

OSBORNE ACCOUNTING SYSTEM
For years the Osborne system has helped turn the personal computer into a serious business tool. The *General Ledger, Accounts Payable & Receivable*, and *Payroll* programs have now been implemented on the IBM PC and are offered for just $99 each. Manuals are available through us, or at computer stores nationwide.
MENTOR COMPUTER SERVICES
P.O. Box 8140, Santa Cruz, CA 95061
(408) 684-1617

PC COMPANION
Pocket-size programming tool newly available for the IBM PC. This handy, quick reference card lists ASCII codes and their values. A must for any programmer. To order send $1. Quantities available.
D² ENTERPRISES, P.O. Box 871
Shalimar, FL 32579 (904) 651-3108

PC CONNECTION
PC Connection is a mail-order firm exclusively concerned with products for IBM Personal Computers. Write or call for a complete list of

the hardware and software products we handle. (9 a.m. to 5 p.m.).
6 Mill St., Marlow, NH 03456
(603) 446-3383

PC DUSTCOVER
Protect your IBM PC from the damaging effects of dust. Not tacky vinyl, our handsome cover is washable, gray corduroy and contour-fitted for the system unit, monitor, and keyboard. $24.95 per cover. NC residents add 4 percent sales tax. Order by phone or mail. Visa and MasterCard welcome. Money-back guarantee.
SYSTEMS SOFTWEAR, P.O. Box 3203
Durham, NC 27705 (919) 477-7784

PC GRAPHICS PRINTING UTILITY
GRAFIT: Copies graphics screen on IBM or Epson MX-80 printer with Graftrax. Beautiful full-screen printout in 106 seconds with single command. Optional aspect ratios, screen width, negative image. Program, instructions, examples on diskette. $49.50.
LADERA ASSOCIATES, 5134 Corning Ave.
Los Angeles, CA 90056 (213) 292-4924

PERSONAL FINANCE
With PFP, *the* personal finance program for the IBM Personal Computer, you can write checks and budgets, and compare them to see how you're doing; obtain information on checks in individual categories; calculate your long-term prospects with a single command, giving you a balance for the end of the month; balance your checkbook efficiently; find the cost of your credit cards and your minimum payments; create an inventory of household valuables; map your financial history through PFP's color charts and graphs; read the clear documentation with plenty of examples. At only $50, PFP is one of the best software values around. Call or write for more information.
DENNIS SOFTWARE SYSTEMS
1510 Eucalyptus Hill Rd., Ste. B.
Santa Barbara, CA 93103 (805) 965-2158

POLYCUBE
Vivid graphics simulate seven levels of complexity in the ultimate cube puzzle. Scramble and unscramble up to 500 moves. For profound difficulty, try the 6x6x6 or 7x7x7 puzzle. Requires 48K, DOS, color. $26.95.
LINEAR AESTHETIC SYSTEMS, P.O. Box 23
W. Cornwall, CT 06796 (203) 672-6360

PORTFOLIO
Generates periodic status reports of investment portfolios. Carries updated evaluating statistics on each security. Computes and summarizes comparative current data on all stocks, taxable and tax-exempt bonds held. Write or call for details or sample printout.
M. CLAY ADAMS, P.O. Box 377
Sea Girt, NJ 08750 (201) 449-2210

A PROPORTIONAL DAISY WHEEL TEXT FORMATTER
Text formatter for daisy wheel proportional spacing printers $100, full-featured screen editor, flexible data base management systems, and business software systems. Professional custom software development available at reasonable rates. Call for details on available software and rates.
FOUNDATION SOFTWARE SYSTEMS
P.O. Box 725, Malibu, CA 90265
(213) 457-4195

PSYCHOLOGICAL SERVICES
MMPI Scoring Program for the IBM PC. Accepts Minnesota Multiphasic Personality Inventory (Form R or Group Form) response data using PC function keys. Patient files are constructed. Printout includes standard graphical MMPI profile with raw, T, and K-corr. scores and T-30/70 demarcations; Welsh Code; Harris-Lingoes, Wiggins Content, and Tryon, Stein & Chu subscales; Grayson critical items; itemwise response summary. Fully optimized for PC video attributes and IBM PC printer. Requires 80-column display. Price: $275.
LIFE SCIENCE ASSOCIATES, 1 Fenimore Rd.
Bayport, NY 11705 (516) 472-2111

SCREENGEN II
Generates IBM BASIC program to display any design keyed onto the screen. Program function keys can be set to any displayable character. Blinking, underline, highlight, and reverse image can be switched anywhere on the screen. Cursor keys, insert, delete, home are all supported. $60 on diskette.
FOGLE COMPUTING CORP.
357 E. Blackstock Rd., P.O. Box 5166
Spartanburg, SC 29304 (803) 574-4950

SERIAL PRINTER SOFTWARE + FORTH
SerPrinSoft ($59.95) makes the perfect marriage between any serial printer and your IBM DOS. XON, XOFF, and hardware handshake protocol supported. Now List, Lprint, and the PrtSc key work like magic with your serial printer. By pressing the F key, the FORTH programming language becomes activated. Available through ComputerLand or direct from International Computers. (Software consulting available.)
INTERNATIONAL COMPUTERS
13048 Olive Blvd., Creve Coeur, MO 63141
(314) 878-8838

SMALL-C FOR THE PC
A Small-C compiler for the PC-DOS environment. Includes compiler and run-time library source. Requires IBM PC ASM or MASM. Price $35 ($36.75 in Texas). MasterCard or Visa accepted.
CAPROCK SYSTEMS, INC., P.O. Box 13814
Arlington, TX 76013 (817) 261-4493

SOFTWARE CATALOG
For the IBM Personal Computer. Looking for IBM PC software? Let us help you. Free IBM PC software catalog. Only one of its kind.
UOI COMPANY, 15445 Ventura Blvd. #1092
Sherman Oaks, CA 91413

SOFTWRITE
A word processor so friendly you probably won't need the excellent documentation provided. Word wrap, line insert, PC-DOS files, variable colors, word search, serial or parallel printers, 32K, plus much more. Credit cards accepted. $49.95.
SOFT BYTE, P.O. Box 16506
Seattle, WA 98116 (206) 937-0961

STOCK OPTIONS ANALYZER
Stock Options Analyzer is a series of programs designed to help investors evaluate a variety of option strategies. These programs calculate the number of days until expiration, annualized return, and breakeven points. Among the strategies analyzed are buying puts and calls, selling covered calls (allowable for Keogh and IRA), straddles, calendar spreads, bull spreads, bear spreads, vertical spreads, and diagonal spreads.
SYSTEMS & SOFTWARE, 220 Redwood Hwy
Mill Valley, CA 94941 (415) 331-5056

STOCK OPTIONS TRADING
Analyze put and call options, profit potential of spread and hedge strategies, covered or uncovered writing. Identify undervalued options. Requires: one disk, 48K. $49 complete.
FINSOFT, 16-06 Quail Ridge Dr.
Plainsboro, NJ 08536

STOCK PORTFOLIO MANAGER
Keep track of your stock portfolio. Completely interactive program lets you add, edit, and delete listings. Printout and total your listings and updates. $49.95. 48K, one or two disk drives. Specify drives.
JD ENTERPRISES, 3009 N. 61
Milwaukee, WI 53210

STOP-LIST
It is no longer necessary to use that awkward two-handed reach for Ctrl and NumLock to suspend operation of your IBM PC. This system enhancement utility program provides a single-key operation of the Pause/Resume function, a slow-motion display option, and automatic operation upon system startup. Compatible with almost all DOS software. Full user reference manual included. Price is $24.95 including shipping and handling.
WILCRO SYSTEMS, P.O. Box 11208
Dallas, TX 75223 (214) 321-7049

SUPER EDITOR
Powerful full-screen text editor for the IBM PC. Block copy, move and delete. Cursor and scrolling controlled from keyboard. Uses IBM-DOS. Send $54.95 for program and documentation on diskette.
FRANK SCHIELE SOFTWARE
1375 Tobias Dr., Chula Vista, CA 92011

SUPER ZAP
Super Zap is a full-screen menu-driven utility that allows access to sectors on a file or disk basis. Any sector may be altered in Hex, Decimal, Octal, or ASCII. Changes are made by positioning the cursor on any byte and entering the new value. Powerful GOTO commands allow rapid sector positioning. Other functions include directory listing, sector printing, and customization options. Best of all, function keys are used exclusively. There are no commands to remember. *Super Zap* supports IBM-DOS and all monitors. Call or write for information on other utilities.
ALTA SYSTEMS, P.O. Box 9802, Ste. 181
Austin, TX 78766 (512) 836-7351

SURVTAB SURVEY ANALYSIS SOFTWARE
Easy to use system for entering, editing, analyzing data from survey questionnaires. Frequency tabulations, cross-tabulations, and "banner" tables. *Survtab* for IBM PC: $180. Survey consulting services available.
STATISTICAL COMPUTING CONSULTANTS
9025 Andromeda Dr., Burke, VA 22015

TAXCALC (1982 VERSION)
Planning *VisiCalc* template that runs on either the Apple II Plus or the IBM PC. The TRS-80 Model II version is coming soon. The program automatically computes most limitations (i.e., capital loss limitation, medical and contribution limitations, etc.); also schedules D and G, minimum tax and alternative minimum tax. Input follows the actual IRS forms. Tax results of different alternatives are displayed on your monitor as you play "what ifs." A one-time cost is all you pay. The program will cost $95. Updates will be $50 for years 1983 and 1984. *VisiCalc* is a trademark of VisiCorp.
HARRY S. CHUD, CPA, 4210 W. Vickery
Fort Worth, TX 76107 (817) 738-3122

ULTIMENU
DOS is even easier with our full-screen menu system. Execute any of up to 36 programs or batch files with a single keystroke (plus Enter). Eliminates the need to memorize utilities or type lengthy character strings. Fast. Easy to customize. $19.95. (Similar menu system for BASIC add $15.)
DB/DC SOFTWARE ASSOCIATES
P.O. Box 4695, Manchester, NH 03103
(617) 682-6629

UNERASE
Recovers erased files, even if partly overwritten. Never lose a file again! ($20 plus $5 postage and diskette.)
Peter Norton, 1716 Main St., Ste. D
Venice, CA 90291

WANTED: MICROCOMPUTER SOFTWARE
Have you recently developed high-quality microcomputer software only to find out how frustrating and expensive it is to market on a national basis? Execuware hears you and can help. Execuware is a division of Aeronca, Inc., an American Stock Exchange company. We pay substantial royalty fees, have an existing, nationwide network of distribution, and the advertising support to make your product successful. For more information write or call Execuware today.
EXECUWARE, 4530 Park Rd., Ste. 348
Charlotte, NC 28209 (704) 525-9881

ELIZA IS HERE!

AT LAST! A FULL IMPLEMENTATION of the original ELIZA program is now available to run on your IBM Personal Computer!

Created at MIT in 1966, ELIZA has become the world's most celebrated artificial intelligence demonstration program. ELIZA turns your computer into a non-directive psychotherapist with whom you can converse much as you would with a live therapist. She analyzes each statement as you type it in and then responds with her own comment or question. Response time is virtually instantaneous, and her remarks are often amazingly appropriate!

Designed to run on a large mainframe, ELIZA has never before been available to personal computer users except in greatly stripped down versions lacking the sophistication which made the original program so fascinating.

Now, our new IBM PC version possessing the **FULL** power and range of expression of the original is being offered at the introductory price of only $25. And if you want to find out how she does it (or teach her to do more), you can buy the complete IBM Disk BASIC **SOURCE PROGRAM** for only $20 additional.

Order your copy of ELIZA today and you'll never again wonder how to respond when you hear someone say, "Okay, let's see what this computer of yours can actually do!"

AVAILABLE ON DISK IN TWO VERSIONS FOR THE PC

BUSINESS DATA ORGANIZATION SYSTEMS

for IBM PCs and other fine Micros

Simple and elegant answers to complex business questions!

SOLOMON™—The Wise Business Decision! Accounting based upon MDBS™, a network database manager, now available on the IBM P.C. with hard disk. All functions including job costing and budgeting.

PMS-II™—Project Management Systems! For managing any complex project — R&D, construction, business planning. 1,000+ events on critical path, bar charts, other reports. Team up with RMS-II™ for capacity planning and load leveling.

Additional answers coming soon.

THE PC MONEY MAN®

Exclusively for the IBM Personal Computer

The financial manager featuring full function management tools for the HOME and BUSINESS

- Checking account management
- Income and expense analysis
- Budget planning and control
- Summaries for tax analysis
- Complete transaction capability
- Plain English - no cryptic codes
- Powerful query language...inquire by date, account, category etc., in any order.
- State-of-the-art extended hashing data base technology for fast query access and disk utilization
- Structured programming in Pascal and assembler for maximum reliability and speed

128 K, 2 drives

PC UTILITIES

SUPER ZAP

A menu driven utility that allows *Full-Screen* access to *every sector* on disk. Sectors may be accessed by a file or absolute sector number. Data is displayed in *Ascii*, and in *Hexadecimal, Decimal,* or *Octal*. Powerful 'GOTO' commands move you rapidly through files or disk. Configuration options provides user customization. Best of all there are *No* difficult commands to remember; function keys are used exclusively. **$45.00**

PC TOOLBOX

A collection of utilities, all with completed documentation.

- Extended directory — formats file names horizontally, display halts when screen is full. Space Information about files on disk given in DOS allocation units.
- Monitor — Allows dynamic switching between monochromatic and color adapter monitors.
- List — Outputs contents of file directly to printer with forms, tab and printer controls.
- Clock — Continuous display of time on monitor screen.
- File Utility — Recovers deleted files. Removes and assigns "hidden" attributes to selected file. **$35.00**

All programs support standard IBM PC configurations.

Beginner's Guide To Strings

nhancements to PC BASIC make using strings easy.

ne of the nicer features of the BASIC language is its ability to manipulate characters as well as mbers. Character data is needed to process names, telephone numbers, alphanumeric part numbers, and so on. Groups of aracter data of this kind are called trings." The string handling ability of PC ASIC is especially nice, thanks to enncements that are not part of the standrd BASIC language. Most of these enncements are in the form of string nctions, which receive strings as their guments or return string results.

Strings can take one of two forms: They n be string constants or string variables. ring constants are most often found in RINT statements.

```
INT "One for the money,"
```

he string constant is the data enclosed by uotation marks. Strings of this type are ot usually manipulated by programs; nce the string never changes, manipulaon of the string will always yield the me result.

String variables, however, frequently ssume unknown values. When a program rompts you to enter a name, for example, ere is no way for the program to know hat name will be entered or whether the alue entered is actually a name. Writing rograms that can cope with such unhowns is one of the toughest programing chores.

String variables are identified by a dolr-sign character ($) following the varible name. Following are some valid ring variable names.

```
TRING$
E$
AME$
ONGSTRINGVARIABLENAME$
```

Two Plus Two Is Not Four

The most elementary string operation is string concatenation. Concatenation is the process of connecting two or more strings to form one long string. Although the same symbol is used for both numeric addition and string concatenation, the results are not the same. The following program accepts strings from the keyboard and continuously concatenates them.

```
10 A$="" ' A$ IS EMPTY
20 INPUT "Type a string:";X$
30 A$=A$+X$
40 PRINT A$
50 GOTO 20
```

Measuring Up

One frequently used string function is the LEN function, which returns the number of characters in a string. LEN requires only one argument—the string to be measured. The following program will prompt you to enter a string, and then tell you how many characters you entered.

```
10 INPUT "Enter a string:";ANS$
20 PRINT "You entered";LEN(ANS$);
   "characters."
```

Taking a String Apart

There are three PC BASIC string functions that extract a specified number of characters from a string. These functions are LEFT$, MID$, and RIGHT$. Actually, the MID$ function can be made to perform the jobs of both LEFT$ and RIGHT$, but the other two functions are provided to simplify the programmer's job.

The MID$ function has three parameters. The first parameter is the string from which you wish to extract characters. The second parameter is a number that indicates the position of the first character you wish to extract, and the third parameter is the number of characters to extract. In the following program the word "for" will be extracted from the argument A$ and displayed on the screen.

```
10 A$="One for the money,"
20 PRINT MID$(A$,5,3)
```

Note that when part of a string is extracted, the string itself remains unaffected. In this example program the value of A$ will always be "One for the money,". The MID$ function returns a result that is the same as the characters that stand in the indicated position in the argument.

LEFT$ and RIGHT$ require only two parameters. The first parameter is the string from which to extract characters. The second is the number of characters to extract. The LEFT$ function returns the

specified number of characters starting from the left side of the string, and RIGHT$ returns characters from the end of the string. The following program displays the first and the last five characters of the argument string CD$.

```
10 CD$ = "You can fool some of the people"
20 PRINT LEFT$(CD$,5)
30 PRINT RIGHT$(CD$,5)
```

The MID$ function is often used to examine a string character by character. The following program will search through a string you enter and tell you how many times the letter "E" occurs.

```
10 INPUT "Enter a string:";Z$
20 COUNT=0
30 FOR CHAR=1 TO LEN(Z$) ' EXAMINE EACH
CHARACTER
40 IF MID$(Z$,CHAR,1)="E" THEN 60 '
UPPERCASE E?
50 IF MID$(Z$,CHAR,1)<>"e" THEN 70 '
LOWERCASE?
60 COUNT = COUNT + 1
70 NEXT CHAR
80 PRINT "You typed the letter E";COUNT;
"times."
```

Strings to Numbers, Numbers to Strings

Although a string is composed of characters, they can still be numeric digits. Numbers stored as string data are not the same as numbers stored as numeric data. Before a number stored as a string can be used for a numeric calculation, it must be converted into numeric data. The conversion is done by the VAL function.

Following is a program that prompts you to enter a number or press [ENTER] to end the program. You could not stop the program by pressing [ENTER] if the INPUT statement used a numeric variable.

```
10 INPUT "Enter a number. Press ENTER to exit;";
ST$
20 IF LEN(ST$)=0 THEN 99
30 PRINT VAL(ST$)*10
40 GOTO 10
99 END
```

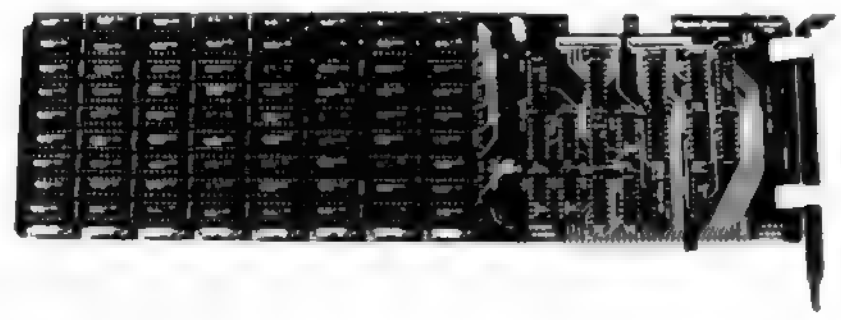

The STR$ function is the reverse of the VAL function; it converts a numeric value into a string. The following example uses the STR$ function to put the results of a calculation into a string.

```
10 INPUT "Enter a number:";R
20 X=R^2*3.1415926
30 ANS$="The answer is: "+STR$(X)+"."
```

UltraRAM™

MEMORY BOARD

FOR THE IBM PERSONAL COMPUTER

One Half Megabyte Memory Board

UltraRAM from Daystar Systems provides 128K to 512K Bytes of Parity Detected memory (that's more than 3 disk drives of available storage) on a single card. This capability frees up additional slots for other peripheral boards. **UltraRAM** is switch addressable anywhere in the PC's address space, thus if you need more, two **UltraRAM**'s can reside in the same machine. **UltraRAM**'s Parity Control circuitry features parity disable allowing a "no-latch" function for parity errors (usually due to memory soft-errors). Optionally available is our memory disk emulator, **UltraFAST**, which dramatically increases the speed with which emulated file accesses occur. **UltraRAM** is a high quality product designed to industrial standards for maximum reliability and versatility. It is plug-compatible with IBM memory expansion boards and conforms to the IBM expansion board dimensional format. **UltraRAM** is available at Computerland and other fine computer stores.

Other Daystar Systems Products for the IBM Personal Computer

UltraWRAP™ – a prototyping card
UltraEXTEND™ – an extender card
UltraROM™ – a ROM/PROM/RAM card
UltraMEM™ – an Error Correcting memory card

Announcing The System Solution

Integrating Software and Hardware with IBM PC Equivalent Documentation

***SOFTWARE* (All software requires 64K, PC-DOS, and 1 Disk Drive)**

- **PC/FORMAT**—A highly interactive screen formatter written in 8086 assembly language, PC/FORMAT includes a screen format generator, FORMGEN, for fast creation and testing of screen layouts. FORMAT, the runtime component, is linked to your application and provides for all keyboard and screen I/O including data entry-type editing. Supported by BASIC, PASCAL, FORTRAN, and COBOL. Price $99.00. Manual only - $30.00.
- **PC/HASP**—A HASP/RJE Workstation emulator supporting one console and dynamically reassignable reader, printer, and punch streams to include the parallel printer port, up to two RS232 Serial I/O ports, and user-defined disk files. Supports line printers with Data Products interface. Available 9/82.

I-Queue™

...the intelligent buffer that frees your IBM Personal Computer from the time-consuming printing function.

I-Queue accepts data at processor speed (over 4000 characters per second) and sends it to the printer* at whatever speed the printer can accept.

I-Queue can store 16K of RAM, which is approximately 7 pages of average printout (optionally expandable to 65K for storage of 28 average pages). Standard features include complete pagination and formatting capabilities, a reprint buffer, a clock/calendar and many other design enhancements usually found only in sophisticated word processors.

Available direct or from participating PC dealers. Distributor and dealer inquiries invited. For new brochure, write, or call our 800 number.

*Fully compatible with IBM printer and all Centronics interface printers.

A number must be converted to a string before it can become part of another string.

Secret Numbers

Every character on the PC has a unique internal number. These numbers are not unique to the PC, however. They are the

WHEN USED with the ASC function, the CHR$ function can simplify many programming tasks.

same for almost every computer. These numbers are called ASCII codes. ASCII is an acronym for American Standard Code for Information Interchange. The ASC function converts a character into its ASCII code value. The following program accepts a string you type on the keyboard and displays the ASCII code for each character you enter.

```
10 INPUT "Enter a string:";S$
20 FOR J=1 to LEN(S$)
30 PRINT ASC(MID$(S$,J,1));
40 NEXT J
```

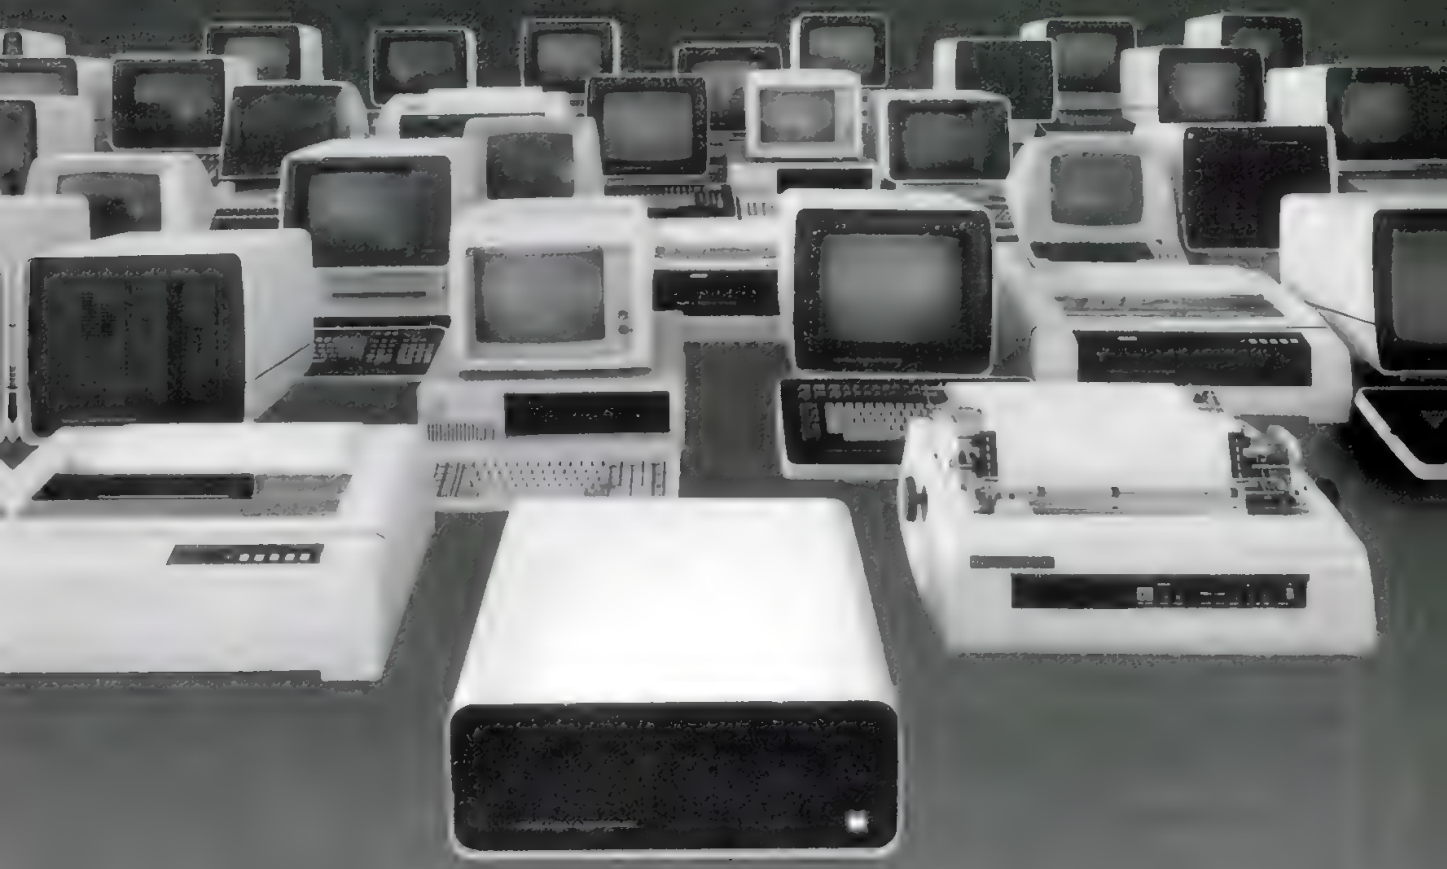

ASCII codes for all characters on the PC are listed in Appendix G of the BASIC manual.

The CHR$ function is the opposite of the ASC function. The CHR$ function allows you to put special characters into programs (those that cannot be typed on the keyboard), and it is especially useful for sending control characters to printers and other devices. When used with the ASC function, the CHR$ function can simplify many programming tasks. Following is a program that converts characters in the input string into uppercase.

```
10 UC$=""
20 INPUT "Enter a string:";LC$
30 FOR C=1 TO LEN(LC$)
40 X=ASC(MID$(LC$,C,1))
50 IF X>96 AND X<123 THEN X=X-32
60 UC$=UC$+CHR$(X)
70 NEXT C
80 PRINT UC$
```

/PC

NOVELL'S NOLAN
THE ULTIMATE PERSPECTIVE IN NETWORKS

Plenty of manufacturers have LAN's on their drawing boards.

At Novell we approached the network problem with a broad vision which led to a new perspective. That perspective, in short, couples a 16/32 bit processor, memory, and a sophisticated network operating system.

We call the system **NOLAN.**

At its heart is Motorola's MC68000 micro processor, 512 K-Bytes random access memory, and a highly tuned management software system, designed to maximize through-put to network users. With that perspective **NOLAN** gives you a true on-line, real-time, multi-user system with less than 2:1 degradation between 1 and 24 compiles.

NOLAN is capable of concurrently supporting 24 work stations while maintaining a sophisticated file sharing/locking system, and simultaneously spooling up to five printers.

IBM personal computer and CP/M micro computer nodes can be intermixed at will on the **NOLAN** network while maintaining a common file or data base.

If you're caught in our information-based society trying to manage more and more information, then **NOLAN's** perspective is your answer.

By design, **NOLAN** delivers main-frame/mini-performance while keeping hardware one-third to one-half the cost.

That's perspective!

Give us a call when you're ready to change the way you look at things: 800-453-1267.

NOW! **IBM Selectric®-Quality Printing from your IBM Personal Computer!**

IBM®

Why settle for less? Here's a top-quality IBM electronic typewriter equipped with the famous IPEX ELF interface, ready to plug into your IBM Personal Computer to print letters, reports, or data. No special software is needed. And you can use it as a stand-alone correcting typewriter anytime you wish. This amazing machine has dual pitch plus proportional-spacing, and electronically aligns numbers, indents, centers, tabs, and underscores.

Every typewriter has been detailed to sparkling like-new condition in the IBM factory and is eligible for service or maintenance agreement from any IBM service location in the U.S.

The perfect all-around printer system for your IBM Personal Computer is priced at only $1695. (Computer cable $30 additional.)

P.S. If you already own an IBM SELECTRIC or IBM Electronic Typewriter, you can easily add the IPEX ELF interface unit to work with most popular computers.

To order, or for more information, call or write, today.

FABS/PC™

THE KEY TO

HIGH SPEED DATA ACCESS:

*** MAINTENANCE FREE BTREE STRUCTURE ***

FOR DOS & BASIC ON THE IBM PERSONAL COMPUTER

PRICE $150.00

AUTOSORT

is an 8088 assembly language sort/merge/select subroutine.

Sorts on 10 keys; Compares up to 4 independent select keys; Rapid with large data files; Has subroutine to merge two files into one; Sorts files as large as DOS & workspace allows; Has prompted disk change capability.

OTHER PRODUCTS:

FABS, FABS-II, ULTRASORT-II, and AUTOSORT FOR CP/M SYSTEMS.

Above CP/M products for use on the IBM PC with the 'BABY BLUE BOARD'

All products are easily incorporated by novice programmers.

Features:

- **Versatile, fast, easy, to use assembly lang. multi-path BTREE**
- **Loads as resident to DOS for easy, continuous access by BASIC**
- **Random search time approx. 1 sec.; sequential approx. ¼ sec.**
- **Duplicate keys permitted; search returns the first duplicate**
- **Insert/Delete multiple keys with a single command string**
- **Deleted data records automatically reclaimed by later inserts**
- **Generic search returns the first occurrence of a partial key**
- **FABS directs all access to the data file with record pointers**
- **Allows ASCII keys (► 50 bytes), integer keys use only 2 bytes**
- **Up to 32767 records (limited by BASIC, FABS supports 65535)**
- **Excellent error handling; errors/warnings returned to basic**

COMMANDS:

Educational Programs for the IBM Personal Computer

BBasic
Learn how to program your IBM Personal Computer through a friendly and constantly interactive software.

ABasic
A complement to BBASIC that includes advanced lessons on file management and string manipulation.

The Keyboard
Learn the sophisticated functions of your IBM Personal Computer keyboard through an amazing, illustrated program.

Bridge Tutor
1) Designed for beginners and experts alike; Bridge Tutor gives immediate, detailed feedback on your bid or play.
2) It has full color graphics that teach you rules and strategy for social to tournament play.
3) It generates practice hands randomly. You never get the same hand twice so you can practice over and over.

T.E.L.
Who says learning can't be fun? With T.E.L., you can be the teacher and learn at the same time. And you can create an unlimited number of subjects—in fact, anything that interests you from anatomy to zoology.

Add a GENIE to Your Computer

Genie Removable Hard Disks

FEATURES:

- **10 Megabytes of on-line storage**
- **Looks like two 5 MB drives**
- **File sizes to 5 Megabytes**
- **Power-on self-test**
- **Easy back-ups in minutes**
- **System expandable to eight drives**
- **Built-in error detection and correction**
- **One year warranty**

GENIE CARTRIDGE DRIVE The Genie Cartridge Drive is a new revolutionary 10 Megabyte Hard Disk for the IBM Personal Computer that includes a 5 Megabyte Removable Cartridge. The cartridge drive system simply plugs into any slot in the IBM PC* and is 100% IBM DOS* compatible. Each 5 MB cartridge holds more data than over 30 standard double-density floppy disks.

Genie Fixed Drives

5, 10, 15, and 20 Megabyte fixed Winchester Drives.
— Same great features as our cartridge drives.

ONLY $3995

Also Genie 64K Buffered Printer Adapters

GENIE PARALLEL PRINT SPOOLER The Genie Parallel Print Spooler is a uniquely designed Printer Interface Card that can buffer up to 64,000 characters of printer output. This means no more wasted time while you are waiting around for your printer to finish a listing. This board features our Proprietary Datacram Process for data compression which allows up to 20% more efficient use of buffer storage area. The Genie Print Spooler is fully software compatible, and can be used anywhere an IBM Parellel Printer Adapter can be used. No software patches required.

Price $349.00

GENIE SERIAL PRINT SPOOLER The Genie Serial Print Spooler is similar to the Parallel Print Spooler above, except that it has been designed specifically to work with most serial printers, buffering up to 40 minutes of output at 30 characters per second. This board looks like a Parallel Card to the IBM, and is compatible with all standard software, including Wordstar**.

Price $349.00

*IBM DOS is a Registered Trademark of IBM
**Wordstar is a Registered Trademark of Micropro

Software for the IBM PC and the Apple II

With spoken instructions, our tested software doesn't try your patience.

EASY Every Alpha software package contains spoken instructions on cassette to guide you through the program on the disk. You get professional software that a novice can use.

PROVEN Our business software for the IBM PC has been used since 1979 on the Apple. Thousands of people agree that our versatile **Data Base Manager** and **Mailing List** programs are effective time- and money-saving devices.

INNOVATIVE **Question** is a fun game based on artificial intelligence. It tries to guess what city, person or animal you're thinking of, and gets smarter as you play. You can even teach it new topics.

Type Faces lets your dot matrix printer generate 15 different kinds of large lettering.

With **The Apple-IBM Connection**, you'll be able to transfer files from the Apple II to the IBM and vice versa. Your VisiCalc work can be transferred without retyping or errors. Requires no technical knowledge. The software does all the work for you.

Alpha software products available at participating **ComputerLands**.

15 type styles for the IBM PC and Apple II

With this program your dot matrix printer can output 15 large typefaces.

Type Faces generates distinctive presentations, fancy lettering, invitations, easy to read output, and over 100 symbols. Reduced printout on a copier gives you letter quality text... an inexpensive typesetter.

Type Faces comes with its own simple text editor and is compatible with most word processors.

Edix™ + Wordix™ isn't the most popular, most easily learned or least expensive word processor. It's only the best.

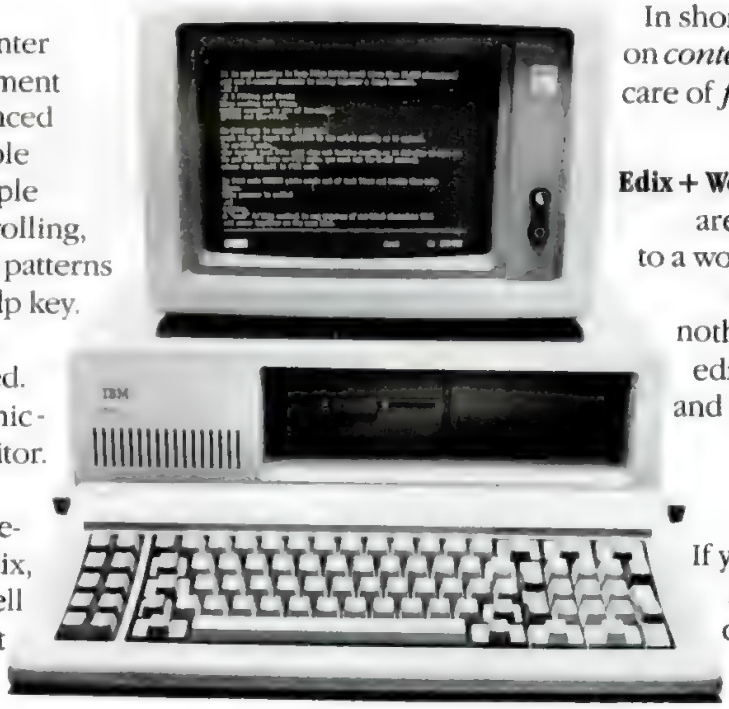

Editor + Formatter= Word Processor
Most word processors try to do too much at once: text entering and correcting, line filling, pagination and printing. Unfortunately, they don't have time to do anything really well. Edix + Wordix divides word processing into *editing* and *formatting*. So it does things very well indeed.

Edix. You use Edix to enter and correct your document (or program). Its advanced features include multiple screen windows, multiple buffers, side-to-side scrolling, block moves, powerful patterns for searching, and a help key. There's even an online course to get you started. It's the world's finest microcomputer screen editor.

Wordix. Once you've prepared your text with Edix, imbedded commands tell Wordix how to format it into lines, paragraphs, pages and sections. Wordix automatically hyphenates, positions footnotes, numbers sections and builds a table-of-contents. It can incorporate information from data files into your document, so you can use your mailing list to generate form letters. It lets you predefine customized formats for letters, memos, reports and books.

In short, you can concentrate on *content* while Wordix takes care of *form*.

Edix + Wordix. Your documents are too important to trust to a word processor that does everything at once and nothing well. You need an editor that knows editing, and a formatter that knows formatting. You need Edix + Wordix.

If you would like to know more, call or write for our detailed brochure.

IBM-PC DATABASE MANAGEMENT RMS
RECORD MANAGEMENT SYSTEM

- USER DEFINED RECORD FORMAT VIA DATA DICTIONARY
- SCREEN ORIENTED, FORM FILL OUT TYPE OF ACCESS
- OPTIONAL TWO LEVEL RECORD HIERARCHY
- ALL FILES IN ASCII TEXT FORMAT, BASIC COMPATIBLE
- DIRECT ACCESS BY KEY FIELD, MULTIPLE INDEX FILES
- EXTENSIVE DOCUMENTATION, SAMPLE APPLICATION
- VERSATILE, PROFESSIONAL QUALITY REPORT WRITER
- BUILT-IN SORT / MERGE
- EASY TO USE, DOS AND BASIC COMPATIBLE
- UP TO 65,000 RECORDS, 1K/50 FIELDS EACH

RMS is a complete DATABASE MANAGEMENT package for the IBM computer. It is made up of five machine language programs that make up the most powerful business programming tool available for the PC. It can be used by the relative novice, to implement an incredible variety of information storage and retrieval applications, without any programming. However, the programmer can use RMS as part of the solution to a larger problem, saving many hours of unnecessary program development time. RMS can be used to handle data input, editing, validation, on-line retrieval, sorting and printed reports. Custom data manipulation can be filled in by the user's BASIC programs. Minimum system: 48K, one disk, DOS.

Our software package is better than most of theirs put together.

Instead of buying four or five different programs, learning how to operate this one and how to link up with that one, Final Copy™ does it all for you.

There's no need to buy separate text formatter, report generator, forms entry and calculator programs. Final Copy™ does it all in one easy to learn package. Word processing, data entry, data management, business calculating and remote communications make Final Copy™ the only software package you will need.

Final Copy™ is portable. It's written in UCSD Pascal, so it runs on the IBM PC, Apple III, Xerox 820, TRS 80 Model II, and all TI's.

EASY TO LEARN. Powerful as it is, you can learn Final Copy™ fast. It helps teach itself with single key stroke commands, menu prompting at every point and on-line help files.

PROVEN. Final Copy™ has been successfully used by many major corporations since 1979, on the full TI line in single and multi-user systems.

AVAILABLE NOW. For more information, write "Final Copy"™ on the back of your business card and send it to us. Ticom Systems, Inc., 13470 Washington Blvd., Marina del Rey, Ca. 90291. Or call (213) 827-7118. Distributor and dealer inquiries are invited.

NEC's NEW ADVANCED PERSONAL COMPUTER GIVES CHARLIE THE BLUES.

If you're a businessman shopping for a personal computer, take a look at NEC. Our APC™ Advanced Personal Computer has better price/performance than any personal computer on the market.

It's a totally solutions-oriented system, supporting both CP/M-86™ and MS-DOS,™ developed to solve business problems in the simplest, most cost-effective way possible.

Our business software has been optimized to take advantage of the APC's unique hardware features. That makes system operation faster and easier.

Our software includes a full set of general accounting packages, word processing, mailing list management, business planning, database management, and communications. And we're readying many more.

We back our software with a unique unconditional guarantee. It will work or you get your money back.

Our APC comes with more information storage capacity than any system in its price range.

Our high-resolution color graphics run circles, arcs and lines around everybody else. The APC's screen images—lines, characters, pictures—are unprecedented in their clarity.

See for yourself how much better we are. The solutions-oriented Advanced Personal Computer from NEC. Return the coupon to NEC Information Systems, Inc., 5 Militia Drive, Lexington, MA 02173.

Note: CP/M and CP/M 86 are trademarks of Digital Research, Inc.

Why pay hundreds more for a four (as in QUAD) function IBM PC board?

This may be the only board you need to expand your IBM personal computer. Standard with three functions; memory up to 256K, clock/calendar with battery back-up, and asynchronous serial (RS232C) port, (COM1 or COM2). On the same board a parallel printer port can be added for an extra $50. All the options you may ever need if you have the color graphics adapter. If you have the monochrome/printer adapter, you can save the $50, unless you plan to run two parallel interface printers. Or you may add this option later if needed.

No corner cutting here

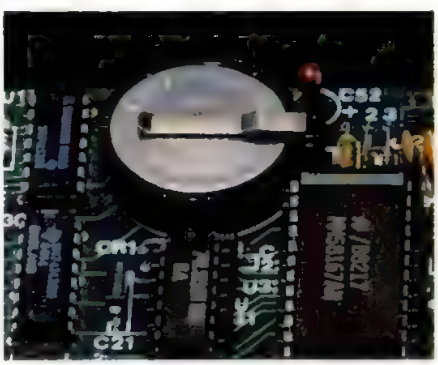

You may think that since this board costs so much less there has to be a catch. The catch is you have to put the board in yourself, and set a switch to tell your computer the board is there. It's all done in less than ten minutes. Our clear instructions with illustrations make it a snap. The board is a four layer design with rows of nine memory chips for full parity checking. Each board is solder masked, silk screened, and has gold plated contacts. The memory chip locations are all socketed. All components are premium grade, meet IBM performance specifications, and are burned in and tested prior to shipment. The highly rated design is well proven with several thousand boards in the field providing reliable service.

How much memory?

We offer the board with 64K, 128K, 192K, or 256K of memory. Buy only the memory you need or your budget allows. Quite frankly we don't think you can put your own untested chips on as cheaply, and ours are prime #1 chips, burned in , tested, and warrantied for one year. We have found the 192K board to be the most popular because coupled with the 64K in your computer this gives you a full 256K of memory. The board can hold up to 256K (a total of 320K with the 64K in the PC).

Clock/calendar & clip-on battery

That round thing in the picture is a lithium battery. It may last as long as five years since it is only needed when the computer is turned off. Note the holder it is in. The under $4.00 battery just slips out and a new one slips in. No soldering required as with some other clock boards. The clock/calendar sets the time and date when your computer is turned on. This is done with a program which we send you on a diskette. The clock on the board is set using the IBM DOS commands TIME and DATE.

The offer you shouldn't refuse

Our spreadsheet offering, SUPERCALC, is the best one we have seen for the PC. It has all the features of the popular VISICALC program, with some extra features that make it much more useful and convenient. SUPERCALC will address up to 512K of memory and if you order it with your board we will sell it to you for the unheard of price of $176. This offer is only available at the time you order your board.

When you buy from us?

Service and support are the keys when you buy any product. How many mail order companies take the trouble to write their own installation instructions? How many include schematics with their boards? How many offer a diagnostic program for just $10 that let's you check out your board so you don't send it for service until you know there really is a problem? Who else charges no extra for credit cards, COD fees, or shipping charges? How many will face our acid test?

The acid test

Qubie Distributing gives you our 30 day satisfaction guarantee on all board purchases. If you are not completely satisfied we will return the entire cost of your purchase as well as pay the postage to return it. If you can get one of our competitors to give you the same guarantee, buy any other board you think compares and return the one you don't like. We're not worried because we know which one you'll keep. On top of this we give you a one year parts and labor warranty, and a one year extended warranty for $50. Warranty repairs are done in 48 hours or we will send you a new board.

You don't have to wait

Just send the following to the address below:

Name & street address.
Memory size.
Optional parallel port?
SUPERCALC & cables you want.
Your daytime telephone number.
A check or money order.

Visa & MasterCard buyers may substitute their credit card number and expiration date for the check. Or call us and save the trip to the mailbox.

TO ORDER BY PHONE:

Outside California **(800) 421-7103**

Reliable Business Software

DATASMITH software requires no previous computer experience, so it can be used effectively by your present office staff. The menu-driven systems feature extensive error detection and correction facilities, so they are "friendly" to the user.

- GENERAL LEDGER. Everything you need to keep the books. Features easy-to-use data entry and error correction, trial balance, fast post, and a variety of comprehensive reports. Automatic error detection keeps the books in balance. Writes checks and makes journal entries in one operation.
- PAYROLL. A very flexible system that adapts to a wide variety of needs. Features Federal, state, and local tax calculations, EI credit, and special pay and deduction amounts. Prints all necessary reports, paychecks, and W-2 forms.
- DATA MANAGER. A powerful generalized data management system that lets you define, enter, update, sort, select, and print reports from a database of your own design. Applicable to almost any job where records must be kept, this system can replace literally hundreds of programs.

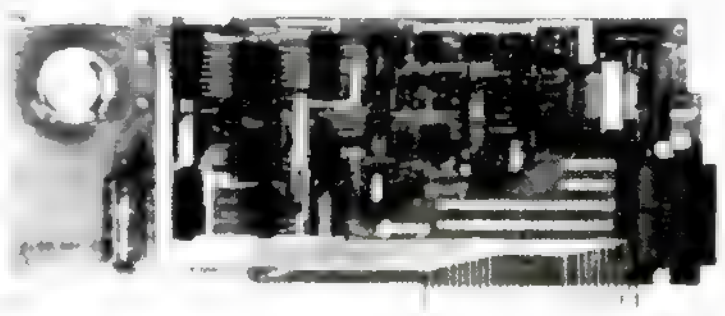

Put your computer to work with these sophisticated systems now. Programs are available for 48K or larger two-disk systems in your choice of code for Microsoft BASIC-80® under CP/M®, IBM® Personal Computer BASIC, or Micropolis® BASIC.

IBM PC Personal Financial Systems

Like having your private accountant on call. Personal Systems package looks after your personal finances:

- Household Budget with 13 major expense categories and user defined itemization.
- Checkbook with automatic payment withdrawals by date.
- Passbook with compounded savings projections.
- Amortization with mortgage and consumer loan scheduling.

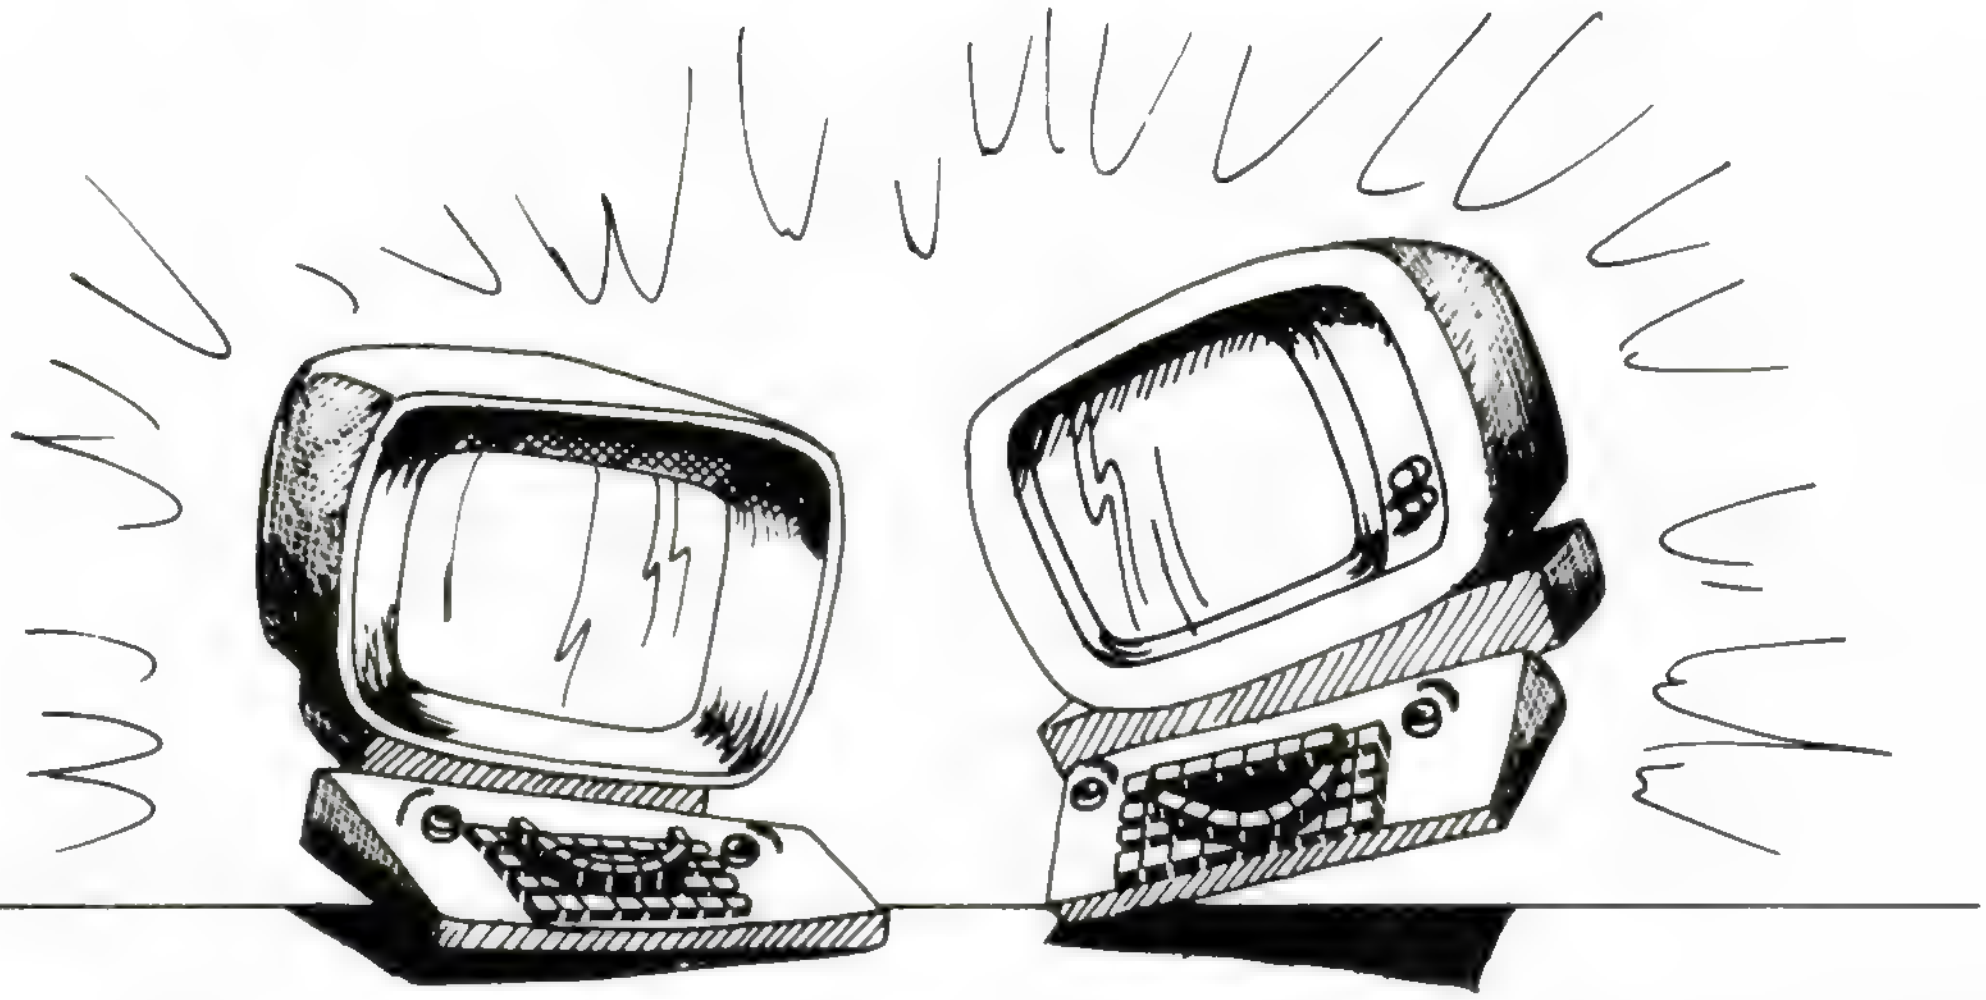

In addition to professional and educational uses, your Personal Computer can be keeping your personal finances in order.

User friendly programs in Basic. Diskette and Manual only $100. Send check or money order. Allow up to three weeks for delivery.

DESIGN DATA SYSTEMS

5270 N. Park Place N.E.
Cedar Rapids, IA 52402

"WHAT DID ONE COMPUTER SAY TO THE OTHER COMPUTER?

NOT A THING... UNTIL NOW.

Until The Communicator/ Text Editor from EDS' Smartools.™

With the C/TE, the IBM® Personal Computer can talk to virtually any other computer—not just to other IBM's, but to any micro-, mini-, or mainframe with dial-up capability. And that includes APPLE® II, TSO™, VM/CMS®, and word processors.

Transfers VisiCalc® files

Are your VisiCalc files bound to a less powerful computer? The C/TE will transfer them to the Personal Computer intact, eliminating the need for manual re-entry. Less time, less expense. No mistakes. The same can be done with text files or any source programs in ASCII format.

With the Disk-I/O functions, you can receive transmit data directly to/from disk, completely bypassing memory. When receiving directly to memory, automatic spillover files catch any information overflow. No loss of data or broken communication.

Uses Powerful Text Editor

The C/TE is also unique in its ability to modify and manipulate data to just the format needed for the Personal Computer. This 'information transformation' is made possible by the C/TE's powerful and fast Text Editor. With the global FIND and REPLACE command, key syntax from one BASIC is automatically converted to BASIC for IBM.

In addition to FIND and REPLACE, the C/TE has more than 20 editor commands—each operated by a single key. The program also makes extensive use of all the PC's function keys.

Breezes through security and passwords

In its 'conversations' with other computers, The C/TE avoids problems with passwords. At the touch of a button, you can use its stored phone number memory to automatically dial up and log on to bulletin boards and networks. Such as Dow-Jones™, Networks Networks® II, CompuSe and The Source through Telenet℠ and Tymnet℠

Backed by the expertis EDS

This state-of-the-ar software comes to you EDS—a company that h earned a 20-year reputa for producing the best systems in the business Find out how the Communicator/Text Edit now available at your lo computer dealer for onl $180—can help you get most benefits from you IBM PC.

THE PROWRITER COMETH.

(And It Cometh On Like Gangbusters.)

Evolution.

It's inevitable. An eternal verity.

Just when you think you've got it knocked, and you're resting on your laurels, somebody comes along and makes a dinosaur out of you.

Witness what happened to the Centronics printer when the Epson MX-80 came along in 1981.

And now, witness what's happening to the MX-80 as the ProWriter cometh to be the foremost printer of the decade.

SPEED

MX-80: 80 cps, for 46 full lines per minute throughput.
PROWRITER: 120 cps, for 63 full lines per minute throughput.

GRAPHICS

MX-80: Block graphics standard, fine for things like bar graphs.
PROWRITER: High-resolution graphics features, fine for bar graphs, smooth curves, thin lines, intricate details, etc.

PRINTING

MX-80: Dot matrix business quality.
PROWRITER: Dot matrix correspondence quality, with incremental printing capability standard.

FEED

MX-80: Tractor feed standard; optional friction-feed kit for about $75 extra.
PROWRITER: Both tractor and friction feed standard.

INTERFACE

MX-80: Parallel interface standard; optional serial interface for about $75 extra.
PROWRITER: Available standard—either parallel interface or parallel/serial interface.

WARRANTY

MX-80: 90 days, from Epson.
PROWRITER: One full year, from Leading Edge.

PRICE

Heh, heh.

Marketed Exclusively by Leading Edge Products, Inc., 225 Turnpike Street, Canton, Massachusetts 02021. Call: toll-free 1-800-343-6833; or in Massachusetts call collect (617) 828-8150. Telex 951-624.

Tecmar

The TECMAR Expansion series is the fi
and only, complete line of expansion optio
available for the IBM Personal Computer

Now totaling over twenty-five separa
options, the TECMAR series gives you t
broadest range of expansion available
your IBM Personal Computer.

SYSTEM EXPANSION with a complete Expansion Chassis providing six additional system slots, a separate power supply and styling that complements the IBM system.

MEMORY EXPANSION in 64K 128K, 192K and 256K Byte increments of Dynamic RAM with parity. 32K Bytes of Static RAM, 32K Bytes of CMOS RAM with battery backup, or up to 128K Bytes of Read Only Memory.

PRACTICAL EXPANSION with two Serial ports and one Parallel port on a single board, or a Time of Day calendar with battery backup, a Voice Synthesizer with vocabulary in ROM and phoneme speech generation, even a BSR X10™ device controller for lights and appliances.

DISK EXPANSION through the addition of a five or ten megabyte Winchester disk. The disk options come enclosed in the TECMAR Expansion Chassis, providing additional expansion slots as well as Winchester disk storage. This approach assures you of unmatched system expandability for nearly any application.

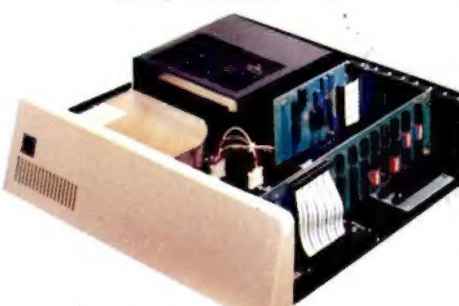

FUNCTIONAL EXPANSION is also available with TECMAR Speed Disk™ and print Spooling Software that give new functionality to memory options.

UNMATCHED EXPANSION for the serious IBM Personal Computer user through these and the many other TECMAR Expansion products available through participating COMPUTERLAND stores, and other fine computer retailers nationwide.

LABORATORY/INDUSTRIAL
PANSION through an IEEE
interface, the Lab Tender with an
A/D and D/A, or the Lab Maste
12 bit A/D and D/A, a two
Stepper Motor Controller, or the Par
Digital-In/Digital-Out B
Board™, Video Digitizat
with Video VanGogh™.

DEVELOPMENT EXPANSION u
an E+EEPROM programmer, Pr
zoa prototyping boards or a TECM
Extender card.
